## Report of Board of Public Utilities of Los Angeles on Grade Crossing Elimination, to the City Council— Review of the Situation.

We have been making an exhaustive study of the grade crossing elimination problem in this city and have made one report thereon covering the general situation and advised you that we would from time to time submit additional reports on the various branches of grade elimination required. One of those branches is, of course, viaducts across the industrial district upon which we now submit the results of investigations.

We note that your public works committee recognized the necessity for viaducts at Ninth street, Seventh street, Macy and Fourth streets. This is a step in advance, though in our opinion not far enough in advance, for we find such viaducts are required at First street and Main street in addition to those recommended by your committee.

Our investigations further show that these six viaducts would total 35,500 lineal feet, and could be built at a cost of \$4,260,000, and that in a piece of work of this magnitude a saving could be made if the city should furnish the steel, cement and broken stone buying in wholesale lots, furnishing cement from the Monolith plant and broken stone from the county crushing plants. Letting contract for erection and placing of the materials.

### Offers of Co-operation.

While this expenditure of more than \$4,000,000 looks like a heavy expenditure and a difficult matter to finance, we can get nowhere in the elimination of dangerous grade crossings unless we look the facts straight in the face and endeavor to overcome them; we have carefully sounded out the public both within the city and county, and find very much more definitely favorable opinions of this expenditure than we had expected. The County Supervisors have expressed a willingness to co-operate as have individuals and associations.

Assuming that the city and county bear equally their proportion of the expense, of say 50 per cent of the total, or 25 per cent each; then that the railroad should bear 50 per cent of the cost of such structure of the same type as that adopted, that would be required should each crossing be considered separately. These separate crossings then when summed up will yield a proportion of the whole equal to 14 1/2 per cent for the Southern Pacific Company, 13 1/2 per cent for the Santa Fe and 12 1/2 per cent for the Salt Lake Railway, which, with the city and county 50 per cent, leaves only 9 1/2 per cent that should be divided between the Los Angeles Railway for the use of the viaducts, say 4 1/2 per cent and the industrial district 3 and 4, 4 1/2 per cent for relief from this through traffic.

### Tabulated Figures.

Reducing these percentages to figures would give:

	Per Cent.	Estimated Expen- diture.
City as a whole .....	25	\$1,065,000
County as a whole .....	25	1,065,000
Los Angeles Railway .....	4 1/2	202,350
Industrial district 3 and 4 .....	4 1/2	202,350
Southern Pacific Company .....	14.5	617,700
Santa Fe .....	13.5	575,100
Salt Lake .....	12.5	532,500
Totals .....	100.5	\$4,260,000

We are submitting this information also to the County Supervisors and to other interested parties, and it might be advisable to call a general meeting of all parties at interest, or to appoint a general committee to devise ways and means.

We enclose you herewith maps and plans which we have prepared and our chief engineer's report on the

matter for further detail information and urge that you give this whole matter your careful consideration.

Respectfully submitted,  
BOARD OF PUBLIC UTILITIES.

A new irrigation project of promising dimensions will soon take shape if the Victor Valley residents and certain Senators and Congressmen can convince Secretary Lane and the Reclamation Bureau that the expenditure of \$7,000,000 to \$8,000,000 on the project will give ample returns to the valley to secure an appropriation for the preliminary work.

A report of the feasibility of the project has been made by Mr. J. B. Lippincott, Consulting Hydraulic Engineer of Los Angeles, and he gives it his unqualified approval.

### Supply and Cost.

To supply the water there are only two good storage reservoirs available that are at elevations great enough to serve the land under this project by gravity flow. The lands on the east side of the valley must be supplied from the Little Bear Valley reservoir, while that on the west will receive its supply from the Forks reservoir.

Following are estimates made by Mr. Lippincott, being a summary of costs of collection system, storage dams, outlet systems and distribution systems for the entire project:

Little Bear Valley reservoir .....	\$1,005,719
Little Bear Valley dam .....	200,564
Outlet system to west mesa .....	1,071,007
Cost of collection system Forks reservoir .....	366,785
Cost of Forks dam .....	387,692
Cost of outlet system to east mesa .....	326,352
Cost of distribution east mesa .....	418,200
Cost of distribution west mesa .....	\$48,595

Total cost of complete project, excluding value of construction work done by Arrowhead Reservoir and Power Company \$4,614,915  
Total gross area under project ..... 56,470 acres  
Cost per acre, excluding value of construction work on Arrowhead Reservoir and Power Company, also value of power that can be developed, \$81.75  
Mr. Lippincott's report as to the acreage to be benefited by the project includes only that which would receive direct irrigation. He has made no estimate of how much of the 500,000 acres would ultimately be irrigated by the subterranean flow of water.

When the irrigation works have been built it will be possible by the expenditure of an additional amount of \$313,000 to develop an output of 4,330 kilowatts for a period of six months each year, which if wholesaled at the rate of one-half cent per kilowatt hour would produce an annual net income of \$56,000, which could be applied to reduce the construction costs.

The paving controversy in Portland, Oregon, has served to bring out a lot of information about paving and road making embodied in the several reports submitted that ordinarily is not made available for the ordinary layman and taxpayer.

The Chamber of Commerce of the City of Portland are to be congratulated that their report committee covers all the different types of pavement being offered in this field.

They did not confine themselves to any one group of promoters, but listened to all, and investigated every kind of paving.

It is fortunate that the Chamber committee tackled this hard problem in a spirit of open-minded fairness, and have produced a report which is virtually a descriptive manual of all available types of paving for country roads.

# Paving Report of the Portland Chamber of Commerce.

Hon. C. C. Colt, President, Portland Chamber of Commerce.

Your committee, to whom was referred for report and recommendation the public contracts which will be let relative to the bond issue recently passed for good roads, begs to report as follows:

## Took Stenographic Notes.

Your committee first met on the 28th day of April and decided that it would be a wise procedure to institute a series of hearings at which stenographic notes be taken for the purpose of extending the same in transcript form for present and future reference. It was thought that in this way your committee would establish an orderly procedure for giving opportunity to any one who might desire to present themselves and state their qualifications and views on the general subject of highway construction.

## Visited Pavements.

These hearings were supplemented by an investigation of pavements and highways within the city limits of Portland and contiguous thereto, as well as visits to chemical laboratories where pavements are subjected to various tests to ascertain whether they conform to established standards.

In this way your committee feels that it has approached and investigated the subject in as comprehensive a manner as the limited time placed at its disposal would permit. Attached to this report and made a part hereof is a copy of the transcript of the testimony taken by your committee.

## No Need Travel Far.

In its personal inspection of pavements of the city of Portland and vicinity, your committee arrived at the conclusion that it was not necessary to visit any other community to ascertain the behavior of all forms of hard surface pavements under traffic conditions, for your committee was able to find in Portland and its vicinity all of the standard hard surface types of pavement being actually subjected to daily traffic and weather conditions.

There is this much to say with reference to the construction of permanent country roads as distinguished from city pavements—in country road construction opposite lines of travel are confined to a relatively small area of surface. This is due to the fact that country road construction usually varies in width from 12 to 30 feet, as far as hard surfacing is concerned, while in city pavements opposite lines of travel are spread over a greater area, the width of hard surfaced streets being generally wider than country highways.

## Problem Differs from City.

The result of this is that there is a concentration of the lines of travel upon a country highway that does not exist in city streets.

The next difference between country

highways and city streets is this—that upon the question of repair the problem is a different one with reference to the country road than to the city street.

## Long Way from Plant.

A country road is apt to be, on an average, a greater distance from the base of the supply of repairing material than is a city street. The result of this is that there is an increase of the unit cost of repair upon a country road over that of the city pavement.

## Traffic Interruptions.

Another distinction is this—that in the repair of the hard surfaced city street, during the time of repair, traffic may be diverted to parallel streets within a short distance of the street to be repaired, which can, without any great inconvenience, reach the almost identical territory which is served by the street under repair, while on the country highway the interruption to traffic for the purpose of the repair is apt to inconvenience a territory that is not otherwise served.

## Takes Longer to Clean.

Another important factor in a comparative sense is the facility and opportunity for cleaning highways and city streets. With reference to the cleansing of the city street, cities usually maintain efficient cleaning departments with comparatively low cost, owing to a sufficient number of hard surfaced pavements, allowing cleaning to be done upon both the outgoing and returning trip.

Ordinarily in the cleaning of a country road there is a large loss of time for the cleaning apparatus in returning from the end of the cleaning trip to the base of operation. This may be somewhat mitigated if country highways are constructed along the lines of complete out-going and returning circulation. However, it is not reasonable to expect that as efficient a country cleaning force can be maintained as is maintained in the city. It is neither desirable or necessary if the type of pavement is chosen for country highways whose life is not vitally dependent upon its being kept clean.

## Shows Basis Comparison.

The effect of the above distinctions is that with reference to county highways a city pavement, particularly in regard to its life and cost of maintenance, is not an absolute criterion for a country road type. It is a criterion, however, for the purpose of ascertaining the behavior of various types of pavement under weather and traffic conditions.

There is another distinction which might be made between a city pavement and a country road, and that is this—generally, adjacent to a roadway devoted to general vehicle traffic is a sidewalk for pedestrians, which is separated from the roadway area by a substantial curb, while the country roads have made a practice, from the

standpoint of economy, of having the hard surface area of less width than the right of way of the road.

In such construction, ordinarily the roadway is not divided by a substantial curb, but there is a construction, a shoulder general, of macadam, which furnishes a width of road on which traffic may pass or turn. The junction of the hard surfaced part of the road with the macadam next to it introduces a road problem that is not generally met in the city street.

## Not Cut Up So Often.

On the other hand, the most trying problems of the city pavement are not often met with in country road construction; they are the continual cutting in of the pavement of the city street for the purpose of getting at pipes and wires and the establishing in city streets of auxiliary furniture, generally in the way of catch basins and man-holes; and the laying of hard surfaced pavement adjacent to street railroad tracks.

It has been found that many city pavements that were otherwise good, have failed owing to these complications; therefore, the fact that a city pavement does not fail otherwise than above specified would seem to commend it for use upon country roads.

## Discusses Legal Status.

At this point it might be well to make reference to the principal sources of statutory law under which Multnomah County must look for the construction of its contemplated highway system under the \$1,250,000 bond issue recently authorized:

The principal statute on the subject is Chapter 103 of the Laws of 1913, found on page 170 et seq of the General laws of Oregon for 1913. Under this law, after the fourth year until the maturity of the bonds, the law requires that a specified amount be set aside, the object being to retire the bonds serially at the end of 15 years the county will have retired its indebtedness created for road construction. It therefore seems advisable that the kind of pavement be selected which, with a reasonable amount expended for maintenance, will insure a condition of the road as good at the time the bonds are retired as it was at the date of construction.

## Minimum, 15 Years Life.

In other words, it would be extremely poor public finance to have the road system in such a state of dis-repair prior to the time all bonds are retired, as to be, for all practical purposes, useless. Therefore, 15 years should be required as the minimum life of any road system constructed under the 15 year bond issue.

Returning again to Chapter 103 of the General Laws of 1913, your committee found that in a good many instances the law is somewhat indefinite, but as this developed points of construction applied to matters that occurred before the authorization of the bond issue by election, and are of an immaterial nature, your committee refrains from giving consideration to most of them.

At this stage of the road development, however, there are two sections of the law that should be discussed. They are Sections 13 and 24. Section 13 is as follows:

"All monies raised under the provisions of act shall be used in constructing permanent public roads in that county, which roads shall be constructed by the county court under its exclusive jurisdiction and such expert assistance as they may employ."

Section 24—"The County Court shall prepare plans and specifications of said road and shall invite bids in conformity to such plans and specifications, and may also receive and consider any and all bids in conformity to any plans and specifications furnished by any individual, firm or corporation offering to construct such roads. The County Court shall have power to reject any and all bids."

In legal parlance it may be stated that these two sections of the road law become the subject of construction. This is true because there is a possibility of a conflict between the provisions of one, when considered with reference to the provisions of the other. A general rule of construction of statutory law requires that statutes, or sections of the same statute that seem to be in conflict should be reconciled if possible. That is to say that in this particular case, if the two sections are subject to a construction that makes one in conflict with the other, and also a construction that will reconcile one with the other, the rule is that the one that reconciles them is the governing rule of construction.

The possible conflict between Section 13 and 24 is this—that if the sense of Section 13 be taken standing alone it would seem to indicate that the County Court is given authority under the law to purchase material and employ labor and expert assistance for the construction of county roads. While if Section 24 is taken by itself, it would seem to indicate that the authority of the County Court is limited to the preparation of plans and specifications and therefore must receive bids for the construction of roads by contractors. However, if the general rule of law be followed, which your committee thinks of necessity must be the construction that could be placed upon these two sections is this—that in the first instance the County Court must cause plans and specifications to be prepared.

In the preparation of this work, under Section 13, it would have authority to employ expert assistance; that the plans and specifications must be published and bids received. The right is reserved, however, to the County Court to reject any and all bids. If it accepts a bid, then, under Section 13, it would have authority to employ such expert assistance in the way of inspection and otherwise as would insure a proper conformity by the contractor of his contract.

But Section 24 must be given consideration over and above its possible construction with Section 13, and that is this—under Section 24 the County Court must cause to be under the necessity to make its award to the lowest responsible bidder bidding on the same type of pavement. Authority under this section is also given to the County Court to reject all bids. The law however—that is, Chapter 103 is silent as to what procedure the County Court may follow in case all bids are rejected. The law seems neither to contemplate that the County Court may re-advertise for bids or to proceed to construct the road by the purchase of material and the employment of labor.

This being so, your committee is of the opinion that the law with reference to this subject must be found elsewhere, possibly among the general statutes of the state with reference to the power and jurisdiction of the County Court to construct roads. Further, the statute being silent as to what procedure may be followed in case all bids are rejected, your committee is of the opinion that Section 25 of Chapter 103 would not act as a repealing clause against any general road statute which dealt with the special matter of the power of the county with reference to roads in a

case where all bids were rejected. Your committee has not had time to investigate the general road statutes with reference to this subject, but in its investigations it was brought out by Mr. E. L. Covert, an expert lawyer on the subject of road law, that in his opinion in many particulars the general road law and other statutes should be construed as supplementing Chapter 103 of the laws of 1913.

#### Build by Day Labor.

A proposition has been brought to the attention of your committee by Messrs. McMullen and Dulin that they stand ready to enter into a contract with the county by which the county is to construct the contemplated road system by the purchase of material and the employment of labor.

#### Labor Council Supports Plan.

These gentlemen have submitted a proposition to the county under the date of April 21st, 1915, supplemented by a further communication, copies of which are hereto attached and for better reference are marked Exhibit A.

Their plan is that the county establish a paving plant at Kelly Butte and control the mixing and laying of the pavement, the county to pay all expenses of running the plant and labor incident to the mixing and laying, these gentlemen to act as expert assistants to the county for which they would receive a compensation of \$200 per month.

#### Claim 60c Cost

It is their claim that they can lay types of bituminous pavement at a cost to the county of less than 60 cents per square yard, not taking into consideration the cost of royalty if the county decides to hard surface the system of county roads or any portion thereof by using a patent pavement. That, in addition to their compensation of \$200 per month each for their services, they receive a bonus equal to thirty-three and a third (33-1/3) per cent of the amount saved by laying such pavement at less than 60 cents per yard; their proposition providing that none of this bonus shall be paid to them at the completion of the pavement but shall remain in trust for five years.

#### Is Ingenious Proposal

If, during that period, any defects appear in the pavement as laid there shall be deducted from the bonus an amount sufficient to defray all expenses of repairing pavement, and only the amount remaining in the bonus after repairs have been made shall be paid to them.

This presents an interesting proposition.

#### Are Chemical Experts.

Your committee held conference with Messrs. McMullen and Dulin and visited the paving testing laboratory of the city of Portland where these gentlemen are at the present time employed.

#### Honest and Sincere.

All the members of your committee became profoundly impressed with the knowledge that these gentlemen possess with reference to the physical and chemical properties of pavements.

Your committee was further impressed with the honesty and sincerity of these gentlemen.

Incidentally, throughout these hearings paving contractors were interrogated with reference to the cost items

presented in the communications of Messrs. McMullen and Dulin.

#### Figures Seem Too Low.

Where these interrogations were made the answers were that the figures of Messrs. McMullen and Dulin were too low; that they had failed to take into consideration certain overhead and depreciation expenses.

Undoubtedly, in a measure, this criticism is correct, but our investigations also led us to the conclusion that certain items which contractors habitually include as cost items, while legitimate in the general paving business, would not and should not be considered if the county were to employ labor, purchase material and directly construct the road system.

These items principally concern themselves with what might generally be called items of sales expense. A contractor or a paving company must of necessity be brought in competition with other types of pavement, and in order to get the business an efficient and intelligent sales department must be maintained.

This is usually a high salaried department, because it requires exceedingly clever men—men convincing, persuasive, honest and possessing a profound knowledge of the details of the paving business. This, we say, would not apply to the county after it once settles the type of pavement that it desires to construct. There is an element, however, that enters into the cost items of construction possibly not contemplated by Messrs. McMullen and Dulin, and that is this:

That the success of most types of pavement depends upon the skill and accuracy in preparing the preparation and laying it upon the roadbed.

#### Cost of Maintaining Organization.

That in order to command the services of the best skill in this respect it is necessary to carry on the payrolls of whoever is constructing a pavement these skilled employees over a period of time when seasonal conditions prevent paving construction.

It goes without saying, of course, that if the county were to enter into general hard surface road construction it would eliminate contractors' profits in road construction. The county, however, as well as any contractor, would have to meet royalty payments if it decided to use a patent pavement, assuming, of course, that the patent to the pavement is sustainable.

#### Danger Political Interference.

As against this item of the contractor's profit, however, is the danger of political interference in road construction by the county. Your committee does not wish to be understood to imply or intimate that there is political influence existing at the present time with reference to the road system of the county as administered by the Board of County Commissioners. In fact, your committee knows of no such influence, and does not wish to infer that any exists. But, it does say that this danger is one that has arisen where construction is done directly by public authority, and therefore, the danger might confront us in the future.

#### Not Free from Doubt.

It is the understanding of your com-

mittee that the Board of County Commissioners has rejected the proposition of Messrs. McMullen and Dulin. Your committee also desires to state that their proposition is not free from doubt as a legal question. Your committee will not and does not say that their proposition could be accepted by the county as a matter of law or that it could not be accepted as a matter of law.

#### Portable Plant Suggested.

Objection has been urged to their proposition on the ground that a \$50,000 plant at Kelly Butte could not furnish the facility for material for the contemplated road construction on two grounds—first, that the material could not be turned out fast enough; second, that in order to economically construct all the portions of the road system portable plants must be established to furnish a near base of supply.

To this Messrs. McMullen and Dulin answer that at a very low cost the county could establish the portable plants suggested. It is also urged that, without an undue expenditure of money for equipment, the county would be unable to hard surface the road system contemplated within a reasonable length of time; while under the contract system, if work were let to a responsible contractor, he could bring to bear upon the work sufficient equipment to rapidly perform the work, due to the fact that his plant has already been assembled in his contracting business and after the completion of the contract he would have reasonable prospect of employing his plant in his general business.

#### County Plant Idle.

While in the plant of the county, unless the county were to continue in blocks of work equal to or nearly equal to the present block of hard surface construction—in other words, inasmuch as probably during the first five years of the pavement the repairs would be slight, there would be little use for large equipment; much of the equipment would be idle unless the electors of the county authorized large future bond issues, and it is undoubtedly true, considering the problematical utility of a large county equipment, that the county would have to carry a disproportionate depreciation account on its plants, both fixed and portable.

There is some tendency for cities and counties to maintain their own paving plants. It may be said, however, that this question is one on which, as a policy, there is a considerable divergence of opinion. In a measure Multnomah County now maintains such a system with reference to the macadamizing of the present county roads, and we understand that Pierce County, Wash., partially maintains such a system, or has done so while constructing its cement roads, in order that its roads may be supplied with properly selected and washed sand, gravel and broken stone.

#### Question of Public Policy

In conclusion, on this point your committee is of the opinion that the items of road cost do not lie entirely in Messrs. McMullen's and Dulin's figures, nor do they lie entirely with the cost items of contractors. They seem to repose somewhere as a middle

ground between the two, and your committee feels that the general membership of the Chamber or its Board of Directors is fully capable of deciding for itself whether the work shall be done under the contract system or under direct construction by the county for, after all, it is a question of policy upon which public and individual opinion is divided.

#### What Are Fundamental Requirements?

Your committee now comes to the point in its report in which it approaches the question of desirability of pavement.

In order that pavements may be classified, an outline of just what requirements a pavement should conform to seems desirable. After this has been ascertained, the prevailing types of hard surface pavements should be subjected to an analysis in order that it may be ascertained which of the pavements contains most of the elements of desirability. The best discussion of the subject under present consideration that your committee has been able to find appears in "Byrne on Highway Construction," the fifth and latest edition, which was issued in 1913. We have found the discussion of this author so good that we must be pardoned for quoting rather heavily from his opinions. On page 1 he says:

#### These Qualities Essential.

The qualities essential to a good pavement may be stated as follows:

- No. 1—It should be impervious.
- No. 2—It should afford good foothold for horses.
- No. 3—It should be hard and durable, so as to resist wear and disintegration.
- No. 4—It should be adapted to every grade.
- No. 5—It should suit every class of traffic.
- No. 6—It should offer the minimum resistance to traffic.
- No. 7—It should be noiseless.
- No. 8—It should yield neither dust nor mud.
- No. 9—It should be easily cleaned.
- No. 10—It should be cheap.

Continuing, he says:

Of the above requirements Nos. 2, 4, 5 and 6 affect the traffic and determine the cost of haulage by the limitation of loads, speed, wear and tear of horses and vehicles.

If the surface is rough or the foothold had the weight of the load a horse can draw is decreased, thus necessitating the making of more trips or the employment of more horses and vehicles to move a given weight.

A defective surface necessitates a reduction in the speed of movement and consequent loss of time.

It measures the wear on horses, thus decreasing their life service and lessens the value of their current service.

It also increases the cost of maintaining vehicles and harness.

Nos. 7, 8 and 9 affect the occupiers of the adjacent premises who suffer from the effect of dust and noise; and second, the owners of said premises whose incomes from rents is diminished when these disadvantages exist. Nos. 2 and 10 affect the taxpayers alone; first as to length of time during which the covering remains serviceable and second as to the amount of annual repairs.

No. 1 affects the adjacent occupiers principally on hygienic grounds.

Nos. 7 and 8 affect both traffic and occupier.

#### Motors New Problem.

With reference to present traffic conditions and their application to county roads, the above essential qualifications of Byrne need modification. At the present time the large volume of traffic is moved by motor vehicles

and this introduces a new traffic problem of its own, and minimizes the traffic problems of horse drawn vehicles.

#### Must Not Ignore Horses.

But, while this is so, horse traffic must not and cannot be ignored on county roads. The quality of a pavement being noiseless is not as necessary on a county road as on a city street, and its ease of being cleaned, except where dirt affects the life of the pavement, is not so important a country as a city problem, although it cannot be entirely ignored in country construction. The element of cost is a more vital problem in the country road than in the city street, owing to the fact that in city streets the original cost of construction is usually charged to abutting property, and the improvement by hard surfacing an adjacent street represents a greater percentage of increased value to abutting property.

#### Elements of Cost Vital.

There is a tendency for city property to sell more rapidly in small lots than there is for country property to so sell, and the street assessment represents a smaller element measured against property value in the city than the country. The result is that the city owner can more readily transfer the cost of the hard surfaced pavement assessed to abutting property while the country land owner cannot.

This applies more particularly where a country road is constructed under an assessment against abutting property; but, nevertheless, even where the county constructs directly it has an indirect bearing, inasmuch as the general tax is a more distasteful tax than an assessment for special benefits. Therefore, country road construction consistent with durability should be a cheaper pavement than a city pavement.

#### Compares Cost of Hauling.

On page 3 of the above cited authority is given a table which sets out the cost of transportation by horse and wagons per ton mile on different road coverings. The table is as follows:

Transportation on iron rails...	1.25c
On asphalt .....	2.70c
On stone paving, dry and in good order .....	5.33c
On stone paving, dry and in ordinary condition .....	6.12c
On stone paving, covered with mud .....	21.30c
On earth, dry and hard .....	18.00c
On earth, full of ruts and mud .....	39.00c
On loose gravel .....	51.60c
On gravel, compact .....	12.80c
On plank in good condition .....	8.80c
On sand, wet .....	32.60c
On sand, dry .....	61.00c

On page 4 the author says: The problem involved in the selection of the most suitable pavement is composed of the following factors—first, adaptability; second, desirability; third, serviceability; fourth, durability; fifth, cost.

#### Must Fit Local Use.

**Adaptability:** Continuing the author says:

The best pavement for any given roadway will depend altogether on local circumstances. Pavements must be adapted to the class of traffic that will use them. The pavement suitable for a road through an agricultural district will not be suitable for the streets of a manufacturing center, nor will the covering suitable for heavy traffic be suitable for a pleasure drive or residential district.

### Must Satisfy Users.

**Desirability:** With reference to this, he says:

The desirability of a pavement is its possession of qualities which make it satisfactory to the people using and seeking it. Between two pavements alike in cost and in durability, people will have preferences arising from the condition of their health, personal prejudices and various other intangible influences, causing them to select one rather than the other.

The economic desirability of pavements is governed by the amount of movement over them, and is measured by the number of horses or pounds of tractive force required to move a given weight, usually one ton, over them.

### Compares Horse Effort.

The author then gives a table for level roads, surface of which is formed of different materials, in which he takes asphalt as the standard of excellence. By this table he shows the number of horses required to move one ton over these different pavements. The table is as follows:

FIVE JULY 1	HOYT
Asphalt .....	1.00
Stone blocks dry and in good condition .....	1.50 to 2.00
Stone blocks in fair condition .....	2.00 to 2.50
Stone blocks covered with mud .....	2.00 to 2.70
Macadam, dry and in good condition .....	2.50 to 3.00
Macadam, in a wet state .....	3.50
Macadam, in fair order .....	4.50
Macadam, covered with mud .....	5.50
Macadam, with stones loose .....	5.00 to 8.20

### Smoothness Is Economy.

From the above table the great economy of smoothness becomes at once apparent. But it is evident that, as in all lines of transportation, the greatest resistance regulates the load over the rest of the route, unless there be auxiliary power; so the continuity of the surface should remain unbroken by any other grade of material which would increase the resistance.

### Expense Caused To Traffic

The author discusses serviceability as follows:

The serviceability of a pavement is its quality of fitness for use. This quality is measured by the expense caused to the traffic using it. \* \* \* No statistics are available from which to deduct the actual cost of wear and tear. It has been estimated as follows:

	Per Mile of Travel.
On cobblestones .....	.5c
Belgian blocks .....	.4c
Wood .....	2.5c
Broken stone in first class condition .....	1.2c
Asphalt .....	1.3c

### Foothold for Horses.

The serviceability of any pavement depends in a great measure upon the amount of foothold afforded by the surface provided, however, that its surface be not so rough as to absorb too large a percentage of the tractive energy required to move a given load over it. Cobblestones afford excellent foothold but the resistance to motion requires the expenditure of about 250 pounds of tractive energy to move a load of one ton. Asphalt affords the least foothold but the tractive force required to overcome the resistance it offers to motion is only about 30 pounds per ton.

### When Horses Fall.

**Comparative safety.** The comparison of pavements in this respect is the distance traveled before a horse falls. The material affording the best foothold for horses are as follows, stated in the order of their merit.

1. Earth dry and compact.
2. Gravel.
3. Macadam.
4. Wood.
5. Sandstone and brick.
6. Asphalt.
7. Granite blocks.

\*Note—Committee's explanation, not given by author, this would include Belgian blocks.

### How Far Horse Will Travel.

The author then gives a table showing how far a horse will travel over the various pavements, which was worked out by Capt. F. B. Greene, and it is as follows:

Asphalt .....	533 miles
Granite .....	413 miles
Wood .....	272 miles

### Haywood Favors Wood.

For the same purpose observations were made in London by Col. Haywood. He compared wood, asphalt and stone under conditions as nearly identical as possible. The observation was for fifty days, and it showed that before meeting with an accident a horse would travel a greater distance on wood than he could either on asphalt or stone. Col. Haywood's table is as follows:

### Weather Affects Horse Safety.

#### Dry Weather Distances.

Wood .....	646 miles
Asphalt .....	223 miles
Granite .....	18 miles

#### Damp Weather Distances.

Wood .....	193 miles
Asphalt .....	125 miles
Granite .....	166 miles

#### Thoroughly Wet Weather.

Wood .....	132 miles
Asphalt .....	192 miles
Granite .....	537 miles

Under another mode of observation the distance may be given as follows:

Wood .....	446 miles
Asphalt .....	191 miles
Granite .....	132 miles

### Compares Slipperiness.

It thus appears, from the above tables, that asphalt is the most slippery when damp and safest when perfectly dry; granite slippery when dry and safest when wet; wood most slippery when damp, safest when dry.

### Stone Blocks Safest.

When climatic conditions of Western Oregon are considered, granite or Belgian blocks being slippery when perfectly dry but safe when perfectly wet, stone blocks must be considered the safest pavement, and that as between asphalt and wood, wood is the safest. Granite seems to be least safe when clean and wood and asphalt most safe when clean. Slight rains make asphalt and wood more slippery than they do at other times. Asphalt becomes slippery almost at once after a slight rain, while wood requires more rain before it reaches its worst condition, but slipperiness lasts longer on wood.

It will be noted in the above that the tables of Greene and Haywood differ, Greene's tables having been taken in the eastern cities of America and Haywood's with reference to the London pavements. Probably climatic conditions explain the difference in the two tables.

### How to Overcome.

There is also another explanation for the behaviour of asphalt, and that is that asphalt as laid in Europe is a more slippery pavement, owing to the methods of its construction, than the asphalt laid in the United States. The authorities seem to agree that slipperiness can be cured in asphalt by the spreading of sand, and on wood block pavements by the spreading of pea gravel and the rolling of the same over the surface by a steam roller.

### Difference in Falls.

On page 21 of his work on Highway Construction, Byrne discusses the character of falls on various pavements as follows:

The commonest falls on wood are falls on the knees, which are less likely to injure the horses and are less inconvenient to traffic than other falls. Falls on haunches are more numerous on asphalt than on wood. Complete falls are fewest on wood and most on granite. The falls on asphalt are generally due to sudden pulling up and short turning; those on granite to excessive width of the blocks, which fail to support proper foothold.

### Makes Difference in Durability.

On page 10 the author discusses the durability of the pavement and says:

The durability of the pavement is its quality which relates to the length of time during which it is serviceable, and not the length of time it has been down. The only measure of the durability of a pavement is the amount of traffic tonnage it will bear before it becomes so worn that the cost of replacing it is less than the expense incurred by its use.

### Length of Pavement Life.

On page 11 he says:

The life or durability of the different pavements under like conditions of traffic and maintenance may be taken as follows:

Granite blocks .....	12 to 30 years
Sandstone .....	6 to 12 years
Asphalt .....	10 to 14 years
Wood .....	3 to 5 years
Limestone .....	1 to 3 years
Brick .....	5 to 12 years

With reference to this table it may be stated that no reference is made to Belgian blocks. They should be properly classified. In our judgment, with granite blocks. No reference is made to asphaltic concrete, which, in our judgment, should occupy a position between Belgian blocks and asphalt, possessing a higher degree of merit than asphalt. In the reference to the classification of wood the author fails to state whether the wood has been preserved by creosote or otherwise. We are inclined to the opinion that, if wood blocks are properly treated with a preservative, they would take a higher classification than that given in the table. The author also further fails to state whether the paving bricks were vitrified. We are inclined to the opinion that vitrified bricks should take a better classification than given by the author.

### Why Cost Varies.

Continuing on page 13, the author says:

The cost of construction is largely controlled by the locality of the place, its proximity to the particular material used and character of the foundation.

On page 11 he says:

The first cost of pavement is like any other permanent investment, measurable for purposes of comparison by the amount of annual interest on the sum expended.

### Disperses Popular Error.

**Maintenance.** Under this head must be included all outlays for repairs and renewals which are made from time to time when the pavement is new and at its best to a time subsequent, when by any treatment it is again put in equally good condition.

**The prevailing opinion** that no pavement is a good one unless, when once laid, it will take care of itself is erroneous; there is no such pavement.

**Attention!** Says Committee.

At this point your committee wants, with great emphasis, call attention to the above statement. Your committee is of the opinion that the greatest problem in permanent road

construction is the wearing surface. Your committee is of the opinion that the wearing surface of any road has a comparatively short life. This being so, your committee regards the real vital problem in road construction as the maintenance problem. As verification of this point, your committee will continue the quotation of Byrne. He says:

**Maintenance the Vital Problem.**

All pavements are being constantly worn by traffic and the action of the atmosphere, and if any defects which appear are not quickly repaired they soon become unsatisfactory and are destroyed. To keep them in repair incessant attention is necessary and is consistent with economy. Yet claims are made that particular pavements cost little or nothing for repairs, simply because repairs are not made, while anyone can see the need of them. Byrne gives a table showing the comparative cost of various pavements in Liverpool, including interest on first cost, sinking fund, maintenance and cleaning, when reduced to a uniform traffic of 100,000 tons per annum for each yard in width of the carriage way. It follows at top of next page:

**SHOWS COST PER YEAR FOR LAST FIFTY YEARS.**

**Byrne's Table Includes Interest, Repairs, Maintenance, Replacement and All Other Expense, Based on Experience of Half a Century in United States.**

	Granite Blocks	Asphalt	Wood	Brick
Foundation .....	\$ 1.00	\$ 1.00	\$ 1.00	\$ 1.00
Materials, labor, etc. ....	3.25	2.50	1.40	1.80
Total first cost .....	\$ 4.25	\$ 3.50	\$ 2.40	\$ 2.80
Interest on material, and sinking fund, 50 years, 4% .....	26.00	20.00	11.20	14.40
Interest on foundation .....	2.00	2.00	2.00	2.00
Maintenance 50 years .....	2.50	4.50	7.50	2.50
Cleaning 50 years .....	5.00	1.00	6.00	2.50
Three renewals of surface at \$3.25 .....	9.75	.....	.....	.....
Five renewals at \$2.50 .....	.....	12.50	.....	.....
Twelve renewals at \$1.40 .....	.....	.....	16.80	.....
Eight renewals at \$1.80 .....	.....	.....	.....	14.40
Consequential damages .....	10.00	1.00	1.50	2.00
Cost of service estimated .....	30.00	10.00	20.00	15.00
Total .....	\$89.50	\$54.50	\$67.40	\$55.60
Less value of foundation .....	1.00	1.00	1.00	1.00
Less value of old material .....	\$88.50	\$53.50	\$66.40	\$54.60
.....	1.00	.10	.00	.25
.....	\$87.50	\$53.40	\$66.40	\$54.35

Which, divided by 50, that being the life of the pavement in years, gives the annual gross cost per square yard per annum as follows:

Granite blocks .....	\$1.75
Asphalt .....	1.068
Wood .....	1.33
Brick .....	1.087

Per sq. yd. per annum  
Block pavements of hard granite .. 23c  
Block pavements of soft granite .. 23c  
Bituminous concrete .. 47c  
Wood pavement .. 53c  
Macadam on pitch foundation .. 71c  
When the traffic is taken at 40,000 tons per annum for each yard, the showing is as follows:

Bituminous concrete .. 27c  
Wood .. 41c  
Macadam .. 47c  
Asphalt is not given in this table, neither are Belgian blocks or vitrified brick, and it not stated whether the wood was treated with a preservative. Byrne places asphalt between wood and bituminous concrete, making it better than wood but inferior to bituminous concrete.

On page 209 is Byrne's table showing the approximate comparative gross cost of various pavements in the United States for a period of 50 years, the pavement at the end of that period to be in as good condition as when first

laid, cost being per square yard.

**Classifies "Asphaltic Concrete."**

It will be noted that in this table asphaltic concrete is not given. Neither are Belgian blocks. In the opinion of your committee asphaltic concrete should take as good, or better, a classification as does sheet asphalt, and Belgian blocks will take the classification of granite blocks. The table fails to state whether the bricks are vitrified. If they are, they should take a classification more nearly approaching granite blocks. The table fails to state whether the wood has been subjected to a preservative.

**Treating Wood Blocks.**

We thing that treated wood blocks should take a better classification than that which appears in the table. It will be noted that the items of consequential damages and cost of service are particularly severe on granite blocks and brick and are comparatively light on asphalt and wood. These items are of an intangible nature and any items of expenditure arising under them are more properly chargeable to

3d. ....	Wood
4th. ....	Vitrified brick
5th. ....	Granite blocks
.....	Hygienic Fitness.
1st. ....	Asphalt
2d. ....	Asphaltic concrete
3d. ....	Brick
4th. ....	Granite blocks
5th. ....	Wood

**Service on Grades.**

1st. ....	Granite or Belgian block
2d. ....	Brick
3d. ....	Wood
4th. ....	Asphaltic concrete
5th. ....	Asphalt
.....	Gross Annual Cost.
1st. ....	Asphaltic concrete
2d. ....	Asphalt
3d. ....	Brick
4th. ....	Wood
5th. ....	Granite or Belgian block

However, as before explained, brick and Belgian block if all intangible elements are eliminated should take a better classification.

**Facility for Cleaning.**

1st. ....	Asphalt
2d. ....	Asphaltic concrete
3d. ....	Brick
4th. ....	Granite or Belgian block
5th. ....	Wood

In the opinion of your committee this is not so important on a country road as on a city street.

**Agencies of Destruction.**

Under this head, on page 24, Byrne says:

The agencies causing destruction of paving materials may be classified as mechanical, chemical and physical and organic. It is estimated that the mechanical agencies cause 80 per cent of the destruction and the others 20 per cent. The mechanical and physical agencies exert the greatest action on the surface, while the chemical affects both the surface and the sub-stratum.

The mechanical agencies due to traffic are (a) Impact produced by the action of horses feet. (b) The percussive and abrading action of moving wheels. (c) The crushing due to the weight of the load on the wheels.

The mechanical agencies are generally applied in their most destructive forms, namely, in the presence of water, producing abrasion in the presence of a solvent, in which condition their destroying effect is most energetic.

The chemical agencies are water and the various acids present in the atmosphere, and the humus acids derived from the decomposition of animal and vegetable matter. The action of the chemical agencies is very slow, and their effect may be ignored except in the case of rock already in a state of decomposition or containing readily soluble mineral matter. The rocks that are most susceptible to the solvent action of water impregnated with acids are the limestone, calcareous sandstone and granite containing feldspar. The physical agencies are:

- (a) Air in the form of wind.
- (b) Heat due to changes of atmosphere, and
- (c) Ice.

Air acts mechanically to remove the loose material and transport it in the form of dust. \* \* \* Heat, through changes of atmosphere, causes expansions and contractions which produce a slight movement among the component particles of material, thus breaking their cohesion and leaving them more susceptible to the destroying effect of the other agents. Ice water penetrates into all the materials employed for paving purposes, and at the freezing temperature it acts mechanically to disrupt the material by the pressure exerted while passing from the liquid to the solid state.

Organic agencies. The organic agencies are vegetable or fungus growths that thrive in damp shady places.

Continuing on page 26, he says:

The properties which the material used for paving must possess in order to resist the destroying agencies are physical and chemical. The physical properties comprise resistance to crushing, impact and abrasion. The chemical properties consist in the ability

the users of a highway than to a county laying a system of permanent roads.

**Charge to Users, Not County.**

They are elements which your committee thinks in considering the sole question of ultimate cost to the county in laying a pavement, should be eliminated and their elimination would materially alter the classification given to each pavement. The table is of value and interest, however, and all elements entering into the life of the pavement are to be taken into consideration. In conclusion, the rank of pavements as to all of the elements above discussed may be classified as follows:

.....	Durability.
1st. ....	Vitrified brick
2d. ....	Granite
3d. ....	Asphaltic concrete
4th. ....	Asphalt and wood
.....	Serviceability.
1st. ....	Asphaltic concrete
2d. ....	Asphalt

ity to resist, for a considerable length of time, the disintegrating action of the several physical, chemical and organic agencies due to weather and present on the surface of the roadway. This quality is generally designated by the term durability.

The ability to resist crushing varies with the character of material and frequently varies to a considerable extent in the same material. In the plastic or viscous materials it depends upon the strength of the cementing medium or adhesive power of the matrix; in stones, brick, etc., it depends upon the cohesion and interlocking of the component particles.

Since the resistance to crushing possessed by all the material commonly regarded as suitable for paving is in excess of that actually required in use, this property is of secondary importance in determining the enduring quality of material, especially when it is to be placed upon a good foundation. With a weak foundation high resistance to crushing and cross breaking is essential.

**Resistance to Impact and Abrasion.** This property depends upon hardness and toughness of the material. These two properties are closely related, are not always coincident; some materials, although extremely hard are yet so brittle that they crush easily under pressure. Materials possessing extreme hardness polish readily under friction and produce slippery and dangerous road surface.

Hardness is generally defined as that property of a solid which renders it difficult to displace its parts among themselves. When applied to the materials used for paving it signifies the resistance offered by the material to wear by abrasion under the action of wheels.

Toughness, as applied to paving material, may be defined as that property which enables it to resist fracture under the blows produced by traffic.

Durability depends upon the hardness, toughness and chemical stability of the material. Physical defects and abrasion generally cause the destruction of the material long before it is injured by chemical changes.

#### **Deducts Important Conclusions.**

From the above the following conclusions may be deduced:

That any pavement that is weak in resisting mechanical and physical destruction is not a desirable pavement.

Any pavement that is durable against destructive agencies which are mechanical and physical but is weak in its resistance to chemical agencies is the most desirable pavement, provided that its chemical resistance exceeds in life the period of time that the best pavement, showing failure from mechanical and physical causes, possesses.

#### **Chemical Action Main Trouble.**

As a general rule it may be stated that any pavement which is protected against mechanical destruction must be one which depends for its resistance to mechanical destruction upon chemical affinity employed to resist mechanical destruction generally takes the form of a cement principle and is often in those pavements having a sheet surface.

#### **Advantage of Sheet Surface.**

The advantage of the sheet surface, as long as it maintains its chemical vitality, is that traffic in borne upon its surface in the form of compression rather than in the form of tension or shear.

However, sheet pavements must be distinguished in their resistance to tension and shear, with reference to the manner in which the blows and shocks of traffic are received by the sheet pavement.

With reference to this principle, sheet pavements are of two kinds:

(1) Those that resist blows and shocks of traffic under the principle of resiliency, and

(2) Those which receive the same under the principle of rigidity.

In those receiving shocks by resiliency there is very little abrasion, while those which receive them rigidly are subject to abrasions. The principle of resiliency is found in sheet asphalt pavements and in asphaltic concrete. The principle has been likened to successive poundings or blows upon lead; subjected to such force the lead shows but slight abrasion, but it thins out.

This is not the entire principle of the sheet asphalt or the asphaltic concrete pavements, however, inasmuch as after blows lead retains the new position that it assumed under the blows, while sheet asphalt and asphaltic concrete pavements conform to the principle of elasticity, and after cessation of traffic blows, develop the character to return to their former position.

#### **Like Bread Dough.**

The kneading of bread dough is a fair illustration of the principle.

But when shear of traffic destruction is considered, all sheet pavements, if they maintain the consistency that they assume at the time of completion, effectively resist the shear force, and it is only when under either physical force or chemical disintegration they lose their sheet-like surface, that they rapidly break down under the destruction of traffic.

#### **Defines Block Pavements.**

Pavements that do not possess a sheet surface may be designated as block pavements.

These are found in granite or stone blocks, brick, wood, concrete blocks and asphaltum molded or compressed blocks. The use of block pavements results in either one or two things. There will either be two materials presented to surface wear, or if traffic is borne upon the block surface entirely there must be crevices between the various blocks.

Either one of these surfaces resulting in the employment of auxiliary material is due to the interlocking principle of the block pavement.

Block pavements, being composed of small units, require a grouting principle to maintain their position under traffic conditions. If the grout is brought flush with the surface of the block, two materials come in contact with traffic—the surface of the block and the surface of the grouting material. The result of this is, especially with reference to stone blocks and brick, that both the face of the block and the face of the grouting material is subjected to mechanical and physical destruction.

Ordinarily the block is both hard and tough; that is, it is highly resistant to chemical disintegration, while if the grouting material is of a pitch, tar or bituminous nature, it is apt to be subject to chemical disintegration. If the grouting material is cement it results in the employment of a material that is rigid.

In stone block pavements the blocks are apt to become smooth, which is the result of abrasion, and the grouting material is apt to disintegrate chemically.

The pavement, or any pavement in fact, is no stronger than its weakest part.

If the block surface becomes smooth it becomes an undesirable pavement; if the grouting material disintegrates it becomes displaced and the block has a tendency to shift under traffic conditions. If the cementing principle is not brought flush with top of the surface of the pavement, the corners of the block pavement are exposed to shear and tension. The result is that there is danger of chipping under these forces.

#### **They Live Long.**

However, the history of stone block pavements and vitrified brick pavements is that they present a long life of durability. They are admirably suited for grades upon roads. In regard to block pavement the tendency of modern practice seems to be to make the blocks of smaller dimensions than formerly and to grout with tar or asphaltum in preference to concrete or cement. The principal objection to stone block pavements and vitrified brick pavements is their original cost. However, where grade conditions and heavy traffic conditions are of paramount importance their employment is of the highest necessity and the increase in cost justified.

#### **Wood Favored Back East.**

In regard to the wood block pavement as laid in Europe and in eastern cities of the United States, it has developed remarkable durability as to wear under heavy traffic conditions. Its principal fault lies in its tendency to swell and rot. Both of these tendencies have been controlled by the use of preservative forced into the wood under pressure principally creosote or carbolineum.

#### **Never Tested Fairly Here.**

Wood block pavements, in the opinion of your committee, have never been given a fair test in Portland.

However, there are samples of wood block pavements which have given splendid service in the city of Portland. There is a wood block pavement on Yamhill street which was accepted by the city on the 23rd day of August, 1902, and is still in fair condition. The wood pavement on the south portion of Fourth street was laid in 1902 and taken up, as we recall, in the fall of 1913. It was subject to some swelling, but gave excellent results.

#### **Why Failed in Portland.**

In our opinion the wood blocks that have been laid in Portland have failed principally for the following reasons:

1st. They were laid upon a cushion of sand which is not good practice;

2nd. The wood blocks were not properly selected as to the closeness of their grain and defects existing in the material;

3rd. Expansion joints were absolute disregarded;

4th. Sufficient attention was not given to the entire removal of sap;

5th. They were not properly impregnated with the preserving materials.

Wood blocks have given excellent service in Europe. The type of wood principally employed in Europe has been gunwood and Baltic fir, while the principal kind of wood used in the United States has been long leaf yellow pine, tamarack and gunwood. The pavements in the City of Portland have been composed, as we understand it, of Douglas fir.

### Fir Compares Favorably.

From the behavior of the Fourth street and Yanhill street pavement we think that Douglas fir compares favorably with any material that has been employed in the wood block pavement. The authorities seem to be NINE JULY 2 HOYT 1915, pretty well agreed that soft woods are more preferable in the block pavement than are hard woods.

### Costs More at First.

It has been found, however, that a good wood block pavement, laid under careful supervision, is a pavement more expensive in first cost than pavements having the sheet-like principle. Our recommendation on wood block pavements is reserved for later discussion in this report.

### Concrete Cheapest at First.

We now pass to the construction of the sheet pavements. Of these pavements the cheapest in first cost is the concrete pavement. This pavement is laid in what is known as 1 course or 2 course, and it ranges in price from about \$1.00 per square yard to \$1.37, unless a reinforcing principle is employed, when the cost is so materially increased as to place it in the same category with other sheet pavements, and if the thickness of the material is increased in addition to the reinforcing principle, the cost approaches some of the cheaper grades of other block paving.

### Gets Full Force of Shock.

As has been said heretofore in this report, a concrete pavement is a rigid pavement. It therefore, receives the full force of traffic shock. It is particularly susceptible to physical forces. This susceptibility is caused by its tendency to expand and contract, principally to contract. The result is that at an early period of its life it develops cracks. These cracks are not considered by the authorities, as a vital defect in a concrete pavement. It does necessitate, however, an immediate repair of the crack, and if not repaired in a short time, the pavement having departed from its sheet principle and presenting an edge, develops a weak point which at once becomes subjected to the tension and shear of traffic. The result is concrete being weak in its resistance to these forces, the cohesion of the mass is broken down and the pavement begins to ravel.

It is generally conceded that the cracking of a concrete pavement cannot be entirely eliminated. It can, however, be controlled.

It is generally controlled by the introduction of expansion joints. It has been found that if a concrete pavement be constructed without expansion joints and subjected to the cycle of weather conditions, that the cracking manifests itself under a fairly accurate rule of ascertainment.

### Use Expansion Joints.

It is found that this pavement will crack transversely at distances varying from 25 to 30 feet. This has resulted in the introduction of expansion joints at from 25 to 30 feet. However, the introduction of an expansion joint must, of necessity, result in the employment of two different materials at the place where the expansion joint is introduced. These two materials are the concrete material forming the surface of the pavement and the material

composing the expansion joint itself.

If the material composing the expansion joint is destroyed either as the result of chemical disintegration or as the result of mechanical or physical destruction, it no longer serves its purpose, and the concrete pavement at that point immediately becomes subjected to the primary destructive forces to which the concrete pavement itself is subject.

These, to repeat, are principally shear and tension.

The authorities seem to differ as to whether these expansion joints should be right angle joints or oblique. The theory of the oblique expansion joint is that the shear and tension is distributed over the joint at a different angle than over the right angle, thus reducing the destructive force.

### Ruts and Pit Holes.

The other disintegrating weakness of the concrete pavement is its tendency to abrasion, owing to its being a rigid mass. This tendency manifests itself in ruts and pit holes which ultimately expose the surface to unevenness, breaking down under tension and shear.

The principal remedy for this defect in concrete is to cushion the surface. This is done either by spreading over the surface a preparation of tar, scattering over this stone chips, which is known as the Dolarway process, or by putting over a sheet surface more or less in the nature of an asphalt sheet surface.

### Cushion the Surface.

The objection to the Dolarway process is that it seems to lack adhesion; that is, it has a tendency to flake off under traffic. The result is that it must be frequently renewed. This increases the cost of maintenance of the pavement.

Neither is the cost of maintenance limited to the cost of resurfacing. This is so because the flaking of the surface is not uniform; so that, in order to prevent frequent resurfacing by Dolarway, owing to the flaking of old surface which has not developed failure at the time of patching, it is necessary to remove the old Dolarway coating by a solvent, so that the cost of maintenance must include both the old Dolarway removal and the new spreading.

### Just Like a Foundation.

If the other surface is employed it can be readily seen that the original concrete pavement in fact becomes a base, and there is a new surface possessing all of the characteristics of the sheet asphalt pavement. In order to prevent the creeping of such a surface it would probably require a bituminous binder to get proper adhesion.

The result would be that the original concrete pavement would be converted into a sheet pavement of asphalt, involving all of the failures and elements of repair and all the defects that an original asphalt pavement would possess, and quite closely approaching in cost the cost of an original asphalt pavement.

These remarks are not to be construed as applying to the patented pavement known as the Hassam pavement, which will receive consideration later in this report.

It might be well at this place to discuss some of the authorities with ref-

erence to concrete pavements. It has been earnestly urged at the hearings before us that a great deal of the failure of concrete pavements has been due to faulty specifications, dirty material, particularly sand and rock, and lax inspection, and this is undoubtedly true.

### Causes of Failure.

Your committee, however, is of the opinion that a great deal of the failure, or at least premature failure, is also due to the above causes.

In the book known as "Highway Engineers' Handbook," Messrs. Harger & Bonney being the authors, the book being dated April, 1912, on page 81 is said:

Solid concrete pavements have been tried, the best being the Hassam pavement which is sometimes especially reinforced to prevent cracks resulting from temperature or heaving. It is understood, however, that both transverse and longitudinal cracks have developed in this type of construction. This seems to be an inherent defect in all rigid types of construction for county roads.

Where the traffic comes directly on the concrete surface it often causes unevenly failing in spots. This defect has led to the application of a thin wearing coat of bituminous material and stone screenings. How successful this will prove is still to be demonstrated.

On page 71 they say:

The selection of the most economical top course that is suitable for a given road is the hardest problem of highway engineering. The relative economy of different constructions is theoretically expressed by the sum of the first coat and the capitalized cost of maintenance and renewal. The first can be readily estimated, but the cost of maintenance and renewal cannot be figured with any degree of accuracy for single special cases, and even on large systems it can only be approximately because of the new factor of motor vehicle traffic. The life of any surfacing is comparatively short, a fact generally overlooked in most of the popular literature on Good Roads.

On any road the amount and class of traffic will fluctuate, and roads that are designed for light traffic will often fail under temporary heavy traffic which, for some reason, is diverted from its normal course. The first improved roads built in any locality will, for a time, carry more than their share of the traffic which is naturally induced by the subsequent construction of adjacent improvements. It can readily be seen that it is difficult to judge the amount of traffic a road will handle, and that a short time traffic estimate is valueless as a basis for definite conclusion. The design of the top course is usually based upon a comparison of the actions of the different kinds of previously improved roads that serve districts similar to that under consideration.

### Cement Experience Too Recent.

In the text book on "Roads and Pavements" by Frederic P. Spalding, professor of Civil Engineering, University of Missouri, and member of American Society of Civil Engineers, fourth edition, dated, June, 1912, it is stated:

The use of Portland cement as material for surface of sheet pavement has been in use in a small way since about 1895, and until 1900, however, these pavements were very few in number, and regarded as rather doubtful experiments. Since 1900 there has been a considerable increase in the use of this material, and quite a number of cities have tried it to some extent.

Most of the work that has been done is of too recent date to show final results, or determine the best methods of construction. In several instances the earlier pavements have given good wear under modern traffic, but more experience is necessary to determine the extent to which these materials may meet the requirements of more general

use, and to formulate methods of construction to secure the best results.

The objects in most instances of engineers who have constructed pavements of this kind have been to secure pavements for momentary traffic at less cost than brick, or other satisfactory pavements, could be constructed. Several methods of construction have been patented and many, if not most, of the concrete pavements now in use have been constructed under some of these patents. These refer both to the composition of cement mortar or concrete employed for surfacing the pavement and to the method of construction.

Three types of construction have been used for pavements of this class—(a) Mortar surfaced pavements, in which a surfacing of mortar is applied to an ordinary concrete foundation before the concrete has set, in order that adhesion may develop between the mortar and the concrete in setting.

(b) Monolithic concrete pavements, which consist of a single layer of concrete of the full thickness of the pavement.

(c) Grouted concrete pavements, constructed by first placing the coarse aggregate to the required thickness and then pouring a grout of cement mortar over the surface so as to fill the voids in the aggregate, which is then to form a firm surface, either before or after the grout is applied.

Concrete pavements seem to give promise of considerable development in the immediate future, and it is probable that their use will rapidly extend.

In the Fourth Report of the Illinois Highway Commission, dated the 1st day of June, 1913, and covering the years 1910, 1911 and 1912, on page 82 it is said:

Concrete pavements present many characteristics totally unlike other forms of pavement in much more general use. A concrete pavement has a rigid monolithic surface and is properly to be classified a sheet pavement. Practically all forms of rigid surface pavements are of the block type, while all other sheet pavements are somewhat resilient. The fact that concrete pavements are composed of large monolithic slabs of rather brittle nature, having a coefficient of expansion due to temperature, differing not greatly from that of steel, makes it necessary to consider certain features of construction not usually important in other forms of pavement.

The fact that a concrete road is rigid results in the surface layer becoming subjected to far greater impact stresses than is received by a pavement of a more resilient type.

The strength of concrete to resist stresses of all character depends upon the strength of the matrix or mortar holding the aggregate together, assuming that we have an aggregate of sound hard particles. The concrete being made of various sized particles held together by the matrix, it becomes necessary that none of these particles is loosened under the action of traffic.

#### Impossible to Prevent Cracking.

Owing to the constant movement of a concrete pavement due to temperature changes, it is impossible to prevent cracks from forming. On hot days the pavement tends to lengthen and on cold days to shorten. It is evident that the cracks form when the pavement tends to shorten.

If the formation of cracks in a hazardous way is to be prevented, it will be necessary to provide joints close enough together that there will be sufficient strength in the concrete to drag one-half its length between the joints.

The advantage of making the cracks beforehand is that their edges may be properly protected from traffic. It will be realized at the outset that the expansion joints constitute the weak points in the pavement and that there should be as few of them as possible.

#### Influence of Temperature.

If a concrete pavement is laid without expansion joints, it might pass the first season without any serious consequences from cracking. It will be realized that the cracks which are formed by the low temperature might not become sufficiently filled with incompressible material but that they afforded some relief as the

pavement expanded under subsequent temperature rise. But as time goes on the cracks will become more and more filled with grit, become more nearly incompressible, so that in no very long time they will cease to be expansive and afford no opportunity for movement of the pavement, which movement must be taken up by deforming the concrete and the stresses that will be caused by such deformation are beyond what is to be expected a thin slab can withstand without buckling.

On page 87 of the same report it is said:

Like all other forms of road construction, if a concrete road is to give proper service it must have proper maintenance. Just what will be necessary to do to maintain properly a concrete road cannot be entirely foreseen owing to the limited experience of this form of construction.

#### Cement Requires Maintenance.

Most uneven places in concrete roads are started by the formation of a crack, the edges of which will become broken down under traffic. That a crack forms shows that there has been movement of the concrete, and doubtless the cause resulting in the cracks still exists. If the cracks should become filled with incompressible material either by pouring in a thin grout or gradually filled with dust or grit from the road, there is every likelihood that the crack will expand under subsequent movement of the concrete slab.

It is believed that it is important to leave the concrete surface free to move, as it shows by the appearance of the cracks that it is necessary for it to do so. Therefore, as soon as cracks are formed, and a sharp lookout should be kept for them, they should be cleaned out as thoroughly as possible, and filled immediately with some plastic material, such as asphaltum pitch. This will prevent the water seeping through the cracks and also offer some protection to the edges. Especially if the crevice is flushed with a slight excess of the pitch.

In the University of Oregon Bulletin of January, 1913, in an article entitled "Concrete Roads vs. Macadam" by Prof. E. H. Macalister, Dean of the School of Engineering of the University of Oregon, on page 5 it says:

#### Will Be Standard Highway.

Considering its many merits, and the fact that in the long run it is relatively inexpensive, it seems probable that the concrete road, either with or without bituminous wearing surface, will become the standard highway of the future.

#### Is Most Promising Material.

On page 13 he says: The writer favors a concrete base with a thin bituminous wearing surface, as adopted in New York and California.

On page 16 he says:

Standard types of city pavements, such as bitulithic or vitrified brick, are too expensive for the great majority of country roads, and concrete is the most promising material in sight that embodies at once a moderate first cost and reasonable maintenance charge.

In the Fifth Biennial Report, covering the period from 1912 to October 1st, 1911, of the State Highway Commission of the State of Washington, on page 128, in discussing the roads in Pierce County, Washington, it is said:

#### Experience in Pierce County.

This county is the first in the state to undertake a large mileage of concrete pavements. In 1912 the construction of 8 miles of groutoid pavement was completed in the Puyallup Valley. This pavement has given excellent satisfaction, but the cost was excessive.

In 1913 the county commenced the construction of one-course concrete pavements, using a concrete mixture. One contract of this kind of pavement was a failure on account of poor aggregate and lax inspection. This section has been used as a basis for a standard sheet asphalt road.

Another contract gave a pavement which has been giving very good satisfaction up to date. Owing to the

difficulty of controlling quality of aggregate the county installed a large gravel and sand pit near Lakeview, and undertook to furnish crushed and washed gravel and clean sand for all its contracts as well as its own work.

The 1914 specifications for one-course pavements changed the proportions of aggregate and cement to 1:2:3½, and undertook a very rigid system of inspection and control of all features of the concrete work. The 1914 work is particularly noticeable for the careful attention given to special details, such as treatment of curves, shoulders, drains, expansion joints, etc.

#### Long Time to Set.

With reference to concrete pavements, the time of construction becomes an important element, particularly considering the comparatively short season for favorable road construction in Western Oregon. It is pretty generally admitted that in all types of concrete construction, with the exception of the Hassam pavement, that the concrete must be kept carefully dampened for a period of 7 or 8 days, and a period of 20 days should elapse before the pavement has sufficiently set to allow traffic upon it.

This, of course, from the standpoint of interrupted traffic, is a considerable objection.

#### Data Is Lacking.

As will be noted from the discussion of the authorities, there is very little data on the cost of maintenance of concrete roads. During the hearings of your committee it has been asserted that the cost of maintenance of a concrete road is so slight that it is not to be taken into consideration. Your committee, however, is not convinced of the soundness of this assertion.

#### Here Is Best Discussion.

The best discussion of concrete country roads that has come to the attention of the committee of that of Mr. Paul E. Green, a member of the American Society of Civil Engineers, in a report he made to the authorities and taxpayers of Highland Park, Illinois. Mr. Green was commissioned by the taxpayers of that village, which is a suburb of the city of Chicago, Illinois, to make an inspection of the concrete road system as it then existed in Wayne County, Michigan. Mr. Green made his inspection in June, 1913.

He was employed for the reason that the authorities of Highland Park were desirous of improving their thoroughfares, and wanted to ascertain the merits and faults of concrete road construction. On the general subject Mr. Green says:

#### Doubts Utility of Concrete.

The large proportion of failures observed by the writer has caused him to seriously doubt the utility of this product as a wearing surface, in cities especially.

While cracking will not be a serious defect as far as concerns the appearance on country roads, the writer has always believed that in city streets, where the value of abutting property is largely dependent upon the character of the street pavement, and is so recognized by the laws of practically all states, the tendency of concrete to crack and spall is a serious objection to its use.

It has been maintained, however, by the advocates of concrete pavements, that much, if not all this cracking has been caused by improper specifications and that it can be eliminated by careful construction and also by proper movement with steel. It is believed that the assertion is at best partially correct and that while such reinforcement will not eliminate the tendency entirely, it will reduce it largely. The steel reinforcement will, however, if

used in the proper quantities and correctly and carefully placed, add a very appreciable item to the cost of construction.

Another weak point in the lasting qualities of concrete as a wearing surface, is the fact, about which there can be little dispute, that it is deficient in its ability to withstand abrasive action. As long as the surface is smooth and perfect, the destructive effect of traffic is small, but if any break occurs the ravelling action of iron-shod horses and iron-tired vehicles is very apparent and the action rapidly disintegrates the concrete, the surface soon becoming rutty and full of holes. This result is to be expected from the character of the material, since concrete will withstand a very considerable compression, but a very inconsiderable shear or tension. In reinforced concrete the allowable working stress for tension is rarely over one hundred (100) pounds per square inch; and for shear eighty (80) pounds per square inch, and for reinforced work these figures are reduced. Thus, when a hole is started in a concrete surface, it is exposed at its weakest points.

**Comparison of Pros and Cons.**  
Mr. Green gives the advantages and disadvantages of concrete pavements as follows:

**Advantages.**

1. Cheap first cost.
2. Durable and sanitary.
3. Good appearance if no cracks appear.

**Disadvantages.**

1. Liability of cracking.
2. Inability to withstand abrasive action.
3. Bad appearance after cracking.
4. If covered with bitumen, high maintenance charges.

He also gives his opinion that the proper location for such a pavement is:

First: Streets of light traffic (less than one hundred vehicles per day.)

**Q. R. for Light Traffic.**

With reference to this he says:  
It is quite possible that this figure is too low, but the writer is inclined not to change the figure, it being understood that the one hundred vehicles per day refers to iron-tired, horse-drawn vehicles.

**Will Do for Some Roads.**

Continuing, he says:

Another proper location for such a road was stated to be country roads where the value of the property will not be affected by cracking, and on which two hundred and fifty vehicles per day would be considered a heavy traffic.

He gives a summary as follows:

Practically all cases of concrete pavements on city streets observed by the writer in the last five years have cracked badly before they are two years old. In most cases they are also badly worn.

The same statement is true of Windsor, Ontario.

Of the Wayne County roads observed, 22 per cent of the individual slabs of the 1909 work, 27 per cent of the 1910 work, 41 per cent of the 1911 work and 21 per cent of the 1912 work is cracking and showing signs of wear.

**Are Wearing Badly.**

All streets and roads observed which have a considerable commercial traffic, and which are more than one year old, are wearing badly; as, for example, Gratiot, River and Mack roads, in Wayne County, Michigan; Park street, Windsor, Ontario; Ohio street, Chicago; Green Bay road, Highland Park, Illinois, and many others.

To keep concrete roads and streets in good condition there must be constant maintenance the first year, and the maintenance will increase materially year after year. This maintenance may consist of tarring cracks and holes, or covering the entire surface with tar and sand, if the latter course is followed, the maintenance expense will amount to about 10c per square yard per year.

**Joints Are Weak Points.**

To reduce the cracking and settling to an unobjectionable minimum, it is necessary to reinforce the concrete and

also to increase the number of expansion joints above those now generally used. These joints should be protected. Every joint, no matter what its character, is another point of weakness of the pavement and it is a debatable question whether it will not be well to go to the other extreme and eliminate all transverse expansion joints, use longitudinal expansion joints adjoining the curb only, let the cracks come when they will, and after their appearance—maintain them.

**Other Types Are Superior.**

It is believed that a first class concrete road cannot be built for less than \$1.60 to \$1.75 per square yard, and at this it will be inferior to the cement grouted brick pavement, or an asphaltic concrete pavement or bituminous pavement or a sheet asphalt pavement, any of which can be constructed at this price, or at a slight increase over these figures.

The reason for this is because of its inability to stand abrasion.

**Analyses Michigan Figures.**

In Mr. Green's report he comments upon the assertion as to the Wayne County roads, dealing with the cost of maintenance, the assertion being that only \$260 was expended in 1911 and \$100 in 1912 on the 65 miles of concrete highway in Wayne County, Michigan, from which, however, must be eliminated the 1912 construction of 40 miles, which was too recent at the time of his investigation to take into consideration the cost of its repair and maintenance.

Mr. Green points out that the report of the Commission credits certain Dolarway treatment of concrete roads to the cost of experimental road work, when, as a matter of fact, it should have been credited to the maintenance account. He also estimates that, if the cracks as discovered by him in the road system were properly repaired that the cost of maintenance of the system would be as follows:

Joints and cracks for 1912.....	\$1,427.30
Joints and cracks for 1913.....	2,378.84
Holes .....	820.40
Surfacing with Dolarway 1912	
and 1913 .....	3,425.18

Total .....

And he says that in addition to this it would require not less than \$1,000 to put back road in good condition, making a grand total for maintenance to date of \$9,051.72, or about \$140 per mile, if the entire mileage of 65 miles is considered; or about \$226 per mile if only work constructed previous to 1912 is considered.

And he concludes this discussion in this way:

This figure is the minimum figure possible; relates to the surface of the pavement alone, and takes no account of ditching, draining, hauling, replacing entire slabs, etc. In fact, it is the opinion of the writer, after talking to the foreman making repairs, that the actual maintenance is \$5,000 more than this.

**Is Costly to Maintain.**

It thus appears that a concrete pavement, as above discussed, is an expensive pavement to maintain, and the opinion of your committee is that a concrete construction should be limited to a base and not used for the surface. It is the understanding of your committee that a concrete pavement can be laid for an average price ranging from \$1.04 to \$1.10.

**Cannot Use Existing Foundation.**

There is another matter to be taken into consideration, and that is that a considerable portion of the contemplated mileage improvement is now improved with a macadam surface. If

concrete were employed it would be necessary to take up this macadam surface, and if the material could be utilized in concrete construction it would have to be cleaned and broken to proper sizes.

However, this is not as much of an objection if concrete is employed as it would be to other types of pavement which would require the destruction of this macadam base. This is so because of the cheapness of the original construction of concrete. The objection to concrete is the objection to the probable cost of its maintenance, and if the pavement were to fall badly, as it often has done, the necessity of having to put in entirely new slabs, which would require at least thirty days before such repaired sections could be opened to traffic.

**Hassam Is an Exception.**

The above discussion in no way is to be taken as applying to the patent pavement known as Hassam. This pavement will now be considered. It has been employed considerably in the city of Portland for street paving.

It is composed of broken rock of designated sizes, grouted with cement. The surface is then spread over with a cement mortar, which is broomed in by a rough brush. The prevailing practice of the Hassam Company is not to establish expansion joints but allow cracks to appear where they will.

Some attempt has been made to fill cracks with tar after they appear, but the manager of the company states that this has not been particularly successful, owing to the fact that the cracks are surface cracks not extending in depth into the pavement any great distance, the result being that not much of a key is furnished for the holding of plastic material which is ordinarily employed in filling cracks in concrete pavements.

We are informed that the cost of this pavement will range from \$1.40 to \$1.80 per square yard, depending upon the thickness of the pavement and local conditions.

The oldest Hassam pavement seen in the city of Portland is that on Grand avenue south of East Morrison street. We were informed that this pavement has been down about six years. It shows much better behavior than any other concrete pavement which your committee has seen, and from the investigations of your committee the Hassam pavement is entitled to more consideration than any other concrete pavement that has been called to the attention of your investigators.

**Good and Weak Points.**

It does crack, however, these cracks are both transverse and longitudinal. It shows evidence in places of both abrasion and pit holes. There is raveling, principally confined, however, to the end of the day's run. Its behavior with reference to its proximity to street car rails is the best of any pavement we have seen.

**Expensive to Repair.**

Your committee is unable to form an opinion as to just what the ultimate life of the surface of the Hassam pavement will be. In the opinion of your committee, however, in case of the destruction under traffic of the Hassam pavement, it would be an expensive pavement to repair. The patent rights

of the Hassam Company will be discussed elsewhere in this report.

#### Results Much More Satisfactory.

It has been stated by the present manager of the Hassam Company that a good deal of the Hassam pavement laid in Portland before 1911 has been unsatisfactory owing to the lack of interest of contractors in the pavement itself; but that since the Hassam Company are laying the pavement much greater care has been taken and the results have been much more satisfactory. In the opinion of your committee Hassam pavements since 1911 have been laid with greater care in Portland than before that time, and the result is noticeable with reference to pavements laid before and after that time—much more favorable to those laid subsequent to 1911.

#### Two Asphaltic Concrete Types.

The next sheet pavement which we desire to discuss is the asphaltic concrete pavement. There are two general types of this pavement—that laid by the Warren Construction Company or by others under royalty license from them, which is known as the bitulithic or Warrenite. The other is an asphaltic concrete pavement which is laid under what are known as the Topeka specifications.

#### Warrenite Discussed Here.

Your attention will first be given to the Warren product. It is not necessary, at this time, to discuss the Warren patents as that is reserved for later consideration.

It may be stated that pavements laid under the Warren patent are designated as bitulithic or Warrenite. There seems to be no substantial difference between bitulithic pavement and the Warrenite pavement, although there is considerable difference of opinion as to just what type of pavement is contemplated by each of these two designations.

It has been stated to us that the bitulithic pavement is one in which the ingredients entering the mixing pot are those that are weighted on a multiple beam scale; that the Warrenite pavement is one in which the ingredients are measured instead of being weighed.

It has also been stated that the difference is this: that the bitulithic pavement has a greater thickness than a Warrenite pavement, but the explanation as given by a member of the firm of Warren Bros is that there is no distinction other than this—that the company always lays a bitulithic pavement in cities and a Warrenite pavement outside of cities.

If this distinction be taken as correct, it appears that the only difference is in designation for specific purposes, and that bitulithic and Warrenite are merely trade names.

Bitulithic pavement has been laid upon streets in the city of Portland since 1902, and your committee has found plenty of examples from which to form an estimate of the behavior of this pavement.

#### Laid Eleven Years

Fifth street, from Jefferson north with the exception of a block between Morrison and Alder was paved with Warren's bitulithic in 1903 or 1904. At the present time the street is in good condition except along the street car

rails. This street has been repaired

#### Nature of Repairs.

No figure as to the cost of repairs to this street have been obtainable by your committee. It is claimed by Warren Bros. that the only repairs made to this street have been those caused by the settlement of foundation areas due to excavating in the laying of water pipes and other street furniture, and the subjecting of the surface of the street to a flush coating which forms a thin bituminous cushion surface, the purpose being to seal the surface of the street to keep it waterproof.

#### Best pavement in City.

Others have claimed, however, that this street, in certain places, has been subjected to a heavy asphalt cushion due to failure developing in the street. However, your committee is of the opinion that Fifth street, considering the traffic upon it, is the best pavement in the city of Portland, and it gives every indication of having a future life of a great many years.

#### Absence of Cracking.

No cracks have developed in this street that your committee has been able to find, and this absence of cracking seems to be characteristic of Warren's bitulithic pavement, and by virtue of this fact it is to be put in a class by itself when compared with other sheet surfaced streets. The advantage that it possesses in this particular is that it maintains a smooth surface taking compression and that there is no tension or shear upon its surface because it does not crack.

#### Only Found One Bad Place.

Your committee has only found in its inspection of many bitulithic streets in the city of Portland and its inspection of Warrenite pavement within the vicinity of Portland one spot where cracks have developed in a bitulithic pavement.

#### Some Failures Noted.

A number of failures of Warren's bitulithic pavement have been called to the attention of your committee. Second street in the city of Portland has undoubtedly given the Warren people a great deal of trouble. The same is true of Grand avenue, north of Morrison street, and your committee has heard of a failure developing in the city of Eugene, Oregon, as well as some of the Warrenite pavement laid on the county roads in King County, Washington.

#### Opinion on Failures.

But your committee is of the opinion that this percentage of failures is small when compared with the large percentage of successes that this pavement has shown under traffic conditions varying in volume and covering a period of years all the way from 5 to 11 or 12.

In regard to the failures of the Warrenite pavement in King County, Washington, the Warrens maintain, and your committee believes it to be true, that these pavements were laid by contractors, under license royalty, and in several instances the contractors were inexperienced, while in others sufficient supervision and care were not taken either in mixing or in laying.

The failure in Eugene was probably due to a bad foundation problem as it is well known that the street in Eugene which was laid with bitulithic

presented a bad foundation problem owing to the low flat nature of the street.

#### Committee in Doubt.

Second street in Portland was laid at a time when weather conditions were bad. In regard to the Warren pavement—it has been asserted that Warrens do not always lay a pavement up to their specifications, and that in case of repairs they have used a mixture which did not contain a bitulithic aggregation. In some instances your committee is of the opinion that possibly the first assertion might be true, although your committee is in doubt on this point.

#### Thin Coat for Repairs.

In regard to the second assertion, the point is undoubtedly correct, and it seems to be admitted by the Warrens that in making repairs they cannot always use their preferred aggregate, owing to the fact that the surface to be repaired is so small in area that they could not employ the aggregate and make a neat repair and, therefore, they use less sized particles in cases of that kind.

#### How Samples Are Selected.

A sample was shown your committee of a piece of pavement taken from Division street near 30th in the city of Portland, which did not have the appearance of conforming to the bitulithic aggregate. Your committee requested the Warren people to make an investigation of this pavement. They did so, and submitted an analysis and a sample of the pavement which materially differed from the original sample shown to your committee.

#### Committee Gets Own Sample.

In all probability each side selected a sample most favorable to its position. It became necessary for one member of the committee to obtain an independent sample, which seems to possess the characteristics of standard bitulithic.

It is but fair to the Warren Company to state, however, that this Division street pavement was not laid by the Warren Construction Company. It was laid by a company having license from the Warrens to lay it.

#### Behavior on Linton Road.

There has been a great deal of talk concerning the behavior of the Warrenite pavement on the Linton road, Multnomah County. This pavement was laid about the year 1911 or '12. It has recently been flush coated at the cost of about 2 cents per square yard. At the edge it developed some failure.

It is claimed by the Warren people, however, that the county failed to run a header along the edges of this road, with the result that when the pavement was rolled it feathered out under the compression and it was these thin edges that developed failure.

It was also asserted by the Warrens that the Linton road has a bad foundation problem, and that they would not desire or care to construct any more Warrenite pavement on the Linton road, unless the pavement were carried on a concrete base. The Warrens advocate that a flush coating on their bitulithic pavement be applied about once every five years, that this has a tendency to keep the pavement sealed and waterproof.

### Effect of Water

At this point it might be well to explain the failure of a street having an asphalt or asphaltic concrete surface as a result of the action of water upon its sheet surface. Water, if it stands any length of time upon a street of this character, has a tendency to disintegrate the asphaltum cement. It has a tendency to cause the pavement to become brittle due to the volatilization of certain chemicals in the asphaltum.

When this occurs the pavement shows a lifeless surface, showing particles of sand over the surface and rapidly disintegrates. From this it can be readily seen that if the asphaltum loses its power to withstand compression and shear, there will be a shoving of sand particles and the crystallized asphalt with the result that holes develop and the pavement rapidly breaks down under tension and shear. Therefore, it is necessary to keep the water out of an asphaltic concrete pavement, and this flush coating process of the Warrens seems to be resorted to for that purpose.

### Side by Side.

A good illustration of a street that has been flush coated and one that has not may be seen on Jefferson street between Fifth and Sixth, in Portland; one-half of this street has been flush coated, the other half has not. The difference is quite noticeable.

### Small Cost of Maintenance.

There is another point about the Warren pavement which merits attention. Your committee is of the opinion that it can be easily and cheaply repaired, so that with the small maintenance cost the life of the pavement will cover the minimum period of 15 years as before referred to in this report. The ease of repair seems to be principally due to the fact that where the repair must be made by the incorporating of new material, it can be done by building the pavement up without having to go down to any sub-foundation. This is so because there seems to be perfect adhesion between the new repairing material and the old material. This is not true of an asphalt sheet pavement.

### Repairs Require Finer Mixture.

It, however, may be said in this connection that where repairs of this character are made that a finer-sized mixture must be used in making the repair than in laying the original pavement. In the opinion of your committee the repairs by the adhesion of new material to old and the filling of holes would not even have to be resorted to if the foundation maintained its integrity, the principal repair being the flush coating of the surface of the road.

### Its Source of Strength.

Your committee is of the opinion that inherently the Warren aggregate, by virtue of employing a graded size of stone from 2 inches down to fine powder, presents a pavement which is strong in its power to resist compression, irrespective of the asphalt binder employed in the mixture.

### Stone, Not Bitumen, Carries Weight.

In most sheet pavements employing the asphalt principle, the resistance to compression is obtained from the inherent stability of the asphalt or bitumen after it is set, while in the Warren pavement dependence is placed

upon the stone in the aggregate rather than the asphalt.

### Binder Is More Elastic.

The result is that either a less amount of asphalt may be used, owing to the arrangement of the stone sizes resulting in the reduction of voids, or a grade of asphalt may be employed which results in a permanent binder which is soft and more oily, thereby resisting in greater degree the volatilization and tendency to become brittle that asphalt develops as a result of its chemical failure.

### Won't Displace Even When Warm.

It has been asserted and your committee believes it to be true, that after the mixture in the bitulithic pavement has been spread upon the surface to be paved and rolled, that motor trucks can drive over it without a displacement as a result of the compression of this traffic. This is evidence of the fact that before the asphalt binder has cooled, as it must do before it can set, that the aggregate of stone in the mixture possesses an inherent stability of its own.

### Broken Stone and Old Macadam.

We will not dwell further upon these points at this time as they will be more fully discussed under the head of the Warren patents. It may be remarked, however, that this stability presented by the Warren pavement results in the employment of a different type of foundation without violating safe practice, for in this type of pavement we think it has been demonstrated beyond successful dispute—that under ordinary conditions a foundation of broken stone may be used for bitulithic or Warrenite pavement. The result of this would be to greatly reduce the cost of the Warrenite pavement on those portions of the county roads which require new foundations. This is true unless other standard types of pavements can be successfully laid upon a similar foundation.

It would also allow the employing of the present macadam on those roads which are now surfaced with that material, but this is not of so much importance as in all probability a sheet asphalt pavement or a pavement of the Topeka specifications could use the same base.

### Here Is Topeka Mix.

We come now to the construction of the Topeka specifications. As will be more fully explained in the discussion of the Warren patents, the Topeka specifications were the result of the analysis of certain asphaltic concrete pavements laid in the city of Pittsburgh, Pa., a number of years ago.

It is not contended by the Warrens that a pavement of the Topeka specifications is an infringement on their patent. These pavements have been laid in the city of Portland, but are of recent date.

Your committee examined a number of them, and is of the opinion that this pavement, as far as they could tell from the pavements they saw, should be placed in the category of sheet asphalt pavements. They have been laid in Portland for about two years.

The pavement was put down in Springfield, Oregon, in the year 1911; and also in 1911 the street known as D street in Salem.

### Much in Valley Towns.

A considerable amount of this pavement has been laid in the Willamette Valley towns of Oregon.

The pavements that your committee saw in Portland, down about two years, have developed a tendency to crack, showing both transverse and longitudinal cracks.

### Develops Tendency to Cracks.

This cracking is analogous to the behavior of sheet asphalt streets.

Your committee, however, is not able to absolutely classify this pavement.

### High Per Cent of Voids.

It does know, however, that the pavement possesses more than 21 per cent of voids and that the aggregate of material in the mixture, aside from the asphalt binder, possesses no inherent stability. Still, reliable evidence as to the good behavior of this pavement under traffic has been brought to the attention of your committee. It where it was first employed, although after a time it appears to have been abandoned in Pittsburgh and was not employed again until used in Topeka, Kansas.

### Meets With Much Favor.

It seems to meet with favor upon the part of Mr. Linn White, the engineer of the South Park Board, Chicago, Illinois. Your committee has been unable to obtain data concerning the method employed in its repair or cost of its maintenance as it has been of too recent date to absolutely establish items of cost in this particular.

### At Least Is Equal of Asphalt.

It is the opinion of your committee that this pavement, if carefully laid, will be at least the equal of an asphalt street and probably better than an asphalt street, particularly if it could be repaired by the obtaining of adhesion to old and new material. Your committee is of the opinion that this adhesion can be obtained, as it finds that where bitulithic pavements are repaired, due to foundation failures, that, what in effect amounts to the material of Topeka specifications has been employed in the repair and proper adhesion has been obtained.

One or two of the earlier streets of the Topeka specifications laid in Portland employed a flush coat similar to that used on the Warren's bitulithic. The more recent constructions under the Topeka specifications have employed a cement dust surfacing instead of the flush coat. There is no unanimous opinion as to the reason for the departure from the flush coat to the cement dust surfacing. It seems to have been brought about at the instance of the city.

### Patent on Flush Coat.

The Warren Bros. claim that they informed the city that the use of this flush coat on a pavement of Topeka specifications violated one of their patent rights, as they claim to have a patent on the flush coat employed. On the other hand, it seems to be maintained by others that the flush coat is composed of but tar and sand and that the only right that the Warrens have is to the trade name on some of the asphaltic oil entering into the flush coat as an ingredient. The patent right of the Warrens as to this flush coat will be discussed later.

### Sheet Asphalt Pavements.

We now arrive at a discussion of sheet asphalt pavements. This discussion can be brief. **Asphalt is not suitable for country road construction as compared with other standard types.**

First, because it is high in price.

Second, because it is slippery.

Third, because its chemical life is comparatively short.

Fourth, because of the difficulty of its repair.

We know of no advocate for a sheet asphalt surface on the contemplated county road improvement. If it were to be used on roads requiring the use of new foundations, it would require either a concrete base or a bituminous base. It is doubtful if the crushed rock base could be used. It could, however, be used on the old macadam base on roads where such a base exists.

### Reason for Failures.

**But, the principal objection to asphalt is that, more than any other pavement in existence, it must be attuned to traffic conditions;** that is to say, where traffic is light the mixture should be different than where traffic is moderate, and should not be used at all where traffic is heavy. The failures of asphalt are due to its disintegrating as above pointed out, and also due to the fact that under light traffic it is apt to crack.

### Condition Often Lifeless.

Your committee examined sheet asphalt pavements in Portland upon which there was little or no traffic and where the pavements had been down only two or three years; these pavements presented a lifeless condition and were full of cracks, and will go to pieces in a very short time, irrespective of the volume of traffic upon them. This is due to the fact that asphalt maintains its vital principal longer under the kneading process of moderate traffic, and if it is not given this kneading process it becomes brittle and develops, under expansion and contraction numerous cracks which, of course, are great faults in any pavement, as they are readily torn to pieces by the destruction of traffic.

### Discussion of Patents.

So much has been said about the legality of the Warren patents that your committee feels it necessary, at the expense of some length and slight repetition, to discuss this matter. From time to time during its investigation, the assertion has been made to your committee that the Warren patent covering Bitulithic and Warrentite pavements, and the patent covering the Warren flush coat mixture, were invalid and had been held so by the Courts.

It has also been claimed that the Warrens have always sought to avoid litigation on the merits of their patent rights. That in various suits instituted by them to protect their patents, if they saw that the evidence of their opponents was particularly strong, the policy of the Warrens was to make a compromise by agreeing that if their opponents in the litigation would consent to a decree to the effect that the Warren patents were valid and had been infringed, the Warrens would waive all royalty under their patents.

### Review of Litigation.

In view of these assertions and claims, your committee deems it necessary to review the litigation as far as it has been able to find the same reported in the printed reports of the various courts.

### Moral Right at Stake.

In regard to the general subject of patents your committee is of the opinion that if a patent for a pavement is valid that no sound reason can exist why the inventor or owner of the patent should not be entitled to the fruit of his genius in the form of a royalty.

This right is guaranteed to all inventors under the laws of their country.

A sound public policy justifies patent monopoly.

The protection of a patent furnishes strong incentive for inventive genius.

### Public Gets the Benefit.

The general public, in countless instances, has reaped great benefit which otherwise never would have been had not inventive endeavor had for its goal the hope of monetary reward held out by the limited monopoly that the patent laws give. The ultimate public benefit under the patent laws is that the public will, after the limited time has expired protecting a patent, have the use and benefit of the invention or discovery for all time, and that too, without charge or price for the discovery or invention, after the expiration of the patent period.

### Depends on Validity.

On the other hand if a patent be in fact invalid, then all reasons for the protection fails and the public is under no legal or moral duty whatsoever to compensate the holder of such illegal patent or process when it becomes necessary or desirable to use the same.

### History of Warren Patent.

The Warren patent for a bitulithic or Warrentite pavement was granted to Frederick J. Warren on May 5, 1903, and bears serial number 727,505 and was for a new and useful improvement in street pavements. The patent has been attacked on the principal ground that the Warren method for street pavement was not new, had been used before, and therefore had, under the patent laws, been anticipated. Also, that what is known as double patenting the patent was invalid. These claims are questions of fact, any one of which, if true, would invalidate the patent. They have all been passed on by the courts, as will hereafter be shown.

### Nature of Invention.

The pavement that Warren invented has for its component parts broken stone in graded percentages from stone that will pass through a 2-inch ring and be retained by a 1½-inch ring down to impalpable powder mixed with bitumen or coal tar; subjecting the graded stone and bitumen mixed together to heat, the stone and bitumen forming a conglomerate mass which is spread hot over a foundation of either concrete, bituminous base, broken stone or old macadam.

### Avoiding Voids the Object.

The mixing of the properly graded stone from 2 inches down, having added to it a certain percentage of impalpable powder fills the spaces between the stone of larger sizes. Thus

it is claimed that the density of the large solid stone will result in a given mass of less percentage of voids than the use of small particles. That this is true appears from the following example:

### Here Is a Sample Illustration.

Let a 3-inch cube of stone be placed in a box of close fit; now let the stone be broken into small particles; these particles will more than fill the box; the surplus of particles over the filled box is the result of the voids or interstices between the particles.

### Results Obtained.

The reduction of voids in the use of graded stone in mass results in three things:

First, a combination that resists in high degree compression or static force independent of the bituminous or coal tar binder.

Second, less voids to be filled by the binder, resulting in the destructive force of traffic being borne in a greater per cent upon the stone than upon the bitumen.

Third, inasmuch as the bitumen that must carry a high percentage of compression must be of a grade so as to become hard when set, while a grade that is used for a binder remains more plastic after setting, the hard being more susceptible to disintegration under water than the soft, the result of the Warren patent was that less bitumen was used, and the grade less subject to water disintegration, thereby resulting in a pavement more impervious to the elements to which pavements must, of necessity, be subjected.

### Product, Not Process.

Warren claimed his invention was a product, not a process; that is, he admitted that before his invention broken stone, bitumen or coal tar and stone powder had been used in combination for paving. He made no claim for a patent based upon the novelty of the process, but he did claim that the process before his patent was confined to layer combination resulting in a pavement having no inherent stability and having more than 21 per cent of voids.

### Cases Are Cited.

In cases in which the Warren patent No. 727,505 has been before the courts the courts have upheld the Warren patent with the exception of one in which the Warrens dismissed their suit for infringement after the court had denied them a preliminary injunction.

In this case, after the denial of the preliminary injunction, the suit was still before the court on the merits of the Warren patent, particularly with

elements of density and stability, the product must necessarily possess the "inherent stability" which is the broad and fundamental idea embodied in the invention and embraced in the patent. A decree will be entered enjoining the defendants from carrying out their contract for the construction of the Barclay street pavement."

#### Celebrated Topeka Controversy.

There now remains the question of consent decrees in which it has been claimed that the Warrens have made agreements in litigation whereby they have waived their royalty in consideration that it be stipulated that decrees be entered upholding their patents. As near as can be ascertained, the grounds for these claims seemed to have originated in the litigation the Warrens had in Topeka, Kansas.

No report of this Topeka case seems to appear in the printed law reports. As we gathered the facts it seems that in the case of Warren Bros. vs. the City of Topeka, the city had prepared specifications for pavements which the Warrens sought to enjoin and infringement of their patents. On a hearing the City of Topeka defended their right on the ground that the Warren patent had been anticipated by the construction of an asphalt concrete pavement on Lang avenue, also Bellfield avenue and Sherman street in the city of Pittsburgh, Pa., which pavements were constructed prior to 1891 and had been in use from the date of construction until the present time (August 1909) and were in good condition:

"That said asphaltic concrete pavements were composed of a mixture of crushed stone, sand and bituminous cement so proportioned and mixed as to produce enough bituminous mortar from the finer particles of stone, the sand and bituminous cement to fill the voids or interstices of the stone and produce a solid, homogeneous mass, free from voids."

These facts were supported by the affidavits of H. H. Grant, superintendent of the City Asphalt Paving Plant, Wm. D. Hamilton, an employee of the Department of Public Works of Pittsburgh, and James Martin, a resident of Sherman street in said city, having lived on that street for a period of about eleven years. The Warrens contended that the Pittsburgh streets were not of a density having less than 21 per cent voids, and the specifications under which Topeka was seeking to lay pavements did have. They said they did not consider the specifications of Pittsburgh streets as being an infringement of their patents—that if the Topeka people wanted to lay pavements like the Pittsburgh pavements to go ahead and do so.

#### Topeka Abandoned Attempt.

The outcome of the case seems to have been that the city of Topeka abandoned its attempt to lay pavements under the specifications upon which it was sued and laid pavements after the Pittsburgh specifications which was not contested by the Warrens. This is the original, as we understand, of the now famous Topeka specifications for asphalt concrete.

#### Alleged Breaking of Patent.

The next case is that of Warren Bros. vs. City of Creston, Iowa et al. In this case it has been claimed that the Warren patent was broken. In this we are unable to concur. The material part of the decree is conclusive on the point; it is as follows:

"Thereupon it is decreed that the following decree might be forthwith entered as hereinafter specified. And, it appearing to the satisfaction of the Court that the specifications for the work as constructed by the defendant City of Creston, Iowa, requires said contractors to use in the construction of the wearing surface of the pavement contracted to be built in said city of Creston, Iowa, no particles of stone that would not pass a screen with openings  $\frac{1}{2}$  in diameter, and that less than ten per cent of the stone or coarse sand or gravel retained upon a screen with openings  $\frac{1}{2}$  in diameter, and all the remaining mineral matter used should be finer than  $\frac{1}{4}$  in diameter."

"And it further appearing that the pavement constructed by the use of

mineral particles as above described would not infringe the claims of complainant's patent in this case, No. 835,423, and it further appearing that the pavement to be constructed in said city of Creston, Iowa, will be constructed in substantial compliance with the following formula, to-wit: Bitumen ..... from 7 to 11% Mineral aggregate pass—ing 200 mesh screen..... from 5 to 11% Mineral aggregate pass—ing 40 mesh screen..... from 18 to 30% Mineral aggregate pass—ing 10 mesh screen..... from 25 to 55% Mineral aggregate pass—ing 2 mesh screen..... from 8 to 22% Mineral aggregate pass—ing 2 mesh screen..... less than 10% same to be used in the order named and that said pavement so constructed will not infringe the claims of said patent."

It is, therefore, ordered that the matters in controversy between the plaintiff's patent in this case, No. 835,423, and the above findings, the bill heretofore filed in this case be dismissed without costs as against either party.

It is so ordered of record this June 16th, 1910.  
(Signed) SMITH McPHERSON, Judge."

#### Case Adjourned Without Trial.

We have now arrived at that point when it is necessary to consider the South Park Board Chicago case. There can be no doubt about it—the Warrens failed to obtain a preliminary injunction for the infringement of their patent. This left the case for trial on its merits. It was never tried. The contractor not being prevented by a preliminary injunction to finish his contract. An affidavit by H. M. Head, General Counsel for Warren Bros., filed in the case of Warren Bros. vs. City of New York above discussed, says of this case:

"The plaintiff has heretofore filed an affidavit in this case and that as General Counsel for Warren Bros., he was present in the City of Chicago, Illinois, and took part as counsel in the ex parte application for a preliminary injunction against the South Park Commissioners and Metropolitan Construction Company to prevent the construction of a street pavement on Michigan Boulevard in said city of Chicago, which construction, it was claimed, would infringe the patent No. 727,505, owned by Warren Bros. Co., covering a street pavement; that at the hearing of said application and after the argument had progressed for some time the defendants brought before the Court and exhibited a section of the pavement, which it was claimed had been taken from one of the streets of the City of Washington, D. C., and which it was claimed had been laid during the year 1872 or 1873; and was offered as evidence of a pavement construction which anticipated the claims of the Warren patent."

"Affiant states that the section of pavement exhibited appeared on its face to anticipate the claims of said patent, and evidently made such an impression upon the mind of the Court that upon presentation of that exhibit the Court felt constrained to refuse the issuance of the preliminary injunction and so stated in making the order in the case."

#### Validity Acknowledged by Contractor.

"The affiant further states that immediately thereafter further steps were taken to make a thorough examination of the contract and specifications under which said pavement had been laid in the city of Washington, and also to make a careful examination and analysis of the same; and that as soon as said examination had been made, affiant undertook to renew the application for the preliminary injunction before Judge Kohlsaat but was unable to secure a hearing before him, owing to the fact that it was then midsummer and the Judge intended to leave the city on a day's vacation; at Judge Kohlsaat's suggestion, affiant then attempted to have a re-hearing before Judge Sanborn but was unable to secure a day's hearing in September during which time the work had been vigorously prosecuted and a large portion of the street torn up and rendered unfit for use. Affiant further states that owing to the fact that this street had been torn up and

tendered impossible for traffic, affiant realized that it would be impossible to secure the issuance of a preliminary injunction to prevent the further prosecution of the work at that time, and the application for said injunction was, therefore, never argued; affiant further states that before further legal steps were taken in this case the contractor to whom the contract for the improvement of Michigan Boulevard had been awarded, compromised and settled its differences with complainant and accepted a license acknowledging the validity and agreeing to use the patent of complainant in further construction of street pavements; that, therefore, the complainant dismissed its suit against South Park Commission and Metropolitan Construction Company, the matter having been settled and adjusted."

#### Another View of Same Case.

With reference to this Chicago case, Linn White, Chief Engineer of the South Park Board of Chicago, Illinois, in an address before the Civil Engineers' Society of St. Paul, on April 7th, 1913, says:

"Some litigation was had in Chicago with the Bituthylic Company, of which the following is a brief statement: In 1909, when the South Park Commissioners let a contract for paving Michigan boulevard from 12th to Jackson with asphaltic concrete, the Bituthylic Company sought an injunction in the Federal Circuit Court. The injunction was denied by one judge but under appeal the majority of the case was reopened before another Federal judge in the same circuit. The injunction was again denied, and as this left the case before the Court in such a shape that any further action would have to be a trial on its merits, the complainants dismissed the complaint and no attempt has since been made to renew it. To reach this partial conclusion in the court is the best result, and, of course, before then the contract over which the litigation started was completed and the pavement in use. The South Park commissioners, however, had proceeded to lay other considerable quantities of similar pavement and if good grounds for an injunction had been shown the result would have been to force them to come to terms with the Bituthylic Company and account for royalties in both past and future work. Up to date, considerably over a million yards of asphaltic concrete pavement has been laid in Chicago, and the royalties would amount to a considerable sum."

#### Committee on Law Points.

From the facts as your committee has been able to obtain them, it would seem, with the possible exception of the Chicago case that the patent has been fully sustained in the courts. It is also a noteworthy fact that the alleged Washington anticipation before the Court in the Chicago case has been held by other courts not to be considered anticipations.

Of course, as your committee has heretofore intimated, the question of the Warren patents has not been fully closed and probably never will be, for it is always open to the introduction of evidence of new alleged anticipations that have never been before the courts.

#### Advises Against Litigation.

However, for this county to litigate with the Warrens the validity of their patent would mean protracted litigation, which would greatly delay highway construction.

#### Main Point Is Ultimate Cost.

After all, the point is not whether the Warren patent is valid, but whether the Warren pavement, with the royalty to be paid in connection with their original cost plus maintenance, is the cheapest pavement in the long run for the county.

#### Patent on Flush Coat.

There now remains to be disposed of the question of Warren's patent for their flush coating process.

This patent is No. 69,422, which must be taken with their patents for machine for spreading the flush coat, which are Nos. 741,726 and 691,708. All these patents were sustained by the United States District Court for the Western District of Texas, El Paso Division, by a decree entered in the case of Warren Bros. Co. vs. John Eubank et al. entered on the 15th day of April, 1915. Whether this suit will be appealed we are unable to state. This seems to be the only case in which the just above named patent rights have been litigated.

#### Discusses Hassam Patents.

In conclusion on the subject of patents, we desire to discuss the letters patent for the Hassam pavement.

These bear serial Nos. 819,652 and 831,625. These patents were sustained in the District Court of the United States for the District of Oregon by a decree in the case of Hassam Paving Co. et al. vs. Consolidated Contract Co. et al. This decree was filed April 27, 1914. We understand that this suit has been appealed to the United States Circuit Court of Appeals and is now pending there. As far as we have been able to find, the above suit is the only one in which the Hassam pavement has been in litigation.

#### Wood Block Should Be Tried.

During these hearings your committee took the testimony of several gentlemen interested in wood block pavements. However, we understand that the trustees of the Chamber of Commerce have passed a resolution favoring a trial of wood block pavement. Under these circumstances, your committee feels that the trustees have acted upon the special matter of wood block pavement so that little need be said further than what has been heretofore in this report said concerning the general type and behavior of such pavements.

Your committee is unanimous that experiment be made with wood block; however, we think that the experimental pavement should be confined to units of one mile each and on different roads, and that the experiment be limited to three miles of wood paving. In view of the fact that this pavement in its cost will exceed other standard types, it is thought advisable that the difference in cost be taken care of by those interested in the wood block pavement.

#### Here Are Main Recommendations.

As a general recommendation, your committee recommends that on grades and sharp curves either brick or Belgian blocks be employed; that if a Belgian block pavement can be laid as cheaply as a vitrified brick pavement on grades and curves, that stone blocks be employed in preference to brick, as it will furnish an avenue for the employment of an Oregon product.

Your committee further recommends that the Warren pavement be employed on the majority of the mileage for the contemplated hard surface improvements of the county.

In arriving at this conclusion your committee hesitated somewhat in this recommendation as against an asphaltic concrete pavement of the Topeka specifications, and its preference for Warrenite over Topeka is due to the fact that it has been unable to ascertain what the cost of maintenance of the Topeka pavement would be, measured by the minimum period of 15 years, which your committee believes should be the basis for determining the maintenance charge.

If, however, a pavement of the Topeka specifications is to be considered,

the question of type of foundation becomes an important one. It would seem to your committee that this pavement, if requiring a new foundation, should have a foundation of either a concrete base or the bituminous base which, of course, would eliminate a crushed rock base.

Your committee is of the opinion, however, that if the Topeka specification pavement were to be used on the roads at the present time improved with macadam that the macadam base would furnish a sufficient foundation for this pavement. To again emphasize the point of your committee, it eliminates asphaltic concrete of the Topeka specifications and gives preference to Warrenite purely upon the ground of lack of information with reference to the probable life and cost of maintenance of the pavement of the Topeka specifications.

During our investigations it was stated to us by a member of the firm of Warren Bros. that it was the policy of their company, when their pavement was used, not to exact royalty for future flush coating or for repairs with the Warren mixture. This, of course, should be reduced to contract form so that there can be no possible misunderstanding upon this point. The opportunity for the county to avail itself of such privileges if it may so desire, without the payment of royalty, of course is of vital importance.

Your committee is unable to recommend the use of sheet asphalt pavement on the county highways owing to the fact that when damp it is extremely slippery; also, your committee is convinced that the cost of repairs for this type of pavement is comparatively high.

Your committee at this time, does not deem it necessary to discuss the question of a separate maintenance contract for the pavements after they are once laid, as it understands that this matter has been satisfactorily disposed of by asking for bids for maintenance under a contract separate from the specifications that call for bids for original construction.

#### Confidence in John B. Yeon.

In conclusion, your committee takes this opportunity to express its confidence in the honesty and integrity of Mr. John B. Yeon, roadmaster of the county. Mr. Yeon, without compensation, is giving all his time and abilities to this very commendable plan of constructing a permanent highway system. Your committee has found him well grounded and informed on the subject of pavements, and it is the opinion of your committee that the only motive Mr. Yeon has in his views and activities is that of obtaining the very best pavement for the least amount of money. By this we do not mean the cheapest pavement in first cost, but the pavement that will ultimately be the cheapest. Whether Mr. Yeon is mistaken in his conclusions, whether your committee is mistaken in its conclusions, can only be revealed by the future.

But, of this, we are certain—that everybody concerned in this paving problem who is entirely disinterested has been and is now seeking to get the very best available pavement for the county, because it is realized that in so doing the county will be furnish-

ing an object lesson which will be an incentive to depart from the unwise policy of the past, which has resulted in throwing money away for useless macadam roads.

Respectfully submitted,

F. W. MULKEY, Chairman,  
RODNEY L. GLISAN,  
FRANK MC CRILLIS.

#### NOTES FROM CHILE.

[Commercial Attache Verne L. Havens, Santiago, April 23.]

#### Supplies for Government Railways.

The Chilean Government railways have asked for bids on spare parts of cars and locomotives, such as tires, axles, springs, and bolts. The bids close on July 17, 1915, and representatives of several North American manufacturers are on the ground. It is interesting to note that the material "shall be in accordance with the specifications of the Pennsylvania Railroad Co. if it comes from the United States and with the standard British specifications if it comes from England." The National Railways ask for bids to be opened on July 27 at the Alameda Station Material Department, Santiago, for 4,600 car axles and 1,410 locomotive tires; also 6,850 volute car springs and 3,020 spiral car springs, according to Pennsylvania Railway specifications. Local representation is necessary.

The Government Railways will also open bids on July 27, 1915, for 1,000 kilos (2,204.6 pounds) of sheet asbestos one-eighth of 1 inch thick, 146 kilos (322 pounds) one-fourth of 1 inch thick, and 100 kilos (220.46 pounds) three-eighths of 1 inch thick. At the same time bids will be opened for 7,520 quarts of varnish, 7,800 kilos (17,196 pounds) of wire nails, 1,500 meters (4,921 feet) of leather belting, and 250 meters (820 feet) of camel's-hair belting. Many minor articles are also specified. In many cases samples, comparisons with the material in use, and personal knowledge of conditions are necessary before one could bid satisfactorily. The Government Railway will open bids on all electrical fixtures and spare parts for use in 1915 at the office of the material department, Alameda Station, Santiago, on July 30. There are many articles for telegraph and telephone and lighting.

#### WOOD-BLOCK PAVING IN CANADA.

[Consul Julius D. Dreher, Toronto, June 19.]

The Dominion Department of the Interior has established in connection with the Forestry Branch a forest products laboratory. This institution is constantly at work testing woods for paper making, building, furniture, etc. An investigation of the use of wood for block paving has just been completed and the results issued in a pamphlet entitled "Treated Wood-Block Paving." This gives the latest facts and figures in regard to wood paving in Europe and America and removes many misconceptions. It shows the points to be guarded to secure the best results. All citizens interested in wood-block paving may have a copy of this pamphlet sent free by writing to the Director of Forestry, Ottawa, Canada.

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$35,000. Architects, O'Brien Bros., 240 Montgomery St., S. F. Owner's name withheld. The building will be erected at the northwest corner of Pierce and Golden Gate, having a frontage of 137½ feet on Pierce and 35 feet on Golden Gate avenue. Interior has been arranged to contain a total of 24 suites of two rooms and bath. Interior will be finished in hard pine, mahogany and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat, an automatic elevator and hot water system. All suites will have wall beds. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance lobby. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$15,000. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner, Mrs. Eichler. The building will be erected on Waller street, 100 feet west of Webster, and has been designed for twelve suites of three and four rooms. Interiors will be finished in pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. All suites will have wall beds and private bath rooms. Tile floors and wainscot will be used in the baths. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 4 story and base, Class C construction. Cost not stated. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. The building will be erected on the east side of Hyde street north of Sutter, and has been designed to contain nine suites of four rooms and bath. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living rooms, dining rooms and entrance halls. There will be steam heat, an automatic elevator and hot water system. Bath rooms will have tile floors and wainscot. Marble and tile wainscot will be used in the lobby, together with ornamental plaster. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, George W. Mensor. The building has been designed to contain six suites of four rooms and bath, and will be erected on the south side of Washington street east of Steiner. The building

will have a frontage of 25 feet and a depth of 127½ feet. Interior will be finished in pine, Philippine mahogany and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water system. Exterior will be covered with asbestos stucco on metal lath. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 5 story and base, Class C construction. Cost not stated. Architects Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. The building will be erected on the north side of Post street between Taylor and Jones, and has been designed for two stores on the first floor besides a large and attractive entrance, lobby and dansant. Upper four floors will contain 27 apartments of two and three rooms. Each apartment will have a private bath and wall beds. Interior will be finished in southern gum, mahogany and white enamel. Hardwood floors will be used in the living and dining rooms. Bath rooms will be finished in tile. Marble and ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Apartment houses, 2, 2 story and base, frame, \$8,000 each. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Clyde Investment Co. The building will be erected on the east side of 3rd avenue east of 14th. Each building will contain six apartments of three rooms and bath. Interiors will be finished in pine with some elm panels and hardwood floors. Bath rooms will have tile wainscot. There will be automatic water heaters. Exteriors will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Apartment house, 4 story and base, brick, \$65,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner, Edward Sommarstrom. The building will be erected on the east side of Alice north of 14th and has been designed to contain a number of two, three and four room suites. Interior finish will be of pine with some hardwood. Hardwood floors will be used in the living and dining rooms. Plans provide for steam heat, a hot water system and automatic elevator. Bath rooms will be finished in tile. Marble and tile wainscot will be used. All suites will have wall beds. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SEATTLE, WASH.**—Apartment house, 3 story and base, brick or reinforced concrete, \$75,000. Architect, J. F. Everett, Boston Bldg., Seattle. Owner, West Wheeler, Colman Bldg., Se-

attle. The building will be erected at the southwest corner of 14th avenue and Marion street, covering an area of 60 by 120 feet. Apartments will be arranged in suites of two, three and four rooms. Interior will be finished in pine and hardwood veneer with some hardwood floors. Plans provide for steam heat, automatic elevator, vacuum cleaning and a hot water system. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick or cement plaster. Plans are complete and figures will be called for at once.

## Contracts Awarded

**SEATTLE, WASH.**—Apartment house, 3 story and base, brick veneer, \$65,000. Architect, J. A. Creutzler, New York Block, Seattle. Owner, F. F. Adams. Contractors, Johnson & Odin, Mutual Life Bldg., Seattle. Contract price, \$65,000.

## BANKS

## Contracts Awarded

**VANCOUVER, B. C.**—Bank and offices, 3 story and base, reinforced concrete, \$150,000. Architects, Somervell & Putman, White Bldg., Seattle, Wash. Owners, Merchants' Bank of Canada. Contractors, Prudy & Henderson, Henry Bldg., Seattle. Contract price, \$150,000.

## BRIDGES AND DAMS

**BERKELEY, ALAMEDA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. A resolution of intention providing for the construction of a reinforced concrete bridge 40 feet 4 inches wide and 106 feet 6 inches long, with retaining end and wing walls, two 12-inch by 18-inch inlets and 8-inch pipe connections, four metal one-light electrolliers, fitted with 6-inch by 11-inch globes, together with electric conduit, outlet boxes and necessary wiring, all to be constructed in Walnut street from a point 80 feet north of Berryman street over Codornices Creek in the City of Berkeley, has been passed to print by the City Council. Bids will be called for shortly.

**PIT RIVER, SHASTA CO., CAL.**—Bridges, 5, reinforced concrete. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed and figures are now being taken for the construction of the Pit River bridge, a 335-foot structure, and four other small bridges to be erected along the right-of-way of the state highway in Shasta County. Bids for the work will be opened on July 19th. Plans and specifications can be secured from the office of the State Highway Commission.

**RED BLUFF, TEHAMA CO., CAL.**—Bridge, reinforced concrete and steel.

Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. When the Board of Supervisors met to open bids for the construction of three bridges across sand sloughs in Tehama County, District Attorney Gernon advised them they could not legally enter into contracts during this fiscal year for the work to be paid out of funds from taxes during the fiscal year 1915-16. The seven bids received were returned and new figures will be called for during July. The total cost of the three bridge will be about \$250,000. The contractors submitting bids on the work stated that the steel bridge with an 8-foot span will cost, complete, about \$200,000. A concrete girder type in the neighborhood of \$150,000, while a combination arch and girder will cost about \$170,000.

MARYSVILLE, YUBA CO., CAL.—Highway bridges, 3 reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Marysville. Owners, Yuba County. Plans have been completed and figures are now being called for the construction of three highway bridges in Yuba County. The Best Slough bridge will be 120 feet long, the Dry Creek bridge 200 feet, and the Grasshopper bridge 80 feet. Bids will be opened on July 14th. Plans and specifications can be secured from the County Clerk.

DUNSMUIR, SISKIYOU CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on July 19th by the State Highway Commission for the construction of a large reinforced concrete bridge over the Sacramento River at Dunsmuir. The structure will be 532 feet long with a clear span of 180 feet. Plans and specifications can be secured from the State Highway Commission.

HEALDSBURG, SONOMA CO., CAL.—Dam, reinforced concrete. Cost not stated. Engineer, none. Owners, Sonoma County. A subscription list for funds with which to build a dam in the Russian River this summer is being circulated in Healdsburg and vicinity. The Northwestern Pacific Railroad Company has contributed together with many other concerns in favor of the proposition.

PETALUMA, SONOMA CO., CAL.—Wharf, timber construction. Cost not stated. Engineer, none. Owner, Dr. Macleay. Petaluma. Work has been started by William Call on the construction of a wharf for Dr. Macleay. The structure will be 1,200 feet long, commencing at the Vosen warehouse and extending to the Steamer Gold landing. The piles for the work are now on the ground and the work will be rushed to completion.

NAPA, NAPA CO., CAL.—Bridge repairs, \$2,000. Engineer, City Engineer, Napa. Owners, City of Napa. At the last meeting of the Council the City Engineer was instructed to prepare plans and specifications for repairing the Third street bridge, which will cost in the neighborhood of \$1,000 and the electric road \$550. The plans will be presented at the next meeting of the Council, when a call for bids will be probably issued.

SEATTLE, WASH., Dock addition, frame and concrete, \$50,000. Engineer,

Chief Engineer J. R. West, Seattle. Owners, City of Seattle. Plans are now being prepared for the construction of two additions of four stories each to the present dock building. Plans will be complete in about 30 days and figures will be called. Further mention will be made of the work.

PORTLAND, ORE.—Viaduct, reinforced concrete and steel. Cost not stated. Engineer, Commissioner of Public Docks, Worrester Bldg., Portland. Owners, City of Portland. Plans are being prepared for a viaduct 20 feet wide and 180 feet long to be erected over 17th street. Plans will be completed shortly when further mention will be made of the work.

FRESNO, FRESNO CO., CAL.—Bridge, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. The Fresno County Supervisors have decided after long arguments by representatives of the Stinson-Burrell Reclamation District, to build a 110-foot concrete bridge over Fish Slough on the Elkhorn grade, instead of a 200-foot bridge as asked by the Reclamation District. Bids on this work will soon be called for.

VISALIA, TULARE CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Visalia. Owners, Tulare County. Plans are complete and bids are now being taken for the construction of a reinforced concrete bridge over Cameron Creek in the Second Road District. Bids will be opened on July 16th. Plans and specifications can be secured from the County Clerk at Visalia.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Bridge, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Santa Barbara. Owners, Santa Barbara County. Bids opened by the City Council for the construction of the Carrillo bridge which will span the Mission Creek, are as follows: A and B denotes where wood and concrete piles are bid respectively. Munoz & Munoz, L. A. Mayberry & Parker plans, (b) \$17,771; city plans (b) \$18,973. Mann & Knox, M. & B. plans, (b) \$15,945; city (b) \$19,750. Flaherty, \$19,682; Leonard & Day, \$19,242. Boardman Construction Co., L. A., M. & P., (a) \$19,158; (b) \$18,958; city (a) \$21,274; (b) \$21,076. Flaherty \$19,658; L. & D. \$21,365. Mesner & Rice, L. A., M. & P. plans (a) \$20,661; (b) \$21,273; city (a) \$20,979; (b) \$25,588. F. O. Engstrom Co., L. A., M. & P. plans (a) \$16,543; (b) \$166,652; city (a) \$19,043; (b) \$19,452. E. A. Carland, M. & P. plans (a) \$20,435; (b) \$20,625; city (a) \$21,700; (b) \$21,800. Mercereau Bridge and Construction Co., L. A., M. & P. plans (a) \$18,394; (b) \$18,967; city (a) \$22,421; (b) \$22,878; L. & D. plans, \$26,450. Putnam & Stone, Pasadena, M. & P. plans (a) \$22,400; (b) \$22,000; city (a) \$28,000; (b) \$27,100; Flaherty \$24,200. The bids have been referred to the City Engineer for report.

#### Contracts Awarded

RED BLUFF, TEHAMA CO., CAL.—Bridge, timber and concrete, \$1,250. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, C. E. McCarthy and F. W. Haskell, Red Bluff. Contract price, \$1,250.

COLUSA, COLUSA CO., CAL.—Bridge repairs, steel and concrete, \$50,000. En-

gineer, County Surveyor, Colusa. Owners, Colusa County. Contractors, Missouri Valley Bridge and Iron Works, Leavenworth, Kans. Contract price, \$50,000. This contract is subject to the approval of the receivership of the Northern Electric Co.

MAYFIELD, WASH.—Bridge, steel and concrete, \$28,888. Engineer, City Engineer, Mayfield. Owners, City of Mayfield. Contractors, Beers Building Co., Portland. Contract price, \$28,888.

PORTLAND, ORE.—Dock construction, timber and concrete. Cost not stated. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. Contractors, J. A. McEachern Co., Coman Bldg., Portland. Contract price not stated.

LINN, LINN CO., ORE.—Bridge, steel, \$13,383. Engineer, County Surveyor, Linn. Owners, Linn County, Oregon. Contractors, Pacific Iron Works, Portland. Contract price, \$13,383.

SALINAS, MONTEREY CO., CAL.—Bridge, steel and concrete, \$29,030. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractors, W. L. Gillham & Son, 112 West Santa Clara street, San Jose. Contract price, \$29,030.

BURLINGAME, SAN MATEO CO., CAL.—Bridges, 10, concrete, \$20,125.93. Engineer, City Engineer, Burlingame. Owners, City of Burlingame. Contractors, Eaton & Smith, S. F. Contract price, \$20,125.93.

#### BONDS

PETALUMA, SONOMA CO., CAL.—The N. W. Halsey Company has purchased the \$70,000 State Highway bonds of Sonoma County. The company bid \$67,212.50.

SAN JACINTO SCHOOL DISTRICT, RIVERSIDE CO., CAL.—An election will be held on July 10th to vote bonds of \$25,000 for school betterments.

VISALIA, TULARE CO., CAL.—Both Bond propositions carried at a special election called here. The proposition for bonds of \$65,000 for extending the sewer system carried by a large majority as did the bonds for the municipal auditorium, which is estimated to cost \$50,000.

ARBUCKLE, COLUSA CO., CAL.—Bonds of \$1,000 have been voted for school betterments.

DUNSMUIR, SISKIYOU CO., CAL.—Bonds of \$25,000 have been sold to a San Francisco firm, and the work of paving the streets that will form a link in the State Highway will soon be underway.

CUTLER SCHOOL DISTRICT, TULARE CO., CAL.—Bonds of \$8,500 have been sold by the Supervisors and a new school building will be erected for the Cutler School District.

BAKERSFIELD, KERN CO., CAL.—The Bakersfield Water Company has been authorized to issue \$25,000 second mortgage bonds, proceeds to be used in improving the system.

LOS ANGELES, CAL.—The Los Angeles City Council has purchased \$392,047.50 worth of power bonds from interest and sinking funds. The bonds were of the \$6,500,000 issue of May 8, 1913, which provide for the construction of power plants in San Francisco canyon, and the construction of

a high voltage power line from there to the city.

**CALEXICO, IMPERIAL CO., CAL.**—An election to vote bonds of \$74,000 to provide for the erection of new school buildings, repairing and the purchase of equipment, will be voted on July 21st by the voters of the Calexico School District.

**SACRAMENTO, CAL.**—George B. McDougall, State Architect, has submitted a report to Edward Hyatt, State Superintendent of Instruction, condemning the San Jacinto grammar school in Riverside County. The county authorities will take up the matter of building a new school at once, according to Hyatt.

**SAN RAFAEL, MARIN CO., CAL.**—A campaign has launched by the Central Marin Chamber of Commerce and the local City Council for the purpose of calling a \$25,000 bond election. If carried the amount will be added to the State appropriation of \$12,500 for the dredging and straightening of San Rafael canal. The expenditure has been recommended by the Congress Rivers and Harbors Committee.

**NAPA, NAPA CO., CAL.**—The Moose Lodge has appointed a committee, which has viewed sites in Vallejo and Napa with the intention of locating a home. The committee, composed of San Francisco members of the order, will submit a report to the Grand Lodge, who will render a decision as to the establishment of the proposed home.

**RED BLUFF, TEHAMA CO., CAL.**—The committee appointed to consult with the High School Trustees regarding additional accommodations for the local school met and adopted a resolution recommending that the Trustees call a special election to vote upon the proposition of bonding the Union High School District for the sum of \$90,000.

This recommendation was the substance of a report made by a subcommittee appointed to look into the details of the requirements for a new building.

Plans have already been submitted for an addition to the present building, that will cost, including furniture and gymnasium equipment, about \$86,000.

**LAVE OAK, SUTTER CO., CAL.**—Bonds of \$5,000 to provide for an addition to the present school building have been voted.

**BARRY SCHOOL DISTRICT, SUTTER CO., CAL.**—Bonds of \$5,000 have been voted for making additions to the present grammar school.

**FORTUNA, HUMBOLDT CO., CAL.**—The Board of School Trustees are advertising for bids for a site of not less than ten acres on which they will erect a new high school building. A bond issue will be called in the near future.

**PINAL COUNTY, ARIZ.**—By a vote of more than five to one the proposed \$150,000 bond issue to provide funds for the construction of a bridge across the Gila River at Kelvin and Winkelman has been approved by the taxpayers of the county.

**DIXIE, TULARE CO., CAL.**—An effort is being made by residents in Dinuba to urge the school trustees in building a new high school. It is thought that bonds of \$10,000 or \$15,000 will be voted to cover the cost of construction of the proposed building.

**CALEXICO, IMPERIAL CO., CAL.**—The voters of Calexico will be asked to vote on a bond issue to the amount of \$75,000 for two new grammar school buildings. One of the new buildings will replace the present grade school which was totally destroyed by earthquake; the other building contemplated is needed to care for the increasing population in the district. Architects Allison & Allison, Hibert & Allison Bldg., Los Angeles, have been commissioned to prepare plans for the new buildings.

**HUNTINGTON BEACH, ORANGE CO., CAL.**—An election will be called soon at Huntington Beach to vote bonds of \$75,000 and \$100,000 for a new high school building. Architect John C. Smith, 325 H. W. Hellman Bldg., Los Angeles is preparing sketches for the proposed structure.

**BEAUMONT, RIVERSIDE CO., CAL.**—The Beaumont School District has voted bonds in the sum of \$20,000 for the erection of a new school building at Beaumont.

**EL CENTRO, IMPERIAL CO., CAL.**—Arthur Shepard, chairman of the Board of Supervisors, is advocating the calling of a special election to vote bonds in the sum of \$250,000 for county improvements. It is desired to raise \$150,000 for the erection of a new county court house, \$35,000 for a new jail, and the remainder of the funds to be used in the construction of the bridges required on the State Highway.

**MOORPARK, CAL.**—The Moorpark Mutual Water Company will issue bonds of \$25,000 to provide funds for the extension of their water system.

**LUNA COUNTY, N. MEX.**—Petitions are being circulated in Luna County, N. Mex., praying the Board of County Commissioners to call an election for the purpose of voting a bond issue of \$100,000 for improvement of highways.

**REDWOOD CITY, SAN MATEO CO., CAL.**—The election held to vote bonds of \$7,500 to provide for an auto chemical engine and other apparatus carried by a vote of four to one.

## COURT HOUSES.

**CRESCENT CITY, DEL NORTE CO., CAL.**—Court house addition, 2 story, frame and plaster, \$25,000. Architects, Ackerman & Reese, Eureka. Owners, Del Norte County. Plans have been approved for a two-story addition to the present county court house. The new portion of the building will contain a court room, judge's chambers, jury room, lavatory rooms and store room. Interior will be finished in pine. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

## FIRE HOUSES AND JAILS.

**CRESCENT CITY, DEL NORTE CO., CAL.**—Jail, 1 story and base, reinforced concrete. Cost not stated. Architects, Ackerman & Reese, Eureka. Owners, Del Norte County. Preliminary plans are being prepared for a one-story jail building. Interior will be finished in pine. There will be special cell work, a steam heating system and hot water system. Exterior of the

building will be faced with cement plaster. Further mention will be made of the work when bids are called.

## FACTORIES AND WAREHOUSES.

**SAN FRANCISCO**—Laundry, 1 story, frame, \$5,000. Architect, J. T. Quinn, 317 Noe street, S. E. Owner, E. B. Carr, 331 Noe street, S. E. The building will have a cement floor. Interior will be finished in pine. Considerable special machinery will be installed. The contract will also include alterations to a frame building in the rear of the property. Exterior will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Bakery, 2 story and base, frame, \$15,000. Architects, Hutchinson & McLean, 470 12th street, Oakland. Owners, Robertson & Losh. The building will be erected at the corner of 25th and Broadway, and will cover a considerable ground area. Interior will be finished in pine. There will be special machinery and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Factory, 1 story, frame and corrugated iron. Cost not stated. Architect, none. Owners, Whiff's Manufacturing Co., 565 Gough street, S. E. The building will cover a considerable ground area. No interior finish is specified. There will be a cement floor. Special machinery will be installed. Exterior of the building will be covered with corrugated iron. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**SANTA CLARA, SANTA CLARA CO., CAL.**—Municipal gas works' storage tanks, etc. Cost not stated. Engineer, City Engineer, Santa Clara. Owners, City of Santa Clara. Thirteen bids were received by the City Trustees for six high pressure storage tanks, one single stage gas compressor and two high pressure gas radiators and strainers for the municipal gas works. All bids were taken under advisement until the next meeting.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Warehouse, 1 story frame, \$5,000. Architect, Joseph Losekann, San Joaquin Bldg., Stockton. Owners, Pacific Tannery Co. The building will cover an area of 70 by 100 feet and will be erected on Fremont street between El Dorado and Hunter. No interior finish will be used. Exterior of the building will be covered with corrugated iron. Plans are complete and figures are being taken.

**COLUSA, COLUSA CO., CAL.**—Rice mill, 2 and 1 story, mill constructed, \$10,000. Architect's name not given. Owner, W. H. Packard, Colusa. It has been definitely decided to accept W. H. Packard's suggestion for the erection of a large rice mill in Colusa. It will take \$10,000 to build the proposed building and install the machinery. The money will be raised at once so as to have work on the structure start in the near future. According to information received the new building will be four stories high, while the freight

department and offices will be two stories of brick and mill construction.

**PORTLAND, ORE.**—Dock building, 1 story, reinforced concrete. Cost not stated. Engineer, Commissioner of Public Docks, Worcester Bldg., Portland. Owners, City of Portland. The building will be erected on property adjoining Municipal Dock No. 1. The dock building will be 330 feet long and 176 feet wide. Plans provide for a 4-ply asbestos roof and sprinkling system. The floors will be of concrete, as well as the piling and fire walls. Plans are being prepared.

#### Contracts Awarded

**MARTINEZ, CONTRA COSTA CO., CAL.**—Dephlegmator building, 2 story, steel frame. Cost not stated. Engineer, Engineering Dept. Shell Oil Co., 313 Sansome street, S. F. Owners, Shell Oil Co. Contractors, Gutleben Bros. New Call Bldg., S. F. Contract price not stated.

#### FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$8,500. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 263 14th avenue, S. F. The building will be erected at the southwest corner of Palm avenue and Euclid street, and has been designed to contain four modern flats of five rooms and bath. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms and reception halls. There will be a central heating system and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot. Exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

#### GARAGES

**SAN FRANCISCO**—Garage, 1 story, steel and concrete, \$2,500. Engineer, Engineering Dept. Shell Oil Co., 313 Sansome street, S. F. Owners, Shell Oil Co. The building will be erected on the company's property on Kentucky street between Army and Marin. There will be a cement floor. Exterior will be covered with corrugated iron. Plans are complete and figures are being taken.

#### GOVERNMENT WORK & SUPPLIES

##### Topock, Ariz., Steel Bridge.

The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., for constructing a steel bridge over the Colorado River near Topock, Ariz.:

The Kansas City Structural Steel Co., Kansas City, Mo., \$61,950; time, 150 days.

The Ross Construction Co., Sacramento Cal., \$94,872; time, 150 days.

Security Construction Co., Los Angeles Cal., \$71,450; time 150 days.

The Graff Construction Co., Seattle, Wash., \$53,150; time 150 days.

S. B. Harding, Webster Building, Chicago, Ill., \$78,900, informal.

The Virginia Iron Co., Roanoke, Va., \$70,100; time, 200 days.

Missouri Valley Bridge and Iron Co.,

Leavenworth, Kans., \$71,000; time, 150 days.

Omaha Structural Steel Works, Omaha, Neb., \$85,331; time, 250 days.

California Construction Co., San Francisco, Cal., \$72,500; 200 days.

The Midland Bridge Co., Kansas City, Mo., \$73,900; 300 days.

#### Lighthouse Service, Cement.

The following bids were received by the lighthouse inspector, 16th district, Ketchikan, Alaska for 200 bbls cement for Cape St. Elias:

W. F. Jahn & Co., Seattle, Wash., \$300.

Gabraith, Bacon & Co., Seattle, Wash., \$768; accepted.

#### Fort Worden, Concrete Wharf.

The bid of John J. Stockland, \$795 in amount, has been accepted for the construction of a concrete wharf at Fort Worden, Wash.

#### San Francisco, Cal., Mint, Wiring System.

The contract for installing a conduit and wiring system in the U. S. mint, San Francisco, Cal., has been awarded to Possett & Wilhelm, Denver, Colo., at \$6,200; time, Sept. 13.

#### Fort Worden, Wash., Building.

The contract for the construction of a concrete militia storehouse at Fort Worden, Wash., has been awarded to H. A. Cotton at \$1,300.

#### HOSPITALS

**CRESCENT CITY, DEL NORTE CO., CAL.**—Hospital, 1½ story and base, frame. Cost not stated. Architects, Ackerman & Reese, Eureka. Owners, Del Norte County. The building has been designed to contain two wards and several private rooms. Interior will be finished in pine and redwood. Modern hospital plumbing and a central heating system will be installed. Exterior will be covered with shingles. Plans are being prepared and further mention will be made of the work.

#### Contracts Awarded

**PORTLAND, ORE.**—Hospital, 2 story and base, hollow tile, \$14,000. Architects, Tourtelotte & Hummell, Rothchild Bldg., Portland. Owners, Emanuel Hospital Association. Contractor, J. A. Blackstrand, Chamber of Commerce Bldg., Portland. Contract price, \$11,000.

#### HOTELS.

**SEATTLE, WASH.**—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, J. P. Everett, Walker Bldg., Seattle. Owners, West & Wheeler. The building will be erected at the southwest corner of Marion and 4th avenue, covering an area of 55 by 120 feet. Foundations and walls have been designed for additional stories. The building will be arranged for a large number of single rooms and baths. Interior will be finished in pine with some hard wood veneer. There will be steam heat, an automatic elevator and hot water system. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**MCCLOUD, SISKIYOU CO., CAL.**—Hotel, 2 story and base, frame, \$25,000. Architects, Dooliver & Swain, Royal Insurance Bldg., S. F. Owners, McCloud River Lumber Co. The building has been designed to contain a total of 70 rooms, several baths, dining room and office. Interior will be finished in pine. There will be steam heat and a hot water system. Exterior of the building will be covered with rustic. Plans are complete and the work is being done by Day Labor.

#### LIBRARIES.

**GRIDLEY, BUTTE CO., CAL.**—Library, 1 story and base, brick and steel. Cost not stated. Architect, Chester Cole, Chico. Owners, Town of Gridley. The building will cover an area of 40 by 44 feet, and has been designed in the classic style. Interior will be finished in pine with maple floors. Some metal stacks will be installed. There will be a central heating system, probably warm air. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**SACRAMENTO, CAL.**—Library, 2 story and base. Class A construction, \$100,000. Architect, Chief Building Inspector W. B. Rohl, Sacramento. Owners, City of Sacramento. Preliminary plans have been presented for approval for this building, which will be erected at the corner of 9th and I streets. Besides the usual rooms, the designer has provided for two large open air reading rooms. Details of construction cannot be given until the Library Trustees act on the plans. Further mention will be made of the work.

#### RAILROAD CONSTRUCTION AND EQUIPMENT.

**SILVERTON, ORE.**—Logging road, \$100,000. Engineer's name not given. Owners, Silver Falls Timber Co., Northwestern Bank Bldg., Portland. The Silver Falls Timber Co. has increased their capital stock \$10,000, which stock issue will be used in the construction of a logging railroad. The company has 26,000 acres of timber land near Silverton and has a 20 mile logging road in operation and the extension will be about 7 miles in a hilly country. Work on the road has been started.

#### Contracts Awarded

**RICHMOND, CONTRA COSTA CO., CAL.**—Spur track construction. Cost not stated. Engineer's name not given. Owners, Los Angeles Pressed Brick Co., J. H. Nicholl and John G. Gerlach. Contractors, Chadwick & Sykes, Crocker Bldg., S. F. Contract price not stated.

#### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architects, Foulkes & Hildebrand, Crocker Bldg., S. F. Owner, John H. Schroder. The dwelling will be erected at the northwest corner of Washington and Webster streets, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or

brick mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owners, George F. and Lucy S. Cleese, 524 27th avenue, S. E. The dwelling will be erected on the east side of 36th avenue south of Anza, and has been designed for a five-room house with bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place in the living room. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**OAKLAND, CAL.**—Residences, 2, 2 story and base, frame, \$4,000 each. Architect, none. Owner, C. M. MacGregor, 170 13th street, Oakland. These two houses will be erected on the north side of Mandana Boulevard west of Carleton, and each has been designed for a seven-room house with bath and sleeping porch. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, E. A. Hersam, 2568 Le Conte avenue, Berkeley. The dwelling has been designed for a seven room house with bath and sleeping porch, and will be erected on the Arden road. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms and reception halls. There will be a hot water heating system and open fire places. Mantels will be of brick. Bath room will be finished in German-stone. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$6,000. Architect none. Owner, Dr. Dowell, 515 Bellevue, Berkeley. The dwelling will be erected in the Lake Merritt District and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. There will be furnace heat and open fire places. Hardwood floors will be used in the living room, dining room and reception hall. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal

lath. Plans are now being prepared.

**BURLINGAME, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$1,000. Architect, Carl Geilfuss, 16 Kearny street, S. E. Owner's name withheld. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**SAN MATEO, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$6,500. Architect, Charles C. Frye, 20 Montgomery street, S. E. Owner's name withheld. The dwelling will contain nine rooms, three baths and sleeping porch. Interior will be finished in pine and redwood with some white enamel in the bed rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**COLUSA, COLUSA CO., CAL.**—Residence, 2 story and base, frame, \$7,000. Architect, F. E. St. John, Berkeley. Owner J. H. Sherer Colusa. The dwelling will contain nine rooms bath and sleeping porches. Interior will be finished in pine and hardwood with some white enamel in the bed rooms. There will be hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and the owner will take figures.

**ROSS VALLEY, MARIN CO., CAL.**—Residence, 1½ story and base, frame, \$1,000. Architect, Charles C. Frye, 20 Montgomery street, S. E. Owner's name withheld. The dwelling will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Residence, 2 story and base, frame, \$6,000. Architect, Joseph Loskann, San Joaquin Bldg., Stockton. Owner, Sheriff W. H. Ricks. The dwelling will contain eight rooms and two baths. Interior will be finished in pine hardwoods and white enamel. Hardwood floors will be used in the

principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**PORTLAND, ORE.**—Residence, 2½ story and base, brick veneer, \$15,000. Architect, none. Owner, H. M. Boya-John, Panama Bldg., Portland. The dwelling will be erected on Fairview Boulevard, and has been designed to contain ten rooms and three baths. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be a central heating system and open fire places. A hot water circulating system is also specified. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

#### Contracts Awarded.

**PORTLAND, ORE.**—Residence, 2½ story and base, brick and frame, \$30,000. Architect, Earle A. Roberts, Selling Bldg., Portland. Owner, J. H. Henry, Contractors, Trenchell & Parelius, Portland. Contract price, \$30,000.

**SEATTLE, WASH.**—Residence, 2½ story and base, brick veneer, \$60,000. Architects, Cutler & Malmgren, Spokane. Owner, J. T. Heffernan, 108 Railroad avenue, South Sacramento, Cal. Contractor, J. N. Johnson, 4273 Whitman avenue, Seattle. Contract price, \$60,000.

#### SCHOOLS.

**BERKELEY, ALAMEDA CO., CAL.**—University dormitory, 1 story and University dormitory, 4 story and base. Class A construction, \$800,000. Architect, John Galen Howard, 601 Mission street, S. E. Owners, Regents of the University of California. Victor Henderson, Secretary to President Wheeler of the University of California, states that working drawings for the dormitory building to be known as the Bend. L. Wheeler Building on the University Campus, have been completed. The building will be a four-story structure of steel and granite, and will cost in the neighborhood of \$800,000. Bids will be called for at once, according to the secretary. The secretary also states that plans for other important work to be carried out under the \$1,800,000 bond issue at the University are nearly complete, and that the balance of the year will see many of the new buildings under construction.

**BERKELEY, ALAMEDA CO., CAL.**—University buildings, 2, 1 and 2 story. Class A construction, \$750,000. Architect, John Galen Howard, 601 Mission street, S. E. Owners, Regents of the University of California. Architect John Galen Howard will shortly start working drawings for three more new buildings to be erected at the University of California in Berkeley. The \$1,000,000 fund bequeathed by Ernest V. Cowell is now available. The buildings will consist of a gymnasium,

student infirmary and a stadium. Further mention will be made of the work.

**SACRAMENTO, CAL.**—School additions, frame and concrete, \$20,000. Architect's name not given. Owners, City of Sacramento. Superintendent of Schools O. C. Hughes reported to the City School Board that the desired improvements in the Lincoln and Marshall schools will cost \$9,200 and \$1,700 respectively. The Board voted to ask the County Treasurer to sell \$20,000 of school bonds so the work may be done and other improvements made. It is the plan to put in four more rooms at the Lincoln and two at the Marshall.

**GALT, SACRAMENTO CO., CAL.**—School, 1 story and base, hollow tile frame. Cost not stated. Architect, Clarence C. Cluff, Ochsner Bldg., Sacramento. The building has been designed to contain six class rooms and an auditorium. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, probably steam heat and oil burning furnace. Slate blackboards will be used. Modern school plumbing is specified. Exterior of the building will be faced with cement plaster. Bids are now being taken for both frame and hollow tile construction, and on the work as a whole and with the heating and ventilating separate. Plans can be secured from the architect. Bids will be opened on July 17th.

**MARICOPA, KERN CO., CAL.**—School, 1 story and base, frame, \$15,000. Architects, Thomas B. Wiseman and Charles H. Biggar, Producers' National Bank Bldg., Bakersfield. Owners, Maricopa High School District. The building will cover an area of 50 by 90 feet and has been designed to contain class rooms, office and departments of domestic science and manual training. Interior will be finished in pine with some maple floors. There will be a central heating system and oil burning furnace. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**SANTA CLARA, SANTA CLARA CO., CAL.**—Convent, 2 story and base, reinforced concrete, \$100,000. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Carmelite Sisters. The building will be erected on property adjoining the Santa Clara College, and has been designed in the Spanish Colonial style. Interior will be arranged for a large chapel, living apartments and recreation rooms. Pine and hardwood tile and hardwood floors will be used. There will be steam heat and oil burning furnace, vacuum cleaning and hot water system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

#### Contracts Awarded

**PETALUMA, SONOMA CO., CAL.**—School clock system, \$1,200. Architects, Brainerd Jones, Petaluma. Owners, Petaluma School District. Contractors, Standard Electric Time Co., S. F. Contract price, \$11,300.

#### SEWERS, STREET WORK & WATER SYSTEMS.

**SAN FRANCISCO**—Boulevard construction, \$100,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. By resolution of the Board of Supervisors the Board of Public Works has authorized the City Engineer to prepare plans and specifications for the construction of the Ocean Beach Esplanade for which \$100,000 has been provided in the budget. This amount it is estimated will cover the cost of 100,000 feet of the proposed project southerly from the Cliff House.

**CALIFORNIA**—State Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans and specifications have been approved and bids will be opened on July 26th for the following highway work: Colusa, 0.5 miles asphalt, 55 feet wide; Marin, 4 miles, graded; Monterey, 11.7 miles, Portland cement concrete; Santa Barbara, 11.4 miles, graded, and San Luis Obispo, 10 miles, Portland cement concrete. Plans and specifications can be secured from the State Highway Commission at Sacramento or from its branch offices in San Francisco and Los Angeles.

**CALIFORNIA**—Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed and figures will be opened on July 19th for the construction of state highways in the following counties: Alameda, 5.8 miles, Portland cement concrete; Santa Clara, 8.9 miles, Portland cement concrete; Los Angeles, 4.9 miles, Portland cement concrete. Plans and specifications can be secured from the office of the Highway Commission in Sacramento or the branch offices in San Francisco and Los Angeles.

**SAN JOSE, SANTA CLARA CO., CAL.** Road improvements. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been completed for the improvement of Union avenue and Foxworth road in District No. 5, for the improvement of Ford road in District No. 2, and for the improvement of the Tully, White and Felipe roads in District No. 3. Bids are being taken and will be opened on July 19th. Plans and specifications can be secured from the County Clerk.

**SANTA CLARA, SANTA CLARA CO., CAL.**—Highway completion and paving. Cost not stated. Engineer, City Engineer, Santa Clara. Owners, City of Santa Clara. The town trustees are again considering the proposition of completing the state highway in Santa Clara. Nearly two miles of the road is uncompleted here. The paving question will also be brought up at the meeting of the town trustees.

**SALINAS, MONTEREY CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Salinas. Owners, Monterey County. Plans are complete and figures will be opened on July 15th for the improvement of the Monterey-Castroville road in the Alisal and Pajaro Road District. Plans can be secured from the County Clerk.

**SAN JOSE, SANTA CLARA CO., CAL.**—Furnishing cement. Cost not stated.

Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids will be opened on July 19th for furnishing and delivering 50,000 barrels of cement to be used in highway construction. Complete information can be secured from the County Clerk at San Jose.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Pipe line construction. Cost not stated. Engineer, Engineering Dept. Valley Pipe Line Co., 343 Sansome street, S. F. Owners, Valley Pipe Line Co. A supplemental order has been issued by the Railroad Commission authorizing the Valley Pipe Line Company to issue 18,975 shares of stock to the Anglo-Saxon Petroleum Company. The proceeds of the sale of this stock will be used in the construction of a pipe line from the property of the California Oil Fields, Ltd., near Coalinga, Fresno County, to Martinez, Contra Costa County.

**SAUSALITO, MARIN CO., CAL.**—Street and sewer work. Cost not stated. Engineer, Town Engineer Hohl, Sausalito. Owners, Town of Sausalito. Plans and specifications for the local improvement district "F," submitted by Town Engineer Hohl, have been approved. Bids on the work will soon be called for.

**SAUSALITO, MARIN CO., CAL.**—Street electroliners. Cost not stated. Engineer, Town Engineer Hohl, Sausalito. Owners, Town of Sausalito. At the last meeting of the Town Trustees, Town Engineer Hohl submitted plans for an electrolier system on Water street and Caledonia street, and the board will take it up at the July meeting. There will be 65 lights, 150-feet apart on each side of the street, and it is estimated that the cost per front foot will be about 40 cents.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street paving, etc. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans have been completed and figures are now being taken for the improvement of 10th street from Barrett to Pennsylvania. Bids will be opened on July 1th. Complete information can be secured from the City Clerk.

**WOODLAND, YOLO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Woodland. Owners, City of Woodland. Plans and specifications having been approved, the City Trustees have passed resolutions of intention for the paving of Main, from Third street to the Southern Pacific depot; North College, from Main to Beamer street, and South Third, from Main to Pandegast.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Pumping plant. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has rejected all bids submitted for the construction of the pumping plant for the new city park in the northwestern part of the city on account of the bids being too high. New bids will probably be called for.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewers and street work. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Specifications have been approved by the City Council for the sewerage of Harrison, Worth, Anderson, Jefferson and Jackson streets, as provided under Resolution No. 310, were approved.

Two other resolutions were also adopted. Both call for street improvements.

**CORNING, TEHAMA CO., CAL.**—Water system extension. Cost not stated. Engineer, City Engineer, Corning. Owners, City of Corning. Plans are complete and figures are being taken for extensive water system extensions. The work may be let as a whole or divided into the following parts: Sewer extension and water extension. Bids will be opened on July 16th. Plans and specifications can be secured on application to the City Clerk.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans are complete for 4, 6 and 8 inch vitrified salt glazed iron stone pipe sewers in Harrison and Jackson streets. Bids will be opened for this work on July 13th. Plans and specifications can be secured from the City Clerk.

**MODESTO, STANISLAUS CO., CAL.**—Irrigation Flume. Cost not stated. Engineer, F. C. Hermann, Modesto. Owners, Modesto Irrigation District. Plans and specifications prepared by Engineer F. C. Hermann of the Modesto Irrigation Board for the last of the big flumes which the Modesto Irrigation District is preparing to put in, were submitted to the directors and were approved. Bids will probably be called for at the next meeting of the directors. The Dry Creek is the last of the big projects. It will be 730 feet long, and will be constructed of reinforced concrete. The flume will be supported by concrete pillars. The width of the flume will be 18 feet and depth 9½ feet. The greatest elevation will be 40 feet. A sand box at the upper end of the flume will stop the sand which at present clogs the lower stretches of the main canal and costs the district about \$2,000 annually for removal. A spillway will be arranged as an outlet to Dry Creek. The approximate cost of the structure is \$75,000.

**OAKDALE, STANISLAUS CO., CAL.**—Irrigation tunnel, \$50,000. Engineer, Burton Smith, Oakdale. Owners, Oakdale Irrigation District. Plans are being prepared by the Oakdale Irrigation District for an 8,000-foot tunnel to be bored through Cape Horn and water all the north side of the irrigation district. By the construction of the tunnel Chief Engineer Burton Smith figures that the district can do away with the maintenance of eight miles of ditches and flumes.

**MONO LAKE, MONO CO., CAL.**—Irrigation dam, reinforced concrete, \$250,000. Engineer's name not given. Owners, private capital. Duncanson-Harrelson Co., Chronicle Bldg., S. F., has been awarded the contract for the construction of the big reinforced concrete irrigation dam, which is to be erected in Mono County near Mono Lake. Private individuals are developing, and it is to be one of the largest irrigation projects in California, and this dam in the first of a number of large construction enterprises to be undertaken. The dam will cost about \$250,000, and work will be started at once.

#### Contracts Awarded

**SAN JOSE, SANTA CLARA CO., CAL.**—Redwood tanks, 15, 3,000-gallon,

\$161.25 each. Engineer, County Surveyor, San Jose. Owners, Santa Clara County, Contractor, Alphonse Lorentz, 201 West Julian avenue, San Jose. Contract price, \$461.25 each.

**SAN JOSE, SANTA CLARA CO., CAL.**—Furnishing 1-inch galvanized iron pipe, \$2,307.85. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractors, Mark-Lally Co., S. F. Contract price, \$2,307.83 for 23,160 feet.

**SAN JOSE, SANTA CLARA CO., CAL.**—Crushed rock, \$5,688.75. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractors, Stanfield & Knowles, San Jose. 5,125 cubic feet at \$5,688.75.

**BURLINGAME, SAN MATEO CO., CAL.**—Paving, grading and curbs. Cost not stated. Engineer, City Engineer, Burlingame. Owners, City of Burlingame. Contractors, Ralisch Improvement Co., S. F. Contract price not stated.

**SACRAMENTO, MARIN CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Contractors, Austin-De Camp Co., 14 Montgomery street, S. F. Contract price not stated.

**CONCORD, CONTRA COSTA CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, Concord. Owners, Town of Concord. Contractors, Municipal Improvement Co., Richmond. Contract price not stated.

**VACAVILLE, SOLANO CO., CAL.**—Retaining wall, concrete, \$898. Engineer, none. Owners, Town of Vacaville. Contractor, George Nash, Vacaville. Contract price, \$898.

**NEWCASTLE, PLACER CO., CAL.**—Sewers, etc., \$2,368. Engineer, Town Engineer, Newcastle. Owners, Town of Newcastle. Contractors, Leach & De Camp, 11 Montgomery street, S. F. Contract price, \$2,368.

### SEALED PROPOSALS

#### PROPOSALS FOR BUILDING.

**ADDITION TO BRICK ASSEMBLY HALL**—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Addition to Brick Assembly Hall, Salem School, Oregon," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. of July 21, 1915, for furnishing materials and labor for the construction of an addition to the brick assembly hall, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at the United States Indian warehouses at Chicago, Ill., and St. Louis, Mo., and Builders' Exchange, St. Paul, Minn., and at the office of the superintendent of the Salem Indian School, Chemawa, Ore. For further information apply to the superintendent of the Salem School. CATO SELAS, Commissioner.

#### PROPOSALS FOR EXCAVATING.

**EXCAVATION, ETC.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Provo, Utah, until 2 p. m. July 15, 1915, for the construction, involving about 50,000 cubic yards of canal excavation, 8,000 cubic yards of rolled embankment, 3,000 cubic yards of excavation for structures, 950 cubic yards of reinforced concrete and 325 square feet of canal lining. The work is located near Goshen, Utah, on the Tintic Branch of the Denver and Rio Grande Railroad.

For particulars address, the U. S. Reclamation Service, Provo, Utah, or Washington, D. C.

#### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 939**—Proposals for Steel Doors for Sheds on Pier No. 7, Cristobal, and Pier No. 18, Balboa. Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. July 13, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 939) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 941**—Proposals for Pig Iron, Track Spikes, Track Bolts, Toe Calks, Expansion Bolts, Electric Motors, Lavatories, Brass Spoons, Shower Heads, Cocks, Valves, Brass Cleanouts, Flue Pipe, Slip Joint Ells, "S" Traps, Brass Chain, Rubber Valves, Rock Salt, Sal Soda, Litharge, Coal Tar Pitch, Drop Black, Lamplack, Vermilion Black, Asphaltum Varnish, Cab Enamel, Paints, White Maple Lumber and Mahogany Lumber. Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. July 9, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 941) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the engineering offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

**SEALED PROPOSALS** will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on July 26, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Colusa County, through Arbuckle (H-Col-7-A), about 0.3 miles in length, to be surfaced with asphalt 5½ feet wide.

Marin County, between Burdell and St. Vincent (V-Mrn-1-A), about 4 miles in length, to be graded.

Monterey County, from Greenfield to Canphora (V-Mon-2-B), about 11.7 miles in length, to be paved with Portland cement concrete.

Santa Barbara County, from Caylota Pass to Zaca Station (V-S-B-2-D), about 11.1 miles in length, to be graded. San Luis Obispo County, from Atascadero Creek to Paso Robles (V-S-L-O-2-B), about 10 miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the Division in which the work is situated. The Division Engineers' offices are located at Willets, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The specifications of prospective bidders is called to the "Notice to Contractors" annexed to the

blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES P. FEICK,  
California Highway Commission,  
AUSTIN B. FLETCHER,  
Highway Engineer,  
WILSON R. ELLIS,  
Secretary. (\*)

Dated: June 29, 1915.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 938—Proposals for Twelve Electric Towing Locomotives for Canal Locks.—Sealed proposals will be received at the office of the General Purchasing Officer, the Panama Canal, Washington, D. C., until 10:30 a. m. August 16, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 938) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, Major, Corps of Engineers, U. S. Army, General Purchasing Officer.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 939 — Steel Doors for Sheds on Pier 7 at Cristobal and Pier 18 at Balboa.—Sealed proposals will be received at the office of the General Purchasing Officer, the Panama Canal, Washington, D. C., until 10:30 a. m. August 16, 1915, at which time they will be opened in public, for furnishing and erecting the above mentioned articles. Blanks and general information relating to this circular (No. 939) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, Major, Corps of Engineers, U. S. Army, General Purchasing Officer.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 937.—Proposals for Structural Steel and Accessory Parts for Shed on Pier No. 7.—Sealed proposals will be received at the office of the General Purchasing Officer, the Panama Canal, Washington, D. C., until 10:30 a. m. July 12, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 937) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, Major, Corps of Engineers, U. S. Army, General Purchasing Officer.

#### PROPOSALS FOR SUBMARINES.

SUBMARINES—Proposals for constructing by contract sixteen submarine boats, Nos. 62-77, will be received at the Navy Department until 12 o'clock noon August 2, 1915, when they will be publicly opened. Circulars for the information of bidders and general specifications for the construction of said vessels are ready for distribution among prospective bidders. Forms of proposal and contract may be had on application to the department. FRANKLIN D. ROOSEVELT, Acting Secretary of the Navy.

#### PROPOSALS FOR SHAFTS AND CHAIN.

SHAFTS AND CHAIN—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Washington, D. C., until 2 o'clock p. m. July

12, 1915, for furnishing chain shafts and chains for the rolling crest of Grand River diversion dam, Grand Valley project, Colo., consisting of one safety chain, one main shaft, one operating chain, and one guard chain, all for the 60-foot roller, and of six safety chains, six chain shafts, six operating chains, and six guard chains for the six 70-foot rollers. For particulars address the U. S. Reclamation Service, Washington, D. C. MORRIS BIEN, Acting Director.

#### PROPOSALS FOR RECLAMATION WORK.

RECLAMATION WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Provo, Utah, until 2 o'clock p. m. July 15, 1915, for construction, involving about 4,000 cubic yards of canal excavation, 8,000 cubic yards of rolled embankment, 3,000 cubic yards of excavation for structures, 950 cubic yards of reinforced concrete, and 55,000 square feet of canal lining. The work is located near Goshen, Utah, on the Tintic Branch of the Denver and Rio Grande Railroad. For particulars address the United States Reclamation Service, Provo, Utah, or Washington, D. C. MORRIS BIEN, Acting Director.

#### PROPOSALS FOR VESSEL.

VESSEL—Sealed proposals will be received at the office of the superintendent, Coast and Geodetic Survey, Department of Commerce, Washington, D. C., until August 10, 1915, and then opened, and also on the same date at the office of the inspector, Coast and Geodetic Survey, Room 310, Custom House, San Francisco, Cal., for the construction and equipment of the Coast and Geodetic Survey steamer "Surveyor," of about 1,000 tons displacement. Particulars may be obtained upon application to the superintendent, Coast and Geodetic Survey, Washington, D. C.

#### PROPOSALS FOR DREDGING.

1915, and then and there publicly opened for dredging 72,000 cubic yards. DREDGING—Sealed proposals, endorsed "Proposals for Dredging," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 31, more or less, at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, Chief of Bureau.

#### PROPOSALS FOR BUILDING.

BUILDING — Sealed proposals, endorsed "Proposals for Seven Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 24, 1915, and then and there publicly opened, for one power house, one operating building and one storehouse, of stuccoed brick and steel frames, one pump house, one quarters for commanding officer, one double quarters for chief operator and operators' quarters of stuccoed wood frame construction at the naval radio station, San Diego, Cal. Plans and specifications may be obtained on application to the bureau or to the officer in charge, at the radio station, San Diego, Cal. H. R. STANFORD, Chief of Bureau.

#### LONGEST FLAGSTAFF.

The longest flagstaff produced in British Columbia will be forwarded soon to Great Britain as a present from the provincial government, and will be placed in the Kew Botanical Gardens, a few miles out from London. The tree from which it was made was a perfect specimen of fir pine, and the staff, which is 216 feet in length,

is without flaw or defect. In its original state the stick was 5 feet in diameter at the butt and 14 inches in diameter at the top, and perfectly straight.

#### WELLS MORE THAN A MILE DEEP.

The deepest well in the world is in Upper Silesia, in the German Empire. It is a diamond-drill hole in a coal field and is 7,350 feet deep. A well in the United States which may go deeper, according to the United States Geological Survey, is 4 miles northwest of McDonald, Pa., and about 15 miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone—a bed that elsewhere contains oil and gas—is now 7,174 feet deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6,820 and 7,100 feet rocks bearing rock salt and salt water were encountered. These are regarded as of Salina age, the same as those carrying rock salt in western New York. The temperature in this well at the depth of 6,775 feet, as recently determined with great accuracy, is 145.8 degrees F.

At Derrick City, McKean County, Pa., near Bradford, there is a well 5,820 feet deep, which is probably the second deepest well in the United States. Another deep well is on Slaughter Creek, Kanawha County, W. V.; it is 5,595 feet deep. It penetrated a sandstone at 5,030 to 5,050 feet, and from this depth to the bottom, a distance of 345 feet, the well is in limestone. Near West Elizabeth, Pa., there is another well 5,575 feet beneath the surface, penetrating into a black shale. Another deep well is being drilled at Gaines, Pa. This has already reached a depth of 5,500 feet. Deep-well drillers in this country of course employ the most improved and effective rigs, but one of the most remarkable of wells, reaching a depth of 3,600 feet, was drilled for petroleum in western China by means of such crude appliances as a cable made of twisted strands of rattan.

#### CARBIDE SLIME AS BUILDING MATERIAL.

[Frankfurter Zeitung, May 16.] In the manufacture of acetylene gas (from calcium carbide and water) considerable quantities of so-called carbide slime are always left in the apparatus. The slime is a waste product, no means of utilizing it having been known heretofore. In view of the large increase in the consumption of acetylene since the outbreak of the war, the report of R. Schumann on the possible utilization of carbide slime, published in the Chemiker-Zeitung, will be of special interest. The material could not be used as fertilizer, salts of phosphorus being absent, but might be used as water purifier when of a certain composition. The experiments with the employment of carbide slime as building material yielded the best results. When mixed with 40 per cent building sand, the carbide slime formed a usable mortar which set well and bound the bricks firmly. This new building material will be thoroughly tested by further experiments.

### SAN FRANCISCO.

**APARTMENT HOUSE**—3 story and base, frame, \$35,000. San Francisco. Architects, O'Brien Bros., 240 Montgomery St., S. F. Owner's name withheld. The building will be erected at the northwest corner of Pierce and Golden Gate, having a frontage of 137½ feet on Pierce and 35 feet on Golden Gate avenue. Interior has been arranged to contain a total of 24 suites of two rooms and bath. Interior will be finished in hard pine, mahogany and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat, an automatic elevator and hot water system. All suites will have wall beds. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance lobby. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—2 story and base, frame, \$15,000. San Francisco. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner, Mrs. Eichler. The building will be erected on Waller street, 100 feet west of Webster, and has been designed for twelve suites of three and four rooms. Interiors will be finished in pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. All suites will have wall beds and private bath rooms. Tile floors and wainscot will be used in the baths. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**APARTMENT HOUSE**—4 story and base. Class C construction. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. The building will be erected on the east side of Hyde street north of Sutter, and has been designed to contain nine suites of four rooms and bath. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living rooms, dining rooms and entrance halls. There will be steam heat, an automatic elevator and hot water system. Bath rooms will have tile floors and wainscot. Marble and tile wainscot will be used in the lobby, together with ornamental plaster. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete.

**APARTMENT HOUSE**—3 story and base, frame, \$12,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, George W. Mensor. The building has been designed to contain six suites of four rooms and bath, and will be erected on the south side of Washington street east of Steiner. The building will have a frontage of 25 feet and a depth

of 127½ feet. Interior will be finished in pine, Philippine mahogany and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water system. Exterior will be covered with asbestos stucco on metal lath. Plans are being prepared.

**APARTMENT HOUSE**—5 story and base, class C construction. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. The building will be erected on the north side of Post street between Taylor and Jones, and has been designed for two stores on the first floor besides a large and attractive entrance, lobby and dansant. Upper four floors will contain 27 apartments of two and three rooms. Each apartment will have private bath and wall beds. Interior will be finished in southern gum, mahogany and white enamel. Hardwood floors will be used in the living and dining rooms. Bath rooms will be finished in tile. Marble and tile and ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

**LAUNDRY**—1 story, frame, \$2,000. San Francisco. Architect, J. T. Quinn, 247 Noe street, S. F. Owner, E. B. Carr, 331 Noe street, S. F. The building will have a cement floor. Interior will be finished in pine. Considerable special machinery will be installed. The contract will also include alterations to a frame building in the rear of the property. Exterior will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**GARAGE**—1 story, steel and concrete, \$2,500. San Francisco. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. The building will be erected on the company's property on Kentucky street between Army and Marin. There will be a cement floor. Exterior will be covered with corrugated iron. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$8,500. San Francisco. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 563 14th avenue, S. F. The building will be erected at the southwest corner of Palm avenue and Euclid street, and has been designed to contain four modern flats of five rooms and bath. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms and reception halls. There will be a central heating system and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot. Exterior of the building will be covered with shiplap

and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architects, Foulkes & Hildebrand, Crocker Bldg., S. E. Owner, John H. Schroder. The dwelling will be erected at the northwest corner of Washington and Webster streets, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE — 1 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, George F. and Lucy S. Olesse, 524 25th avenue, S. E. The dwelling will be erected on the east side of 36th avenue south of Anza, and has been designed for a five-room house with bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place in the living room. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

BOULEVARD CONSTRUCTION — \$100,000. San Francisco. Engineer, City Engineer, Temporary City Hall, S. E. Owners, City and County of San Francisco. By resolution of the Board of Supervisors the Board of Public Works has authorized the City Engineer to prepare plans and specifications for the construction of the Ocean Beach Esplanade for which \$100,000 has been provided for in the budget. This amount it is estimated will cover the cost of 1,000 feet of the proposed project southerly from the Cliff House.

HARRISON ST.,  
bet. 8th & 9th  
San Francisco**

**Telephone Market 337**

be finished in tile. Marble and tile wainscot will be used. All suites will have wall beds. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BRIDGE**—Reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. A resolution of intention providing for the construction of a reinforced concrete bridge 40 feet 4 inches wide and 106 feet 6 inches long with retaining end and wing walls, two 12 inch by 18 inch inlets and 8 inch pipe connections, 4 metal one light electroliters, fitted with 6 inch by 14 inch globes, together with electric conduit, outlet boxes and necessary wiring, all to be constructed in Walnut street from a point 50 feet north of Berryman street over Codornices Creek in the city of Berkeley, has been passed to print by the City Council. Bids will be called for shortly.

**BAKERY**—2 story and base, frame, \$15,000. Oakland, Cal. Architects, Hutchinson & McLeon, 479 13th street, Oakland. Owners, Robertson & Losh. The building will be erected at the corner of 25th and Broadway, and will cover a considerable ground area. Interior will be finished in pine. There will be special machinery and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

**RESIDENCES**—2, 2 story and base, frame, \$4,000 each. Oakland, Cal. Architect, none. Owner, C. M. MacGregor, 479 13th street, Oakland. The two houses will be erected on the north side of Mandana Boulevard west of Carlston and each has been designed for a seven-room house with bath and sleeping porch. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. A. Hersam, 2568 Le Conte avenue, Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on the Arden road. Interior will be fin-

ished in pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms and reception hall. There will be hot water heating system and open fire places. Mantels will be of brick. Bath room will be finished in Germanstone. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$6,000. Oakland, Cal. Architect, none. Owner, Dr. Dowell, 515 Bellevue, Berkeley. The dwelling will be erected in the Lake Merritt District, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. There will be furnace heat and open fire places. Hardwood floors will be used in the living room, lining room and reception hall. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**UNIVERSITY DORMITORY**—4 story and base. Class A construction, \$900,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. Victor Henderson, Secretary to President Wheeler of the University of California, states that working drawings for the dormitory building to be known as the Benj. I. Wheeler Building on the University Campus, have been completed. The building will be a four-story structure of steel and granite, and will cost in the neighborhood of \$900,000. Bids will be called for at once, according to the secretary. The secretary also states that plans for other important work to be carried out under the \$1,800,000 bond issue at the University are nearly complete, and that the balance of the year will see many of the new buildings under construction.

**UNIVERSITY BUILDINGS**—3, 1 and 2 story. Class A construction, \$750,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission street, S. F. Owners, Regents of the University of California. Architect John Galen Howard will shortly start working drawings for three more new buildings to be erected at the University of California in Berkeley. The \$750,000 fund bequeathed by Ernest V. Cowell is now available. The buildings will consist of a gymnasium, student infirmary and a stadium. Further mention will be made of the work

### SAN JOSE AND THE SANTA CLARA VALLEY

FACTORY—1 story, frame and cor-  
rugated iron. Cost not stated. South  
San Francisco, San Mateo Co, Cal. Ar-  
chitect, none. Owners Wihl's Manu-  
facturing Co, 595 Gough street, S. F.  
The building will cover a considerable  
ground area. No interior finish is  
specified. There will be a cement floor.  
Special machinery will be installed.  
Exterior of the building will be cov-  
ered with corrugated iron. Plans are  
complete and in the hands of the own-  
ers who will do the work by Day  
Labor.

MUNICIPAL GAS WORKS' STORAGE  
TANKS, ETC.—Cost not stated. Santa  
Clara, Santa Clara Co, Cal. Engineer,  
City Engineer, Santa Clara. Owners,  
City of Santa Clara. Thirteen bids were  
received by the City Trustees for six  
high pressure storage tanks, one single  
stage gas compressor and two high  
pressure gas radiators and strainers  
for the municipal gas works. All bids  
were taken under advisement until the  
next meeting.

RESIDENCE — 2 story and base,  
frame, \$4,000. Burlingame, San Mateo  
Co, Cal. Architect, Carl Geiffuss, 16  
Kearny street, S. F. Owner's name  
withheld. The dwelling has been de-  
signed for a seven-room house with  
bath and sleeping porch. Interior will  
be finished in pine, hardwood and  
white enamel. Hardwood floors will  
be used in the living and dining rooms  
and reception hall. There will be fur-  
nace heat and open fire places. Man-  
tels will be of tile or brick. Bath  
room will have tile floor and wainscot.  
An automatic water heater will be in-  
stalled. Exterior of the dwelling will  
be covered with rustic and cement

plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$5,500. San Mateo, San Mateo Co., Cal. Architect, Charles C. Frye, 26 Montgomery street, S. F. Owner's name withheld. The dwelling will contain nine rooms, three baths and sleeping porch. Interior will be finished in pine and redwood with some white enamel in the bed rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**CONVENT**—2 story and base, reinforced concrete, \$100,000. Santa Clara, Santa Clara Co., Cal. Architect, John A. Foley, 46 Kearny street, S. F. Owners, Carmelite Sisters. The building will be erected on property adjoining the Santa Clara College ground, and has been designed in the Spanish Colonial style. Interior will be arranged for a large chapel, living apartments and recreation rooms. Pine and hardwood trim and hardwood floors will be used. There will be steam heat and oil burning furnace, vacuum cleaning and hot water system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

**ROAD IMPROVEMENTS**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been completed for the improvement of Union avenue and Foxworth road in District No. 5, for the improvement of the Ford road in District No. 2, and for the improvement of the Tully, White and Felipe roads in District No. 3. Bids are being taken and will be opened on July 19th. Plans and specifications can be secured from the County Clerk.

**HIGHWAY COMPLETION AND PAVING**. Cost not stated. Santa Clara, Santa Clara Co., Cal. Engineer, City Engineer, Santa Clara. Owners, City of Santa Clara. The Town Trustees are again considering the proposition of completing the state highway in Santa Clara. Nearly two miles of the road is uncompleted here. The paving question will also be brought up at the meeting of the Town Trustees.

**ROAD IMPROVEMENT**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Plans are complete and figures will be opened on July 15th for the improvement of the Monterey-Castroville road in the Alisal and Pajaro Road District. Plans can be secured from the County Clerk.

**FURNISHING CEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids will be opened on July 19th for furnishing and delivering 50,000 barrels of cement to be used in highway construction. Complete information can be secured from the County Clerk at San Jose.

### Contracts Awarded.

#### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**DAM**—Reinforced concrete. Cost not stated. Healdsburg, Sonoma Co., Cal. Engineer, none. Owners, Sonoma County. A subscription list for funds with which to build a dam in

the Russian River this summer is being circulated in Healdsburg and vicinity. The Northwestern Pacific Railroad Company has contributed together with many other concerns in favor of the proposition.

**WHARF**—Timber construction. Cost not stated. Petaluma, Sonoma Co., Cal. Engineer, none. Owner, Dr. Macleay. Petaluma. Work has been started by William Call on the construction of a wharf for Dr. Macleay. The structure will be 1200 feet long, commencing at the Vosen warehouse extending to the Steamer Gold landing. The piles for the work are now on the ground and the work will be rushed to completion.

**BRIDGE REPAIRS**—\$2,000. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa.

At the last meeting of the Council the City Engineer was instructed to prepare the plans and specifications for repairing the Third street bridge, which will cost in the neighborhood of \$1,000 and the electric road \$950. The plans will be presented at the next meeting of the Council when a call for bids will probably be issued.

**DEPHLEGMATOR BUILDING**—3 story, steel frame. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. Contractors, Guttchen Bros., New Cal Bldg., S. F. Contract price not stated.

**RESIDENCE**—1½ story and base, frame, \$1,000. Ross Valley, Marin Co., Cal. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The dwelling will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**PIPE LINE CONSTRUCTION**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, Engineering Dept. Valley Pipe Line Co., 343 Sansome street, S. F. Owners, Valley Pipe Line Co. A supplemental order has been issued by the Railroad Commission authorizing the Valley Pipe Line Company to issue 18,975 shares of stock to the Anglo-Saxon Petroleum Company. The proceeds of the sale of this stock will be used in the construction of a pipe line from the property of the California Oil Fields, Ltd., near Coalinga, Fresno County, to Martinez, Contra Costa County.

**STREET AND SEWER WORK**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer Hohl, Sausalito. Owners, Town of Sausalito. Plans and specifications for the local improvement district "F" submitted by Town Engineer Hohl, have been approved. Bids on the work will soon be called for.

**STREET ELECTROLIERS**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer Hohl, Sausalito. Owners, Town of Sausalito. At

the last meeting of the Town Trustees, Town Engineer Hohl submitted plans for the electrolytic system on Water street and Caledonia street, and the board will take it up at the July meeting. There will be 65 lights, 150 feet apart on each side of the street, and it is estimated that the cost per front foot will be about 40 cents.

**STREET PAVING, ETC.**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans have been completed and figures are now being taken for the improvement of 10th street from Barrett to Pennsylvania. Bids will be opened on July 12th. Complete information can be secured from the City Clerk.

### Contracts Awarded

**SEWER CONSTRUCTION**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Contractors, Austin-De Camp Co., 14 Montgomery street, S. F. Contract price not stated.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**BRIDGE**—Reinforced concrete and steel. Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. The Fresno County Supervisors have decided after long arguments by Representatives of the Stimson-Burrell Reclamation District, to build a 110-foot concrete bridge over Fish Slough on the Elkhorn grade, instead of a 200-foot bridge as asked by the Reclamation District. Bids on this work will soon be called for.

**BRIDGE**—Reinforced concrete. Cost not stated. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Plans are complete and bids are now being taken for the construction of a reinforced concrete bridge over Cameron Creek in the Second Road District. Bids will be opened on July 16th. Plans and specifications can be secured from the County Clerk at Visalia.

**SCHOOL**—1 story and base, frame, \$15,000. Maricopa, Kern Co., Cal. Architects, Thomas B. Wiseman and Charles H. Biggar, Producers' National Bank Bldg., Bakersfield. Owners, Maricopa High School District. The building will cover an area of 50 by 90 feet, and has been designed to contain class rooms, office and departments of domestic science and manual training. Interior will be finished in pine with some maple floors. There will be a central heating system and oil burning furnace. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**IRRIGATION FLUME**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, F. C. Hermann, Modesto. Owners, Modesto Irrigation District. Plans and specifications prepared by Engineer F. C. Hermann of the Modesto Irrigation Board for the last of the big flumes which the Modesto Irrigation District is preparing to put in, were submitted to the directors and were approved. Bids will probably be called for at the next meeting of the

plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$5,500. San Mateo, San Mateo Co., Cal. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The dwelling will contain nine rooms, three baths and sleeping porch. Interior will be finished in pine and redwood with some white enamel in the bed rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**CONVENT**—2 story and base, reinforced concrete, \$100,000. Santa Clara, Santa Clara Co., Cal. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Carmelite Sisters. The building will be erected on property adjoining the Santa Clara College ground, and has been designed in the Spanish Colonial style. Interior will be arranged for a large chapel, living apartments and recreation rooms. Pine and hardwood trim and hardwood floors will be used. There will be steam heat and oil burning furnace, vacuum cleaning and hot water system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

**ROAD IMPROVEMENTS**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been completed for the improvement of Union avenue and Foxworth road in District No. 5, for the improvement of the Ford road in District No. 2, and for the improvement of the Tully, White and Felipe roads in District No. 3. Bids are being taken and will be opened on July 12th. Plans and specifications can be secured from the County Clerk.

**HIGHWAY COMPLETION AND PAVING**. Cost not stated. Santa Clara, Santa Clara Co., Cal. Engineer, City Engineer, Santa Clara. Owners, City of Santa Clara. The Town Trustees are again considering the proposition of completing the state highway in Santa Clara. Nearly two miles of the road is uncompleted here. The paving question will also be brought up at the meeting of the Town Trustees.

**ROAD IMPROVEMENT**—Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Plans are complete and figures will be opened on July 15th for the improvement of the Monterey-Castroville road in the Alisal and Pagano Road District. Plans can be secured from the County Clerk.

**FURNISHING CEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids will be opened on July 19th for furnishing and delivering 50,000 barrels of cement to be used in highway construction. Complete information can be secured from the County Clerk at San Jose.

The piles for the work are now on the ground and the work will be rushed to completion.

**BRIDGE REPAIRS**—\$2,000. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa.

At the last meeting of the Council the City Engineer was instructed to prepare the plans and specifications for repairing the Third street bridge, which will cost in the neighborhood of \$1,000 and the electric road \$950. The plans will be presented at the next meeting of the Council when a call for bids will probably be issued.

**DEHUMIDIFIATOR BUILDING**—3 story, steel frame. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. Contractors, Guttler Bros., New Cal. Bldg., S. F. Contract price not stated.

**RESIDENCE**—1½ story and base, frame, \$1,000. Ross Valley, Marin Co., Cal. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The dwelling will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

**PIPE LINE CONSTRUCTION**—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, Engineering Dept. Valley Pipe Line Co., 343 Sansome street, S. F. Owners, Valley Pipe Line Co. A supplemental order has been issued by the Railroad Commission authorizing the Valley Pipe Line Company to issue 18,975 shares of stock to the Anglo-Saxon Petroleum Company. The proceeds of the sale of this stock will be used in the construction of a pipe line from the property of the California Oil Fields, Ltd., near Coalinga, Fresno County, to Martinez, Contra Costa County.

**STREET AND SEWER WORK**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer Hohl, Sausalito. Owners, Town of Sausalito. Plans and specifications for the local improvement district "F" submitted by Town Engineer Hohl, have been approved. Bids on the work will soon be called for.

**STREET ELECTROLIERS**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, Town Engineer Hohl, Sausalito. Owners, Town of Sausalito. At

the last meeting of the Town Trustees, Town Engineer Hohl submitted plans for the electrolyser system on Water street and Caledonia street, and the board will take it up at the July meeting. There will be 65 lights, 150 feet apart on each side of the street, and it is estimated that the cost per front foot will be about 10 cents.

**STREET PAVING, ETC.**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans have been completed and figures are now being taken for the improvement of 10th street from Barrett to Pennsylvania. Bids will be opened on July 12th. Complete information can be secured from the City Clerk.

### Contracts Awarded

**SEWER CONSTRUCTION**—Cost not stated. Sausalito, Marin Co., Cal. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Contractors, Austin-De Camp Co., 14 Montgomery street, S. F. Contract price not stated.

**STREET PAVING**—Cost not stated. Concord, Contra Costa Co., Cal. Engineer, Town Engineer, Concord. Owners, Town of Concord. Contractors, Municipal Improvement Co., Richmond. Contract price not stated.

**RETAINING WALL**—Concrete, \$898. Vacaville, Solano Co., Cal. Engineer, none. Owners, Town of Vacaville. Contractor, George Nash, Vacaville. Contract price, \$898.

**SPUR TRACK CONSTRUCTION**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer's name not given. Owners, Los Angeles Pressed Brick Co., J. H. Nicholl & John G. Gerlach. Contractors, Chadwick & Sykes, Crocker Bldg., S. F. Contract price not stated.

**SCHOOL CLOCK SYSTEM**—\$1,300. Petaluma, Sonoma Co., Cal. Architect, Brainard Jones, Petaluma. Owners, Petaluma School District. Contractors, Standard Electric Time Co., S. F. Contract price \$1,300.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**BRIDGE**—Reinforced concrete and steel. Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. The Fresno County Supervisors have decided after long arguments by representatives of the Stimson-Burrell Reclamation District, to build a 110-foot concrete bridge over Fish Slough on the Elkhorn grade, instead of a 200-foot bridge as asked by the Reclamation District. Bids on this work will soon be called for.

**BRIDGE**—Reinforced concrete. Cost not stated. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Plans are complete and bids are now being taken for the construction of a reinforced concrete bridge over Cameron Creek in the Second Road District. Bids will be opened on July 16th. Plans and specifications can be secured from the County Clerk at Visalia.

**SCHOOL**—1 story and base, frame, \$15,000. Maricopa, Kern Co., Cal. Architects, Thomas B. Wiseman and Charles H. Biggar, Producers' National Bank Bldg., Bakersfield. Owners, Maricopa High School District. The building will cover an area of 50 by 90 feet, and has been designed to contain class rooms, office and departments of domestic science and manual training. Interior will be finished in pine with some maple floors. There will be a central heating system and oil burning furnace. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**IRRIGATION FLUME**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, F. C. Hermann, Modesto. Owners, Modesto Irrigation District. Plans and specifications prepared by Engineer F. C. Hermann of the Modesto Irrigation Board for the last of the big flumes which the Modesto Irrigation District is preparing to put in, were submitted to the directors and were approved. Bids will probably be called for at the next meeting of the

Reg. U. S. Pat. Office  
The Panels that are  
as good as they are  
famous.

## White Brothers

5th and Brannan Streets

San Francisco

### Value all Panels by their Quality---WYBRO.

The value of a panel is determined by its **lasting qualities** and not by its cheapness of price.

We sell only **WYBRO PANELS** because we **know** that their quality is unsurpassed and can therefore freely guarantee them.

Wybro Panels last longer, look better, wear better, are smoother, and yet cost no higher than many inferior makes.

directors. The Dry Creek is the last of the big projects. It will be 730 feet long, and will be constructed of reinforced concrete. The flume will be supported by concrete pillars. The width of the flume will be 18 feet and depth 9½ feet. The greatest elevation will be 40 feet. A sand box at the upper end of the flume will stop the sand which at present clogs the lower stretches of the main canal and costs the district about \$2,000 annually for removal. A spillway will be arranged as an outlet to Dry Creek. The approximate cost of the structure is \$75,000.

**IRRIGATION TUNNEL** — \$50,000. Oakdale, Stanislaus Co., Cal. Engineer, Burton Smith, Oakdale. Owners, Oakdale Irrigation District. Plans are being prepared by the Oakdale Irrigation District for an 8,000-foot tunnel to be bored through Cape Horn to water all the north side of the irrigation district. By the construction of the tunnel, Chief Engineer Smith figures that the district can do away with the maintenance of eight miles of ditches and flumes.

**STATE HIGHWAY CONSTRUCTION** —Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans and specifications have been approved and bids will be opened on July 26th for the following highway work: Colusa, 0.3 miles asphalt, 55 feet wide; Marin, 4 miles, graded; Monterey, 11.7 miles, Portland cement concrete; Santa Barbara, 11.4 miles, graded, and San Luis Obispo, 10 miles, Portland cement concrete. Plans and specifications can be secured from the State Highway Commission at Sacramento or from its branch offices in San Francisco and Los Angeles.

**HIGHWAY CONSTRUCTION** —Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed and figures will be opened on July 19th for the construction of state highways in the following counties: Alameda, 5.8 miles, Portland cement concrete; Santa Clara, 2.9 miles, Portland cement concrete, Los Angeles, 4.9 miles, Portland cement concrete. Plans and specifications can be secured from the office of the Highway Commission in Sacramento or the branch office in San Francisco and Los Angeles.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**BRIDGES**—5, reinforced concrete. Cost not stated. Pitt River, Shasta Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed and figures are now being taken for the construction of the Pitt River bridge, a 395-foot structure, and four other small bridges to be erected along the right-of-way of the state highway in Shasta County. Bids for the work will be opened on July 19th. Plans and specifications can be secured from the office of the State Highway Commission.

**BRIDGES**—Reinforced concrete and steel. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. When the Board of Supervisors met to open bids for the construction of three bridges across sand sloughs in Tehama County, District Attorney Gernon advised them they could not legally enter into contracts during this fiscal year for the work to be paid out of funds from taxes during the fiscal year 1915-16. The seven bids received were returned and new figures will be called for during July. The total cost of the three bridges will be about \$260,000. The contractors submitting bids on the work stated that the steel bridges with an 8-foot span will cost, complete, about \$260,000. A concrete girder type in the neighborhood of \$150,000, which a combination arch and girder will cost about \$170,000.

**HIGHWAY BRIDGES**—3, reinforced concrete and steel. Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. Plans have been completed and figures are now being called for the construction of three highway bridges in Yuba County. The Best Slough bridge will be 120 feet long, the Dry Creek bridge 260 feet and the Grasshopper bridge 50 feet. Bids will be opened on July 11th. Plans and specifications can be secured from the County Clerk.

**BRIDGE**—Reinforced concrete. Cost not stated. Dunsuir, Siskiyou Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on July 19th by the State Highway Commission for the construction of a large reinforced concrete bridge over the Sacramento River at Dunsuir. The structure will be 332 feet long with a clear span of 150 feet. Plans and specifications can be secured from the State Highway Commission.

**WAREHOUSE**—1 story, frame, \$3,000. Stockton, San Joaquin Co., Cal. Architect, Joseph Losekann, San Joaquin Bldg., Stockton. Owners, Pacific Tannery Co. The building will cover an area of 70 by 100 feet, and will be erected on Fremont street between El Dorado and Hunter. No interior finish will be used. Exterior of the

building will be covered with corrugated iron. Plans are complete and figures are being taken.

**RICE MILL**—2 and 4 story, mill constructed, \$10,000. Colusa, Colusa Co., Cal. Architect's name not given. Owner, W. H. Packard, Colusa. It has been definitely decided to accept W. H. Packard's suggestion of the erection of a large rice mill in Colusa. It will take \$10,000 to build the proposed building and install the machinery. The money will be raised at once so as to have work on the structure start in the near future. According to information received the main building will be four stories high while the freight department and offices will be two stories of brick and mill construction.

**HOTEL**—2 story and base, frame, \$25,000. McCloud, Siskiyou Co., Cal. Architects, Dolliver & Swain, Royal Insurance Bldg., S. F. Owners, McCloud River Lumber Co. The building has been designed to contain a total of 70 rooms, several baths, dining room and office. Interior will be finished in pine. There will be steam heat and a hot water system. Exterior of the building will be covered with rustic. Plans are complete and the work is now being done by Day Labor.

**HOSPITAL**—1½ story and base, frame. Cost not stated. Crescent City, Del Norte Co., Cal. Architects, Ackerman & Reese, Eureka. Owners, Del Norte County. The building will be designed to contain two wards and several private rooms. Interior will be finished in pine and redwood. Modern hospital plumbing and a central heating system will be installed. Exterior will be covered with shingles. Plans are being prepared and further mention will be made of the work.

**JAIL**—1 story and base, reinforced concrete. Cost not stated. Crescent City, Del Norte Co., Cal. Architects, Ackerman & Reese, Eureka. Owners, Del Norte County. Preliminary plans are being prepared for a one-story jail building. Interior will be finished in pine. There will be special cell work, a steam heating system and hot water system. Exterior of the building will be faced with cement plaster. Further mention will be made of the work when bids are called.

**COURT HOUSE ADDITION**—2 story, frame and plaster, \$25,000. Crescent City, Del Norte Co., Cal. Architects, Ackerman & Reese, Eureka. Owners, Del Norte County. Plans have been approved for a two-story addition to the recent county court house. The new portion of the building will contain a court room, judges' chambers, jury room, lavatory and store room. Interior will be finished in pine. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**LIBRARY**—1 story and base, brick and steel. Cost not stated. Gridley, Butte Co., Cal. Architect, Chester Cole, Chico. Owners, Town of Gridley. The building will cover an area of 40 by 44 feet, and has been designed in the classic style. Interior will be finished in pine with maple floors. Some metal stacks will be installed. There will be a central heating system,

probably warm air. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**LIBRARY**—2 story and base. Class A construction, \$100,000. Sacramento, Cal. Architect, Chief Building Inspector W. B. Rohl, Sacramento. Owners, City of Sacramento. Preliminary plans have been presented for approval for this building, which will be erected at the corner of 9th and I streets. Besides the usual rooms, the designer has provided for two large open air reading rooms. Details of construction cannot be given until the Library Trustees act on the plans. Further mention will be made of the work.

**RESIDENCE**—2 story and base, frame, \$7,000. Colusa, Colusa Co., Cal. Architect, F. E. St. John, Berkeley. Owner, J. H. Sherer, Colusa. The dwelling will contain nine rooms, bath and sleeping porches. Interior will be finished in pine and hardwood with some white enamel in the bed rooms. There will be hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and the owner will take figures.

**RESIDENCE**—2 story and base, frame, \$6,000. Stockton, San Joaquin Co., Cal. Architect, Joseph Losekann, San Joaquin Bldg., Stockton. Owner, Sheriff W. H. Rieks. The dwelling will contain eight rooms and two baths. Interior will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**SCHOOL ADDITIONS**—Frame and concrete, \$20,000. Sacramento, Cal. Architect's name not given. Owners, City of Sacramento. Superintendent of Schools O. C. Hughes reported to the City School Board that the desired improvements in the Lincoln and Marshall schools will cost \$3,200 and \$1,700 respectively. The board voted to ask the County Treasurer to sell \$20,000 of school bonds so the work may be done and other improvements made. It is the plan to put in four more rooms at the Lincoln and two at the Marshall.

**SCHOOL**—1 story and base, hollow tile or frame. Cost not stated. Galt, Sacramento Co., Cal. Architect, Clarence C. Cuff, Ochsner Bldg., Sacramento. The building has been designed to contain six class rooms and an auditorium. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, probably steam heat and oil burning furnace. Slate black boards will be used. Modern school plumbing is specified. Exterior of the building will be faced with cement plaster. Bids are now being taken for both frame and hollow tile construction and on the work as a whole, and with the heating and ventilating sep-

arate. Plans can be secured from the architect. Bids will be opened on July 17th.

**STREET PAVING**—Cost not stated. Woodland, Yolo Co., Cal. Engineer. City Engineer, Woodland. Owners, City of Woodland. Plans and specifications having been approved, the City Trustees have passed resolutions of intention for the paving of Main, from Third street to the Southern Pacific depot; North College, from Main to Becmer street, and South Third, from Main to Pandegast.

**PUMPING PLANT**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has rejected all bids submitted for the construction of the pumping plant for the new park in the northwestern part of the city on account of the bids being too high. New bids will probably be called for.

**SEWERS AND STREET WORK**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Specifications have been approved by the City Council for the sewer of Harrison, Worth, Anderson, Jefferson and Jackson streets, as provided under Resolution No. 316, were approved. Two other resolutions were also adopted. Both call for street improvements.

**WATER SYSTEM EXTENSION**—Cost not stated. Corning, Tehama Co., Cal. Engineer, City Engineer, Corning. Owners, City of Corning. Plans are complete and figures are being taken for extensive water system extensions. The work may be let as a whole or divided into the following parts: Sewer extension and water extension. Bids will be opened on July 16th. Plans and specifications can be secured on application to the City Clerk.

**SEWER WORK**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans are complete for four 6 and 8 inch vitrified Harrison and Jackson streets. Bids salt glazed iron stone pipe sewers in will be opened for this work on July 12th. Plans and specifications can be secured from the City Clerk.

**IRRIGATION DAM**—Reinforced concrete, \$250,000. Mono Lake, Mono Co., Cal. Engineer's name not given. Owners, private capital. Duncanson-Harrelson Co., Chronicle Bldg., S. F., has been awarded the contract for the construction of the big reinforced concrete irrigation dam, which is to be erected in Mono County near Mono Lake. Private individuals are developing what is to be one of the largest irrigation projects in California, and this dam is the first of a number of large construction enterprises to be undertaken. The dam will cost about \$250,000 and work will be started at once.

#### Contracts Awarded

**SEWERS, ETC.**—\$2,368. Newcastle, Placer Co., Cal. Engineer, Town Engineer, Newcastle. Owners, Town of Newcastle. Contractors, Leach & De Camp, 11 Montgomery street, S. F. Contract price, \$2,368.

PORTLAND AND OREGON

**VIADUCT**—Reinforced concrete and steel. Cost not stated. Portland, Ore. Engineer, Commissioner of Public Docks, Worcester Bldg., Portland. Owners, City of Portland. Plans are being prepared for a viaduct 20 feet wide and 150 feet long to be erected over 17th street. Plans will be completed shortly when further mention will be made of the work.

**DOCK CONSTRUCTION**—Timber and concrete. Cost not stated. Portland, Ore. Engineer, Engineering Dept. Shell Oil Co., 313 Sansome street, San Francisco. Owners, Shell Oil Co. Contractors, J. A. Eberhart Co., Conant Bldg., Portland. Contract price not stated.

**DOCK BUILDING**—1 story, reinforced concrete. Cost not stated. Portland, Ore. Engineer, Commissioner of Public Docks, Worcester Bldg., Portland. Owners, City of Portland. The building will be erected on property adjoining Municipal Dock No. 1. The dock building will be 350 feet long and 176 feet wide. Plans provide for a 4-ply asbestos roof and sprinkling system. The floors will be of concrete, as well as the piling and fire walls. Plans are being prepared.

**LOGGING ROAD**—\$400,000. Silverton, Ore. Engineer's name not given. Owners, Silver Falls Timber Co., Northwestern Bank Bldg., Portland. The Silver Falls Timber Co. has increased its capital stock \$400,000, which stock issue will be used in the construction of a logging railroad. The company has 30,000 acres of timber land near Silverton and has a 20-mile logging road in operation, and the extension will be about 7 miles in a hilly country. Work on the road has been started.

**RESIDENCE**—2½ story and base, brick veneer, \$15,000. Portland, Ore. Architect, none. Owner, H. M. Boyajian, Panama Bldg., Portland. The dwelling will be erected on Fairview Boulevard, and has been designed to contain ten rooms and three baths. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be a central heating system and open fire places. A hot water circulating system is also specified. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded

**RESIDENCE**—2½ story and base, brick and frame, \$30,000. Portland, Ore. Architect, Earle A. Roberts, Selling Bldg., Portland. Owner, J. H. Henry, Contractors, Trenchell & Partners, Portland. Contract price, \$30,000.

**PRIDE OF STEEL**, \$12,000. Linn, Linn Co., Ore. Engineer, County Surveyor Linn. Owners, Linn County. Contractors, Pacific Iron Works, Portland. Contract price, \$12,000.

**HOSPITAL**, 2 story and one, bed low life, \$14,000. Portland, Ore. Architects, Tomlin & Hummel

Rothchild Bldg., Portland. Owners, Emanuel Hospital Association. Contractor, J. A. Blackstrand, Chamber of Commerce Bldg., Portland. Contract price, \$14,000.

ENCOURAGING COMMENTS ON AMERICAN COMMERCE.

[Commercial Attache A. H. Baldwin, London.]

In a study of relative commercial conditions in the United States and in the United Kingdom there is found much to encourage confidence in the ability of American business firms to compete with success for a share of the world's trade. Attention has often been called to the alleged defects in our methods of handling export commerce, and such delinquencies as poor packing, brusque forms of correspondence, indifference to customers' instructions, inadequate postage, and similar matters have received ample publicity. It is therefore reassuring to find that some of our most active competitors pay sincere tribute to certain excellent characteristics of American trade.

A report just issued by the British Royal Commission on the natural resources, trade, and legislation of certain portions of His Majesty's dominions contains the minutes of evidence taken in Newfoundland in 1914, in which it appears that witnesses before the commission often compared the trade, products, and methods of the United States with those of Great Britain to the advantage of our own country.

For example, Mr. Frederick William Ayre (director of Ayre & Sons (Ltd.), general merchants and importers, representing the Board of Trade of St. John's Newfoundland), commenting on the trade of the colony in boots and shoes, attributed the ascendancy of the United States in this field to the fact that "leading makers (in the United States) have carefully studied the local requirements and have been and are prepared to meet all demands as to shapes, styles, etc., in contrast to British makers, whose loss of trade was largely due to conservatively refusing to meet the demands of the market."

Reference was made to the growing circulation of magazines and newspapers from the United States as stimulating trade with that country. "These advertisements are very interesting to read," it was significantly added.

The intrinsic value of the British article is claimed to be usually superior to that of the American product, but the Americans are said to gain through the article being slightly and more attractive to the eye. Patriotism in the colony of Newfoundland would tend to divert the trade to Great Britain whenever possible.

Other comments of interest to our manufacturers follow:

It was alleged that the dyeing of American cotton goods was inferior to the English in resisting washing and the effects of the sun.

Another witness, the manager of a boot-and-shoe factory, spoke of the "much better-looking footwear as from America, even if not so durable as the British." This charge of inferior durability of the American shoe is also often heard in Great Britain.

SEATTLE AND WASHINGTON

**APARTMENT HOUSE**—3 story and base, brick or reinforced concrete, \$75,000. Seattle, Wash. Architect, J. F. Everett, Boston Bldg., Seattle. Owner, West Wheeler, Colman Bldg., Seattle. The building will be erected at the southwest corner of 4th avenue and Marion street, covering an area of 60 by 120 feet. Apartments will be arranged in suites of two, three and four rooms. Interior will be finished in pine and hardwood veneer with some hardwood floors. Plans provide for steam heat, automatic elevator, vacuum cleaning and a hot water system. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick or cement plaster. Plans are complete and figures will be called for at once.

**DOCK ADDITION**—Frame and concrete, \$50,000. Seattle, Wash. Engineer, Chief Engineer J. R. West, Seattle. Owners, City of Seattle. Plans are now being prepared for the construction of two additions of four stories each to the present dock building. Plans will be complete in about 30 days and figures will be called. Further mention will be made of the work.

**HOTEL**—4 story and base, brick and steel. Cost not stated. Seattle, Wash. Architect, J. P. Everett, Walker Bldg., Seattle. Owners, West & Wheeler. The building will be erected at the southwest corner of Marion and 4th avenue, covering an area of 55 by 120 feet. Foundations and walls have been designed for additional stories. The building will be arranged for a large number of single rooms and baths. Interior will be finished in pine with some hardwood veneer. There will be steam heat, an automatic elevator and hot water system. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

**BRIDGE**—Steel and concrete, \$28,888. Mayfield, Wash. Engineer, City Engineer, Mayfield. Owners, City of

**RESIDENCE**—2½ story and base, brick veneer, \$60,000. Seattle, Wash. Architects, Cutler & Malmgren, Spokane. Owner, J. T. Heffernan, 108 Railroad avenue, South Sacramento, Cal. Contractor, J. N. Johnson, 1273 Whitman avenue, Seattle. Contract price, \$60,000.

**BANK AND OFFICES**—3 story and base, reinforced concrete, \$150,000. Vancouver, B. C. Architects, Somervell & Putnam, White Bldg., Seattle, Wash. Owners, Merchants' Bank of Canada. Contractors, Pudy & Henderson, Henry Bldg., Seattle. Contract price, \$150,000.

**APARTMENT HOUSE** 3 story and base, brick veneer, \$65,000. Seattle, Wash. Architect, J. A. Gruenzer, New York Bldg., Seattle. Owner, F. F. Adams. Contractors, Johnson & Odum, Mutual Life Bldg., Seattle. Contract price, \$65,000.

## HALF OF ALL FOREST FIRES ARE PREVENTABLE.

Analysis of Reports Shows That More Than 50 Per Cent of Great Annual Loss of Life and Property is Due to Avoidable Causes.

WASHINGTON, D. C.—With the opening of the season of fire danger on most of the national forests, the forest service is sending broadcast a warning that more than half of the forest fires in the United States are due to carelessness or other preventable causes, starting from campers, railroad locomotives, brush burning, incendiaries, and sawmills.

This statement is based on an analysis of statistics compiled from the forest fire records of the last season, when more than 7,000 fires were reported on national forests alone and approximately 10,000 on state and private holdings in the eighteen states which received federal co-operation in fire protection under the Weeks law, namely, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, New York, New Jersey, Maryland, West Virginia, Kentucky, Michigan, Wisconsin, Minnesota, South Dakota, Montana, Idaho, Washington and Oregon.

Forest fires destroy millions of dollars' worth of timber and other property every year, and in some years cause considerable loss of life. It has been estimated from the best information obtainable that forest fires last year burned over an area of approximately 6,000,000 acres with a total loss of at least \$9,500,000.

## JUNE BUILDING TOTALS.

According to the records of the Bureau of Building Inspection of the Board of Public Works the building permits issued for the month of June amounted to \$891,007, this amount being for 618 permits.

During the month there were no permits issued for Class "A" or Class "1" structures. Included in the Bureau's report is a building being erected by the Harbor Commissioners costing \$27,221. The complete report is as follows:

Class	No. of Bldgs	Amt.
Class "C"	12	\$224,200
Frames	161	503,181
Alterations	444	136,405
Harbor Commissioners	1	27,221
Total	618	\$891,007

## PAVING CONTRACTS AWARDED.

The Board of Public Works has awarded the following street improvement contracts.

To D. L. Blenfield, improvement of Spruce street from Jackson street westerly; Lida Place from 15th to 16th streets; and Elm street from Pierce to Scott street.

To Eaton & Smith, improvement of Fourteenth street from Rosemont to Dolores street.

To L. G. Harney, improvement of Parnassus avenue.

The Board has rejected all bids submitted for the improvement of the south side of Howard street from First to Fremont, and will take new bids until July 14th.

At their meeting Friday the Board

accepted the Strauss bascule bridge constructed by the Southern Pacific Company at the foot of Third street over the Islais Creek.

## AMERICAN FIRMS REPRESENTED IN AMOY, CHINA.

Consul Lester Maynard has forwarded a list of the American firms established in Amoy and of the American agencies held by Amoy firms, with comments as to other lines handled but not specifically represented in that Chinese port. These will be loaned to those interested by the Bureau of Foreign and Domestic Commerce or its branch offices. San Francisco branch, 306 Customhouse. (\*)

## ELECTRICAL MEASURING INSTRUMENTS.

Circular No. 30, recently issued by the Bureau of Standards at Washington, describes the operating principles of electrical instruments used for commercial measurements, including ammeters, voltmeters, and wattmeters. It gives such information on the errors of instruments as will assist those who use them to obtain the most accurate results in any given case. Other related subjects are treated as follows: Current and voltage transformers, which make it possible to measure currents so large and voltages so high as to be out of the range of ordinary instruments; standard apparatus by which ordinary instruments may be checked; and some notes on the design of electrical instruments.

Fifteenth Year, No 27

**Those War Orders**—The daily press has from time to time contained announcements of enormous orders for different kinds of war material given by some foreign government to one or other of our large manufacturing concerns. An analysis of the situation and a presentation of the actual orders may be of interest. The volume of orders in the aggregate is perfectly enormous. A study of our import and export trade indicates that during the past two or three months our total exports have included war supplies and munitions of all sorts to the amount of at least 140 millions a month. Now, considering that such business has to be placed three to ten months ahead, it is surely a fair assumption that as an average the present orders have extended over a period of at least five months, and upon this basis the orders now on hand would figure out 700 millions in the aggregate.

There is no reason to doubt that the Bethlehem Steel Company will turn out this year somewhere between 25 and 35 million dollars worth of war material. The newspapers placed these orders at 100 millions, but this is absurd for more reasons than one.

The Westinghouse Electric Company is supposed to have actually received an order for 5 million dollars worth of shrapnel and one million rifles at \$27.50 a piece.

The American Locomotive Company, it is stated, will turn out about 30 million dollars worth of shrapnel, another 30 million dollars worth going to the New York Air Brake Company and the Westinghouse Air Brake Company.

The American Car and Foundry Company is stated to have an order from the Russian Government for 2,000 railway cars and the Pressed Steel Car Company an order for 7,000 cars.

Crucible Steel Co. is estimated to have orders for about 8 million dollars worth of shrapnel material.

United States Cartridge Co. is credited with 10 million dollars worth of war orders. All these estimates are close to the actual facts and are made by men in close touch with these affairs. There are, of course, more orders given, but these are the most important ones.

We call attention to the article on the Pennsylvania Railroad exhibit at the P. P. I. E. This exhibit, which is very complete, consisting as it does of models of the system and of the terminals and of moving pictures of the different railroad activities in the different sections of the country it serves, gives the observer and the student of our present day complex civilization almost at a glance an idea of the enormously important role that a great railroad system is playing in the life of the nation.

The use of relief maps in the profession has become very extensive in recent years and these exhibits give the engineers the opportunity to study some very high class work of this kind.

Engineers are not often given the opportunity to view a railroad as a system of units, each performing its allotted work in the whole. Our readers should take in this whole exhibit, both models and moving pictures. It will broaden the view of the professional work and stimulate further effort.

The Engineering Record for June 12 started a series of articles to which we call our readers' attention. They treat "Sand," the neglected factor in concrete. It has four main objects: (1) To show that sand testing is not a luxury but a necessity. (2) To show how sand testing may benefit both contractor and owner. (3) To prove that sand testing should continue through the job. (4) To describe briefly and clearly approved methods of testing, and indicate simplified and improved procedure.

Unlike most articles on the subject they are addressed to the contractor as well as the engineer. They eliminate detail in order to drive home the main points. They are above all very practical.

The authors, Cloyd M. Chapman, engineer of tests of Westinghouses, Church, Kerr & Company, and Nathan C. Johnson, author of the articles on the use of the microscope in the study of concrete, which recently appeared in the Engineering Record, needs no introduction to the profession. Thoroughly conversant with the sand-testing and its recent history, they, nevertheless, before writing the series, reviewed the entire literature on the subject in order to profit by the excellences or the weaknesses of other treatments. The result is a series that represents in the present state of the art the last word in sand-testing.

Thomas A. Edison is fairly buried under a shower of university degrees this season. No doubt he values them highly, but he has not said so. In the days of his struggle for recognition and success the universities gave him the cold shoulder. Now that he has won wealth and honor without their help, they are eager to decorate him. He peckets the decorations and smiles enigmatically, without saying what he thinks about them.

Nevada County Supervisors are sending a delegation to Sacramento to urge the early building of a highway lateral into their county. In the past Nevada County has been satisfied with promises, but the delegation insists that the Highway Commissioners take immediate action regarding this county. Nevada County is waking up to the fact that the glory of the old mining days does not pay present day board bills, and that it is the counties with the biggest mileage of the best roads that are reaping the harvest when the prosperity comes around. Prosperity, that is trade and increased activity in all lines of pursuit follows the line of least resistance and the line of least resistance is the Good Road.

The Highway Commission of the State of Washington approved plans for some 112 miles of permanent road construction, entailing an expenditure of \$741,480. Of the total, 15.5 miles will be of concrete; asphalt, 1.5 miles; asphaltic macadam, 11.5 miles; macadam, 7.1 miles; crushed rock, 1 mile; gravel, 75.9 miles. There is \$1,000,000 more to the credit of the various counties in the permanent highway fund for which permanent highway contracts may be awarded this year.

The Pacific States, with their comparatively smaller population, are doing more for the Good Roads movement than many of the larger and better populated Eastern States.

The State Railway Commission has approved the petition of the Midway Gas Company for the consolidation with that company of the Southern California Gas Company and the Northern Exploration Company.

Approval was given by the State Railroad Commission to the reorganization and consolidation of the three companies into one, to be known as the Midway Gas Company, and to issue \$2,995,655 in bonds to take over the other companies, to retire outstanding bonds and to make improvements. The reorganization and consolidation of the three companies, which, in addition to controlling the Midway natural gas supply, are engaged in developing 10,000,000 additional feet of natural gas in the Fullerton field, means a wider use of natural gas and may mean the retirement of artificial gas.

# Lessons From the Exposition.

Collected by GEORGE NELSON, C. E.

## The Pennsylvania Railroad Company Exhibited in the Transportation Building.

The Pennsylvania System, with its 11,729.92 miles of length, and its 26,200 miles of track; its 250,000 employees, 7,561 locomotives, 6,884 passenger cars, 281,590 freight cars, and 68 steamers and ferry boats, directly serves fifteen of the forty-eight States of the Union and the District of Columbia, whose combined population is 48,227,840, or 52 per cent of the entire population of the United States. All but two of the ten largest cities in the Union are directly on its lines, and its 4,500 stations are at the command of twenty cities with a population of over 100,000; one hundred and fifty each with a population of over 10,000 and two hundred and sixty-three with a population of over 5,000.

The Pennsylvania System, consisting of the Pennsylvania Railroad, the Pennsylvania Lines West of Pittsburgh, and affiliated lines, presents to visitors to the Panama-Pacific International Exposition, at San Francisco, California, a comprehensive exhibit of progress and human ingenuity that fully meets the ideal of the Exposition in commemorating the completion of the great ocean-to-ocean waterway.

Occupying one of the most prominent exhibit spaces in the Palace of Transportation, the Pennsylvania System has brought thither the largest model to topographical map, showing the System in its entirety, ever designed; a most complete model of Greater New York, a perfect picture in miniature of the metropolis of the United States, and models of the modern and convenient terminals in New York City and Washington; the proposed terminal in Chicago, and the famous Hell Gate Bridge, which will link New England with the Middle States and the South and West.

These models, perfect in every detail, are the work of Henry Kablerskie, who is the designer of the Founder's Week Pageant, in Philadelphia, and the Mission Play of Southern California, has achieved international reputation. With a force of trained artisans, a full year was spent in the completion of this exhibit.

The exhibit at San Francisco is principally educational, inasmuch as it presents, in an interesting manner, certain features of instructive value to young and old alike. That this spirit has been carried out, an inspection of the exhibit will readily prove.

Ten thousand square feet of space, located almost in the center of the mammoth Palace of Transportation, has been set apart for the proper display of this great exposition of the country's and the Pennsylvania System's growth. Here the various models have been so arranged that visitors may inspect them from every point of vantage.

### Largest Relief Map in the World.

Whilst all of the models are interesting, the attention of the visitor will be directed, probably first, to the great map of the Pennsylvania System in relief, the largest relief map ever con-

structed in the world. This map is forty-two feet in length by twenty-six feet in width, and shows, in interesting detail, the stretch of the United States and Canada from the Atlantic Ocean to the prairies beyond the Mississippi River, and from Chesapeake Bay and the Virginias to the plateaus of Ontario and Quebec.

Engineers were engaged for several months laying out the plan for this map, the drawing being made from the Government maps of the territory, the elevations of rivers being computed to minute detail. Persons familiar with this stretch of country will readily recognize mountain ranges and rivers, so closely do they approximate nature. An endeavor has been made to indicate by the coloring of this map the geographic character of the country traversed.

The lines of the Pennsylvania System, which are shown on the map as a silver band, were constructed of oak strips of the proper width upon which silver leaf is laid. The map itself is made of a composition of plaster, German dextrin and certain acids, which forms a combination almost indestructible.

The larger cities along the lines of the Pennsylvania System are marked with an electric lamp bearing the city's name and population, which are illuminated at short intervals. Practically every large city on the Pennsylvania's lines or adjacent to them, is indicated, and all points of historical interest are marked by small silk American flags. The State boundary lines are indicated by a strip of bright colored paint, and the State Capitals are marked by a small blue flag.

On the blue stretches showing the Great Lakes, little steamers mark the service of the Erie and Western Transportation Company, also known as the "Anchor Line," the Pennsylvania's lake passenger and freight service.

### New York from an Aeroplane.

Next in size, but even more interesting to the visitor, is the wonderful relief model of New York City and its immediate suburbs. We gaze upon the metropolis as though from an aeroplane, our views extending from the narrows of New York Bay to the entrance to Long Island Sound through Hell Gate, and from the cities of Elizabeth and Newark to the far stretches of Brooklyn and Long Island City.

This model reproduces, with a faithfulness that is marvelous, not only the main physical features of Manhattan Island and the surrounding country and water courses, but the prominent buildings; the streets whose names are known far and wide; the great bridges spanning the East River, and the parks and squares.

Every street is depicted with its row after row of business places, its skyscrapers, hotels, theatres, Central Park, with its lake and its statues, the Battery, Ellis Island, the great receiving station for immigrants; the

Statue of Liberty, Staten Island; all are there as though one looked at them in reality.

One sees how the imposing and artistic Pennsylvania Station, the portal to Greater Gotham, is actually the "Heart of New York." Only one block from Broadway, its erection and operation is an achievement that is in itself a triumph for the Pennsylvania System.

One is amazed to find that this great model, twenty-six feet square, is laid out to scale, and the principal buildings of the city were modeled from architects' drawings. Care has even been taken to preserve, as far as possible, the proper coloring of these buildings. Many of them are lighted by small incandescent globes within the building, so that one may see New York by day and night. The little globe surmounting the Statue of Liberty is the smallest incandescent light ever made.

One sees the lines of the Pennsylvania System as they traverse the cities of Elizabeth and Newark and cross the great meadow stretches back of the hills that shut in the Hudson River to the west; past Manhattan Transfer, whence New York trains are drawn through the tubes under the river by electric engines. The Bergen Portal, through which the tubes run, is seen in the side of the hill, and across the East River, the Sunnyside Yard where Pennsylvania trains make a full turn on great curves. Beyond, where the East and Harlem Rivers join at Hell Gate, may be seen the magnificent Hell Gate Bridge, under construction, which will link the Middle States with New England.

Like the map, the greater part of this model is formed of hard composition. Almost every large building and the greater part of the business blocks of the city are formed of separate sections of composition, carved by hand and fitted into spaces in the model.

The creation of this model and map occupied practically a whole year and the service of a corps of about twenty persons. There are a thousand or more separate pieces in the New York model alone.

In connection with this model of New York are shown models in perfect detail of Pennsylvania Station and of the Hell Gate Bridge.

### Great Stations of the System.

To the student of the beautiful in art, the proposed Union Station in Chicago, that already in use in Washington, and Pennsylvania Station, New York, as shown in the models of the three stations in the Pennsylvania exhibit, will prove to be of more than passing interest.

The model of the proposed Union Station, Chicago, which will house when completed the train service of the Pennsylvania System to and from Chicago, is interesting in showing what the third largest terminal in the world will look like when completed.

The new station, as will be seen from the model, will be a magnificent speci-

men of architectural skill, and will be located on the site of the present Union Station, but its increased size and the space devoted to yards and platforms will greatly exceed the space now occupied.

This station will be about three years in building. The train sheds alone will cover an area of more than thirteen acres, and the general waiting room will have 31,000 square feet of floor space. In this particular it will be excelled by only three other stations, those at Leipzig, Germany; Washington, D. C., and Pennsylvania Station, New York City.

The noble, classic lines of the Washington station, with its colonnades and its vaulted roof, its great statues and its splashing fountains, are all reproduced with wonderful fidelity in the model.

The station is 760 feet in length, 340 feet in width between the front entrance and the track section, and from 65 to 120 feet in height. Its central waiting room was modeled after the famous Baths of Diocletian in Rome.

There are thirty-three tracks in the station, twenty of which terminate on the level of the waiting rooms. The remaining thirteen are depressed twenty feet below the level of the waiting rooms, and nine of these continue under the station building into a tunnel which runs beneath a portion of Capitol Hill and leads to the through lines southward. With the exception of the stairs leading to the depressed tracks, there are no steps anywhere in the building.

On one corner of the large relief model of New York City, will be seen a model of Pennsylvania Station, the Pennsylvania System's mammoth terminal in New York City.

This station occupies four entire city blocks in the heart of New York City, and is unique in that the walls and massive columns on the interior and the great stairways are constructed of travertine, a very hard stone quarried in the foothills of the Apennines of Italy.

The train lobby, or concourse as it is called, is constructed almost entirely of steel and glass, and all of the tracks and platforms are below the level of the street.

The area of the station proper and the underlying yards is twenty-eight acres. Five hundred houses, including several churches, were removed to make room for this mammoth terminal, the building proper embracing alone an area of nearly eight acres.

There are twin tubes under the Hudson River and Bergen Hill, in New Jersey, extending a distance of over two miles, and a series of four tubes lead from the station under New York City, the East River and Long Island City, two to the great yards at Sunnyside and the other two to the towns and resorts of Long Island.

#### A Journey Over the System Through the Moving Picture Camera.

The motion picture camera has brought to the Panama-Pacific Exposition a most unique exhibition in the form of a motion picture journey over the principal lines of travel on the Pennsylvania System.

These wonderful pictures are shown in a theatre, forming part of the Pennsylvania's exhibit, constructed of two Pennsylvania standard all-steel pas-

senger coaches, such as are used every day in the regular service of the railroad.

Th two all-steel coaches were converted into a motion picture theatre, after having been taken to San Francisco as a part of a regular train, by installing them on two standard gauge tracks side by side, removing one side of each coach, placing the open sides together and flooring and roofing the opening.

Amply seating space is provided in the cars for the convenience of the audiences who will view the pictures displayed at stated intervals during the time the Exposition is open.

One will note that the car windows have been replaced by transparencies bearing reproductions of the coats of arms of the various States traversed by the Pennsylvania lines, as well as of interesting views of scenery along the lines. At the close of the Exposition, these cars will be restored to normal conditions and be placed in service on the Pennsylvania System.

The motion pictures, which are exhibited without charge for admission, are highly educational. They consist of views along the entire Pennsylvania System, and present an instructive panorama of the country through which the Pennsylvania trains run.

All-steel limited trains between Chicago and New York, between St. Louis and New York, and on other portions of the System, are seen in motion, and at terminals. Freight trains in motion, carrying merchandise, coal, coke, iron ore and other commodities, are displayed in the pictures, which also show the operation of automatic block signals and other appliances. Locomotives taking water from track tanks while running at high speed, and the various devices for the prompt operation and control of trains, are features which possess educational value of special importance.

What with the summer months making practically the end of construction in the Exposition and the war in Europe embroiling more and more nations in the world strife, the month of June shows a fairly good total for building construction in the City and County of San Francisco. All told the figures amounted to \$1,679,928. This being made up of the following: Private construction, \$1,061,587; Panama-Pacific construction, \$17,010; City street work, \$177,145; City building construction, \$355,435; State Harbor work, \$67,221.

Of private construction \$283,777 was for brick and concrete; \$529,823 for frame construction, and \$148,487 for alterations and additions.

The amount for frame construction is about normal, amounting to a little more than half a million showing that residences and frame apartments are being erected at about a normal rate. Permanent construction within the fire limits is of course below the average. As compared to former years the record is as follows:

June, 1906	.....	\$ 687,391
June, 1907	.....	3,337,589
June, 1908	.....	3,455,506
June, 1909	.....	1,398,116
June, 1910	.....	1,178,161
June, 1911	.....	1,625,710
June, 1912	.....	2,068,224
June, 1913	.....	2,836,506

June, 1914	.....	2,799,617
June, 1915	.....	1,679,928

While the record for June is the smallest since 1910, still 1909 and 1910 both show a less figure than does the same month for the present year. So far the record for the first six months of the present year is as follows:

January	.....	\$1,284,598
February	.....	1,637,148
March	.....	2,043,531
April	.....	1,993,396
May	.....	1,212,413
June	.....	1,679,928

While business generally has felt a depression the general standing of the building business has not suffered more than any other. As things tend to adjust themselves to war conditions we may expect to see a revival in building just in proportion as new business starts.

#### THE STORY OF THE CENSUS.

Under this title the U. S. Census Bureau has recently published, for free distribution, an interesting little pamphlet containing a history of the census from 1790 to 1915, illustrated with numerous pictures and diagrams. During the period in question the census grew from "little more than a mere count of the population to the many, varied, and complex lines of investigation now conducted by a great statistical laboratory organized on a permanent basis." The magnitude of this branch of the Government, as now constituted, can perhaps be gaged by the fact that its total expenses during a decade, including the decennial census, amounts to about \$30,000,000. In other words, Americans pay about 3 cents per capita per annum for the luxury not only of being counted, but of having a most elaborate, progressive analysis made of all their activities. The machinery of the census has reached a high state of perfection—if not actual infallibility, the fault lies with the human factor. Thus, there is still some "padding" of census returns; not only for the personal benefit of enumerators, but also on account of the burning desire of cities and towns to inflate their population figures. After the census of 1910, sixty-nine indictments were brought against enumerators and others believed to be responsible for the falsity of returns in fourteen cities and towns, and there were fifty-three convictions.

#### THE INVENTOR OF THE MATCH.

The first match was the product of the ingenuity of John Frederick Kommer, who early in the nineteenth century was imprisoned in the penitentiary at Hohenasperg, in Germany. He invented the lucifer match while in his gloomy dungeon. The German government forbade the manufacture of matches on the ground of public policy because some children playing with them had caused a fire. Kommer was ruined by Viennese competition when he was released from prison and died a pauper. Up to 1886 the Vienna manufacturers controlled the match markets of the entire world.

It requires 1,550 miles of great embankments to preserve the Netherlands from the incursion of the sea.

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Arthur Stevens, Sausalito. The building will be erected on the west side of Leavenworth street north of Vallejo, covering an area of 25 by 74 feet, and has been designed to contain a total of six suites. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. All apartments will have wall beds and private baths. Marble and tile wainscot will be used. There will be a central heating system and a hot water supply. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Neil L. Nielson. The building will be erected on the south side of Sacramento east of Presidio, covering an area of 25 by 50½ feet. There will be a total of ten suites, all of which will have wall beds and private baths. Interior will be finished in pine with some elm panels and hardwood floors. Plans provide for steam heat and a hot water system. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with pressed brick veneer, shiplap and cement plaster on metal lath. Plans are being prepared.

**SAN FRANCISCO**—Apartment house addition, 1 story, frame. Cost not stated. Architect, none. Owner, Chester Williamson, 1464 Devisadero street, S. F. The present building located at 1732 Clement street will undergo alterations and additions. The new portion of the building will contain two and three room apartments. Interior will be finished in pine. There will be a hot water system, modern plumbing and electric work. Plans are complete and the work will be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 4 story and base, brick and steel, \$65,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner, Edward Sommerstrom, 292 12th street, Oakland. The building will be erected on the east side of Alice street north of 14th and has been designed for a large number of two, three and four room suites. Interior will be finished in pine, mahogany and white enamel. Hardwood floors will be used in the living and dining rooms. There will be elevator service, a hot water system, steam heat and vacuum cleaning. Bath rooms will be finished in tile. Wall beds are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and segregated figures

are being taken for all parts of the work except the terra cotta, which has been awarded to the Independent Sewer Pipe Co. of Los Angeles.

### BONDS.

**AUBURN, PLACER CO., CAL.**—The Placer County Supervisors will purchase, \$250,000 of the state highway bonds to be placed on sale July 28th. It is understood that with the money paid by the Placer board the trunk line in Placer County and the Roseville-Auburn lateral will be completed at once.

According to the agreement entered into between the Supervisors and the State Highway Commission, the contract for the construction of the lateral from Roseville to Auburn will be let within the next two months and the work completed without delay.

**OLYMPIA, WASH.**—The school board has decided to call an election to vote bonds in the sum of \$10,000 which will be added to the \$35,000 to be obtained from the State Capitol Commission for the construction of a new high school building.

**RIVERSIDE, RIVERSIDE CO., CAL.**—James A. Langan of Omaha has purchased a 22-acre site at Victoria Hill and will erect a brick residence costing \$25,000. As yet no architect has been selected to prepare the plans.

**EL CENTRO, IMPERIAL CO., CAL.**—At a meeting of the Board of Supervisors of Imperial County, District Attorney Nichols was authorized to draw up a resolution calling for a bond election for the purpose of constructing bridges and a new jail. The expenditures, which will total \$20,000, are as follows: For the court house, \$150,000; for the jail, \$25,000, and \$10,000 for bridges on the state highway in addition to such sums as will be spent on the county bridges.

**MADERA, MADERA CO., CAL.**—The City Trustees have set August 1st as the date for the voting of bonds of \$12,000 to provide for the construction of a new bridge over the Fresno River at B street. The proposed bridge will be of concrete construction and 23 feet wide.

**PASO ROBLES, SAN LUIS OBISPO CO., CAL.**—A special election will be called in the near future for the purpose of voting bonds in the sum of \$10,000 to provide for the erection of new school buildings.

**SEASIDE, ORE.**—Bonds of \$35,000 with which to erect and equip a new school building have been voted and will be ordered sold immediately. A site for the proposed building has already been selected.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—The Board of Supervisors has pledged themselves to finance and purchase \$135,000 worth of state highway bonds from the State Highway Commission. The purchase will be made to finish the state highway between Atascadero and Paso Robles. The

Highway Commission will call for bids immediately on the work according to statements made as this agreement was made with the San Luis Obispo County Supervisors if they agreed to buy the bonds.

**WOODLAND, YOLO CO., CAL.**—In accordance with a proposal made at the time the county broke off all negotiations with the State Highway Commission, the Supervisors are planning a bond issue of \$159,000 for the construction of a highway under their own supervision.

The proposed road will be twenty-one miles in length, and will extend from the northern boundary, where the state highway enters the county, to the bank of Cache Creek, near Yolo.

**OAKDALE, STANISLAUS CO., CAL.**—The Board of Directors of the Oakdale Irrigation District in session recently sold the \$100,000 bond issue voted several months ago to the E. J. Knight Company of Los Angeles at 90.25 and accrued interest.

The proceeds of the sale will be used in the improvement of the district's system.

**PARADISE, BUTTE CO., CAL.**—A movement is underway to bond the voters of Paradise Ridge and form an irrigation district.

A preliminary survey is to be made in the near future to ascertain the feasibility of the project.

**ANDERSON, SHASTA CO., CAL.**—The Board of Directors of the Anderson-Cottonwood Irrigation District, at a special session here, passed a resolution to have the legality of the bond issue of the district passed on by Attorneys Goodfellow, Eells, Moors and Orrich, of San Francisco; and to have the bonds validated by the State Bond Commission.

This will make the bonds legal investment for savings banks, insurance companies, etc., and can be sold anywhere.

The entire bond issue of \$150,000 will be covered in 5210 bonds. The first payment of the principal of the issue will fall due twenty-one years after the sale of the same, and the last installment will be paid after the expiration of forty years.

**MESA, ARIZ.**—Bonds in the sum of \$75,000 for the construction of a municipal sewer system have been sold at a premium of \$2,365. Bids for the construction of the sewer system will be called for shortly.

**COMPTON, LOS ANGELES CO., CAL.**—Bonds in the sum of \$70,000 for the construction of a municipal sewer system have been voted. Olmsted & Gillette, Hollingsworth Building, Los Angeles, are the consulting engineers.

**VISALIA, TULARE CO., CAL.**—Bonds in the sum of \$65,000 for the construction of a municipal sewer system have been voted.

## BRIDGES AND DAMS

**KNIGHTS LANDING, YOLO CO., CAL.**—Bridges, 2, timber construction. Cost not stated. Engineer, Haviland & Tibbitts, Alaska-Commercial Bldg., S. F. Owners, Knights Landing Bridge and Drainage District. Plans have been completed for two timber highway bridges near Knights Landing. The work will consist of two timber trestles each about 420 feet in length,

with two combination steel and timber spans 80 feet in length, and graded roadway approaches at each end. Bids are now being taken and will be opened on July 16th. Plans and specifications can be secured from the engineers' office.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the Santa Clara County Supervisors plans and specifications prepared by the County Surveyor for the construction of a reinforced concrete bridge on the Northern road over Guadalupe Creek were adopted at the Clerk was instructed to advertise for bids until August 2nd at 11 a. m. Further information together with plans and specifications may be had from the County Surveyor at San Jose.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the County Supervisors the County Surveyor presented plans and specifications for the construction of two reinforced concrete bridges on the Alviso road in the County of Santa Clara, and the same were adopted and the Clerk instructed to advertise for bids to close on July 19th at 11 a. m. Plans were also adopted for the construction of a reinforced concrete bridge on Center avenue at San Martin, and bids will be received by the County Supervisors until July 19th at 11 a. m. Plans and specifications together with full information may be had from the County Surveyor at San Jose.

**MODESTO, STANISLAUS CO., CAL.**—Flume and sand box, reinforced concrete. Cost not stated. Engineer, Chief Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. Plans and specifications have been completed and figures will be opened on July 27th for the construction of a flume waterway and sand box along the main line canal and across Dry Creek. Plans and specifications can be secured from the office of the engineer at Modesto.

**SAN ANSELMO, MARIN CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, City Engineer, San Anselmo. Owners, City of San Anselmo. The Board of Trustees of San Anselmo proposes to replace a number of wooden bridges which span San Anselmo Creek with concrete structures of the design employed in the municipality of Ross.

**SALINAS, MONTEREY CO., CAL.**—Bridges, steel construction. Cost not stated. Engineer, County Surveyor, Salinas. Owners, Monterey County. Plans and specifications have been prepared by the County Surveyor for the new steel bridges at Bradley and San Lucas, and will be submitted to the County Supervisors at their next regular meeting for approval. On approval bids will be called.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, steel, timber and concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. The Supervisors have voted to readvertise for bids for the construction of three bridges across the sand sloughs to the east of Red Bluff, and if, after obtaining legal advice

from the District Attorney, it is found possible, will proceed at once to the business of calling an election for the purpose of bonding the county for their erection. If the bonding proposition fails, the bridges will be built by direct tax and paid for in three equal annual installments.

**VISALIA, TULARE CO., CAL.**—Bridge, steel and concrete, \$18,000. Engineer, County Surveyor, Visalia. Owners, Tulare County. The Supervisors of Tulare County are awaiting acceptance from the State Highway Commission of plans for the new bridge to be built over Kings River near Kingsburg. The Supervisors are in session and desire to call for bids for the new bridge, but the plans must first be approved by the State Highway Commission and the State Engineering Department. Bids for the work will be called immediately on the approval of the plans.

**NAPA, NAPA CO., CAL.**—Bridge repairs. Cost not stated. Engineer, City Engineer Napa. Owners, City of Napa. The City Council has adopted the plans and specifications prepared by the City Engineer for the repairs to be made to the Third street bridge and the clerk of the council has been instructed to advertise for bids on the work. Specifications for the work on Third street, from the stone bridge to the concrete bridge, at a total estimated cost of \$1,685.55, were adopted, and the work was ordered done by the council.

**IGO, SHASTA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redding. Owners, Shasta County. All bids for the construction of a new bridge across Clear Creek a mile east of Igo were rejected by the Supervisors. The plans called for a steel bridge with a concrete floor. The Supervisors decided to call for plans for a reinforced concrete structure. The lowest bid offered for a good bridge was \$8,594.

## Contracts Awarded.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridges, reinforced concrete. Costs as follow. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. E. Kicourso, 58 West Santa Clara avenue, San Jose, bridge over Campbell Creek on the Homestead road, \$1,387; John Doyle, 113 West Santa Clara avenue, San Jose, bridges over Calabasas and San Tomas Creeks on the Homestead road, \$2,367; and John Doyle, 113 West Santa Clara avenue, San Jose, bridge over Permanente Creek on Fremont avenue, \$3,363.

**SAN FRANCISCO**—Pier repairs, \$11,281. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Repairs to Pier No. 11, \$11,281.

**MODESTO, STANISLAUS CO., CAL.**—Earth flume, \$51,950.50. Engineer, Chief Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. Contractors, Tibbitts-Pacific Co., 16 California street, S. F. Contract price, \$51,950.50.

**MARYSVILLE, YUBA CO., CAL.**—Bridge, reinforced concrete, \$3,353. Engineer, County Surveyor Marysville. Owners, Yuba County. Contractor, William Stephens, Redding. Contract price, \$3,353.

## COURT HOUSES.

**OAKLAND, CAL.**—Court house addition 2 story, brick, \$2,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Alameda County. The new addition will be erected at Broadway and Fifth, and has been designed to contain an additional court room, jury room and judges' chambers on the first floor. Upper floor will contain offices. Interior will be finished in pine and hardwood. The steam heating system in the present building will be extended into the new portion. Exterior will be faced with pressed brick. Plans are being prepared.

**OROVILLE, BUTTE CO., CAL.**—Hall of Records, 2 story and base, steel or reinforced concrete, \$60,000. Architect, Charles S. Kaiser, Mechanics Institute Bldg., S. F. Owners, Butte County. Preliminary plans for a new Hall of Records have been presented to the Supervisors and working drawings ordered prepared. Construction will be fireproof, but it has not been decided whether to use steel and brick or reinforced concrete. The building will contain the offices of the County Recorder, Treasurer, Auditor and Assessor. Interior will be finished in pine, hardwoods and metal. Tile floor will be used. Plans provide for steam heat, vacuum cleaning and fireproof vaults. Detail drawings will be submitted to the Board of Supervisors at their August meeting. Further mention will be made of the work.

## FACTORIES AND WAREHOUSES

**REDDING, SHASTA CO., CAL.**—Smelter smoke consumer and stack, \$300,000. Engineer's name not given. Owners, Coram Smelting Co. The million dollar smelter at Coram, which has been shut down since 1911, will be reopened as soon as a smoke controlling device can be constructed. This statement has been made by several directors of the smelter company. A \$50,000 smoke stack will be one of the first additions to the plant. Work will be started immediately on these projects, as it is the intention of the directors of the company to have the plant working within nine months.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Oil tanks and towers, street construction. Cost not stated. Engineer, Engineering Dept. Shell Oil Co., 343 Sansome street, S. F. Owners, Shell Oil Co. Contracts will be let in a few days by the Shell Oil Co., for the construction of a 10,000 barrel steel tank with tower at their plant in Martinez. Following this contracts will be let for several more similar tanks. The towers will be 30 feet high.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Factory addition, frame and concrete. Cost not stated. Engineer's name not given. Owners, Atlas Powder Co., Martinez. Plans have already been prepared, according to information received, that the Atlas Powder Company of New Jersey, which recently secured control of the stock of the Giant Powder Co., will make extensive additions to the Giant plant here.

**SAN FRANCISCO**—Factory, 4 story and base. Class A construction, \$250,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, John Bollman Co. It has been learned on

excellent authority that the proposed building to be erected for this company on their newly acquired property at Fourth and Bryant streets will not be started until late in the fall, probably not until October or November. Further mention will be made of the work.

## FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Thomas McCormick, 25 Gladys street, S. F. The building will be erected on the south side of Highland avenue east of Mission and will cover an area of 25 by 56 feet. There will be two modern flats of five and six rooms. Interiors will be finished in pine and redwood. Some oak floors will be used. Each living room will have an open fire place and tile mantel. Automatic water heaters will be installed. Imitation tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats and store, 3 story and base, frame, \$6,500. Architects, O'Brien Bros., 210 Montgomery street, S. F. Owner's name withheld. The building will be erected in the Mission district and has been designed for a store on the first floor and two modern flats of five and six rooms on the upper floors. Interiors will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, De Fazio, 1837 Mason street, S. F. Owner, M. Francisco. The building will be erected on Lombard street west of Kearny, and has been designed to contain two flats of five and six rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have imitation tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$9,000. Architect, S. J. Sterner S. F. Owner, C. Tiedeman, 204 6th avenue, S. F. The building will be erected on the west side of 7th avenue south of California street, and has been designed to contain six modern flats. Interior will be finished in pine and hardwood with some white enamel in the bed rooms. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be a central heating system, hot water heaters and open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in

the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, Henry Shelton, 1523 Santa Clara avenue, Alameda. The building will be erected on the west side of Minna street south of 14th, and has been designed to contain two flats of five rooms each. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile mantels. Bath rooms will have imitation tile wainscot. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$2,500. Architect, none. Owner, A. J. Bowley, 3946 19th street, S. F. The building will be erected on the south side of Hancock street west of Sanchez, covering an area of 24 by 53 feet, and has been designed to contain two small flats. Interiors will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places in the living rooms with tile or brick mantels. Imitation tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, H. E. Harris, Monadnock Bldg., S. F. Owner, C. A. Rushton. The building will be erected at the northwest corner of Fulton and 9th avenue, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine and hardwood. Hardwood floors will be used in the living and dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 4, 2 story and base, frame, \$4,500 each. Architect, none. Owner, J. G. Kincanon, 275 Montgomery street, S. F. These buildings will be erected on the west side of Steiner street north of Union, each covering an area of 25 by 60 feet, and each designed to contain two modern flats of five and six rooms. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be an open fire place in each living room with tile or brick mantel. Bath rooms will have tile wainscot. Automatic water heaters are specified. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

## GOVERNMENT WORK & SUPPLIES

**Clackamas, Ore., Fisheries Station.**

The following bids were received by the commissioner of fisheries, Washington, D. C., for the construction of a

superintendent's residence at the Clackamas, Ore., fisheries station:

J. A. Peters, Portland, Ore., \$1,769.  
E. P. Nelson, Gladstone, Ore., \$3,047.  
Ray O. Powers, Portland, Ore., \$2,361.  
Cripe & Busse, Portland, Ore., \$2,491.  
Hinchman & Scribner, Oregon City, Ore., \$3,286.

Franklin Davis, Portland, Ore., \$2,777.

L. D. Howe, Portland, Ore., \$3,360.  
R. A. Junken, Willamette, Ore., \$2,700.

#### Indian Affairs, Steel Bridge.

The contract for constructing a steel highway bridge across the Colorado River, near Topock, Ariz., has been awarded to the Kansas City Structural Steel Co., Kansas City, Mo., at \$71,450.

#### The Dalles, Ore., Post Office.

The contract for the construction, complete, of the U. S. post office at The Dalles, Ore., was awarded to George Isackson, Portland, Ore., at \$79,659. In the construction of the building fixtures and material manufactured by the following firms will be used: Plumbing fixtures, Crane Co.; nonconducting coverings, Gillen-Chambers Co.; cast iron column radiators and wall radiators, American Radiator Co.; nonconducting coverings for steam pipes, Keasbey & Mattison; radiator valves, Crane Co.; air valves for radiators, American Radiator Co.; damper regulator, Fulton Co.; air valves for steam mains, Jenkins Bros.; oil-burning apparatus, Fess System Co.; motor for oil-burning apparatus, Wagner; rheostat for motor, do; cabinet and tablet, Agutter-Griswold Co.; conduit, Western Conduit Co.; rubber-covered wire, Roebeling; flush switches, Hart Mfg. Co.; pendant switches, General Electric Co.; canopy switches, Cutler-Hammer Mfg. Co.; keyless sockets, Weber.

#### Port Townsend, Wash., Oil-Burning System.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for an oil-burning system in the U. S. post office at Port Townsend, Wash.:

S. Normile Heating and Plumbing Co., Seattle, Wash., \$1,709; time, July 30.

A. H. Cox & Co., Seattle, Wash., \$1,490; time, 30 days.

West Coast Heating Co., Seattle, Wash., \$1,395; time, 60 days.

S. T. Johnson Co., San Francisco, Cal., \$1,731; time, Aug. 25.

T. P. Jarvis Crude Oil Burner Co., San Francisco, Cal., \$1,445; time, Aug. 21.

Ben Olson Co., Tacoma, Wash., \$1,500; time, Sept. 15.

Applying-Griggs Co., Tacoma, Wash., \$1,473; time, 60 days.

#### Steel Gates, Reclamation Service.

The following bids were received by the director, U. S. Reclamation Service, Washington, D. C., for furnishing one set of steel Tainter gates for the Mesilla diversion dam, Rio Grande project, N. M.:

El Paso Foundry and Machinery Co., El Paso, Tex., 4.75c per lb. and 2.91c, alternate weight, 51,000 lbs.; delivered Sept. 1.

Exeter Machine Works, Pittston, Pa., 5.5c per lb.; weight, 58,359 lbs.; time, Sept. 1.

R. D. Wood & Co., Philadelphia, Pa., 5.9c per lb.; weight, 51,780 lbs.; time, Aug. 18.

Penn Bridge Co., Morado, Pa., 3.15c; weight, 51,000 lbs.; time, Sept. 1.

Federal Bridge Co., Waukesha, Wis., 3.76c; weight, 52,300 lbs.; time, Sept. 1.

Minneapolis Steel and Foundry Co., Minneapolis, Minn., 4.15c; weight, 52,000 lbs.; time, Sept. 1.

Linman Hydraulic Manufacturing Co., Denver, Colo., 4.80c; weight, 50,000 lbs.; time, Sept. 1.

Union Machine Co., San Francisco, Cal., 5c; weight, 51,000 lbs.; time, Sept. 1.

Variety Iron and Steel Works Co., Cleveland, Ohio, 5.5c; weight, 52,500 lbs.; time, Sept. 1.

Chicago Bridge and Iron Works, Chicago, Ill., 5.35c; weight, 55,000 lbs.; time, Sept. 1.

Milwaukee Bridge Co., Milwaukee, Wis., 3.65c; weight, 57,900 lbs.; time not stated.

Llewellyn Iron Works, Los Angeles, Cal., 6c; weight, 53,300 lbs.; time, Aug. 7.

Central States Bridge Co., Indianapolis, Ind., 2.9c; weight, 55,000 lbs.; time, Sept. 1.

Ritter-Conley Manufacturing Co., Pittsburgh, Pa., 4.2c; weight, 50,000 lbs.; time, Sept. 1.

Laker Iron Works, Los Angeles, Cal., 6.75c; weight, 59,000 lbs.; time, 60 days.

Darbyshire-Harvie Iron and Machine Co., El Paso, Tex., total, \$3,245; weight, 60,000 lbs.; time, Sept. 1.

Fulton Engineering Works, Los Angeles, Cal., 6.55c; weight, 64,600 lbs.; time, Sept. 1.

#### Panama Canal Circular 947.

The purchasing officer of the Panama Canal will open bids July 20 for furnishing the following supplies and material:

Class 1, 376 louver panels for shed of pier No. 7.

Class 2, 59,500 carriage bolts, with square nuts.

Class 3, A quantity of machine bolts.

Class 4, A quantity of plain milling cutters and spiral end mills.

Class 5, 600 stenographers' notebooks.

Class 6, 500 sheets binder's Board.

Class 7, 10,000 sheets white cardboard.

Class 8, 4,000 sheets fawn cardboard.

Class 9, 100 reams buff bond paper.

Class 10, 150 reams canary bond paper.

Class 11, 600 reams white bond paper.

Class 12, 100,000 manila tags 3x 10 1/2 in.

#### Denver, Colo., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Denver, Colo.:

The Berger Mfg. Co., Canton, Ohio., \$1,461.

The Keyless Lock Co., Indianapolis, Ind., \$1,487.

The American Bank Protection Co., Minneapolis, Ind., \$1,501.

The General Fireproofing Co., Washington, D. C., \$1,547.

The Canton Art Metal Co., Canton, Ohio, \$1,556.

Watson Mfg. Co., Jamestown, N. Y., \$1,525.

Crown Metal Construction Co., Jamestown, N. Y., \$1,757.

The Van Horn Iron Works Co., Cleveland, Ohio, \$1,898.65.

#### Panama Canal Requisitions.

The general purchasing officer of the Panama Canal will soon call for bids for furnishing 3,250,000 lbs structural steel rivets and cast steel slabs for re-loader wharf at Balboa.

#### Crow Indian School, Mont., Building.

The following bids were received by the commissioner of Indian affairs, Washington, D. C., for constructing a brick school house and heating plant at the Crow Indian School, Mont.:

Gagnon & Co., Billings, Mont., school only, \$29,900; 135 days.

W. D. Lovell, Minneapolis, Minn., school, \$21,490; heating, \$4,500; total, \$25,990; 180 days.

#### Army Work Awarded.

The following awards have been made by the construction branch of the quartermaster generals office during the past week:

San Francisco, Cal., Presidio.—Constructing shed over garbage crematory, James Curry, San Francisco, Cal., \$954.

Letterman General Hospital. — Concrete ward building and addition to laboratory, all bids of San Francisco. Ward building—Construction, W. A. Newsom, \$12,888; plumbing, Wm. P. Scott, \$2,057; heating, The Turner Co., \$550; light fixtures, do, \$144. Addition to laboratory.—Construction, L. H. Stock, \$3,829; plumbing, D. O. Church, \$782; wiring, do, \$200; light fixtures, Roberts Mfg. Co., \$73.10; heating, The Turner Co., \$380.

SAN FRANCISCO.—Subtreasury completion. Class A construction, \$9,760. Architect, Milton Dyer, Cuyahoga Bldg., Cleveland, Ohio. Owners, United States Government. Acting Supervising Architect Wetmore telegraphs from Washington, D. C., that the Construction and Engineering Co., 1047 Folsom street, this city, has presented the lowest bid at \$9,760 for the completion of the second floor of the United States subtreasury building.

#### HALLS AND SOCIETY BUILDINGS

BURLINGAME, SAN MATEO CO., CAL.—Commercial Club, 1 story, frame. Cost not stated. Architect's name not given. Owners, Burlingame Commercial Club. The building will cover an area of 10 by 100 feet and, besides the offices and display rooms, will contain a lecture hall, swimming tank, bowling alleys and hand ball courts. Interior will be finished in pine and redwood. Exterior design is in the rustic style and will be covered with rustic shingles. Plans are being prepared. Further mention will be made of the work.

#### HOSPITALS.

SAN FRANCISCO.—Veterinary hospital, 2 story and base, reinforced concrete. Cost not stated. Architect, Norman R. Coulter, 46 Kearny street, S. F. Owners, San Francisco Veterinary College. The building will be erected on the east side of Tenth street 125 feet

south of Stevenson. Dr. Creeley, co-operating with the architect, has designed what will be the largest and most up-to-date and sanitary veterinary college in the west. The building, as designed, will have a frontage of 125 feet and a depth of 130 feet and will be of reinforced concrete construction, fireproof throughout. The main floor has been arranged for the hospital proper, operating rooms and laboratories. There will be a large mezzanine floor and second floor will contain the college class rooms, lecture rooms, study hall and offices. This portion of the building will be finished in pine and hardwood. Plans provide for steam heat, the latest and most sanitary plumbing and operating room equipment. Exterior will be faced with cement plaster and has been designed in the Classic style, and will be a decided addition to Tenth street. The college enrollment is in the neighborhood of 150 students. Plans are being prepared.

### LIBRARIES.

GRIDLEY, BUTTE CO., CAL.—Library, 1 story and base, brick and concrete, \$6,500. Architect's name not given. Owners, Town of Gridley. George W. Tolley of Gridley submitted the lowest figure for the construction of the new library and will probably be awarded the contract. His bid was \$6,500. Three other bids were received.

### RAILROAD CONSTRUCTION AND EQUIPMENT

SAN FRANCISCO—Municipal car barn addition, 1 story, reinforced concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. All bids received by the Board of Public Works for the construction of a one-story addition to the Geary Street Municipal Car Barns have been rejected. New bids will be called for shortly.

GREENVILLE, PLUMAS CO., CAL.—Electric railroad construction. Cost not stated. Engineer, Engineering Department Great Western Power Co., Shreve Bldg., S. F. Owners, Great Western Power Co., Lloyd P. Cornell of Oakland, representing the Great Western Power Co., is in Indian Valley getting rights of way from the various property holders for an electric line from Butte Valley to Engel's Mine. The pole line will run from a plant at Butte Valley over the hills, striking Indian Valley at the Lawrence race track near Greenville, and then along the base of the mountain to Lights Canyon, where the mine is located.

TACOMA, WASH.—Passenger station 2 and 4 story and base. Class A construction, \$100,000. Architect's name not given. Owners, Chicago, Milwaukee & St. Paul R. R. Co. The building will be erected on property at the corner of 25th and East A streets. Other than the fact that the building will be of fireproof construction no details have been given out. Bids will not be called at this time. Further mention will be made of the work.

### Contracts Awarded

MODESTO, STANISLAUS CO., CAL.—Passenger station, 1 story and base,

frame and plaster, \$9,120. Architect, Chief Engineer Barlow, Flood Bldg., S. F. Owners, Southern Pacific Co. Contractor, George A. Bos, Hearst Bldg., S. F. Contract price, \$9,120.

### RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, L. Muldowney, 310 Guerrero street, S. F. The dwelling has been designed for a five-room house with bath, and will be erected on the east side of Rousseau avenue south of Bosworth. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place in the living room with a tile or brick mantel. Tile wainscot will be used in the bath room. An automatic water heater is specified. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, E. Ginley, 131 5th avenue, S. F. The dwelling will be erected on the west side of 15th avenue north of Balboa, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residences, 3, 1 story and base, frame, \$2,000 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These dwellings will be erected on the east side of 29th avenue north of Irving street and each will contain five rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place in each living room. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms. Automatic water heaters are specified. Exteriors will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 3 story and base, frame, \$5,000. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co. The dwelling has been designed for an eight-room house with bath and sleeping porch and will be erected in Ashbury Terrace. Interior will be finished in pine and southern gum. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will

be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architect, none. Owner, R. Roundtree, 408 Hugo street, S. F. The dwelling will be erected on the west side of 26th avenue south of West Clay Park, and has been designed to contain eight rooms, two baths and sleeping porch. A garage will also be provided. Interior of the house will be finished in pine and hardwood and mahogany. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Daniel Ferguson, 65 7th street, Oakland. The dwelling will be erected on Evans avenue north of Wellington, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,500. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. The dwelling will be erected in East Oakland and has been designed for an eight-room house with bath and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine with some hardwood veneer and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and sub-figures are being taken on the work.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss Gertrude Anthony. The dwelling will be erected in Cragmont and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. A., general purchasing officer.

## STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION.

### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the **California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on July 26, 1915**, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Colusa County, through Arbuckle (III-Col-7-A), about 0.3 miles in length, to be surfaced with asphalt 55 feet wide.

Marin County, between Burdell and St. Vincent (IV-Mrn-1-A), about 4 miles in length, to be graded.

Monterey County, from Greenfield to Camphora (V-Mon-2-D), about 11.7 miles in length, to be paved with Portland cement concrete.

Santa Barbara County, from Gaviota Pass to Zaca Station (V-SB, 1-2-D), about 11.4 miles in length, to be graded. San Luis Obispo County, from Atascadero Creek to Paso Robles (V-SB, 1, O-2-B), about 10 miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are lo-

cated at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS,  
Secretary.

Dated: June 29, 1915.

Plans and specifications may be obtained on application to the bureau or to the officer in charge, naval radio station, San Diego, Cal. H. R. STANFORD, Chief of Bureau.

## CALIFORNIA AN ART CENTER.

Rather interesting is the fact that eastern Massachusetts and Southern California, on opposite sides of the continent, should be conspicuous today for triumphs in the realm of esthetics that probably neither the conscience-impelled Pilgrims and Puritans nor the gold-seeking "forty-niners" supposed would become part of the ultimate civilization of the two coasts, says Christian Science Monitor. Equally important to note in connection with the achievements in the plastic arts is their distinct, authentic, characteristically native quality, but little influenced, if at all, by any prevailing fashions in Europe or in the quasi-American city of New York.

How far climate, scenery, and the survivals of aboriginal and Spanish art have shaped the California school

Mary Austin tells in the April Century. It is a convincing, persuasive argument, with its references to the classic cases of Greece and Italy, as showing the relation of the external world to the art that flowered out in Athens and in Rome. Where color abounds in sky and on land, where there is clean-cut definition of landscape forms, where agriculture and its fruits may be made contributory to the pageantry of human experience formally arranged, and where there appears to be a never-ceasing impression upon the beholder of the vitality of nature, there, according to this California interpreter, the creative impulse always flowers out in art.

To these influences, native and inherent, as might be said, in the very physical structure of the region, and bound to influence all who dwell there more or less, add any imported influences of an educational or broadening sort, such as in the course of time may come from contact with Japanese and Chinese art and artists, or as must be latent in the art exhibits of foreign nations at the San Francisco and San Diego expositions, and it should not surprise the nation if out of the southwest and the west were to come some of the greatest of painters, sculptors, and architects. The inspirational influence of the total environment has already registered itself in verse and in fiction, and in nature interpretation by such a genius as Muir.

## ADDITIONS TO AMERICAN MERCHANT FLEET.

Merchant vessels built in the United States and officially numbered by the Bureau of Navigation, Department of Commerce, during the fiscal year ended June 30, 1915, were 1,226, of 215,711 gross tons, compared with 1,291, of 211,575 gross tons, for the fiscal year 1914.

During the past 10 months, however, under the Ship Registry Act of August 18, 1914, to the American merchant fleet, 147 foreign-built vessels of 528,997 gross tons have been added, making the total for the year from both sources 1,373 vessels of 744,618 gross tons.

This tonnage is the largest annual addition to the American merchant fleet in the history of the United States. In 1908 the total increase was 718,683 gross tons, in 1907 it was 596,708 gross tons, and in 1955 it was 586,102 gross tons.

The losses to the merchant fleet for the past year have not all been reported, but for the first nine months they numbered 1,062 vessels of 193,052 gross tons.

Two sovereigns of England have lived to an age of over eighty, three to an age of over seventy and ten to an age of over sixty.

## Fort Worden, Concrete Wharf.

The bid of John J. Stockland, \$795 in amount, has been accepted for the construction of a concrete wharf at Fort Worden, Wash.

A form of the camera obscura has been invented by a Freemason to inform an aviator when he deviates from a given course.

These two houses will be erected at the gore corner of West Ashbury and North Ashbury, and each has been designed for an eight-room house with bath, sleeping porch and basement garage. Interiors will be finished in pine, hardwood veneer and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Automatic water heaters will be installed. Bath rooms will be finished in tile and equipped with showers. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$6,000. San Francisco. Architect, Albert Lapachet, 110 Sutter street, S. F. Owner's name withheld. The

dwelling has been designed for an eight-room house with bath, sleeping porch and basement garage, and will be erected in the Richmond District. Interior will be finished in pine, hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot and will be equipped with shower. An automatic water heater will be installed. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

MUNICIPAL CAR BARN ADDITION — 1 story, reinforced concrete. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. All bids received by the Board of Public Works for the construction of a one-story addition to the Geary Street Municipal Car Barns have been rejected. New bids will be called for shortly.

STORES — 1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Albert Lapachet, 110 Sutter street, S. F. Owner's name withheld. The building will be erected on Geary street near Buchanan, having a frontage of 50 feet. There will be two small stores. Interior will be finished in pine. Patent store fronts are specified. Exterior will be faced with cement plaster. Plans are complete and figures will be taken shortly.

FACTORY—4 story and base. Class A construction, \$250,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, John Bollman Co. It has been learned on excellent authority that the proposed building to be erected for this company on their newly acquired property at the corner of Fourth and Bryant streets will not be started until late in the fall probably not until October or November. Further mention will be made of the work.

VETERINARY HOSPITAL—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Norman R. Coulter, 46 Kearny street, S. F. Owners, San Francisco Veterinary College. The building will be erected on the east side of Tenth street 125 feet south of Stevenson. Dr. Creely, co-operating with the architect has designed what will be the largest and most up-to-date and sanitary veterinary college in the west. The building, as designed, will have a frontage of 125 feet and a depth of 130 feet, and will be of reinforced concrete construction fireproof throughout. The main floor has been arranged for the hospital proper, operating rooms and laboratories. There will be a large mezzanine floor and second floor which will contain the college class rooms, lecture rooms, study hall and offices. This portion of the building will be finished in pine and hardwood. Plans provide for steam heat, the latest and most sanitary plumbing and operating room equipment. Exterior will be faced with cement plaster and has been designed in the Classic style and will be a decided addition to Tenth street. The college enrollment is in the neighborhood of 150 students. Plans are being prepared.

**FOUR**—1 story and base, frame, \$2,500. San Francisco. Architect, P. F. De Martini, 2123 Powell street, S. F. Owner M. J. Sarraille. The building will be erected at the southwest corner of Beach and Grant avenue, covering an area of 50 by 75 feet. Interior will be finished in pine and redwood. Some special fixtures will be installed. Exterior will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

**RESIDENCE** — 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Bernard F. Chambers, 9 Heyman avenue, S. F. The dwelling will be erected on the west side of Diamond street north of Chenery, and has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile mantels. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

### Contracts Awarded

**PIER REPAIRS**—\$14,281. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Repairs to Pier No. 11, \$14,281.

### OAKLAND AND ALAMEDA COUNTY.

**RESIDENCE**—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, Daniel Ferguson, 65 7th street, Oakland. The dwelling will be erected on Evans avenue north of Wellington, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$1,500. Oakland, Cal. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. The dwelling will be erected in East Oakland and has been designed for an eight-room house with bath and sleeping porch. A garage will also be erected on the property. Interior of

the dwelling will be finished in pine with some hardwood veneer and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and sub-figures are being taken on the work.

**RESIDENCE**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss Gertrude Anthony. The dwelling will be erected in Cragmont, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile floor and wainscot will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are now out for figures.

**RESIDENCE**—2 story and base, frame, \$4,100. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Miss Tucker. The dwelling will be erected in North Berkeley, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—4 story and base, brick and steel, \$63,000. Oakland, Cal. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner, Edward Sommarstrom, 202 12th street, Oakland. The building will be erected on the east side of Alice street north of 14th, and has been designed for a large number of two, three and four room suites. Interiors will be finished in pine, mahogany and white enamel. Hardwood floors will be used in the living and dining rooms. There will be elevator service, a hot water system, steam heat and vacuum cleaning. Bath rooms will be finished in tile. Wall beds are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and segregated figures are being taken for parts of the work except the terra cotta, which has been awarded to the Independent Sewer Pipe Co. of Los Angeles.

**COURT HOUSE ADDITION**—2 story brick, \$2,000. Oakland, Cal. Architect, Henry H. Meyers, Kohl Bldg., S. E. Owners, Alameda County. The new addition will be erected on Broadway and Fifth and has been designed to contain an additional court room, jury

room and judges' chambers on the first floor. Upper floor will contain offices. Interior will be finished in pine and hardwood. The steam heating system in the present building will be extended into the new portion. Exterior will be faced with pressed brick. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$1,000. Oakland, Cal. Architect, none. Owner, C. M. MacGregor, 170 13th street, Oakland. The dwelling will be erected on the south side of Lerida street west of Carlston, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood, with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SCHOOL GYMNASIUM**—1 story, frame. Cost not stated. Fruitvale, Alameda Co., Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Mills College. The building will be in the nature of an addition to the present building and will contain bowling alleys. Interior will be finished in pine. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**STORES**—1 story and base, brick, \$10,000. Berkeley, Alameda Co., Cal. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Shattuck avenue having a frontage of 150 feet. There will be five stores. Interiors will be finished in pine with some hardwood veneer. Hardwood floors will be used in the display windows. Patent store fronts and marble bases are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and the architects are taking sub-figures.

**THEATRE**—3 story and base. Class A construction, \$175,000. Oakland, Cal. Architects, Cunningham & Polito, First National Bank Bldg., S. F. Owners, Moffitt Estate, leased to Turner & Bohlen. The building will be erected at the southwest corner of Franklin and 11th streets, having a frontage of 100 feet on Franklin street and 175 on 11th. Construction will be of reinforced concrete and steel. Inclines will do away with all stairways. The main body of the house will seat 4,000 people, and besides this plans provide for a balcony. Interior will be handsomely finished in hardwoods, ornamental plaster and imported draperies. The most modern heating and ventilating systems will be installed. Exterior of the building will be faced with cement plaster and pressed brick trimmed with terra cotta. Plans are nearly complete and figures will be called for shortly.

**STREET PAVING AND BRICK AND TERRA COTTA GATEWAYS**. Cost not stated. Livermore, Alameda Co., Cal.

**Structural Steel  
Contractors**

**Works at  
HARRISON ST.,  
bet. 8th & 9th  
San Francisco**

**Telephone Market 337**

Engineer, Town Engineer, Livermore. Owners, Town of Livermore. Plans and specifications for the paving of a 24-foot strip on the North Stockton road and on North L street to connect the town pavement with the state highway are now being prepared, and bids will soon be called. The length of these strips is 2,500 feet and 300 feet respectively. Plans are also under way for the brick and terra cotta gateways near the town entrances, funds for which have already been granted.

**SEWER CONSTRUCTION**—Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Plans are complete and figures are now being taken for a 6-inch vitrified ironstone sewer 280 feet long with four brick manholes, Y branches etc. Plans can be secured from the office of the City Engineer. Bids will be opened on July 20th.

**RESIDENCE**—2 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architects, Universal Drafting Bureau, 1811 5th avenue, Oakland. Owner, M. P. Brash. The dwelling will be erected in Northbrae and has been designed for a five room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

#### Contracts Awarded.

**SCHOOL**—1 story and base, frame, \$17,891. Newark, Alameda Co., Cal. Architect, F. D. Wolfe, San Jose. Owners, Newark School District. Contractor, Manuel Lewis, Centerville. Contract price, \$17,891. A complete list of the bids submitted will be found under the heading of Oakland and Alameda County in this issue.

**STORE FIXTURES**—\$2,400. Berkeley, Alameda Co., Cal. Architect, Henry Sherman, Mills Bldg., S. F. Owners, Lowman's Pharmacy. Contractor, S. Levi, 116 E street, S. F. Contract price, \$2,400.

## SAN JOSE AND THE SANTA CLARA VALLEY

**STREET PAVING**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. At the last meeting of the City Council resolutions of intention to pave the following streets were adopted: Crossing at 17th and Julian streets; portion of the roadway on the east side of 17th street, between Empire and Washington streets; portion of roadway on 17th street, between Washington and Julian streets. Resolutions given first reading were for the crossing at 17th and Washington streets and 17th and Empire streets. James H. Quimby, for the Kaish Improvement Co., was given permission to do work between 4th and 7th streets and between 8th and 9th streets on William street.

**RESIDENCE**—2 story and base, frame, \$5,000. Los Gatos, Santa Clara Co., Cal. Architect, O. M. Vrooman, 58 South First street, San Jose. Owner, C. H. Phillips. The dwelling will contain eight rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and figures are now being taken.

**BRIDGE**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meet of the Santa Clara County Supervisors plans and specifications prepared by the County Surveyor for the construction of a reinforced concrete bridge on the Northern road over Guadalupe Creek, were adopted and the Clerk was instructed to advertise for bids until August 2nd at 11 a. m. Further information together with plans and specifications may be had from the County Surveyor at San Jose.

**BRIDGE**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the County Supervisors the County Surveyor presented plans and specifications for the construction of two reinforced concrete bridges on the Alviso road in the

County of Santa Clara and the same were adopted and the Clerk instructed to advertise for bids to close on July 19th at 11 a. m. Plans were also adopted for the construction of a reinforced concrete bridge on Center avenue at San Martin and bids will be received by the County Supervisors until July 19th at 11 a. m. Plans and specifications together with full information may be had from the County Surveyor at San Jose.

**BRIDGES**—Steel construction. Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Plans and specifications have been prepared by the County Surveyor for the new steel bridges at Bradley and San Lucas and will be submitted to the County Supervisors at their next meeting for approval. On approval bids will be called.

**COMMERCIAL CLUB**—1 story, frame. Cost not stated. Burlingame, San Mateo Co., Cal. Architect's name not given. Owners, Burlingame Commercial Club. The building will cover an area of 10 by 100 feet and, besides the offices and display rooms, will contain a lecture hall, swimming tank, bowling, alleys and hand ball courts. Interior will be finished in pine and redwood. Exterior design is in the rustic style and will be covered with rustic and shingles. Plans are being prepared. Further mention will be made of the work.

## Contracts Awarded

## AMOUNT

## MARIN, CONTRA COSTA AND SONOMA COUNTIES

BRIDGES—Reinforced concrete. Cost

not stated. San Anselmo, Marin Co.

Cal. Engineer, City Engineer, San An-

selmo. Owners, City of San Anselmo.

The Board of Trustees of San Anselmo

proposes to replace a number of wood-

en bridges which span San Anselmo

Creek with concrete structures of the

design employed in the municipality of

Ross.

BRIDGE REPAIRS—Cost not stated.

Napa, Napa Co., Cal. Engineer, City

Engineer, Napa. Owners, City of Napa.

plans and specifications prepared by

the City Engineer for the repairs to be

made to the Third street bridge and

the Clerk of the Council has been in-

structed to advertise for bids on the

work. Specifications for work on

Third street, from the stone bridge to

the concrete bridge, at a total esti-

mated cost of \$1,685.85, were adopted,

and the work was ordered done by the

Council.

OIL TANKS AND TOWERS—Steel

construction. Cost not stated. Mar-

tinez, Contra Costa Co., Cal. Engineer-

ing Department Shell Oil Co., 343 San-

some street, S. F. Owners, Shell Oil

Co. Contracts will be let in a few

days by the Shell Oil Co. for the con-

struction of a 10,000 barrel steel tank

with steel tower at their plant in Mar-

tinez. Following this contracts will

be let for several more similar tanks.

The towers will be 30 feet high.

GRADING, CONCRETE CULVERTS,

ETC.—Cost not stated. Martinez, Con-

tra Costa Co., Cal. Engineer, City En-

gineer, Martinez. Owners, City of

Martinez. Improvements aggregating

\$7,700, and which call for the con-

struction of a flume across Main street,

in front of the city hall, and for the

changing of the route of the creek on

Ferry street and the construction of a

concrete culvert over it, are now be-

ing considered by the City Trustees.

Immediate action is expected.

FACTORY ADDITION — Frame and

concrete. Cost not stated. Martinez,

Contra Costa Co., Cal. Engineer's name

not given. Owners, Atlas Powder Co.,

Martinez. Plans have already been

prepared, according to information re-

ceived, that the Atlas Powder Com-

pany of New Jersey, which recently

secured control of the stock of the

Giant Powder Co., will make exten-

sive additions to the Giant plant here.

## Contracts Awarded.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**FLUME AND SAND BOX**—Reinforced concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. Plans and specifications have been completed and figures will be opened on July 27th for the construction of a flume waterway and sand box along the main line canal and across Dry Creek. Plans and specifications can be secured from the office of the engineer at Modesto.

**BRIDGE**—Steel and concrete \$18,000. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. The Supervisors of Tulare County are awaiting acceptance from the State Highway Commission of plans for the new bridge to be built over Kings River near Kingsburg. The Supervisors are now in session and desire to call for bids for the new bridge, but the plans must first be approved by the State Highway Commission and the State Engineering Department. Bids for the work will be called for immediately on the approval of the plans.

**OUTFALL SEWER AND FILTER BEDS**—Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Plans and specifications for an outfall sewer and filter beds for draining off the effluent from septic tanks have been completed by the City Engineer, and action is awaited from the State Board of Health. According to reports the board will report favorably on the matter.

**HIGHWAY CONSTRUCTION**—\$25,000. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Bids are being advertised for to be opened at the meeting of the Board of Supervisors in August for the construction of a new mountain highway from Three Rivers to Lemon Cove, in accordance with plans and specifications on file in the office of the County Surveyor.

**SEWER EXTENSION**—Cost not stated. Porterville, Tulare Co., Cal. Engineer, City Engineer L. H. Althouse, Porterville. Owners City of Porterville. The Council has directed the City Engineer to prepare plans and estimates of the cost of extending the sewer system to the newly platted additions north and west of the high school property. Water mains to these additions have been laid. Bids will be called on completion and approval of the plans.

**STREET PAVING**—Cost not stated. Lindsay, Tulare Co., Cal. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. At their last meeting the City Trustees ordered the paving of the road from Basil Prior's corner east to the packing house street. The paving would probably be 16 or 18 feet wide. Specifications were also called for the paving of Honolulu street east to the city limits. The new paving plans call for about 200,000 square feet or approximately 12 blocks.

### Contracts Awarded.

**FURNISHING ROCK**—Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractors, Sharp & Fellows Construction Co., Bakersfield. Contract price not stated. This contract calls for furnishing approximately 14,000 tons of rock.

**PASSENGER DEPOT**—1 story and base, frame and plaster, \$9,720. Modesto, Stanislaus Co., Cal. Architect, Chief Engineer Barlow, Flood Bldg., S. F. Owners, Southern Pacific Co. Contractor, George A. Bos, Hearst Bldg., S. F. Contract price, \$9,720.

**HIGHWAY CONSTRUCTION**—\$4,265.50. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Contractors, Castro & Blaisdell, Bakersfield. Contract price, \$4,265.50.

**HIGHWAY CONSTRUCTION**—\$7,000. Quincy, Plumas Co., Cal. Engineer, County Surveyor, Quincy. Owners, Plumas County. Contractors, Bradley Engineering Co., Reno, Nev. Contract price, \$7,000 plus 15 per cent for changes.

**EARTH FLUME**—\$54,950.50. Modesto, Stanislaus Co., Cal. Engineer, Chief Engineer Herrmann, Modesto. Owners, Modesto Irrigation District. Contractors, Tibbitts-Pacific Co. 18 California street, S. F. Contract price, \$54,950.50.

**LIBRARY**—1 story and base, brick and concrete, \$6,500. Gridley, Butte Co., Cal. Architect's name not given. Owners, Town of Gridley. George W. Tooley of Gridley submitted the lowest figure for the construction of the new library, and will probably be awarded the contract. His bid was \$6,500. Three other bids were received.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**BRIDGES**—2, timber construction. Cost not stated. Knights Landing, Yolo Co., Cal. Engineers, Haviland & Tibbitts, Alaska-Commercial Bldg., S. F. Owners, Knights Landing Bridge and Drainage District. Plans have been completed for two timber highway bridges near Knights Landing, Yolo County, Cal. The work will consist of two timber trestles each about 120 feet in length with two combination steel and timber spans 80 feet in length and graded railway approaches at each end. Bids are now being taken and will be opened on July 16th. Plans and specifications can be secured from the engineer's office.

**BRIDGES** Steel, timber and concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. The Supervisors have voted to re-advertise for bids for the construction of three bridges across the sand sloughs to the east of Red Bluff, and if, after obtaining legal advice from the District Attorney, it is found

possible, will proceed at once to the business of calling an election for the purpose of bonding the county for their erection. If the bonding proposition fails, the bridges will be built by direct tax and paid for in three equal annual installments.

**HALL OF RECORDS**—2 story and base, steel or reinforced concrete, \$60,000. Oroville, Butte Co., Cal. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Butte County. Preliminary plans for a new Hall of Records have been presented to the Supervisors and working drawings ordered prepared. Construction will be fireproof, but it has not been decided whether to use steel and brick or reinforced concrete. The building will contain the offices of the County Recorder, Treasurer, Auditor and Assessor. Interior will be finished in pine, hardwoods and metal. Tile floor will be used. Plans provide for steam heat, vacuum cleaning and fireproof vaults. Detail drawings will be submitted to the Board of Supervisors at their August meeting. Further mention will be made of the work.

**SMELTER SMOKE CONSUMER AND STACK**—\$300,000. Redding, Shasta Co., Cal. Engineer's name not given. Owners, Coram Smelting Co. The million dollar smelter at Coram, which has been shut down since July 1911, will be reopened as soon as a smoke controlling device can be constructed. This statement has been made by several of the directors of the smelter company. A \$50,000 smoke stack will be one of the first additions to the plant. Work will be started immediately on these projects, as it is the intention of the company to have the plant working within nine months.

**SCHOOL POWER HOUSE**—\$1,120. Chico, Butte Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Six sets of figures were received for the construction of the new power house at the Chico State Normal School. E. D. Sharp, Chico, presented the lowest bid at \$1,120 and will probably be awarded the contract. A complete list of the bids received will be found under the heading of San Francisco in this issue.

**SCHOOL**—1 story and base, frame and brick veneer, \$25,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, City of Stockton. The building will be erected on property bounded by Lincoln, Harrison, Anderson and Jefferson

streets, and has been designed for a seven class room building with a large auditorium. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, oil burning system and program clocks. Modern school plumbing and vacuum cleaning will be installed. Exterior of the building will be covered with pressed brick veneer. Plans are complete and figures will be called for at once.

**SCHOOL**—1 story, frame, \$1,800. Montezuma School District, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Montezuma School District. Five bids opened for the construction of this building show Frank Darnell, 1943 San Joaquin avenue, Stockton, low at \$1,800. All bids were taken under advisement.

**ELECTRIC RAILROAD CONSTRUCTION**—Cost not stated. Greenville, Plumas Co., Cal. Engineer, Engineering Department Great Western Power Co., Shreve Bldg., S. F. Owners, Great Western Power Co. Lloyd P. Cornell of Oakland, representing the Great Western Power Co., is in Indian Valley getting rights of way from the various property holders for an electric line from Butte Valley to Engel's Mine. The pole line will run from a plant at Butte Valley over the hills, striking Indian Valley at the Lawrence race-track near Greenville, and then along the base of the mountain to Lights Canyon, where the mine is located.

**STREET PAVING**—\$2,500. Eureka, Humboldt Co., Cal. Engineer, City Engineer, Eureka. Owners, City of Eureka. Plans and specifications for the paving and grading of J street from 17th to Harris have been adopted by the City Council and bids have been ordered advertised.

**STREET IMPROVEMENTS**—Asphalt macadam, \$86,000. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Engineer has completed plans and specifications for street improvements to be made in this city. The streets will be improved with asphalt macadam. The plans call for the improvement of Miner avenue from Hunter to Pilgrim streets; Washington from American to Aurora streets; San Joaquin from Taylor to South streets; Commerce from Main to Church streets and Church from Hunter to California streets.

**STREET PAVING**—Cost not stated. Eureka, Humboldt Co., Cal. Engineer, City Engineer, Eureka. Owners, City of Eureka. Plans and specifications were ordered at the last meeting of

City Council for the paving and adding of Fairfield street from Broadway to Harris street. Bids will be called for on the completion and acceptance of the plans.

**SEWER**—Reinforced concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton, Cal. Owners, City of Stockton. At the next meeting of the Council, sealed proposals were asked for constructing a 14-inch storm water sewer on East street from Roosevelt to North street.

**BRIDGE**—Reinforced concrete. Cost not stated. Igo, Shasta Co., Cal. Engineer, County Surveyor, Redding, Cal. Owners, Shasta County. All bids for construction of a new bridge across Clear Creek a mile east of Igo are rejected by the Supervisors. The plans call for a steel bridge with a concrete floor. The Supervisors decided to call for plans for a reinforced concrete structure. The lowest bid offered for a good bridge was \$8,894.

**SCHOOL ADDITION AND PLUMBING**—Cost not stated. Chico, Butte Co., Cal. Architect, A. J. Bryan, Noonan, Cal. Architects, Owners, Chico High School District. Plans are complete for construction of a frame toilet building, for the concrete work for an addition to the present high school building, and for the installation of a new sewer and plumbing system in the high school building. Figures are now being taken both as a whole and separately for the work. Bids will be opened on July 28th. Plans and specifications can be secured from the architect.

#### Contracts Awarded.

Filed June 25, '15. Dated June 18, '15.

Frame up .....\$500

Roof on .....500

Plastering finished .....400

Work completed .....210

Usual 35 days.....549

**TOTAL COST, \$2150**

Bond, \$1125. Sureties, Benjamin Walters and T. B. Littlehale. Limit, 60 days. Forfeit, \$1 per day. Plans and specifications filed.

### LOS ANGELES AND SOUTHERN CALIFORNIA.

**SCHOOL**—1 story and base, hollow tile. Cost not stated. La Crescenta, Los Angeles Co., Cal. Architects, Tuttle & Angel, Delta Bldg., Los Angeles. Owners, La Crescenta School District. The building will cover an area of 108 by 112 feet and has been designed to contain four large class rooms and an auditorium. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, modern school plumbing and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on July 23rd. Separate figures are being taken for the general construction and heating and ventilating. Plans and specifications can be secured from the architects.

**SCHOOL ADDITION AND ALTERATIONS**—2 story and base, brick, \$13,900. San Pedro, Los Angeles Co., Cal. Architect, Lyman W. Farwell, Story Bldg., L. A. Owners, City of San Pedro. The new portion of the building will contain heating plant, storage rooms, auditorium, music and oral rooms, besides several small class rooms. Interior will be finished in pine with maple floors. Steam heat is specified. Alterations to the old portion of the building will include steam heat, modern school plumbing, plastering and interior wood work. Exterior of the new portion will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

#### Contracts Awarded.

**SCHOOL**—2 story and base, brick addition, \$26,130. Los Angeles, Cal. Architects, John P. Krenple and W. E. Erkes, Fay Bldg., L. A. Owners, City of Los Angeles. Contractor, J. R. Dawson, Fay Bldg., L. A. Contract price, \$26,130.

**SCHOOL**—2 story and base, brick, \$26,580. Los Angeles, Cal. Architects, John P. Krenple and W. E. Erkes, Fay Bldg., L. A. Owners, City of Los Angeles. Contractor, J. P. Atkinson, Story Bldg., L. A. Contract price, \$26,580.

**SCHOOL**—2 story and base, brick, \$27,315. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owners, City of Los Angeles. Contractors, Broadway Construction Co., 235 East Washington street, L. A. Contract price, \$27,315.

**SCHOOL**—2 story and base, frame, \$70,000. Rancho La Brea, Los Angeles Co., Cal. Architect, John C. Austin, Baker-Bowler Bldg., L. A. Owner, Marlborough School for Girls, Con-

Contractor, Fred Steged, Haas Bldg., L.  
A. Contract price, \$70,000.

### PORTLAND AND OREGON

**SCH. CH.**—1 story and base, brick, \$100,000. Gaston, Ore. Architect, Aaron H. Gould, Henry Bldg., Portland. Owners, Town of Gaston. The building will contain four class rooms, and departments for manual training and domestic science. Interior will be finished in pine with some maple floors. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans will be completed in a week and figures called.

**MUNICIPAL WATER SYSTEM.**—\$75,000. West Linn, Ore. Engineer, S. A. Cobb, Beaver Bldg., Oregon City. Owners, City of West Linn. Bids for the proposed water system to be built at West Linn will be opened on July 20th at West Linn. The project includes the construction of a pipe line, a 2,000,000 gallon concrete reservoir, a pump station and standpipe. Alternate proposals will be received for lap welded steel or cast iron pipe in the following quantities and sizes: 13,000 feet of 30-inch pipe, 21,000 feet 6-inch pipe, 500 feet 8-inch pipe, 12,000 feet 1-inch pipe. The reservoir will be of reinforced concrete and will require about 300 cubic yards of concrete. There will be about 19,000 yards of trench excavation, 7,600 yards of reservoir excavation. The equipment to be installed will be a water wheel, two pumps, and a gas engine or a motor.

### Contracts Awarded.

**SCHOOL.**—2 story and base, brick, \$71,997. Portland, Ore. Architect's name not given. Owners, City of Portland. Contractor, James S. Winters, Conch Bldg., Portland. Contract price, \$71,997.

### SEATTLE AND WASHINGTON

**PASSENGER STATION.**—2 and 4 story and base. Class A construction, \$100,000. Tacoma, Wash. Architect's name not given. Owners, Chicago, Milwaukee & St. Paul R. R. Co. The building will be erected on property at the corner of 25th and East A streets. Other than the fact that the building will be of fireproof construction, no details have been given out. Bids will not be called at this time. Further mention will be made of the work.

### Contracts Awarded.

**STREET GRADING AND PAVING.**—\$94,533.20. Port Angeles, Wash. Engineer, City Engineer, Port Angeles. Owners, City of Port Angeles. Contractors, Feich & Glass, White Bldg., Seattle. Contract price, \$94,533.20.

### REGISTRATION OF TRADE-MARKS IN LATIN AMERICAN COUNTRIES.

The following summary of the laws and regulations governing the registration of trade-marks in Latin American countries has been prepared in response to the demand for such information on the part of American manufacturers and exporters. The information is based to a large extent on the official texts of the laws, and in the case of countries for which no original documents are available in the Bureau, use has been made of reliable compila-

tions on the subject of trade-mark laws. No attempt has been made to give all the provisions of the laws, the purpose of the compilation being merely to furnish the American exporter or manufacturer interested in the Latin American market sufficient information to enable him to determine on the best method for the protection of his trade-mark in Latin American countries. It is assumed that the actual work of registration will be effected through the employment of an attorney familiar with the provisions of the various laws. There is on file in the Bureau of Foreign and Domestic Commerce a collection of patent and trade-mark laws of foreign countries, which is being added to and is expected in time to be complete, and the Bureau is prepared to furnish information in answer to specific questions concerning such laws.

Attention should be called to the difference in the legal point of view as to the ownership of trade-marks between the Latin American countries and the United States. By the common law, use is the basis of property in a mark, and registration in the United States is merely an additional means of protecting the property right acquired by use. In the Latin American countries, on the other hand, the rights of property in a mark are derived entirely from the law and depend on the registration of the mark. Legislation is usually granted without investigation of the right to its use, though after due notice to those interested by publication of the application in the official gazettes. When once effected, registration is final against all later comers. The importance of registration is therefore greater in the Latin American countries than in the United States, in view of the facilities for unfair registration afforded by the trade-mark laws in effect in those countries.

In most of the Latin American countries a distinction is drawn between the manufacturer's mark, or ordinary trade-mark (*marca de fabrica*), used to designate the products of a particular factory or manufacturing concern, and the dealer's mark (*marca comercial*), used to distinguish the articles handled by a particular dealer of commercial enterprise; and in some countries, notably in Chile, Colombia, and Venezuela, there is separate registration for the two classes. In a few countries there is a third class of marks used for agricultural products.

The laws often contain provisions for the revocation of the right of exclusive use, if the mark is not used within a specified period, but use abroad is, as a rule, sufficient to prevent revocation in the case of foreign marks.

The fees given in the present summary cover only the official fees and do not include other necessary expenses, such as postage, revenue stamps, or stamped paper, except when specifically noted, or attorneys' fees. Application must generally be made on stamped paper or paper with revenue stamps attached.

Unless the applicant appears personally, the appointment of a qualified attorney is usually necessary. Powers of attorney and certificates of previous registration in country of origin, when required, must be legalized or authenticated by the consul of the country in

which the mark is to be registered. Even when not required, it is usually advantageous to present a certificate of registration in the country of origin.

### BOLIVIA.

**Office of registration.**—Ministerio de Instrucción Publica y Fomento, Notaria de Hacienda, La Paz.

**Duration.**—Indefinite.

**Fees.**—Tax of 5 bolivianos per year (Boliviano equal \$0.359).

**Formalities of registration.**—Application must contain two copies of the mark on stamped paper of 20 centavo description in duplicate of mark and articles to which it is to be applied, one electrolyte, power of attorney, and receipt for taxes. The mark is published three times at intervals of 1 day at the expense of the applicant after which registration is granted. All trade-marks used must be registered.

### CHILE.

**Office of registration.**—Sociedad Nacional de Agricultura, Santiago.

**Duration.**—Ten years; renewable.

**Fees.**—*Marca de fabrica* (trade mark), 12 pesos; *marca comercial* (dealer's mark), 3 pesos; renewal, same as for registration; certificates, 1 peso (Paper peso, fluctuating, now worth about \$0.16.)

**Formalities of registration.**—Application must show name, occupation and residence of petitioner; location of factory, kind of industry or commerce carried on; description of the goods to be marked; 10 copies of the mark, and a certificate of foreign registration the whole to be subscribed by two witnesses. There are two classes of registration, and it is advisable to register in both in order to secure complete protection.

### COLOMBIA.

**Office of registration.**—Despacho de Hacienda, Bogota.

**Duration.**—Twenty years; renewable.

**Fees.**—Registration of mark, 15 dollars; renewal, 30 dollars. (Gold dollar equal \$1.)

**Formalities of registration.**—Application must be made on stamped paper of 20 centavos and should state the distinctive mark adopted, the products to be marked, the place of manufacture and the name and address of the applicant. There should also be presented at least three copies of the mark, each bearing a stamp of 20 centavos, and an electrolyte not over 12 by 12 centimeters; a certificate of foreign registration legalized by a Colombian consul and a receipt showing that the fee has been paid. The application must be published three times in the official gazette, and after 70 days the mark may be registered. The certificate of registration must also be published three times. If registration is denied one-half the fee is returned. There are three classes of marks—manufacture, commerce, and agriculture—but a mark registered in one class may not be registered in another class by a different person.

### COSTA RICA.

**Office of registration.**—Secretaria de Fomento, San Jose.

**Duration.**—Fifteen years; renewable for periods of 10 years.

**Fees.**—The following stamp taxes are provided for in connection with the registration of trade-marks: Each copy of the model of the mark, 1 colones; certificate of inscription, 2

colones; inscription, 5 colones. (Colon equals \$0.465.)

**Formalities of registration.**—File application with two copies of the mark not over 12 by 12 centimeters, and an electrolyte.

#### ECUADOR.

**Office of registration.**—Ministerio de Hacienda, Puito.

**Duration.**—Twenty years; renewable for periods of 15 years.

**Fees.**—Registration, 25 sucres; publication, 12 sucres; stamped paper, 2.40 sucres; total, 39.40 sucres. Renewal, same, except that no publication is required. (Sucre equal \$0.487.)

**Formalities of registration.**—Application must contain name and address of applicant; description of articles to be marked; name and location of factory; certificate of foreign registration legalized by an Ecuadorian consul; 20 copies of the mark, with description of use; one electrolyte of 15 to 100 millimeters high by 20 to 30 millimeters wide; a receipt showing that 25 sucres has been paid into the national treasury; and a power of attorney legalized by an Ecuadorian consul. To complete registration it is necessary that the application and mark be published in the official gazette 12 times, at intervals of one week. Copies of the certificate are furnished free if stamped paper of the fifth class is provided.

#### GUATEMALA.

**Office of registration.**—Secretaria de Estado en el Despacho de Fomento, Oficina de Marcas, Guatemala.

**Duration.**—Ten years; renewable.

**Fees.**—Registration and certificate, 30 pesos; additional copies of certificate, 5 pesos; publication, 50 pesos; authentications (usually two), each, \$3 gold. (Paper peso, fluctuating, about \$0.025.)

**Formalities of registration.**—Application must be made on stamped paper and must contain two copies of the mark with a description in duplicate; class of articles to be marked and whether the mark is to be used by a manufacturer or dealer; receipt showing the payment of 30 pesos; and also a power of attorney and a certificate of foreign registration, translated, and legalized by a Guatemalan consul. There should also be an electrolyte, for the application must be published for one month in the official gazette before registration is granted. If registration is denied the fee is refunded.

#### HONDURAS.

**Office of registration.**—Secretaria de Fomento, Tegucigalpa.

**Duration.**—Indefinite.

**Fees.**—None provided by law. Translation, publication, and stamps about \$35 gold. (Peso equals \$0.363.)

**Formalities of registration.**—Application must show name and residence of petitioner, name and location of factory, and class of goods to be marked. It must be accompanied by two copies of the mark, or samples if done in relief or in some unusual way; a legalized certificate of foreign registration; declaration of rights reserved, power of attorney, and a legalized copy of the commission or contract whereby an agency has been established within the country. The application must be published and registration may be effected after 90 days. If the mark is not used for a period of one year, it is considered abandoned.

#### MEXICO.

**Office of registration.**—Secretaria de Estado y del Despacho de Fomento, Colonizacion, e Industria; Oficina de Patentes y Marcas, Mexico City.

**Duration.**—Twenty years; renewable.

**Fees.**—Registration, 5 pesos; renewal, same. (Gold peso equals \$0.498.)

**Formalities of registration.**—Application must show name and address of petitioner; name, location, and kind of factory; articles to be marked; description of the mark (all the above to be in triplicate). It must also include 12 copies of the mark; one electrolyte not over 10 by 10 centimeters, showing name and address of application and the words "Marca industrial registrada;" and a power of attorney. A certificate of foreign registration is not required. Stamps to the amount of 5 pesos must be attached to the certificate when granted. Extra certificates must carry 3 pesos' worth of stamps.

#### PANAMA.

**Office of registration.**—Secretaria de Fomento, Ramo de Patentes y Marcas, Panama.

**Duration.**—Ten years; renewable.

**Fees.**—Registration, 25 balboas; renewal, 20 balboas; for articles of domestic manufacture or production the fees are one-half the above. (Balboa equals \$1.)

**Formalities of registration.**—Application must be on stamped paper of the first class and must contain name and address of applicant; articles to be marked; place of manufacture; detailed description of mark; and be accompanied by a receipt showing the payment of 25 balboas; three copies of the mark, two of them to carry stamps of the first class and be signed and dated on the back by the applicant; and a certificate of registration in the country of origin, bearing stamps of the first class and certified by a Panamanian consul. The application is published twice consecutively in the official gazette and after 90 days it may be registered. If registration is not made within 30 days after the expiration of the 90 days, the application is considered abandoned. The certificate of registration must also be published twice.

#### NICARAGUA.

**Office of registration.**—Ministerio de Fomento, Managua.

**Duration.**—Ten years; renewable.

**Fees.**—Registration, 25 pesos; renewal, same; certificates, 1 peso. (Peso equals \$0.68.)

**Formalities of registration.**—Application must be made on stamped paper of the sixth class and must contain the name, residence, and nationality of owner; name and location of factory; description of articles to be marked; description of mark applied for; three copies of the mark on thin paper, with two additional copies showing in detail special features, if any; and power of attorney legalized by a Nicaraguan consul. The application must be published three times in the official gazette and registration may be completed after 90 days. Certificates are issued on stamped paper of the first class.

#### PERU.

**Office of registration.**—Ministerio de Fomento, Lima, or any Peruvian consulate general.

**Duration.**—Ten years; renewable.

**Fees.**—Federal registration—fee, 25

soles; publication of notices, 4 soles; stamped paper, 1.20 soles if registered with a Peruvian consul. If registered in Peru the fees are higher. Stamped paper, 0.10 to 0.16 sol per sheet. (Sol equals 1-10 pound sterling equals \$0.4866.)

**Formalities of registration.**—Application must be in Spanish and must contain four copies of the mark, two descriptions of the mark, certificate of registration in country of origin, electrolyte not over 21 centimeters wide by 21 centimeters high, specification of goods to be marked, and class, there being 80 classes, with separate registration required for each. Registration may be effected at any consulate general of Peru, that at New York City being the only one in the United States.

#### SALVADOR.

**Office of registration.**—Oficina de Patentes, San Salvador.

**Duration.**—Twenty years; renewable.

**Fees.**—Registration of foreign marks, 10 pesos; domestic marks, 5 pesos; annual tax on foreign marks, 5 pesos; domestic marks, 2 pesos; extra certificates, 5 pesos; publication, not over 5 pesos; stamped paper, 0.10 to 0.25 peso per sheet. Ordinary paper may be used with stamps affixed. (Peso equals \$0.262.)

**Formalities of registration.**—Application must be made on stamped paper and must contain name and residence; description of mark and articles to be marked; name, location, and nationality of factory; receipt for payment of fees; certified copy of foreign registration; 20 copies of the mark; electrolyte of 15 to 100 millimeters long by 20 to 30 millimeters high; and a legalized power of attorney, if application is not made personally. The application must be published three times in the official gazette, and registration is granted after 90 days. The mark may be used only on goods specified or others of the same class or classes. Tax receipts must be presented at the patent office once every five years or the right is revoked.

#### SANTO DOMINGO.

**Office of registration.**—Ministerio de Fomento y Obras Publicas, Santo Domingo.

**Duration.**—Ten to twenty years; renewable.

**Fees.**—Registration for 10 years, 5 dollars; 15 years, 10 dollars; 20 years, 15 dollars; renewal, same.

**Formalities of registration.**—Application must be made on stamped paper of the third class and should contain the name, residence and occupation of the applicant; a detailed explanation of the mark; a receipt for payment of fee (and a legalized certificate of foreign registration); and two or more copies of the mark. If registration is refused the fee is refunded. The certificate of registration must be published in the official gazette. The mark must be used within one year.

#### VENEZUELA.

**Office of registration.**—Ministerio de Fomento, Ramo de Privilegio o Patentes de Industrias, Caracas.

**Duration.**—Thirty years; renewable.

**Fee.**—Seal and stamp for application, 1.50 bolivares; seal and stamp for certificate 15 bolivares. (Bolivar equals \$0.193.)

**Formalities of registration.**—Application must be made on stamped paper

of the seventh class and should contain the name, residence, and place of business of the applicant; class of articles to be marked, with a particular description of the goods; description of the mark in duplicate, showing manner of application; 10 copies of the mark; certificate of foreign registration legalized by a Venezuelan consul, and a signed declaration that the party applying has the right to use it and that it does not resemble a mark already registered, and that the copies are correct and exact. The application must be published in the official gazette, for which an electrolyte should be provided. The certificate is issued on paper of class 3. There is separate registration of marks of manufacture and marks of commerce. If a power of attorney is included, it must be legalized by a Venezuelan consul. Registration is limited to duration of registration in country of origin, or 30 years.

The war has so materially affected immigration to this country that so far the opening of the Panama canal has had no perceptible effect on the Pacific Coast with regard to addition of people from European countries. The bulletins issued by the Department of Commerce and Labor show that immigration up to the end of May reached a total of 394,669 as against 1,218,100 for the year 1914. This is accounted for mainly by the fact that the nations at war or about to go to war prevented the exodus of possible soldiers. This is noticeable from the fact that last year the number of immigrants from Italy amounted to 251,412 while this year they number 44,199. From Poland last year the number was 122,657 as against 8,836 this year. Russians last year 41,957, this year 1,151. Germans last year 79,871, this year 19,695.

The influx from England and Ireland has not been materially affected. Probably owing to the fact that military service in the United Kingdom is not compulsory and the freedom of the government offers no restrictions on its people.

What effect the end of the war will have upon immigration remains to be seen. Many predict that the impoverishment of Europe will lead thousands to emigrate to this country. Others believe that the slaughter of men will create a deficiency of workmen in all trades and thereby induce citizens to remain in their own country.

Popular government is the last word in modern civilization. But it often has some strange abuses. The unthinking often make a lot of noise, the politician grabs the offices of power and trust and the yellow newspaper a power for evil.

Just now we are witnessing a controversy over the street railway. Judge Sturtevant has just rendered a decision that he no doubt thought it incumbent upon him to render. As a consequence he is being maligned by every newspaper in town without regard to his motives and the fact that he was once a dummy director in the United Railroad is made a basis for a big agitation.

San Francisco surely has nothing to be grateful to the United Railroads for.

Under the reign of Pat Calhoun it was the chief source of corruption of the city. The property is capitalized for three times what it is worth and the people are asked to pay dividends upon it. It was an insolvent corporation when it was asked to furnish transportation for the exposition, and whatever it gets now is richly deserved.

But the methods of the Examiner, for instance, are certainly anything but fair. In the campaign of 1912, the great cry was to vote for the Geary Street agreement or there would be a law suit. There was no question as to whether the city had any rights or not. If the city had rights then why not assert them and take possession of the tracks and let the United Railroads oust the city. Now the question is the construction of a contract. It should be decided with reference to the merits of the case and not with reference to the position a judge may have occupied while making his living as a lawyer. Those things may influence his trend of thought, but there is nothing to imply corruptness or dishonesty.

"We hold these truths to be self-evident," wrote Thomas Jefferson in the great Declaration, "that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." What a splendid heritage these "truths" have been! We have fallen far short of realizing their ideal. But they have always been a court of last resort to which men marching in the advance have been able to appeal. The ideal of equality has warred against slavery and the caste spirit. The ideal of life, liberty and the pursuit of happiness has been a constant incentive to keeping opportunity open to all men. The goal has always been distant. But the way has been plain. Today men are realizing as never before the meaning of the right to the pursuit of happiness. They are understanding that it is mockery to start a child in life unequipped, and tell it that it has full liberty for the pursuit of happiness; that it won't do to permit industrial accidents to disrupt families, and that a whole program for industrial justice is an essential part of the Independence Declaration. It is a heartening fact that never have so many persons been aroused to the necessity of bringing Jefferson's words out of the clouds and of setting them up as a practical creed for the Nation's life.—Kansas City Star.

#### LABOR SELF HELP.

The visit of Japanese labor leaders to this country to investigate conditions of organization and operation in the United States should give emphasis to a side of labor union operation which so far has received scant attention from publicists, either among labor union men themselves or their critics. The relation of the unions to the rest of the world has been so often of belligerent nature that the other side of their activity, the upbuilding of labor spirit, and the activity they exert for the general welfare, has been too little considered or altogether ignored.

No other class in the economic world has been as restricted. Ever

since we have had social co-operation at all, the merchant class has been specially favored. In fact, the controversies in which merchants have engaged has always been treated as a negligible fraction of their relations to the general public. The professions have always been given special consideration. Financiers, while treated as criminals until the later Middle Ages, have been given favorable consideration during the last two centuries. The human side of labor operations alone has been left to fight its own way. This limitation has meant that the relations of the labor unions with the rest of the world have been too much imbittered with controversy and too little treated as a cognate portion of the industrial and social scheme.

We presume that the representatives of Japanese labor organizations will be received with various degrees of courtesy by labor union men in this country. Some of the leaders will be unable to see any difference between co-operating with a Japanese labor leader in the working out of world labor problems, and the question of the employment of a Japanese "scab" laundry worker or waiter in a closely white unionized town in California. But the world is grown too small to take any such attitude. Just as Japanese and American and European chambers of commerce have problems in common to meet which they can handle best by co-operation, so the Japanese labor leaders can give and take ideas in the business of settling labor difficulties in the United States as well as in the Orient.

We have had a well developed trade consciousness that has proved of value without arousing class antagonism. We can equally well have a useful labor consciousness which will be the better for humanity in general as well as for the members of the unions.—Fresno Republican.

The present war is presenting many new problems to the administration. From now on our relations are bound to be more or less strained. Any American living in England is liable to be killed by a bomb dropped from a Zeppelin and in crossing the ocean is liable to be blown up by a submarine. These are new rules of warfare that have been imposed by Germany and it is a question how neutral countries are to maintain their rights under these conditions and the consequent retaliations of the other nations at war. It is up to every American citizen to support the administration in the policy it is pursuing in maintaining peace with dignity and protecting the rights of neutrals. When this war of kings is over it is up to us to lead the way in emancipation from the thrall-dom of militarism.

#### CONTRACTORS FILE INCORPORATION PAPERS.

MODESTO, Stanislaus Co., Cal.—Mahoney Brothers, a contracting firm of San Francisco, incorporated under state seal June 23d, have filed articles of incorporation in the county clerk's office. The capital stock of the corporation is \$100,000, and the directors are: J. J. Mahoney, P. H. Mahoney and Paul F. Fratessa.

### YOUR BREAKFAST

how was it cooked this morning?  
And your dinner last night?

And all the meals at your home?  
Don't be satisfied with the old fashioned expensive coal range, which necessitates keeping the fire going all day whether you are using it or not.

### COOK WITH GAS!

Highest heat efficiency. No fuel consumption except when cooking. No coal nor ashes to handle. No dust. No dirt—and a far cooler kitchen.

### MAKE YOUR OWN GAS

just as thousands of others are already doing. For economy in Lighting, Cooking and Heating as well as for Efficiency, Convenience, Cleanliness and Absolute Safety, what you need is

### THE AERO GAS SYSTEM

which generates the best quality of gas from ordinary automobile gasoline right in your own home. Let us tell you all about it. A postal will bring descriptive booklet, "The Aero-Gas Plant."

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, July 21, 1915

Fifteenth Year, No 28

We are giving in another column the report on the bids for the million and a quarter paving of the Multnomah County roads of Oregon by Roadmaster Yeon, and we feel our readers will appreciate a few historical data leading up to this event.

In 1904 the first bitulithic pavement was laid on Fifth and other streets in Portland.

From 1904 to 1912 approximately 150 miles of bitulithic pavement constructed in the city of Portland.

In 1912 the first contract was awarded for resurfacing the Linton road with Warrenite under the Warren Bros. Company patent.

In 1914 a special committee consisting of A. S. Benson and E. E. Covert went east to examine all types of hard surface pavements suitable for county highways, and upon their return strongly recommended the adoption of Warrenite for future work.

In the early part of 1915 a bond election for \$1,250,000 to be spent on paving 70 miles of road was held and carried by a majority of 3 to 1. Two months later bids were received on all kinds of pavement by the County Commissioners and same were referred to J. B. Yeon, County Roadmaster, for his recommendations, who recommended the use of Warrenite as the most durable construction; the Portland Chamber of Commerce Paving Committee also unanimously endorsed Warrenite in their report to the Executive Committee, and contracts finally awarded in accordance with these recommendations.

The only other point in connection with this award to bear in mind is that concrete and Topeka pavement (a modified sheet asphalt) was considered a poor investment even at a saving of \$250,000, and the newspapers and organizations in general commented on the good judgment used by the County Commissioners in awarding contracts for permanent pavements, such as Warrenite, the Oregonian in particular in an editorial on June 18th stating: "It is true that the greater portion of the contracts call for one standard pavement—bitulithic—but it is obvious enough why the Commissioners reached their decision. The experience of Portland with bitulithic has been satisfactory, and there was no question that, laid under the proper conditions and with ample guarantees, it would meet all expectations."

The use of Moving Pictures is extending into all branches of human activities, and there will soon be no business or endeavor left that can get along without being moving pictured at some stage of the game. The latest use is in making a picture progress report of the new building being put up for the Third National Bank of Springfield, Mass., to show the history of its construction from the demolition of the last building which occupied the site to the completion of its successor.

Lazing the old building, excavating the plot, operating the quarries from which stone, marble and granite used in it will be quarried; rolling steel for the skeleton, loading beams on cars, putting the skeleton together, trees being felled for wood for its interior and the logs will be followed through saw mills and cabinet shops, making brick and terra cotta for its walls, etc., will be shown by the films. The pictures will show foreign weavers at work making carpets, etc., for the banking rooms. The casting and molding of bronze for various parts of the structure will be reviewed by the movies.

The progress on the Twin Peaks Tunnel is said to be more than satisfying the engineers in charge of the work for the city, as about 20 per cent of the tunnelling is done now, and it is expected that this portion of the work will be completed in about a year.

Improvements of the city's boulevard system, a large part of the mileage of which lies west of Twin Peaks, is

abreast or ahead of the tunnel work. Portola Drive, formerly the old Corbett road, has been made one of the finest pieces of scenic roadway in the State. It has been widened and paved from its intersection with Sloat boulevard to Stanford Heights, and is now open to travel. It will be extended over the shoulder of Twin Peaks to Twenty-fourth street. The work will cost about \$40,000. The city is preparing to spend \$100,000 on the scenic Figure-eight boulevard around Twin Peaks summit.

According to the statement of Mayor R. Athow, radical changes are planned in the beautification of San Anselmo Creek at the depot in the town of San Anselmo. These changes cannot come any too soon as the creek at that point is far from being the beauty spot of the town.

The replacement of the wooden bridges with concrete spans is also a much needed improvement and should not be delayed.

Extensive changes are under way in the Civic Center, where considerable concrete work is being done. A children's playground adjoining the City Hall has recently been completed.

The interpretation of incinerator specifications and guarantees will in all probability get thoroughly thrashed out in our local courts when the suits, involving the new Garbage Incinerator Plant, built by the Power Specialty Company for the City of San Francisco and rejected by City Engineer O'Shaughnessy, comes up for hearing.

It certainly is time that something was done to stop this incinerator graft that is going on all over the country. All kinds of guarantees are given about a particular patented plant before the contract is signed, and when the plant is built it only half cooks the garbage, then that is all that was meant by the guarantees. The City Engineer of the City of San Francisco is more than earning his salary.

American iron products are beginning to feel the good effects in the iron trade brought about through the war in Europe. On the Pacific Mail liner Korea there was a shipment of 2,500 dead weight tons of iron consigned to Japan. Sixty-five carloads of iron from Pittsburgh went to make up the shipments.

This is only one shipment of the products which has been finding its way to the kingdom of the Rising Sun since the outbreak of war in Europe. Previously, all of the iron and steel imported by Japan came from Germany. The outbreak of the war shut off the entire supply and as a result, for a brief time there was almost an iron and steel famine in the Far East.

Orders were at once given to American firms and now the supply wave is beginning to make itself felt. Every steamer leaving San Francisco is taking out big cargoes of commercial metal, some consigned to the Japanese Government and some to private interests.

The Southern Pacific has added a new and up-to-date steamer, the Santa Clara, to its fleet of ferry boats. The Santa Clara is a sister ship to the Alameda, her immediate predecessor. She is brilliantly fitted, and can seat 1,700 persons. She will carry life preservers for 4,500, which her constructor estimates is about her capacity. There are various improvements in her machinery and equipment that put her in a class over any thing in her line in the bay.

The Santa Clara is 292 feet long, 42 feet beam and 17 feet from keel to main deck. The hull is of steel and is equipped with seven watertight safety bulkheads for collision purposes which extend to the main deck. On the platform deck there are five more of the bulkheads. The Santa Clara cost about \$500,000.

## Rust Resisting Iron at the Panama-Pacific Exposition.

An iron which is capable of resisting rust or corrosion in the same way as the pure old-fashioned iron of a hundred years ago is, of course, a material of keen interest to engineers and builders everywhere. From a somewhat wide experience with road culverts, roofing and siding, tanks, stoves, and furnaces, etc., it would seem that there is available such an iron in the product known as Armcro (American Ingot) Iron, manufactured by the American Rolling Mill Co. of Middletown.

In conjunction with the association of culvert manufacturers using Armcro Iron for corrugated pipe, The American Rolling Mill Co. has installed a very unusual and interesting exhibit in the Mines and Metallurgy Building at the Exposition. This is planned with the idea of giving visitors a realization of the varied uses of iron of the highest purity. Corrugated culverts in replica installations under highways and railroads form a prominent

feature. An Armcro flume demonstrates its usefulness in connection with irrigation and power developments. Both culverts and flumes are carrying water as in service. One very interesting feature is a miniature Armcro Farm whereon are exhibited houses, barns, etc., roofed with Armcro Iron, and silos, tanks, troughs, fences, etc., also of this highly rust-resisting material. Another portion of this exhibit is devoted to Armcro building products of every description, including roofing and siding of many different types, metal lath, terne plate, and numerous other sheet metal articles of interest to the architect. Still another displays stoves, furnaces, and refrigerators of which the sheet metal parts are entirely of Armcro Iron.

It is interesting to note that pure iron which has been thoroughly degasified is very superior as a base for paint, galvanizing, or enameling. This fact has led to its adoption by many

manufacturers of tanks, refrigerators, table tops and other enameled articles, since it reduces the percentage of culls in the enameling almost to zero.

The principle upon which Armcro (American Ingot) Iron is made is that of the elimination of all impurities to the greatest possible extent, since the investigations of many of the leading scientists of the world have led to the conclusion that these are the principal cause of rusting through affording negative poles for electrolytic action. More recent investigations have emphasized the importance of complete degasification or the elimination of the content of gases in iron or steel, usually present in the form of tiny bubbles. The makers of Armcro Iron claim, and it would seem with good reason, that their material is more thoroughly degasified than any other product of the open hearth furnace. At the booth are displayed many fairly convincing evidences of the superiority under conditions of exposure of this type of metal.

### "PRESS CARAVAN" IN SAN FRANCISCO.

Pedestrians who happen to be on Market street, San Francisco, on the morning of Saturday, July 24, will see a "Press Caravan," with many startling features, move from the ferry building to the Joy Zone entrance of the Panama-Pacific Exposition as the opening event of "Newspapermen's Day."

Mounting their trusty steeds, and with a spirited use of a whip and spur, advance heralds will dash along the route and prepare the way for the notables who will follow, "some in rags and some in tags and some in velvet gowns." Clowns in their varied colored dominoes will cavort side by

side with impersonators of the comic supplement characters, and even the classified sections of the daily press will be properly and plentifully burlesqued for the amusement of the bystanders.

Plans for the "Press Caravan" include the participation of prominent baseball players, members of San Francisco social and political clubs, state and foreign commissioners to the exposition, famous writers of fact and fiction, matadores and toreadores, Indians, Mexicans, Maori girls and Samoan dancers, all donating their share to the "carnival of hearty revelry and wholesome fun"—the slogan of the day.

A novel feature of the "Press Caravan" will be the appearance of at least four noted aviators, each seated at the wheel of his machine, and drawn by six horses. Giant balloons also will make up this division.

An X-ray machine is used to destroy the tiny insect commonly called the "tobacco bug" which annually destroys thousands of dollars' worth of tobacco.

English submarines fly from their periscopes a flag on which is a skull and crossbones when they succeed in destroying a vessel belonging to the enemy.

# Roadmaster Yeon's Report On the Multnomah County Bids.

Below is an extract of Roadmaster Yeon's report to the County Commissioners of Multnomah County, Oregon, on the bids submitted for the paving of 88 miles of roads with hard surface pavements:

Hon. Board of County Commissioners, Gentlemen:

As per your order of June 15, 1915, referring to the tabulation, conference and recommendation, with your Honorable Body, I have the honor to submit to you the following report and recommendations for the awarding of contracts for paving the county roads under the recent bond issue of \$1,250,000.

I have given each of the different types of pavement bid on careful study and investigation, and have gone into the analysis of the bids fully and with the intention of looking after the best interest of the taxpayers of Multnomah County.

Each section of each road has been considered as a separate bid, and the bids compared on the basis of lowest responsible bidder for the type of pavement best suited for that particular locality, the type of transportation, and further increase of traffic.

Due weight has been given the type of pavement best suited for this climate and on the new subgrades where settlement is likely to occur, or on dangerous curves or grades.

## Columbia River Highway, Estimate \$408,007.00.

I recommend, that Section "A," Columbia River Highway be awarded to the Warren Construction Company, at the unit prices bid for Asphaltic Concrete No. 1 (Bitulithic) on a crushed stone basis, Totaling .....\$121,977.32

I recommend that Section "B," Columbia River Highway be awarded to the Warren Construction Company, at the unit prices bid for Asphaltic Concrete No. 1 (Bitulithic) on a crushed stone basis, Totaling ..... 29,806.62

I recommend that Section "C," Columbia River Highway be awarded to the Warren Construction Company, at the unit prices bid for Asphaltic Concrete No. 1 (Bitulithic) on a crushed stone basis, Totaling ..... 137,279.50

"D," Columbia River Highway be awarded to the Pacific Bridge Company, at the unit prices bid for Asphaltic Concrete No. 1 (Bitulithic) on a crushed stone basis, Totaling ..... 155,332.78

I recommend that Section "E," Columbia River Highway be awarded to Boyajohn-Arnold and Hans Ped-

erson, at the unit prices bid for brick on a concrete base, Totaling ..... 22,921.66

Total Bid .....\$166,418.08

## Sandy Road, Estimate \$221,925.00.

I recommend that Section "A," Sandy Road, be awarded to the Warren Construction Company, at the unit prices bid for Asphaltic Concrete No. 1 (Bitulithic) on old macadam base, Totaling .....\$198,690.30

I recommend that Section "B," Sandy Road, be awarded to the Warren Construction Company, at the unit prices bid for Asphaltic Concrete No. 1 (Bitulithic) on old macadam base, Totaling ..... 16,159.17

Total Bid .....\$214,850.07

## Base Line Road, Estimate, \$152,266.00.

I recommend that Section "A," be awarded to the Clark-Henry Construction Company, at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on an old macadam base, Totaling, \$132,193.20

I recommend that Section "B," Base Line Road, be awarded to the Clark-Henry Construction Company, at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on an old macadam base, Totaling.. 15,886.26

Total Bid .....\$148,379.40

## Foster Road, Estimate \$76,303.00.

I recommend that the Foster Road be awarded to Gebisch & Joplin, at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on an old macadam base, Totaling ..... \$76,976.95

## Powell Valley Road, Estimate \$128,935.

I recommend that the Powell Valley Road be awarded to Oskar Huber at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on an old macadam base, Totaling ..... 121,602.90

## Capitol Highway, Estimate \$95,814.00.

I recommend that the Capitol Highway be awarded to Gebisch & Joplin, at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on an old macadam base, Totaling ..... 89,988.71

## Canyon Road, Estimate \$35,356.00

I recommend that Section "A," Canyon Road, be awarded to Boyajohn-Arnold & Hans Pederson, at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on a crushed stone base, Totaling ..... \$16,902.60

I recommend that Section "B," Canyon Road, be awarded to Montague-O'Reilly Company, at the unit prices bid on Cement Concrete No. 1, inclusive of of Armor joints-Crushed stone aggregate, Totaling, 22,352.00

Total Bid ..... \$39,255.00

This recommendation is based on the fact that this section is on a 7½ per cent grade and there were no bids submitted on brick for this section which were low enough to come within the amount appropriated.

## St. Helens Road, Estimate \$67,400.00.

I recommend that Section "M," St. Helens Road, be awarded to the Warren Construction Company, at the unit prices bid on Asphaltic Concrete No. 1 (Bitulithic) on a crushed stone base, Totaling ..... \$28,537.02

I make no further recommendation on the St. Helens Road for the reason that other bids will exceed the estimate.

I would recommend that as soon as the final decision has been made on any section that the contract for the same be promptly awarded and not wait for a decision on all the roads, so that work can be immediately started as the season is getting short and the delay will prove expensive.

\* \* \*

The eyes of the whole of Oregon are on Multnomah County and the example set will have a great influence in the upbuilding of our State. A mistake of not selecting a proper pavement will handicap the progress of the good roads movement.

Respectfully submitted,

JOHN B. YEON,  
Roadmaster.

## ENGINEERING MEETINGS IN SAN FRANCISCO.

The twenty-eighth general meeting of the American Electrochemical Society will be held in San Francisco September 16 to 18. The American Society of Civil Engineers, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers and the American Institute of Mining Engineers expect to hold their meetings at the same time and arrangements are under way for joint sessions with some of these societies. The holding of this meeting immediately before the date for the International Engineering Congress, September 29 to 25, will also enable the members to attend the sessions of the Congress. All inquiries in regard to transportation should be addressed to J. M. Blair, 229 West 39th street, New York, chairman of the transportation committee.

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, reinforced concrete, \$25,000. Architect, Charles J. Rouseau, 46 Kearny street, S. F. Owner, J. G. Kincannon, 215 Montgomery street. The building will be erected on the south side of Post street west of Polk, having a frontage of 27½ feet and a depth of 120 feet. Interior has been arranged for 15 suites of three and four rooms with private baths. Pine, hardwood and white enamel will be used for finish. Hardwood floors will be used in the living and dining rooms. Plans provide for steam heat, an oil burning system, automatic elevator and hot water system. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance lobby. Exterior will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected in the Western Addition, and has been designed to contain a number of three room apartments, all of which will have wall beds and private bath rooms. Interior finish will be of pine. Some oak floors will be used. Bath rooms will have composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures will be taken at once.

**SAN FRANCISCO**—Apartment house addition and alteration, frame construction, \$8,000. Architect, William Mosser, Nevada Bank Bldg., S. F. Owner, G. Gusti. The present three-story frame building located at the southwest corner of Lombard and Scott streets will undergo extensive alterations. A one-story addition will be made to the rear. The work will require new interior partitions, plastering, painting, plumbing, electric work and interior finish. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$13,000. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owners, O'Brien Bros. The building will be erected at the northwest corner of Golden Gate and Pierce, covering an area of 34½ by 137½ feet. There will be a total of 24 apartments of three and four rooms. Interior finish will be of pine and Philippine mahogany. Hardwood floors will be used in the living and dining rooms. Plans provide for steam heat, oil burning furnace, hot water supply and an automatic elevator. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the lobby. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and

segregated figures are now being taken.

**SAN FRANCISCO**—Apartment house, 6 story and base, reinforced concrete, \$60,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. The building will be erected on Taylor street near Washington, having a frontage of 42½ feet and a depth of 137½ feet. There will be a total of 16 apartments of four rooms and bath. Interior will be finished in pine and mahogany. Bath rooms will have tile floors and wainscot. Plans provide for an automatic elevator, steam heat, oil burning furnace and hot water system. Bath rooms will be finished in tile. Marble and tile and ornamental plaster will be used in the lobby and entrance. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are nearly complete and figures will be called for shortly.

**SAN FRANCISCO**—Apartment house, 6 story and base, Class C construction, \$100,000. Architect, C. H. Skidmore, Hearst Bldg., S. F. Owner, Dr. C. F. Buckley. The building will be erected on O'Farrell street near Larkin, and will cover an area of 30 by 70 feet. Interior will be arranged for a number of two and three room suites, all of which will have private bath rooms. There will be steam heat, wall beds, a hot water system and elevator service. Bath rooms will have tile wainscot and composition floors. Interior will be finished in pine and hardwood with some hardwood floors. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

### Contracts Awarded

**SEATTLE, WASH.**—Apartment house, 4 story and base, reinforced concrete, \$100,000. Architect's name not given. Owners, Kreilshelmer Bros. Contractor, Isham B. Johnson, 3833 Evanston avenue, Seattle. Contract price, \$100,000.

### BONDS.

**VISALIA, TULARE CO., CAL.**—County Supervisors have accepted the bid of Bryan & McDonnell of \$151,843 for the \$175,000 state highway bonds which the county will purchase from the state if all legal requirements are overcome.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—The City Council has decided to call an election, the date to be announced later, for the purpose of voting bonds of \$50,000 for the purchase of a site, \$125,000 bonds to build a convention hall, \$25,000 to equip the same and \$10,000 for park improvements.

**SACRAMENTO, CAL.**—The Board of Control has voted to invest \$20,000 of state funds in the recently voted bonds of the Winters Union High School District, in eastern Yolo County to re-

place the building burned last month, and as the Winters bank has purchased the other \$30,000, the trustees announced that work would begin on the new structure at once.

July 25th is the date set by F. W. Richardson, State Treasurer, for the sale of \$2,500,000 worth of state highway bonds—the biggest block of the \$18,000,000 road bond issue. After the \$2,500,000 block is sold there will remain for sale only \$1,500,000 of the original issue.

Steps towards settling the question of the legality of the issue of \$700,000 worth of bonds for the purchase of the Capitol extension site were taken when the City Commission adopted an ordinance providing for the indebtedness in the issue of the bonds.

The city proposes to purchase the blocks bounded by Ninth and Tenth, L and N streets, and give them to the state for the erection of buildings to cost \$3,000,000. New York experts have declined to go on record in an opinion on the bonds.

WOODLAKE, TULARE CO., CAL.—The \$10,000 bond issue of the Woodlake Union High School District has been sold and work on the new school, to be erected from the proceeds of the sale of the bonds, will be started at once.

MARYSVILLE, YUBA CO., CAL.—Tuesday, August 24th, has been fixed upon by the City Council as the date for the bond election to be held in this city for the purpose of raising the sum of \$18,000 for certain internal improvements, principally the extension of the E street sewer from Ninth street to Fourteenth street by way of D street, and the abatement of a nuisance existing at the present outlet of the sewer.

VISALIA, TULARE CO., CAL.—The Tulare County Supervisors have considered the petition presented for the formation of the Terra Bella Irrigation District and have set August 7th as the date when the voters of that section will vote to incorporate the district and elect directors.

The district as planned will include about 12,000 acres of land in the southern part of Tulare County. A delegation headed by Earle R. Clemens of the Terra Bella News met with the Supervisors in the interest of the project.

PITTSBURG, CONTRA COSTA CO., CAL.—On August 6th the voters will decide on the question of issuing and selling bonds of \$10,000 with which to finish the new grammar school building recently erected here. The issue will carry by a large majority, it is believed.

SANTA CLARA, SANTA CLARA CO., CAL.—According to word received from this city the county officials are contemplating a million and a half bond issue for extensive paving of all the main roads.

PARADISE, BUTTE CO., CAL.—S. S. Compton, a civil engineer, has completed estimates and a preliminary survey of the reservoir site and main canal for the proposed gravity irrigation district and has taken the matter up with the Water Users' Association. The system will no doubt be constructed in two units, and when completed will be able to supply water to the whole ridge. The system will cost in the neighborhood of \$250,000 or \$25 an acre for 10,000 acres. A bond issue will be voted to raise funds for the

proposed system.

MERCED, MERCED CO., CAL.—Notification has been given the good roads committee of the Chamber of Commerce by the California Highway Commission that the Board of Supervisors of this county is expected to bid for \$100,000 of the highway bonds which will be offered for sale on July 28. This amount represents the part of the original 18 million dollars state good roads bond issue that is to be spent on the construction of the Merced-Mariposa lateral.

STOCKTON, SAN JOAQUIN CO., CAL.—The Board of Supervisors has approved the petition of the west side land owners for the formation of the proposed irrigation district near Tracy. The matter will come up for further investigation on August 4th. A bond issue of \$185,000 is planned.

RED BLUFF, TEHAMA CO., CAL.—A campaign is on in Red Bluff in securing funds for the erection of a public bath house at the foot of Pine street.

TURLOCK, STANISLAUS CO., CAL.—A movement has been started to call a bond election to vote bonds of \$75,000 for the erection of a new school building.

BEAUMONT, RIVERSIDE CO., CAL.—The Beaumont School District has voted bonds of \$20,000 for the erection of a school building.

FRESNO, FRESNO CO., CAL.—A special election will be called shortly by the Board of Trustees to vote funds for needed municipal improvements. It has not been decided definitely what will be included but among the suggested projects are \$200,000 for extensions to the sewer system, \$150,000 for storm sewers, \$50,000 for an incinerator, \$100,000 for the fire department, and \$100,000 for an alarm system.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—A special election has been called by the Board of Trustees of the Huntington Park School District for August 2, for the purpose of voting bonds in the sum of \$48,000 for the erection of a new school building. E. B. Lowe, Reba Leonard and Orville Jones are the trustees.

SANTA BARBARA, SANTA BARBARA CO., CAL.—The Board of Supervisors is making preparations for calling a special election to vote bonds in the sum of \$100,000 for the erection of a county hospital building. Architects, Costerian & Kavanaugh of Los Angeles, whose plans were accepted in the original competition held several years ago, have been instructed to modify the plans to keep the cost of the building within \$100,000. The original plans called for a building to cost \$200,000.

VISALIA, TULARE CO., CAL.—The County Supervisors have made arrangements for the purchase of \$175,000 of the state highway bonds to insure the completion of the state highway through Tulare County.

## BRIDGES AND DAMS

SALINAS, MONTEREY CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor, Cozzens, Salinas. Owners, Monterey County. Plans and specifications for the San Lucas steel bridge prepared by County Surveyor Cozzens have been approved and adopted by the Board of Supervisors, and bids have been ad-

vertised for, to be opened on August 3rd. Plans specifications and full information may be had from the County Surveyor at Salinas.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, San Luis Obispo County. Engineers Leonard & Day are now issuing plans and specifications for the concrete bridge to be erected over the San Luis Obispo Creek, near San Luis Obispo. Bids close August 3rd at 10 o'clock. Contractors desiring to bid on this work should apply for plans and specifications at the offices of the engineers.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Bridges, 2, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. At the last meeting of the County Supervisors plans and specifications prepared by the County Surveyor for the construction of a 34-foot span, reinforced concrete, I-beam bridge over the Chorro Creek, about four miles from the City of San Luis Obispo, and for a 12-foot span concrete slab bridge or culvert at the "Ferrasi Dairy" on the Stowe Tract, about eight miles from San Luis Obispo, both on the San Luis Obispo and San Simeon public road, were adopted and bids were ordered called. Plans and specifications were also adopted for a 22-foot span, reinforced concrete, I-beam bridge near the "Cerin" ranch, and for a 6-foot arch bridge or culvert near the D. McKeen ranch, each about 2½ miles from San Luis Obispo on the Buckley road. Bids on both structures close on August 3rd at 10 a. m.

MODESTO, STANISLAUS CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans and specifications for the Roberts Ferry bridge east of Waterford eight miles have been adopted by the County Supervisors and the County Clerk has been instructed to advertise for bids on the work. Plans and specifications may be had from the County Surveyor.

MADERA, MADERA CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, City of Madera. The bridge will be erected over the Fresno River at D street and will be 270 feet long. Plans have been completed and figures are now being taken. The opening date has not been set as yet. Plans can be secured from the engineers.

PORTLAND, ORE.—Viaduct, steel and reinforced concrete. Cost not stated. Engineers, Portland Dock Commission, Portland. Owners, City of Portland. Plans and specifications having been completed the Dock Commission of this city has authorized the calling for bids to be received on July 25th for the construction of a viaduct to be built at the foot of 17th street at the county ferry right-of-way. The structure will be 20 feet wide and 180 feet long.

## Contracts Awarded.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Bridge, reinforced concrete, \$2,215. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, E.

J. Hunt, San Luis Obispo. Contract price, \$2,245.

**MILES STATION, SAN LUIS OBISPO CO., CAL.**—Bridge, steel and reinforced concrete, \$21,700. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Gutlehen Bros., New Call Bldg., San Francisco. Contract price, \$21,700.

**OROVILLE, BUTTE CO., CAL.**—Bridge, steel and reinforced concrete, \$75,000 to \$150,000. Engineer, none. Owners, Butte County. Officials and residents of Oroville are urging the State Highway Commission to demand the construction of another bridge across the Feather River near Oroville. It is the intention of the Oroville officials to have the Highway Commission make the demand on the county to build the structure.

**NAPA, NAPA CO., CAL.**—Bridges, 3, stone and concrete. Cost not stated. Engineer, County Surveyor, Napa. Owners, Napa County. Plans have been completed and are now out for figures for three stone arch bridges to be erected on creeks on the road leading into the Pope Valley. Bids will be opened on July 27th. Plans and specifications can be secured from the engineer.

**PORTLAND, ORE.**—Jetty work, \$176,570.90. Engineer, United States Engineers, Couch Bldg., Portland. Owners, U. S. Government. Bids opened show the Miami Company (A. C. U. Berry), Selling Bldg., Portland, low at \$176,570.90 for the construction of the north and south jetties at the mouth of the Siuslaw River. The north jetty will extend out about 300 feet and the south jetty over 200 feet. The work is to be let in one general contract to include the driving of the piling, placing and delivering the rock.

**EUREKA, HUMBOLDT CO., CAL.**—Bridge, steel suspension. Cost not stated. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Plans are complete and figures are now being taken for the construction of a cable suspension bridge over Trinity River in Road District No. 5. Bids will be opened on July 30th. Plans and specifications can be secured from the County Clerk.

### COURT HOUSES.

**OAKLAND, CAL.**—Court house repairs. Cost not stated. Architect, none. Owners, Alameda County. All bids previously received for the repairs to the County Recorder's office have been rejected and new figures are being called. Bids will be opened on July 26th. The work requires the following: Painting, electric work, plumbing and carpentry. Plans and specifications can be had from the office of the County Clerk.

**SACRAMENTO, CAL.**—City hall, 4 story and base. Class A construction, \$175,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. E. Owners, City of Sacramento. The building will be erected at the southeast corner of 6th and H streets, covering a large area. Construction will be fireproof throughout. The building will contain offices for the various city officials, council chambers and city jail. Interior will be finished in pine and hardwood with some metal trim. There will be steam heat, oil burning system, vacuum cleaning and metal win-

dow sash and frames. Ornamental plaster work is specified. Exterior of the building will be faced with pressed brick, trimmed with terra cotta and cut stone. Plans are being prepared.

**TILLAMOOK, ORE.**—City hall, 2 story and base, brick, \$25,000. Architect, Charles H. Burgraff, Albany. Owners, City of Tillamook. The building will cover an area of 52 by 100 feet. The fire department will occupy the basement and a portion of the first floor. City offices, council chamber and library will occupy the balance of the first floor. Second floor will be arranged for an auditorium, offices and club room. Interior will be finished in pine. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 26th.

### CHURCHES

**SAN FRANCISCO**—Church addition, 2 story, frame, \$5,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Bethany Church, S. F. The building will be erected on Mission street at the corner of Richmond avenue, and has been designed to contain Sunday school rooms. Interior will be finished in pine and redwood. Art glass windows will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**OAKDALE, STANISLAUS CO., CAL.**—Church, 2 story and base, frame, \$12,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, First Methodist Episcopal Church of Oakdale. The building has been designed in the Spanish type and will contain, besides a large auditorium, Sunday school rooms and pastor's study. Interior will be finished in pine and ornamental plaster. Modern ventilating system will be installed. Art glass windows are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**PORTLAND, ORE.**—Sunday school, 3 story and base, reinforced concrete, \$45,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Portland. The building will be erected at the corner of 12th and Taylor streets, covering an area of 60 by 100 feet. Each floor will be arranged for a number of class rooms, library and offices. Interior will be finished in pine and hardwood with some maple floors. Plans provide for steam heat and vacuum cleaning. Some art glass windows will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

### FACTORIES AND WAREHOUSES

**PORTLAND, ORE.**—Warehouse, 1 story, reinforced concrete. Cost not stated. Architect, Engineering Department, Portland. Owners, City of Portland. The building will be erected on property near Municipal Dock No. 1. The structure will be 330 feet long and 176 feet wide. Construction will be fireproof with concrete floors and

walls and four-ply asbestos roof. Plans provide for metal window sash and frames and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on July 25th.

### FIRE HOUSES AND JAILS.

**SAN FRANCISCO**—Fire house, 2 story and base. Class C construction, \$30,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected at 34 Mint avenue, and will contain the usual space for apparatus on the first floor and living quarters for the crew on the upper floor. Interior will be finished in pine and hardwood. Some hardwood floors will be used. There will be steam heat, oil burning equipment and special plumbing and electrical equipment. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

**SAN FRANCISCO**—Fire house, 3 story and base. Class C construction, \$60,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected on the north side of Howard street between Second and Third streets. There will be space for four pieces of apparatus on the first floor. Upper floors will be arranged for living quarters. Interior will be finished in pine and hardwood with some maple floors. Plans provide for steam heat, oil burning equipment and special electric and plumbing work. Exterior will be faced with pressed brick and terra cotta. Plans are being prepared.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Fire house, 2 story and base, brick and frame. Cost not stated. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, City of Stockton. The building will be erected on South California street, and will be arranged for two pieces of equipment and living quarters. Interior will be finished in pine. Some hardwood floors will be used. Plans provide for steam heat and modern plumbing. Exterior will be faced with tapestry brick. Plans are complete and figures are being taken. Bids will be opened on July 27th. Plans and specifications can be secured from the architect.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Fire house, 1½ story and base, brick and frame. Cost not stated. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owners, City of Stockton. The building will contain space for two pieces of apparatus and living quarters. Interior finish will be of pine throughout. There will be a central heating system and hot water supply. Special plumbing and electrical work is specified. Exterior will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 27th. Plans and specifications can be secured from the architect.

**SEATTLE, WASH.**—Detention house, 4 story and base, brick, \$75,000. Architects, Bebb & Gould, Denny Bldg., Seattle. Owners, United States Government. The building will be erected at

the corner of Western avenue and Union and will cover an area of 60 by 100 feet. The structure has been designed for a detention home for the immigration service and will contain offices, dining rooms, dormitories and detention cells. Interior will be finished in pine. There will be metal window sash and frames. Plans provide for steam heat, elevator service, hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

PORTLAND, ORE.—Detention home, 2 story and base, brick and steel, \$25,000. Architects, Doyle & Patterson, Worcester Bldg., Portland, Owners, City of Portland. The building will be arranged for offices, juvenile court rooms, judges' room and library. There will be kitchen equipment, dormitories and dining halls. Interior will be finished in pine. Plans provide for steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans have been completed and figures will be called for shortly.

### FLATS

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,500. Architect, none. Owner, A. M. Sylvia, 371 30th avenue, S. F. The building will be erected on the west side of 20th avenue north of Anza street, covering an area of 25 by 50 feet. There will be two modern flats of five rooms each. Interior will be finished in pine and redwood. Hardwood floors will be used in the living rooms. There will be open fire places and tile mantels. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected on the south side of Norton street near Mission, and has been designed to contain two flats of five and six rooms. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being completed and figures will be called for next week.

SAN FRANCISCO—Flats and store, 2 story and base, frame, \$6,000. Architect, C. Fantoni, 916 Kearny street, S. F. Owner, Gaetano Ciampa. The building will be erected on Brazil avenue west of Edinburgh, covering an area of 25 by 67½ feet. There will be a store on the first floor and two modern flats on the upper floors. Interior will be finished in pine and redwood. There will be open fire places in the living rooms and tile or brick mantels. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, W. A. Savage, 776 18th avenue, S. F. Owner, L. B. Ham, 1613 Lake street. The building will be erected on the east side of 19th avenue south of Geary and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected near the corner of Hyde and Union streets, and will contain three flats of five rooms and bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for next week.

OAKLAND, CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected near the Polytechnic school and has been designed to contain one small two-room flat and four flats of four rooms. All flats will have open air sleeping porches. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

### GARAGES.

SAN FRANCISCO—Garage, 1 story and base. Class A construction, \$10,000. Architects, Heiman & Schwartz, Nevada Bank Bldg., S. F. Owner, W. H. Bowen. The building will be erected on the north side of Post street east of Hyde, and has been designed for a public garage. There will be a cement floor and steel frame and roof trusses. Exterior will be faced with pressed brick. Metal window sash and frames and special gasoline storage tanks will be used. Plans are complete and contracts will be let shortly.

The following bids were received and awards made by the depot quartermaster, San Francisco, Cal., under office circular No. 182:

1. Bid 1. Universal Trading Co., 171 Broadway, New York City.
2. Baker & Hamilton, 1th and Brannan streets, San Francisco, Cal.
3. Mark-Lally Co., 235 2nd street, San Francisco, Cal.

4. Dunham, Carigan & Hayden Co., 110 Kansas street, San Francisco, Cal.
5. O. E. Williams, 1182 9th avenue, San Francisco, Cal.

6. W. E. Muesel & Co., 518 Mission street, San Francisco, Cal.

7. Marshall-Newell Supply Co., 112 Stuart street, San Francisco, Cal.

8. W. P. Fuller & Co., Mission and Beale streets, San Francisco, Cal.

9. C. W. Marwedel, 76 1st street, San Francisco, Cal.

10. Pacific Hardware & Steel Co., 7th and Townsend streets, San Francisco, Cal.

11. California Paint Co., 12th and Pine streets, Oakland, Cal.

12. Patrick & Co., 560 Market street, San Francisco, Cal.

13. Herbert P. Dugan, 1170 Sutter street, San Francisco, Cal.

14. Levensen & Co., 225 Market street, San Francisco, Cal.

15. Yates & Co., 762 Folsom street, San Francisco, Cal.

16. F. S. Johnson Co., 570 Howard street, San Francisco, Cal.

17. Bemis Bros. Bag Co., Sansome and Vallejo streets, San Francisco, Cal.

18. California Steam & Plumbing Supply Co., 671 5th street, San Francisco, Cal.

19. Paine, Bailey & Co., 440 Market street, San Francisco, Cal.

20. Union Blind & Ladder Co., 235 Peralta street, Oakland, Cal.

21. Coffin-Heddington Co., 49 2nd street, San Francisco, Cal.

22. Moss-Klinkner Co., 1212 Market street, San Francisco, Cal.

23. John Clark Saddlery Co., Portland, Ore.

Item 1, 712 boxes blueing, ball, 2-oz boxes—Bid 1, 3.73c box; accepted.

2. 12 hatchets, broad—Bid 2, \$7.50 lot; accepted, 4, \$8.15; 7, \$8.25; 10, \$8.

3. 2 ladders, step, 10-ft—Bid 2, \$3.40 ea; 4, \$3.20; 10, \$3.30; 14, \$3.25; 20, \$3; no award.

4. 12 nippers, hoof-cutting, 10-in—Bid 4, \$14.52 lot; 10, \$10.50, accepted.

5. 100 gals oil, sperm—Bid 8, 87c gal; 11, 76c; 16, 72½c; no award yet.

6. 12 pliers, comb, wire cutting—Bid 1, 48.9c ea; 4, 42c, accepted; 9, 50c.

7. 18 do, 8-in—Bid 1, 59.7c ea; 4, 56c, accepted; 9, 90c.

8. 24 tongs, blacksmiths—Bid 2, \$1.20 ea; 4, \$1.08, accepted.

9. 500 bags, coal, gunny sack—Bid 17, 23½c ea; no award.

10. 288 cakes soap, toilet—Bid 1, 12.25c cake, 13, 12c; 21, 11.12c, accepted.

11. 36 boxes polish, shoe, russet—Bid 5, \$2.50 box, accepted.

12. 21 cocks, steam, blow-off, 2-in—Bid 2, \$3.69 ea; 6, \$1.87; 10, \$3.50, accepted, 18, \$1.25; 19, \$3.87.

13. 1 set numbers, n. p.—Bid 10, \$9.12, \$2.75, accepted, 16, \$18; 27, \$7.23.

14. 72 rings, halter—Bid 23, \$1.18 lot, accepted.

15. 5 skins, calf, oak tanned—23 sq ft, open-market purchase.

16 and 17. 6 lbs thread, machine, harness—Bid 16, \$1.35 lb; 23, \$1.50, accepted.

18. 12 cans, squirt—Bid 1, \$6.49 lot; 2, \$3.15; 4, \$3.12, accepted; 9, \$1.80; 10, \$3.25.

San Francisco Circular No. 177.

The following bids were received by the depot quartermaster, San Francisco, Cal., under office circular No. 177 for 10,000 bed sheets:

Bid 1. The H. B. Claffin Corporation, New York City, \$1.5c ea; commence delivery in 60 days and deliver 10 per cent weekly.

2. Ellis A. Gimbel, Philadelphia, Pa., 37c ea; commence delivery in 70 days and deliver 10 per cent weekly.

3. Greenebaum, Weil & Michels, San Francisco, Cal., 42½c and 43½c ea; commence delivery in 60 days and complete in 120.

4. L. Dinkelspiel Co., San Francisco, Cal., 39.25c ea; deliver 1,000 in 60 days and balance 1,000 every 7 days.

5. Moore-Watson Dry Goods Co., San Francisco, Cal., 36½c ea, per sample submitted; deliver 1,000 per week; bid out of order.

#### Tender Manzanita, Repairs.

The following bids were received by the light-house inspector, 17th district, Portland, Ore., for docking, cleaning, painting, and repairing light-house tender Manzanita:

Albrina Engine and Machine Works, Portland, Ore., \$2,248.

Hall Brothers Marine Railway and Shipbuilding Co., Winslow, Wash., \$1,327; accepted.

Seattle Construction and Dry Dock Co., Seattle, Wash., \$1,500.

Williamette Iron and Steel Works, Portland, Ore., \$1,926.26.

#### Tender Madrone, Repairs.

The following bids were received by the light-house inspector, 18th district, San Francisco, Cal., for docking and repairing tender Madrone:

Moore & Scott, San Francisco, Cal., \$1,171 and \$5,920.20; 35 days.

Mare Island Navy Yard, \$3,477 and \$5,512.

United Engineering Co., San Francisco, Cal., \$2,749.50 and \$4,817.20; accepted.

W. G. Tibbitts & Co., San Francisco, Cal., \$4,320.30 and \$4,702.50.

#### Port Townsend, Wash., Refrigerator, Etc.

The following bids were received by the custodian U. S. Marine Hospital, Port Townsend, Wash., for a mechanically cooled refrigerator, machine and ice-making compartments at the above building.

H. W. Johns-Manville Co., Seattle, Wash., \$922.90; 10 days.

The Automatic Refrigerating Co., Seattle, Wash., \$1,152; September 10.

The Clothel Co., New York City, \$2,654; 60 days.

#### Denver, Colo., Furniture.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing furniture equipment in the U. S. post office building at Denver, Colo.:

Federal Equipment Co., Carlisle, Pa., \$12,957.60; time 100 days.

The work involves earthwork and structures, including about 9,000 cubic yards of excavation, the placing of about 75,000 pounds of reinforced steel, etc. The contract price is approximately \$31,383.75.

**Contracts Awarded.**

**FORT SHAFTER, HAWAII**—Clinic and Nurses' Home, 2, 1 story base and frame and concrete, \$33,100. Architect, Constructing Quartermaster's Office, Fort Shafter. Owners, United States Government. Contractors, Lord-Young Co., Honolulu. Contract price, \$33,100.

**HALLS AND SOCIETY BUILDINGS**

**BERKELEY, ALAMEDA CO., CAL.**—Lodge hall, 2 story and base, brick. Cost not stated. Architect, James T. Nabrett, 704 Macdonald avenue, Richmond. Owners, Eagles Hall Association. The building will be erected at the corner of University and San Pablo avenues, covering an area of 50 by 100 feet. The first floor will be arranged for stores, a large and attractive lobby, ball room and kitchen. Upper floor will contain offices of the association and lodge rooms. Interior finish will be of pine and hardwood with some hardwood floors. There will be steam heat, an oil burning system and modern plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 25th. Plans and specifications can be secured from the architect.

**BUTTE, MONTANA**—Lodge building, 4 story and base, steel and reinforced concrete, \$125,000. Architects, Link & Haire, Butte, Mont. Owners, Knights of Columbus. The building will occupy a corner site, covering an area of 65 by 100 feet, and will have a complete steel frame, reinforced concrete walls and floors. The entire structure will be occupied by the organization. Interior finish will be of pine and hardwood with hardwood floors. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Marble and tile wainscot and bases are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

**HOTELS.**

**SEATTLE, WASH.**—Hotel, 3 story and base, brick, \$50,000. Architects, Somervell & Putman, White Bldg., Seattle. Owner, F. E. Welby, New York Bldg. The building will be erected at the corner of Sixth avenue and Spring street, covering an area of 60 by 120 feet. The building has been designed

to contain 100 guest rooms and a number of public and private baths. Interior will be finished in pine. There will be steam heat and a hot water system. Tile wainscot and composition floors will be used in the bath rooms. Exterior will be faced with pressed brick. Plans are complete and in the hands of the owner who is taking figures on the work.

**IRRIGATION PROJECTS AND POWER PLANTS.**

**ALTURA, MODOC CO., CAL.**—Irrigation Project. A party of Minneapolis and Wisconsin capitalists have departed for a trip of inspection over the Cowhead Irrigation proposition in the Surprise Valley, this county. If the enterprise appeals to them, it is announced, they represent abundant capital to finance it completely and bring nearly 50,000 acres of land on the east side of the lake under irrigation. The party was headed by C. A. Gorder of Albert Lea, Minn., accompanied by ten others from various points in Wisconsin and Minnesota.

**PARADISE, BUTTE CO., CAL.**—Irrigation project, \$250,000. Engineer, C. S. Compton, Paradise. Owners, Paradise Water Users' Association. Civil Engineer, C. S. Compton has completed estimates and preliminary survey of the reservoir site and main canal for the proposed gravity irrigation district, and has taken the matter up with the Paradise Water Users' Association. The system could be constructed in two units, according to Compton. The first by building the dam up to the 75-foot contour of the proposed reservoir. Water from this unit would then irrigate 1,800 acres at a cost of about \$75,000. After the territory in which the water is to be used has developed, the second unit could be installed. The second unit would be constructed by raising the dam to the 145-foot contour. Such a dam would back the water up in the reservoir so that it would cover about 700 acres. Engineer Compton estimates that the two units, and distributing system would cost approximately \$250,000, or \$25 an acre for 10,000 acres. A bond issue will be voted to raise funds for the construction of the proposed system.

**Contracts Awarded**

**WEST OKANOGAN, WASH.**—Irrigation plant, \$600,000. Engineer's name not given. Owners, West Okanogan Irrigation District. Contractors, Guthrie-McDougal & Co., Pittcock Block, Portland, Ore. Contract price, \$600,000.

**RAILROAD CONSTRUCTION AND EQUIPMENT**

Plans have been completed and figures are now being taken for the construction of a 6-inch ironstone pipe sewer in B street. There will be one brick manhole and a number of Y branches. Bids will be opened on August 2nd. Plans can be secured from the City Clerk.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street paving, sewers, curbs, etc. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council resolutions of intention were passed for the improvement of several streets, one being for the improvement of North El Dorado street from North street to Wyandotte street, Maple, Ash and Walnut and Sperry avenue from North El Dorado street to Sperry Park. Another was for the improvement of North Commerce and North Center streets from Ash to Wyandotte street; and Ash and Maple from North Eldorado to Sperry Addition. The other was for North Commerce and North Center streets from North street to Ash, and Walnut and Elm streets from North El Dorado to Sperry Addition. Concrete curbs and gutters are to be put in and the roadway to be paved with asphalt concrete.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans and specifications for macadamizing and otherwise improving portions of Jackson, Clay, Van Buren, Monroe, Madison

and Commerce streets, were ordered at the last meeting of the City Council.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans have been completed and figures will be opened on July 27th for furnishing labor and materials and doing the work for paving with asphalt concrete (Topoka specifications) portions of Weber and Miner avenues, Market, Commerce, Sonoma, Church, Washington, Sutter and San Joaquin streets.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street improvement, \$10,205.10. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has passed a resolution of intention for the paving and improving of the northwesterly, southerly and central roads of the new city park, west of Yosemite Terrace, by grading all of said roads, paving the northwesterly road with oil macadam and graveling a 20-foot strip along the center of the other two roadways.

**DUNSMUIR, SISKIYOU CO., CAL.**—Water mains and paving. Cost not stated. Engineer's name not given. Owners, Town of Dunsmuir and California-Oregon Power Co. The California-Oregon Power Company, which furnishes water to the town of Dunsmuir, has contracted for new water mains to be laid on Florence avenue, at a cost of \$10,000. Florence avenue is shortly to be paved and other improvements made to connect with the state highway, which is now being graded from Dunsmuir to Weed, and to connect with the new concrete bridge at the northern outskirts of the city.

**SACRAMENTO, CAL.**—Street paving and sewers. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Plans are complete and figures will be opened on July 21th for paving with asphalt and laying sewers in certain streets in the Oak Grove Addition. Plans can be secured from the City Engineer.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Highway construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The County Surveyor has been directed by the San Mateo County Supervisors to prepare plans and specifications for a boulevard leading along the summit of the Coast Range from the Half Moon Bay-San Mateo road to Kings Mountain, west of Woodside, on completion and adoption of the plans bids on the work will be called.

**SAN BRUNO, SAN MATEO CO., CAL.**—Sewer construction, \$31,000. Engineer, Town Engineer, San Bruno. Owners, Town of San Bruno. The Board of Trustees are now taking bids for the construction of sewers in certain streets. Plans and specifications may be had from the City Engineer at San Bruno.

**HOLLISTER, SAN BENITO CO., CAL.**—Road repairs, \$7,000. Engineer, County Surveyor, Hollister. Owners, San Benito County. The County Surveyor at the last meeting of the County Supervisors, presented his estimate on the cost of repairing the Tres Pinos-Pacifica road. The distance being two and a half miles, with 17 feet, gravel, 6 cubic yards, grading \$12.00, making a total of \$7,000. Action will be taken by the board at their next meeting.

**FRESNO, FRESNO CO., CAL.**—Gas pipe line. Cost not stated. Engineer, none. Owners, Parlier Winery, Fresno. Permission has been granted to the Parlier Winery of this city to lay pipes along the county roads between Sanger, Del Rey, Parlier, Reedley and to the county line at Dinuba. It is the intention of the winery directors to supply gas to all of these small towns.

#### Contracts Awarded.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sewer construction. Cost as follows. Engineer, City Engineer Stockton. Owners, City of Stockton. Contractors, McClouds Addition, to A. Telchert & Son, Ochsner Bldg., Sacramento. Contract price, \$6,968.85. E. C. Hamlin, San Jose, sewers in southern portion of city. Contract price, \$3,401.75.

**EUREKA, HUMBOLDT CO., CAL.**—Street improvement, \$6,939. Engineer, City Engineer, Eureka. Owners, City of Eureka. Contractors, Elsemore & Jacobs, Eureka. Contract price, \$6,939.

**LOS BANOS, MERCED CO., CAL.**—street paving, \$48,810.37. Engineer, City Engineer, Los Banos. Owners, City of Los Banos. Contractors, Worthwick Paving Co., Modesto. Contract price, \$48,810.37.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Sewer construction, \$20,717. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, Eggart & Ukovich, Los Angeles. Contract price, \$20,717.

#### SCHOOLS.

**SAN FRANCISCO**—School, 2 story and base, brick and steel, \$125,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be known as the Daniel Webster School and will be erected on Connecticut street between 19th and 20th. No details of interior arrangement or construction have been determined on. Exterior will probably be faced with pressed brick and terra cotta. Plans are being prepared.

**FRESNO, FRESNO CO., CAL.**—Normal school sewer, \$4,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. A sewer system will be installed in the Fresno Normal School, the City Council having granted permission to connect the sewer with the city mains. The sewer will have a six-inch main in Blumhurst avenue, branch on to Olive avenue for about 100 feet and connect with the city main at the alley between Van Ness and Carmel avenues. The work is estimated to cost between \$3,000 and \$4,000. Bids on the work will be called for immediately.

**PORTLAND, ORE.**—School 1 story and base, brick, \$74,897. Architect's name not given. Owners, City of Portland. Contractor, J. S. Winters, Couch Bldg., Portland. Contract price, \$74,897.

**SAN FRANCISCO**—School, 2 story and base, brick and steel, \$125,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected at the southwest corner of Pine and Larkin

streets, and will be known as the Redding School. The department has just received instructions to proceed with the plans and details are not available. Further mention will be made of the work.

**BERKELEY, ALAMEDA CO., CAL.**—College class rooms, 4 story and base. Class A construction, \$800,000. Architect, John Galen Howard, 604 Mission street, S. F. Owners, University of California. Plans have been completed for the construction of the Benjamin Ide Wheeler Hall to be erected on the Campus grounds at the University of California, Berkeley, and the Regents are now calling for figures on the following parts of the work: Excavating and concrete, structural steel, steel erection, roofing and sheet metal work, lathing and plastering, marble and terrazo work, carpentry and interior finish, plumbing, ornamental metal, elevator work and acoustic felt. Plans and specifications for the above mentioned work can be secured at the cashiers window at the office of the Regents after 9 A. M., Saturday, July 17th. A deposit of \$5 is required. Bids will be opened on August 9th at 11 A. M. An official proposal appears in another column of this issue.

#### Contracts Awarded.

**LATHROP, SAN JOAQUIN CO., CAL.**—School, 2 story, frame, \$3,090. Architects, Young & Jeffery, Wolfe Bldg., Stockton. Owners, Golden West School District. Contractor, Charles Anderson, Stockton. Contract price, \$3,090.

**COURTLAND, SACRAMENTO CO., CAL.**—School, 1 story and base, frame, \$18,000. Architect, P. J. Herold, Forum Bldg., Sacramento. Owners, Bates Union School District. Contractors, G. W. Martin & Son, 1217 19th street, Sacramento, general construction, \$14,096. Hatley & Hatley, Sacramento, plumbing and heating, \$3,886.

#### STORES AND OFFICES.

**SAN FRANCISCO**—Stores, 1 story and base, frame, \$2,500. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, M. J. Sarraile. The building will be erected at the southwest corner of Beach and Grant avenue, and will cover an area of 50 by 75 feet. There will be one store. A cement floor will be used. Interior finish will be of pine and redwood. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Station and store, 1 story, brick, \$6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Heron. The building will be erected on the east side of Shattuck avenue near University, and has been designed for a local station and small store. Interior will be finished in pine and redwood. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SAN LEANDRO, ALAMEDA CO., CAL.**—Store, 1 story and base, brick. Cost not stated. Architect, G. Armstrong, 1639 Alcatraz avenue, Berkeley. Owner, W. L. Duarte. The building will be erected on the east side of 14th street at the corner of Washington

and will cover an area of 42 by 100 feet. There will be several small stores. Interior finish will be of pine and redwood with some hardwood in the display windows. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Store alterations, brick construction. Cost not stated. Architect, William B. Thomas, Yosemite Bldg., Stockton. Owners, Smith & Lang. The building to be altered is located at the southwest corner of Main and San Joaquin streets. Included in the work will be new interior finish, plumbing, painting, electric work and plaster work. Plans are now being prepared.

**CALEXICO, IMPERIAL CO., CAL.**—Stores and offices, 2 story and base, reinforced concrete. Cost not stated. Architect, Sam Zimmer, Calexico. Owner, Max Harris. The building will cover a site 100 by 100 feet, and has been designed for four small stores on the first floor. Upper floor will contain 21 offices. Foundations and walls have been designed for additional stories. Interior will be finished in pine and redwood. A cement floor will be used. Patent store fronts are specified. Marble and tile bases will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**SEATTLE, WASH.**—Publishing offices, 4 story and base, reinforced concrete, \$50,000. Architects, Bebb & Gould, Denny Bldg., Seattle. Owners, Puget Sound News Co. The building will be erected at the corner of Second and Virginia streets, covering an area of 45 by 108 feet. There will be the general offices and subscription department on the first floor. Upper floors will contain editorial rooms, offices and composing rooms. Mechanical department will occupy the basement. Plans provide for freight and passenger elevators, steam heat and hot water supply. Exterior of the building will be faced with cement plaster trimmed with terra cotta. Plans are nearly complete and figures will be called for shortly.

#### Contracts Awarded

**SAN FRANCISCO**—Store alteration. Cost not stated. Architect, Albert Lapachet, 110 Sutter street, S. F. Owners, Shoong Co. Contractors, Atlas Heating and Ventilating Co., S. F. Contract price not stated.

#### SEALED PROPOSALS

##### PROPOSALS FOR CONCRETE PIERS.

**CONCRETE PIERS**—Sealed proposals endorsed "Proposals for Torpedo Boat Piers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then and there publicly opened, for constructing reinforced concrete torpedo boat piers at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

##### PROPOSALS FOR RAILROAD.

**MARINE RAILWAY**—Sealed proposals endorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and

then and there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 948—Proposals for Structural Steel and Accessory Parts for the Decking of the Reloader Wharf, at Alboza—Sealed proposals will be received at the office of the General Purchasing Officer, the Panama Canal, Washington, D. C., until 10:30 a. m. July 23, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 948) may be obtained from this office, or at the offices of the agent purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, in charge of engineers, U. S. A., general purchasing officer.

#### PROPOSALS FOR DREDGING.

DREDGING.—Sealed proposals, indorsed "Proposals for Dredging," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 14, 1915, and then there publicly opened, for dredging at the navy yard, Puget Sound, Wash. Amount available, \$15,000. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

#### PROPOSAL FOR BIDS.

SEALED BIDS will be received at the Office of the Comptroller of the University of California, Berkeley, California, at or before 11 A. M. August 9, 1915, for the Excavation and Concrete, Structural Steel Erection, Roofing and Sheet Metal, Lathing and Plastering, Marble and Terrazzo, Carpentry and Interior Finish, Plumbing, Ornamental Metal, Elevator and Acoustic Felt for Benjamin Ide Wheeler Hall on the grounds of the University of California, Berkeley, as per plans and specifications on file and obtainable after 9 A. M. Saturday, July 17th, at the Cashier's window in said office.

A deposit of \$5.00 will be required for each set of plans and specifications, which deposit will be refunded upon return of said plans and specifications, provided such return is made prior to 12 o'clock, noon, August 10, 1915; no refunds will be made after said date. The time of completion of the work will be an important element in the consideration of bids.

No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. (\*)

#### NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, August 10, 1915, said bids then and there to be publicly opened and read for furnishing all plant, material and labor, and doing the work required for the complete construction of the Main Sewer for the Fresno State Normal School, Fresno, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum

(10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Main Sewer, Fresno State Normal School, Fresno, California."

(SIGNED) W. F. McCLURE, State Engineer. (\*)

#### PROPOSALS FOR PAINTING.

PAINTING.—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be received at this office until 2 P. M. July 23, 1915, and then opened for painting the plastered walls and ceilings in the U. S. post office at Denver, Colo. Copies of the specifications may be obtained at this office and drawings of the building may be seen at the office of the architects, Messrs. Tracy, Swartout & Litchfield, No. 244 5th avenue, New York City, the Builders' Exchange, Chicago, Ill.; the superintendent's office, Denver, Colo.; the office of the supervising superintendent, J. W. Roberts, No. 463 post office and court house, San Francisco, Cal.; and at the supervising architect's office, JAMES A. WETMORE, acting supervising architect.

#### PROPOSALS FOR BUILDING.

BUILDING.—Sealed proposals indorsed "Proposals for Officers' Quarters" will be received at the bureau of yards and docks, Navy Department, until 11 o'clock a. m. August 21, 1915, and then there publicly opened for 4 one-story officers' quarters of wooden construction at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR BUILDING.

ADDITION TO BRICK ASSEMBLY HALL.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of a sealed envelope "Proposals for Addition to Brick Assembly Hall, Salem School, Oregon," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian office, until 2 o'clock p. m. of July 21, 1915, for furnishing materials and labor for the construction of an addition to the brick assembly hall, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at the United States Indian warehouses at Chicago, Ill., and St. Louis, Mo., and Builders' Exchange, St. Paul, Minn., and at the office of the superintendent of the Salem Indian School, Chemawa, Ore. For further information apply to the superintendent of the Salem School. CATO SELLS, Commissioner.

#### STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING.

#### CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on July 20, 1915, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows: Colusa County, through Arbutucke (111-Col-7-A), about 0.3 miles in length, to be surfaced with asphalt 55 feet wide.

Marin County, between Burdell and St. Vincent (IV-Mrn-1-A), about 4 miles in length, to be graded.

Monterey County, from Greenfield to Camphorn (V-Mon-2-D), about 11.7 miles in length, to be paved with Portland cement concrete.

Santa Barbara County, from Gaviota Pass to Zaca Station (V-SB-2-D), about 11.1 miles in length, to be graded. San Luis Obispo County, from Atascadero Creek to Paso Robles (V-SL 0-2-B), about 10 miles in length, to be paved with Portland cement concrete.

Plans may be seen, and proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineer at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. CLARY, NEWELL D. DARLINGTON, CHARLES F. STERN, California Highway Commission.

AUSTIN B. FLETCHER, Highway Engineer.

WILSON R. ELLIS, Secretary. (\*)

Dated: June 29, 1915.

#### PROPOSALS FOR SUBMARINES.

SUBMARINES.—Proposals for constructing by contract sixteen submarine boats, Nos. 62-77, will be received at the Navy Department until 12 o'clock noon August 2, 1915, when they will be publicly opened. Plans and specifications for the construction of said vessels are ready for distribution among prospective bidders. Forms of proposal and contract may be had on application to the department. FRANKLIN D. ROOSEVELT, Acting Secretary of the Navy.

Interior will be finished in pine and redwood. There will be open fire places in the living rooms and tile or brick mantels. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, W. A. Savage, 776 18th avenue, S. F. Owner, L. B. Ham, 1643 Lake street. The building will be erected on the east side of 19th avenue south of Geary, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**FLATS**—3 story and base, frame, \$7,000. San Francisco. Architect, Paul J. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected near the corner of Hyde and Union streets, and will contain three flats of five rooms and bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for next week.

**GARAGE**—1 story and base. Class A construction, \$10,000. San Francisco. Architects, Heiman & Schwartz, Nevada Bank Bldg., S. F. Owner, W. H. Bowen. The building will be erected on the north side of Post street east of Hyde, and has been designed for a public garage. There will be a cement floor and steel frame and roof trusses. Exterior will be faced with pressed brick. Metal window sash and frames and special gasoline storage tanks will be used. Plans are complete and contracts will be let shortly.

**CAR BARN ADDITION**—1 story. Class A construction. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. At Wednesday's meeting of the Board of Public Works new bids were called for on the construction of the addition to the Geary Street Municipal Car Barns. New bids for this work will be opened on July 28th. Plans can be secured from the office of the City Department of Architecture.

**SCHOOL**—2 story and base, brick and steel, \$125,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be known as the Daniel Webster School, and will be erected on Connecticut street between 19th and 20th. No details of interior arrangement or construction have been determined on. Exterior will probably be faced with pressed brick and terra cotta. Plans are being prepared.

**SCHOOL**—2 story and base, brick and steel, \$125,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected at the southwest corner of Pine and Larkin streets, and will be known as the Redding school. The department has just received instructions to proceed with the plans and details are not available. Further mention will be made of the work.

**STORES**—1 story and base, frame, \$2,500. San Francisco. Architect, Paul J. De Martini, 2123 Powell street, S. F. Owner, M. J. Sarraile. The building will be erected at the southwest corner of Beach and Grant avenue, and will cover an area of 59 by 75 feet. There will be one store. A cement floor will be used. Interior finish will be of pine and redwood. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**APARTMENT HOUSE**—6 story and base. Class C construction, \$100,000. San Francisco. Architect, C. H. Skidmore, Hearst Bldg., S. F. Owner, Dr. C. F. Bulkeley. The building will be erected on O'Farrell street near Larkin, and will cover an area of 56 by 70 feet. Interior will be arranged for a number of two and three room suites, all of which will have private bath rooms. There will be steam heat, wall beds, a hot water system and elevator service. Bath rooms will have tile wainscot and composition floors. Interior will be finished in pine and hardwood with some hardwood floors. Marble and tile wainscot will be used in the entrance. Exterior of the building

will be faced with pressed brick. Plans are complete and figures will be called for shortly.

## OAKLAND AND ALAMEDA COUNTY.

RESIDENCES—10, 1 story and base,  
 frame, \$2,500 each. Berkeley, Alameda  
 Co., Cal. Architects, Hutchinson &  
 MacLean, 170 13th street, Oakland.  
 Owner's name withheld. These dwell-  
 ings have been designed for five and  
 six room houses. Interiors will be  
 finished in pine, redwood and hard-  
 wood veneer. Hardwood floors will be  
 used in the living and dining rooms. There  
 will be a large open fire place in each  
 living room. Mantels will be of tile  
 and brick. Some tile wainscot will be  
 used. Automatic water heaters are  
 specified. Exteriors will be covered  
 with rustic shingles and cement plaster.  
 Plans are being completed and the  
 work will be carried on by Day  
 Labor under the direction of the arch-  
 itects.

RESIDENCE—2 story and base,  
 frame, \$8,000. Piedmont, Alameda Co.,  
 Cal. Architect, Louis M. Upton, 111  
 Ellis street, S F. Owner, Mrs. George  
 Hammer. The dwelling has been de-  
 signed for an eight-room house with  
 two baths, sleeping porch and base-  
 ment garage. Interior will be finished  
 in pine and hardwood with white en-  
 amel in the bed rooms. There will be  
 furnace heat and open fire places. Man-  
 tels will be of tile and brick. An au-  
 tomatic water heater will be installed.  
 Bath rooms will be finished in tile.  
 Exterior of the house will be covered  
 with cement plaster on metal lath.  
 Plans are complete and figures are be-  
 ing taken.

RESIDENCE—1½ story and base,  
 frame, \$3,000. Decota, Alameda Co.,  
 Cal. Architect, A. Silva, Centerville.  
 Owner, Mr. Frietas, Decota. The dwell-  
 ing will contain six rooms and bath.  
 There will be a large open fire place  
 and tile or brick mantel. Tile wainscot  
 used in the living and dining rooms.  
 Interior will be finished in pine and  
 redwood. Hardwood floors will be  
 stalled. Exterior of the house will be  
 covered with rustic and shingles.  
 Plans are complete and work will be  
 done by Day Labor.

RESIDENCES—2, 2 story and base,  
 frame, \$1,500. Oakland, Cal. Archi-  
 tect, none. Owner, C M. Macgregor  
 470 13th street, Oakland. These dwell-  
 ings will be erected on Mandana Cou-  
 levard west of Carlton, and each has  
 been designed to contain eight rooms,  
 bath and sleeping porch. Interiors

Contractors**

**Works at  
HARRISON ST.,  
bet. 8th & 9th  
San Francisco**

**Telephone Market 337**

will be finished in pine, redwood and hardwood veneer. Hardwood floors will be used in the living room, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$4,000. San Lorenzo, Alameda Co., Cal. Architects, Mau & Sprague, Macdonough Bldg., Oakland. Owner, J. P. Martin. The dwelling has been designed for a ten-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some elm panes. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and tile or brick mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—1½ story and base, frame. Cost not stated. Oakland, Cal. Architect, Henry Sheinmud, Mills Bldg., S. F. Owner, Mrs. Clara M. Sadler. The dwelling will contain six rooms and bath, and will be erected on the east side of East 20th street near 23d avenue. Interior finish will be of pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles. Plans are complete and figures are now being taken.

**RESIDENCE**—1½ story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, F. Holberg Reimers, 2125 Shattuck avenue, Berkeley. Owner, Mr. Campbell. The dwelling will be erected in Hopkins Terrace, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room. Mantel will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

**COURT HOUSE REPAIRS**—Cost not stated. Oakland, Cal. Architect, none.

Owners, Alameda County. All bids previously received for repairs to the County Recorder's office have been rejected and new figures are being called. Bids will be opened on July 26th. The work requires the following: Painting, electric work, plumbing and carpentry. Plans and specifications can be had from the office of the County Clerk.

**FLATS**—2 story and base, frame, Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected near the Polytechnic school and has been designed to contain one small two-room flat and four flats of four rooms. All flats will have open air sleeping porches. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**LODGE HALL**—2 story and base, brick. Cost not stated. Berkeley, Alameda Co., Cal. Architect, James T. Nabett, 704 Macdonald avenue, Richmond. Owners, Eagles Hall Association. The building will be erected at the corner of University and San Pablo avenues, covering an area of 50 by 100 feet. The first floor will be arranged for stores, a large and attractive lobby, ball room and kitchen. Upper floor will contain offices of the association and lodge rooms. Interior finish will be of pine and hardwood with some hardwood floors. There will be steam heat, an oil burning system and modern plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 25th. Plans and specifications can be secured from the architect.

**COLLEGE CLASS ROOMS**—4 story and base. Class A construction, \$800,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission street, S. F. Owners, University of California. Plans have been completed for the construction of the Benjamin Ide Wheeler Hall to be erected on the Campus grounds at the University of California, Berkeley, and the Regents are now calling for figures on the following parts of the work: Excavating and concrete, structural steel, steel erection, roofing and sheet metal work, lathing and plastering, marble and terrazzo work, carpentry and interior finish, plumbing, ornamental metal, elevator work and acoustic felt. Plans and specifications for the above mentioned work can be secured at the cashier's win-

dow at the office of the Regents after 9 A. M., Saturday, July 17th. A deposit of \$5 is required. Bids will be opened on August 9th at 11 A. M. An official proposals appears in another column of this issue.

**STATION AND STORE**—1 story, brick, \$6,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Heron. The building will be erected on the east side of Shattuck avenue near University, and has been designed for a local station and small store. Interior will be finished in pine and redwood. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**STORE**—1 story and base, brick. Cost not stated. San Leandro, Alameda Co., Cal. Architect, G. Armstrong, 1639 Alcatraz avenue, Berkeley. Owner, W. L. Duarte. The building will be erected on the east side of 14th street at the corner of Washington, and will cover an area of 42 by 100 feet. There will be several small stores. Interior finish will be of pine and redwood with some hardwood in the display windows. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architects, Universal Drafting Bureau, 1844 5th avenue, Oakland. Owner, Benj. F. Kopf, 1015 52nd avenue, Oakland. The dwelling has been designed for a six-room house with bath, and will be erected on 86th avenue. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be an open fire place and tile or brick mantel. Exterior of the house will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

## SAN JOSE AND THE SANTA CLARA VALLEY.

RESIDENCE — 2 story and base, frame. Cost not stated. San Mateo, San Mateo Co., Cal. Architect, Sylvain Schnaittacher, 233 Post street, S. F. Owner, Edward Livingston. The dwelling will be erected on El Cerrito road, and has been designed for a large and attractive suburban home. A separate garage is included in the work. The dwelling will contain 12 rooms, 2 baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat, a hot water circulating system and vacuum cleaning. Bath rooms will be finished in tile. There will be open fire places and tile and brick mantels. Exterior of both the garage and dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCES—2, 1½ story and base, frame, \$2,000 to \$3,000. Redwood City, San Mateo Co., Cal. Architect, none. Owner, Harry G. Putman, Redwood City. These houses have been designed to contain from six to seven rooms, bath and sleeping porch. Interiors will be finished in pine and redwood, some hardwood floors will be used. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Bridge—Steel and concrete. Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor Cozens, Salinas. Owners, Monterey County.

Plans and specifications for the San Lucas steel bridge prepared by County Surveyor Cozzens have been approved and adopted by the Board of Supervisors and bids have been advertised for, to be opened on August 3rd. Plans, specifications and full information may be had from the County Surveyor at Salinas.

**SEWER CONSTRUCTION** — \$31,000. San Bruno, San Mateo Co., Cal. Engineer, Town Engineer, San Bruno. Owners, Town of San Bruno. The Board of Trustees are now taking bids for the construction of sewers in certain streets. Plans and specifications may be had from the City Engineer at San Bruno.

**ROAD REPAIRS**—\$7,000. Hollister, San Benito Co., Cal. Engineer, County Surveyor, Hollister. Owners, San Benito County. The County Surveyor, at the last meeting of the County Supervisors, presented his estimate on the cost of repairing the Tres-Pinos-Palmdes road. The distance being four and one-half miles, width 14 feet, gravel 6,300 cubic yards, grading \$1,000, making a total of \$7,000. Action will be taken by the board at their next meeting.

**HIGHWAY CONSTRUCTION** — Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The county Surveyor has been directed by the San Mateo County Supervisors to prepare plans and specifications for a boulevard leading along the summit of the Coast Range from the Half Moon Bay-San Mateo road to Kings Mountain, west of Woodside. On completion and adoption of the plans bids on the work will be called.

#### Contracts Awarded.

#### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**BRIDGES**—3, stone and concrete.

Cost not stated. Napa, Napa Co., Cal.

Engineer, County Surveyor, Napa.

Owners, Napa County. Plans have

been completed and are now out for

figures for three stone arch bridges to

be erected on creeks on the road lead-

ing into the Pope Valley. Bids will be

opened on July 27th. Plans and speci-

fications can be secured from the en-

gineer.

**HIGHWAY CONSTRUCTION** — Cost

not stated. Martinez, Contra Costa Co.,

Cal. Engineer, County Surveyor, Ralph

R. Arnold, Martinez. Owners, Contra

Costa County. The plans and speci-

fications prepared by the County Sur-

veyor are now complete and ready for

approval for the construction of the

first three miles of permanent concrete

road to be built in Contra Costa Coun-

ty as part of the boulevard system.

The plans call for a concrete road and macadam shoulder on each side, making the road 22 feet wide. On the adoption of the plans bids will be called.

**ROAD CONSTRUCTION, BULKHEADS, CULVERTS, ETC.**—Cost not stated. San Rafael, Marin Co., Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. Plans have been completed and figures will be opened on August 3rd for regrading and improving a portion of the Point an Pedro road and for the construction of embankments, rip-rap, paving, timber bulkheads, pile bulkheads, ditches and culverts therefor, all in Road District No. 1, Marin County.

**STREET PAVING AND SEWER**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Plans are complete and bids will be opened on July 26th for paving certain streets with Richmond Standard macadam, and also for laying a 6-inch pipe sewer in several blocks. Plans can be secured from the City Engineer.

**STREET PAVING**—\$12,200.51. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. John Ward, Richmond, submitted the lowest bid for paving 10th street from Barrett to Pennsylvania and will probably be awarded the contract.

**STREET IMPROVEMENTS**—Cost not stated. San Anselmo, Marin Co., Cal. Engineer, Town Engineer, San Anselmo. Owners, Town of San Anselmo. Plans prepared by the Town Engineer for the improvement of Pine street, Cedar street and San Anselmo avenue, have been approved by the trustees and bids will soon be called. At the same meeting a resolution of intention for the extension of Cedar street was also adopted.

**SEWER EXTENSIONS**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. The City Engineer has been ordered by the Council to prepare plans and specifications for the big sewer project in the annexed district. The work covers the town of Stege, East Shore Park, Coleman-Pullman, Central-Pullman, Central Richmond, Walls Addition, Pullman Townsite, Coleman Park and Bay View Park. On completion and adoption of the plans bids will be called for.

**SEWER CONSTRUCTION**—Cost not stated. Petaluma, Sonoma Co., Cal. Engineer, City Engineer, Petaluma. Owners, City of Petaluma. Plans have been completed and figures are now being taken for the construction of a 4-inch ironstone pipe sewer in B street. There will be one brick manhole and a number of Y branches. Bids will be opened on August 2nd. Plans can be secured from the City Clerk.

#### Contracts Awarded.

**RESIDENCES**—20, 1 story and base, frame, \$2,500 each. Martinez, Contra Costa Co., Cal. Architect, none. Owners, Shell Oil Co. Contractors, Gutleben Bros., New Call Bldg., S. F. Contract price, \$2,500 each.

**NAPA, NAPA CO., CAL.**—Bridges, stone construction, \$1,659.50. Engineer, County Surveyor, Napa. Owners, Napa County. Contractors, A. C. Martini & Co., Napa. Contract price, \$1,659.50.

**MARYSVILLE, YUBA CO., CAL.**—Bridges, 3, reinforced concrete, \$14,216. Engineer, County Surveyor, Marysville. Owners, Yuba County. Contractors, Jenkins & Wells, Sacramento. Contract price, \$14,216.

**BRIDGE**—Stone construction, \$1,659.50. Napa, Napa Co., Cal. Engineer, County Surveyor, Napa. Owners, Napa County. Contractors, A. C. Martini & Co., Napa. Contract price, \$1,659.50.

**BRIDGES**—3, reinforced concrete, \$14,216. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. Contractors, Jenkins & Wells, Sacramento. Contract price, \$15,000. Arhuckle, Colusa Co., Cal. Architect, Chester Cole, Chico. Owner, Jos. Hahn, Sr., Arhuckle. Contractor, H. Anderson, Oakland. Contract price, \$15,000.

#### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**RESIDENCE**—1 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architect, none. Owner, A. D. Trively, 791 Callish street, Fresno. The dwelling has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. The wainscot will be used in the bath room. There will be an open fire place in the living room. Mantel will be of tile. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**CHURCH**—2 story and base, frame, \$12,000. Oakdale, Stanislaus Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, First Methodist Episcopal Church of Oakdale.

The building has been designed in the Spanish type and will contain, besides a large auditorium, Sunday school rooms and pastor's study. Interior will be finished in pine and ornamental plaster. Modern ventilating system will be installed. Art glass windows are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**NORMAL SCHOOL, SEWER**—\$4,000. Fresno, Fresno Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. A sewer system will be installed in the Fresno Normal School, the City Council having granted permission to connect the sewer with the city mains. The sewer will have a six-inch main in Elmhurst avenue, branch on to Olive avenue for about 100 feet and connect with the city main at the alley between Van Ness and Carmel avenues. The work is estimated to cost between \$3,000 and \$4,000. Bids on the work will be called for immediately.

**BRIDGE**—Reinforced concrete. Cost not stated. Madera, Madera Co., Cal. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, Madera County. The bridge will be erected over the Fresno River at D street, and will be 270 feet long. Plans have been completed and figures are now being taken. The opening date has not been set as yet. Plans can be secured from the engineers.

**GAS PIPE LINE**—Cost not stated. Fresno, Fresno Co., Cal. Engineer, none. Owners, Parlier Winery, Fresno. Permission has been granted to the Parlier Winery of this city to lay pipes along the county roads between Sanger, Del Rey, Parlier, Reedley and to the county line at Dinuba. It is the intention of the winery directors to supply gas to all these small towns.

#### Contracts Awarded

**MODESTO, STANISLAUS CO., CAL.**—Bridges, 4, reinforced concrete. Costs as follow. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Contractor, F. F. Fernandez, Hayward, \$3,607, two bridges over Wild Cat Creek. Ross Construction Co., Sacramento, two bridges over irrigation laterals, \$9,420.

**BRIDGES**—3, reinforced concrete. Costs as follow. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Contractor, F. F. Fernandez, Hayward, \$3,607, two bridges over Wild Cat Creek. Ross Construction Co., Sacramento, two bridges over irrigation laterals, \$9,420.

**STREET PAVING**—\$18,810.37. Los Banos, Merced Co., Cal. Contractors, Worswick Paving Co., Modesto. Contract price, \$18,810.37.

**BRIDGE**—Reinforced concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans and specifications for the Roberts Ferry bridge east of Waterford eight miles have been adopted by the County Supervisors and the County Clerk has been instructed to advertise for bids on the work. Plans and specifications may be had from the County Surveyor.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

BRIDGE—Steel and reinforced concrete, \$75,000 to \$150,000. Oroville, Butte Co., Cal. Engineer, none. Owners, Butte County. Officials and residents of Oroville are urging the State Highway Commission to demand the construction of another bridge across the Feather River near Oroville. It is the intention of the Oroville officials to have the Highway Commission make the demand on the county to build the structure.

RESIDENCE — 2 story and base, frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, F. Holberg Reimers, 2125 Shattuck avenue, Berkeley. Owner, Dr. Goodman. The dwelling will be erected in Tuxedo Park, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

CITY HALL—4 story and base. Class A construction, \$175,000. Sacramento, Cal. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. The building will be erected at the southeast corner of 6th and H streets, covering a large area. Construction will be fireproof throughout. The building will contain offices for the various city officials, council chambers and city jail. Interior will be finished in pine and hardwoods with some metal trim. There will be steam heat, oil burning system, vacuum cleaning and metal window sash and frames. Ornamental plaster work is specified. Exterior of the building will be faced with pressed brick, trimmed with terra cotta and cut stone. Plans are being prepared.

FIRE HOUSE—2 story and base, brick and frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, City of Stockton. The building will be erected on

South California street and will be arranged for two pieces of equipment and living quarters. Interior will be finished in pine. Some hardwood floors will be used. Plans provide for steam

heat and modern plumbing. Exterior will be faced with tapestry brick. Plans are complete and figures are being taken. Bids will be opened on July 27th. Plans and specifications can be secured from the architect.

**FIRE HOUSE**—1½ story and base, brick and frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owners, City of Stockton. The building will contain space for two pieces of apparatus and living quarters. Interior finish will be of pine throughout. There will be a central heating system and hot water supply. Special plumbing and electrical work is specified. Exterior will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 27th. Plans and specifications can be secured from the architect.

**STORE ALTERATIONS**—Brick construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, William B. Thomas, Yosemite Bldg., Stockton. Owners, Smith & Lang. The building to be altered is located at the southwest corner of Main and San Joaquin streets. Included in the work will be new interior finish, plumbing, painting, electric work and plaster work. Plans are now being prepared.

**BRIDGE**—Reinforced concrete, \$3,500. Sacramento, Cal. Engineer, City Engineer Miller, Sacramento. Owners, City of Sacramento. Plans have been completed for a reinforced concrete bridge 50 feet long which will be erected over Arcade Creek in Del Paso Park. Bids will be called for at once.

**BRIDGES**—Timber and concrete. Cost not stated. Sonoma, Tuolumne Co., Cal. Engineer, County Surveyor, Sonoma. Owners, Tuolumne County. The County Supervisors have rejected all bids submitted for the construction of the proposed new road in Road District No. 4, as all received were above the engineer's estimate. As a result of this rejection the bids for building all bridges on this road were also rejected. New bids will probably be called for.

**BRIDGE**—Steel suspension. Cost not stated. Eureka, Humboldt Co., Cal. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Plans are complete and figures are now being taken for the construction of a cable suspension bridge over Trinity River in Road District No. 5. Bids will be opened on July 30th. Plans and specifications can be secured from the County Clerk.

**STREET PAVING, SEWERS, CURBS, ETC.**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council resolutions of intention were passed for the improvement of several streets, one being the improvement of North El Dorado street from North street to Wyandotte street; Maple, Ash and Walnut and Sperry avenue, from North El Dorado street to Sperry Park. Another was for the improvement of North Commerce and North Center streets from Ash to Wyandotte street and Ash and Maple from North El Dorado to Sperry Addition. The other was for North Commerce and North Center streets from North street to Ash, and Walnut and Elm streets from

North El Dorado to Sperry Addition. Concrete curbs and gutters are to be put in and the roadway to be paved with asphalt concrete.

**STREET PAVING**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans and specifications for macadamizing and otherwise improving portions of Jackson, Clay, Van Buren, Monroe, Madison and Commerce streets, were ordered at the last meeting of the City Council.

**STREET PAVING**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans have been completed and figures will be opened on July 27th for furnishing of the labor and materials and doing the work for paving with asphalt concrete (Topeka specifications) portions of Weber and Miner avenues, Market, Commerce, Sonoma, Church, Washington, Sutter and San Joaquin streets.

**STREET IMPROVEMENT**—\$10,265.10. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has passed a resolution of intention for the paving and improving of the northwesterly, southerly and central roads of the new city park, west of Yosemite Terrace by grading all of said roads, paving the northwesterly road with oil macadam and graveling a 20-foot strip along the center of the other two roadways.

**WATER MAINS AND PAVING**—Cost not stated. Dunsmuir, Siskiyou Co., Cal. Engineer's name not given. Owners, Town of Dunsmuir and California-Oregon Power Co. The California-Oregon Power Company which furnishes water to the town of Dunsmuir, has contracted for a new water main to be laid on Florence avenue, Dunsmuir, at a cost of \$10,000. Florence avenue is shortly to be paved and other improvements made to connect with the state highway, which is now being graded from Dunsmuir to Weed and to connect with the new concrete bridge at the northern outskirts of the city.

**STREET PAVING AND SEWERS**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Plans are complete and figures will be opened on July 27th for paving with asphalt and laying sewers in certain streets in the Oak Grove addition. Plans can be secured from the City Engineer.

**IRRIGATION PROJECT**—Cost not stated. Alturas, Modoc Co., Cal. Engineer not selected. Owners, Cowhead Irrigation Project. A party of Minneapolis and Wisconsin capitalists have departed for a trip of inspection over the Cowhead Irrigation proposition in the Suprise Valley, this county. If the enterprise appeals to them, it is announced they represent abundant capital to finance it completely and bring nearly 50,000 acres of land on the east side of the lake under irrigation. The party was headed by G. A. Gorder of Albert Lea, Minn., accompanied by ten others from various points in Wisconsin and Minnesota.

**IRRIGATION PROJECT**—\$250,000. Paradise, Butte Co., Cal. Engineer, C. S. Compton, Paradise. Owners, Paradise Water Users' Association. Civil Engineer C. S. Compton has completed estimates and a preliminary survey of

the reservoir site and main canal for the proposed gravity irrigation district, and has taken the matter up with the Paradise Water Users' Association. The system could be constructed in two units, according to Compton. The first by building the dam up to the 75-foot contour of the proposed reservoir. Water from this unit would then irrigate 1,000 acres at a cost of about \$75,000. After the territory in which the water is to be used has developed, the second unit could be installed. The second unit would be constructed by raising the dam to the 145-foot contour. Such a dam would back the water up in the reservoir so that it would cover about 700 acres. The two units would then be capable of furnishing a supply of water to the whole ridge. Engineer Compton estimates that the two units and distributing system would cost approximately \$250,000, or \$25 an acre for 10,000 acres. A bond issue will be voted to raise funds for the construction of the proposed system.

### Contracts Awarded.

**SCHOOL**—2 story and base, frame, \$3,000. Lathrop, San Joaquin Co., Cal. Architects, Young & Jeffery, Wolfe Bldg., Stockton. Owners, Golden West School District. Contractor, Charles Anderson, Stockton. Contract price, \$3,000.

**SCHOOL**—1 story and base, frame, \$18,000. Courtland, Sacramento Co., Cal. Architect, P. J. Herold, Forum Bldg., Sacramento. Owners, Bates Union School District. Contractors, G. W. Martin & Son, 1217 19th Sacramento, general construction, \$14,096. Hatley & Hatley, Sacramento, plumbing and heating, \$3,886.

**SEWER CONSTRUCTION**—Cost as follows. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, McClouds. Addition to A. Teichert & Son, Ochsner Bldg., Sacramento. Contract price, \$6,368.35. E. C. Hamlin, San Jose, sewers in southern portion of city. Contract price, \$3,101.75.

**STREET IMPROVEMENT**—\$6,939. Eureka, Humboldt Co., Cal. Engineer, City Engineer, Eureka. Owners, City of Eureka. Contractors, Elsmore & Jacobs, Eureka. Contract price, \$6,939.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

STORES AND OFFICES—2 story and base, reinforced concrete. Cost not stated. Calexico, Imperial Co., Cal. Architect, Sam Zimmer, Calexico. Owner, Max Harris. The building will cover a site 100 by 100 feet, and has been designed for four small stores on the first floor. Upper floor will contain 31 offices. Foundations and walls have been designed for additional stories. Interior will be finished in pine and redwood. A cement floor will be used. Patent store fronts are specified. Marble and tile bases will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BRIDGE—Reinforced concrete. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, San Luis Obispo County. Engineers Leonard & Day are now issuing plans and specifications for the concrete bridge to be erected over the San Luis Obispo Creek, near San Luis Obispo. Bids close August 3rd at 10 o'clock. Contractors desiring to bid on this work should apply for plans and specifications at the offices of engineers.

BRIDGES—2, steel and reinforced concrete. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. At the last meeting of the County Supervisors plans and specifications prepared by the County Surveyor for the construction of a 34-foot span reinforced concrete I-beam bridge over the Chorro Creek, about four miles from the city of San Luis Obispo, and for a 12-foot span concrete slab bridge or culvert at the "Ferrasi bairy" on the Stowe Tract, about eight miles from San Luis Obispo, both on the San Luis Obispo and San Simeon public road, were adopted and bids were ordered called. Plans and specifications were also adopted for a 22-foot span, reinforced concrete, I-beam bridge near the "Cerin" ranch, and for a 6-foot arch bridge or culvert

near the D. McKeen ranch, each about 2½ miles from San Luis Obispo on the Buckley road, were also adopted. Bids on both structures close August 3rd at 10 a. m

## Contracts Awarded.

BRIDGE—Reinforced concrete, \$2,245. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractor, E. J. Hunt, San Luis Obispo. Contract price, \$2,245.

BRIDGE—Steel and reinforced concrete, \$21,700. Miles Station, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Gutleben Bros., New Call Bldg., S. F. Contract price, \$21,700.

SEWER CONSTRUCTION — \$20,717. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, Eggart & Ukovisia, Los Angeles. Contract price, \$20,717.

## PORTLAND AND OREGON

SUNDAY SCHOOL—3 story and base, reinforced concrete, \$45,000. Portland, Ore. Architects, Tourtelotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church of Portland. The building will be erected at the corner of 12th and Taylor streets, covering an area of 60 by 100 feet. Each floor will be arranged for a number of class rooms, library and offices. Interior will be finished in pine and hardwood with some maple floors. Plans provide for steam heat and vacuum cleaning. Some art glass windows will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

CITY HALL—2 story and base, brick, \$25,000. Tillamook, Ore. Architect, Charles H. Burgraff, Albany. Owners, City of Tillamook. The building will cover an area of 52 by 100 feet. The fire department will occupy the basement and a portion of the first floor. City offices, council chamber and library will occupy the balance of the first floor. Second floor will be arranged for an auditorium, offices and club room. Interior will be finished in pine. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 26th.

DETENTION HOME—2 story and base, brick and steel, \$25,000. Portland, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, City of Portland. The building will be arranged for offices, juvenile court rooms, judges room and library. There will be kitchen equipment, dormitories and dining halls. Interior will be finished in pine. Plans provide for steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans have been completed and figures will be called for shortly.

WAREHOUSE—1 story, reinforced concrete. Cost not stated. Portland, Ore. Architect, Engineering Department, Portland. Owners, City of Portland. The building will be erected on property near Municipal Dock No. 1

The structure will be 330 feet long and 176 feet wide. Construction will be fireproof with concrete floors and walls and a four-ply asbestos roof. Plans provide for metal window sash and frames and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on July 25th.

**JETTY WORK**—\$176,570.90. Portland, Ore., Engineers, United States Engineers, Couch Bldg., Portland. Owners, United States Government. Bids opened show the Miami Company (A. C. U. Berry), Selling Bldg., Portland, low at \$176,570.90 for the construction of the north and south jetties at the mouth of the Siuslaw River. The north jetty will extend out about 500 feet and the south jetty over 200. The work is to be let in one general contract to include the driving of the piling, placing and delivering the rock.

**VIADUCT**—Steel and reinforced concrete. Cost not stated. Portland, Ore., Engineers, Portland Dock Commission, Portland. Owners, City of Portland. Plans and specifications having been completed, the Dock Commission of this city has authorized the calling for bids to be received on July 25th for the construction of a viaduct to be built at the foot of 17th street at the county ferry right-of-way. The structure will be 20 feet wide and 150 feet long.

#### Contracts Awarded

**SCHOOL**—1 story and base, brick, \$74,897. Portland, Ore. Architect's name not given. Owners, City of Portland. Contractor, J. S. Winters, Couch Bldg., Portland. Contract price, \$74,897.

#### SEATTLE AND WASHINGTON

**DETENTION HOME**—4 story and base, brick, \$75,000. Seattle, Wash. Architects, Bebb & Gould, Denny Bldg., Seattle. Owners, United States Government. The building will be erected at the corner of Western avenue and Union and will cover an area of 60 by 120 feet. The structure has been designed for a detention home for the immigration service and will contain offices, dining rooms, dormitories and detention cells. Interior will be finished in pine. There will be metal window sash and frames. Plans provide for steam heat, elevator service, hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**HOTEL**—3 story and base, brick, \$50,000. Seattle, Wash. Architects, Somervell & Putnam, White Bldg., Seattle. Owner, F. E. Welty, New York Bldg. The building will be erected at the corner of Sixth avenue and Spring street, covering an area of 60 by 120 feet. The building has been designed to contain 100 guest rooms and a number of public and private baths. Interior will be finished in pine. There will be steam heat and a hot water system. Tile wainscot and composition floors will be used in the bath rooms. Exterior will be faced with pressed brick. Plans are complete and in the hands of the owner who is taking figures on the work.

**PUBLISHING OFFICES**—1 story and base, reinforced concrete, \$50,000. Seattle, Wash. Architects, Bebb & Gould, Denny Bldg., Seattle. Owners, Puget Sound News Co. The building will be erected at the corner of Second and Virginia streets, covering an area of 45 by 108 feet. There will be the general offices and subscription department on the first floor. Upper floors will contain editorial rooms, offices and composing rooms. Mechanical department will occupy the basement. Plans provide for freight and passenger elevators, steam heat and hot water supply. Exterior of the building will be faced with cement plaster trimmed with terra cotta. Plans are nearly complete and figures will be called for shortly.

**LODGE BUILDING**—1 story and base, steel and reinforced concrete, \$125,000. Butte, Montana. Architects, Link & Haire, Butte, Montana. Owners, Knights of Columbus. The building will occupy a corner site covering an area of 65 by 100 feet, and will have a complete steel frame, reinforced concrete walls and floors. The entire structure will be occupied by the organization. Interior finish will be of pine and hardwood with hardwood floors. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Marble and tile wainscot and bases are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

#### Contracts Awarded

**APARTMENT HOUSE**—1 story and base, reinforced concrete, \$100,000. Seattle, Wash. Architect's name not given. Owners, Kreishelmer Bros. Contractor, Isham B. Johnson, 3535 Evanston avenue, Seattle. Contract price, \$100,000.

**IRRIGATION PLANT**—\$600,000. West Okanogan, Wash. Engineer's name not given. Owners, West Okanogan Irrigation District. Contractors, Guthrie-McDougal & Co., Pittock Block, Portland, Ore. Contract price, \$600,000.

#### REAL GERMAN OPINION GAGGED.

**Fatherland Powerless In Grasp Of Hueracuery, Says Prof. E. R. Hedrick.**

"It would be amusing if it were not desperate to note the puerile faith which English and Some American papers display in the reports and editorials published in German newspapers," says Prof. E. R. Hedrick of the University of Missouri in a striking letter to the New York Evening Post.

Professor Hedrick writes "in defense of the real Germany," which lies helpless behind the thick veil of imperial censorship; and the fact that he holds a degree from the University of Göttingen and is a member of the Deutsche Mathematiker Vereinigung would seem to lend weight to his words.

Professor Hedrick mentions having a German-born friend, holding a position of prominence in this country, who recently received a letter from his brother in Germany "begging him not to believe what the German papers are printing about the conditions and opinions in Germany." The professor also observes that he finds it difficult to imagine an intelligent German express-

ing "in cold words in a German newspaper his real opinion of the invasion of Belgium or of the sinking of the Lusitania."

Professor Hedrick writes further, in part:

I claim that Germany has had little to say about her government, that she has been highly suspicious of that government, and that she is responsible for the recent acts of which we disapprove only in that she has not yet exerted herself to alter that government. I claim that no reasonable opportunity now exists for reliable expression of German opinion, and that the real Germany is as humane, as trustworthy, and as honorable as is any nation. Those who are leading men to think otherwise are enemies of Germany, whether they frankly avow it or whether they stand for and seek the favor of the present government of Germany. \* \* \*

It was a German, and by no means an Englishman, who forced the German government to announce in the Reichstag long before the war that under no conceivable circumstances would the German army invade Belgium if other powers did not.

It was a German who expressed the rottenness of a clique which disgraced German court circles a few years ago.

Real Germans as well as Alsatians voiced protests that were as dangerous as they were futile against the arbitrary acts of German military officers in Alsace.

Yet the government which stands in reality not for the Kaiser so much as for the whole bureaucracy of Berlin and Prussia has been retained in the defense of Germany, he said that any real alteration would not be so easy a matter as in England or in America.

While revolutions would not be strictly necessary in Germany, it is true that serious changes in the organic law would be necessary before even an unfavorable majority would secure any effective change of policy, or any such change in the real rulers as happens regularly in England.

#### LEASE.

July 19, 1915.—NO. 1000 FILLMORE E. line bet Golden Gate Ave and Turk. Arthur H Cousins to Abe Cohn. 2 years. \$15 per month.

#### WOODS WE USE IN OUR TOYS.

"It must not be considered that dolls are the only wooden toys in the manufacture of which American industry has been progressing," says the Southern Lumberman. "Among the toys made in this country from American woods are toy animals, blocks, boats, cannon and forts, children's chairs, circus sets, dolls, doll furniture, games, Christmas tree holders, swing jumpers, children's pianos, pastry sets, babies' play yards, toy shooting galleries, hobbyhorses, popguns, toy wagons, toy autos and wheelbarrows. Basswood is the principal material for wooden toys and for wooden parts of metal toys. Next to basswood, sugar maple, beech, birch and white pine are the principal woods used for toys. The amount of woods used annually in the United States for toy manufacture is nearly 29,000,000 feet."

#### CHINESE COMMERCE AND LABOR COMMISSIONER.

Dr. Ning-tung Young, who has come to the United States as a commissioner of the Chinese Ministry of Agriculture and Commerce for commercial and

labor coming here, will remain in this country for a year and will, during that time, have a permanent address at 315 West Twelfth Street, Kansas City, Mo. The Department of Commerce, through the Bureau of Foreign and Domestic Commerce and its branch offices, plans to co-operate as fully as possible with Dr. Young, and will be glad to communicate to him any questions concerning Chinese matters or will endeavor to arrange, while he is visiting any of the cities wherein a branch office of the bureau is located, to have him put in touch with inquirers there.

The National Americanization Day Committee has sent out a printed circular to make July 1, 1915, an Americanization Day; that is to emphasize the fact that the people who live in this country and enjoy the privileges of its government owe allegiance to its flag. The idea is a good one, for since the outbreak of the war in Europe it has been brought home to many of us the fact that there are a lot of hyphenated Americans among us who look upon this country as a place to make a living in and in the event of war it would be a secondary consideration. So the European countries consider their subjects always subject to their call no matter if they have renounced allegiance to their mother country and have sworn allegiance to the United States.

This country would be a great deal better off if some of its hyphenated Americans would return to the country they came from. For those who came to make their lot with us and help in the upbuilding of its institutions and share in its responsibilities the doors will be ever open. But the doors should be kept open just as wide for those who live here and hold their allegiance to foreign countries to clear out at any time and the sooner they do the better for all concerned.

#### SAVE!

The lesson that war in Europe must be paid for in America is being driven home to us daily. One thing that must be realized at once, with due effect upon Congress, is that the rate of governmental expenditure must be reduced, if the nation is not seriously to feel the effect of war imposition. Figures published June 23, by the treasury department show that not only have the customs duties greatly decreased from the income of last year, but that the total is many millions of dollars less than the lowest estimate made last winter by the experts of the administration in figuring how much the treasury would suffer. At the present rate of income and outgo, the United States will shortly be bankrupt if the war lasts the estimated three years.

There are of course but two possible alternatives for Congress. Either taxes must be increased, or the estimates of public expenditures must be greatly reduced. Congress made some little attempt during the last session to economize, but the effort was resisted by the great mass of the majority members, who had promised money for home expenditures and felt they must make good to their constituents.

In the face of a world crisis, the demand for economy must be made absolute. Not a single new line of public expenditure should be undertaken. Only such inaugurated undertakings should be continued as are imperative because of the possibility of losing the funds already spent. The limit of possible efficiency in handling the means not at the disposal of the administration should be used. This is the time for the Democratic majority, now in control of Congress, to conform rigorously to those rules of economy which the opposition platforms have been using against the Republican administration for sixteen years.—Fresno

#### PRIZES AWARDED TO GEOLOGICAL SURVEY AND BUREAU OF MINES.

The preliminary list of awards by the Panama-Pacific International Exposition gives the Department of the Interior collective exhibit one grand prize. The exhibit of the Geological Survey receives one grand prize, four medals of honor, five gold medals, six silver medals, and two bronze medals. The Bureau of Mines receives one grand prize, six medals of honor, three gold medals, and three silver medals.

#### DISCOVERED BY ACCIDENT.

Fuller's earth was discovered in Florida in 1893 through mere accident. An effort was made to burn brick on the property of the Owl Cigar Co., near Quincy; the effort failed, but an employee of the company called attention to the close resemblance of the clay used to the German fuller's earth. Florida is now the leading State in the production of fuller's earth, having reported for 1914 more than 75 per cent of the total quantity and value.

#### ROAD MODELS.

##### Many Kinds of Roads Illustrated by Models—Construction of a Split-Log Drag.

The exhibit of road models shown for the first time in 1909 by the Office of Public Roads of the department at the Alaska-Yukon-Pacific Exposition has been in active service ever since. Hundreds of thousands of people have seen these models at a dozen or more of the big agricultural expositions, and they have traveled much of the length and breadth of the United States on demonstration trains. A comprehensive exhibit is now being made at the Panama-Pacific Exposition at San Francisco, Cal. People who have seen these miniature model roads not only appreciate the beneficent effects of improved roads but at the same time understand the methods of their construction. In order that these models may have a still greater usefulness, they have been photographed and form the basis of illustrations of a new United States Department of Agriculture Bulletin No. 220, "Road Models."

The models, as a rule, are constructed on a scale of 1 inch to a foot, so that each model is one-twelfth the size of the actual road which it represents. Among the later methods of road building which are pictured and described are the brick, concrete, asphalt-block, macadam, sand-clay, gravel, and earth roads. Still other models show the

processes of maintenance, resurfacing, and bituminous macadam construction by the mixing and penetration methods. Recent additions to the series illustrate road location and roadside treatment, drainage, strengthening unstable foundations, etc.

The history of road construction, dealing with the early methods employed in Italy and France, is followed with discussions and illustrations of the most modern ways of road building. With the widely varying conditions in the United States the scope of road building is necessarily large, and in many sections roads must be constructed largely of the material at hand. The bulletin, Road Models, is applicable to a wide range of conditions.

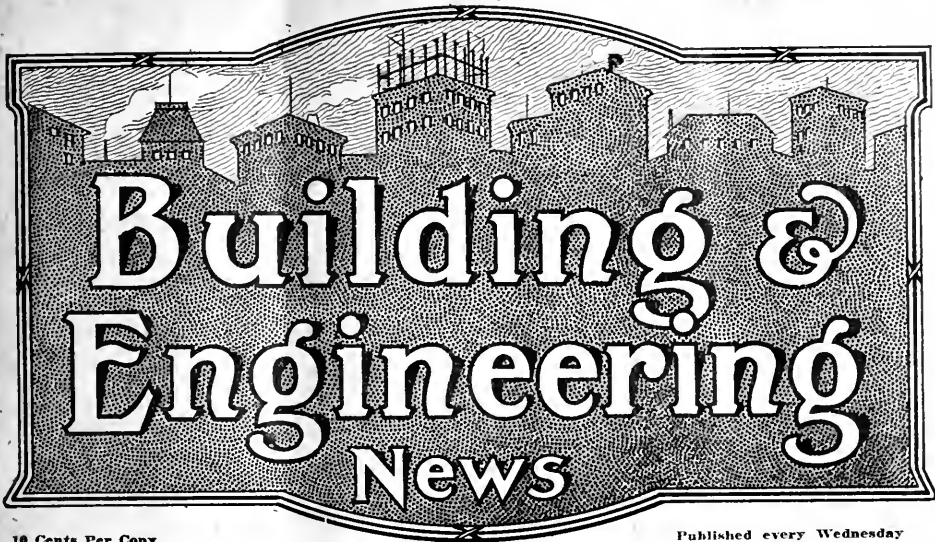

In the section dealing with earth roads the subject of the split-log drag is treated as follows: A suitable drag can be made from a log 7 or 8 inches in diameter and from 6 to 8 feet long. It should be carefully split and the halves, with the flat sides vertical and facing to the front, connected by stakes. The halves, though of the same length, are joined so that one end of the rear half is from 16 to 20 inches nearer the center of the road than the corresponding end of the front half. An ordinary trace chain and a set of double-trees are then attached in such manner that when the horses move forward the drag will be pulled along the road at an angle of about 45 degrees, with the forward end nearest the ditch in order to move the earth toward the road center.

The drag should be light enough to be lifted by one man. The best material is dry red cedar, though red elm and walnut are excellent, while box elder, soft maple, elm, or willow are superior to oak, hickory, or ash. A platform is usually placed on the cross stakes to strengthen the drag and furnish a place for the driver to stand. After a little practice a man can learn how best to shift his weight so as to make the drag cut, spread, and pack the earth properly.

Filling the ruts by dragging up one side of the road and down the other is all that should be undertaken the first time, but this should be repeated after each heavy rain. As a mile of road can be dragged in a few hours, this method of maintenance is simple and inexpensive. If the drag is used in conjunction with the road machine, fairly good earth roads can be built for 50 cents per mile in some parts of the country. At this rate a mile of earth road can be dragged once a month for \$6 annually. Some remarkable results have been accomplished with the drag without the aid of the road machine. Farmers' Bulletin 537, "The Road Drag and How to Use it," deals fully with this subject. Copies of this publication will be sent free to persons applying to the Editor and Chief of the Division of Publications, U. S. Department of Agriculture, Washington, D. C., as long as the department's supply lasts.

A wireless message sent from Honolulu to Japan, a distance of 3400 miles, completes the wireless girdle of the earth.

There are 566,000 telephones listed in the new telephone directory for New York City.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, July 28, 1915

Fifteenth Year, No 28

The growth of the city of Los Angeles has necessitated large and frequent bond issues for the school system enabling it to keep pace with the growth of the city. The people of Los Angeles, divided on many questions, are a unit on the question of the necessity for keeping up the public school system. This was shown in a striking way last fall, when, in a time of general dullness and financial retrenchment, the voters of the city gave an overwhelming indorsement to the \$4,600,000 school bond issue.

Of this huge appropriation \$3,000,000 was intended for new elementary schools and \$1,600,000 for high schools. No immediate market being found for the issue as a whole, the bonds were segregated into amounts covering individual building projects. The plan has been entirely successful, each school having been provided for as it has come up for consideration.

Today, less than a year after the bond election, the Board of Education can point with pride to the fact that that arrangements have been made for the financing of every building contemplated in the city school program, including, with additions to old structures, sixty separate undertakings. Fourteen of the new buildings, including the splendid new Franklin High School in Northeast Los Angeles, are now under way. Contracts have been awarded for several more and bids are being taken for others.

Conservation of flood waters in Los Angeles County will soon take on large dimensions as the tentative work done last fall has proven a success.

The county built five test check dams in a half-mile side canyon leading into Haynes canyon last fall and in the heaviest rains the storm waters never reached the canyon mouth. Now the county will have 340 of these dams built at an average cost of \$13 each to test their value next winter.

"If this scheme works as well, as it is believed it will, the work will be extended generally through the mountains, building check dams and scarifying the mountains to hold the storm waters, reforestate the mountains and canyons and while eliminating the devastating flow of storm waters into the valley.

This work in Haynes canyon, which is tributary to the great Tejuca canyon, consists of a series of 340 test "check dams" to catch and hold the flow of storm waters. These dams, built at intervals of from 50 to 300 feet, prevent devastating flow of storm waters into the valley, and the water remains in the canyon.

"This project is the beginning of a great comprehensive

enterprise to cost between \$3,000,000 and \$4,000,00, for which the county will probably ask the people of the county to approve a bond issue."

The viaducts over the Los Angeles River will not be left to die a natural death in any committee, for the Los Angeles City and County Viaducts Association has been formed and is hot on the trail of councilmen and supervisors to see that the dangerous grade crossings are eliminated and the viaducts built. The president of this association is rather explicit in his statements, for he says: "There can be no shirking this proposition and each councilman and supervisor should feel a personal moral obligation to see that nothing is left undone to secure the separation of grade crossings at the earliest possible moment.

The estimated cost of the six viaducts as planned is \$4,260,000, which, when it is considered that the total amount is to be divided among seven interests does not present such an insurmountable problem. Suppose the city's share to be \$1,065,000 and one or perhaps two viaducts to be constructed a year, the amount respectively is only \$177,500 or \$355,000 which is considerably less than it takes to provide the two-platoon system for the firemen of the city and which the people so readily voted.

The viaduct system is as essential to the industrial district when expansion is considered as it is to the people generally, as the council has gone on record as opposing additional spur tracks privileges at street crossings until such time as the grade crossing problem is taken care of.

A motor road to the summit of Mt. Whitney is the newest project launched by the Southern California Auto Club.

Associated with the Automobile club, in the project will be the Los Angeles Chamber of Commerce, the State Highway Commission, the State Board of Control, the State Forestry Service, Kern County and the Los Angeles County Highway Commission. Not only will the normal support and influence of the Automobile club and the other organizations be given to the work, but active co-operation in a pull together movement will be given by the various officials.

In August a party composed of representatives of each of the named organizations, of various civic bodies of Southern California, personal representatives of Governor Johnson and expert engineers will leave Bakersfield in a body to cover the proposed route of the new road. This party will go by automobile as far as Weldon, fifty miles from Bakersfield and from that point the ascent of the mountain will be made with pack mules.

# Long Beach Concrete Pipe Sewer And Disposal Plant.

By George Nelson, C. E.

The phenomenal growth in the uses of Portland cement concrete during the last ten years is evidenced in the Long Beach Outfall and Intercepting Sewer and Disposal plant now being completed by Bent Brothers, Engineering contractors of Los Angeles. Olmsted and Gillelen of Los Angeles were the consulting engineers for the work.

Long Beach, under the Hatch mayoralty, voted \$340,000 for the building of an outfall sewer system. According to what has been spent and estimates of the amount required to complete the system, its final cost will be \$331,994, leaving a balance of \$8,006.

The city pays the general contractors, Arthur S. Bent

States and is located close to the ocean shore, a 36-inch cast iron pipe taking the effluent out.

The disposal plant is being built by The Sanitation Corporation of New York.

The unit prices for the work are as follows:

10-inch concrete pipe .....	\$0.88
12-inch concrete pipe .....	1.02
18-inch concrete pipe .....	1.57

Trenching with Parsons Machine 54 inches wide and 20 feet 6 inches deep.

Company, \$215,193.06. The ocean outlet, contract for which was awarded to the Mercereau Bridge and Construction Co., costs \$29,007. The contract with Sanitation Corporation of New York for the sewage disposal incinerator, calls for \$39,400. To Olmsted & Gillelen, Los Angeles, who drew the plans and are supervising engineers, is allowed \$20,000. Long Beach bought incinerator

Potter Trench Machine—Buckets of excavated material being dumped on the completed sewer.

20-inch concrete pipe .....	1.73
22-inch concrete pipe .....	2.40
24-inch concrete pipe .....	2.20
27-inch concrete pipe .....	2.92
30-inch concrete pipe .....	3.56
33-inch reinforced concrete pipe .....	5.00
48-inch reinforced concrete pipe .....	6.05
Manholes .....	50.00

## Excavation.

The materials encountered in excavation were clay, sand and gravel, blue sticky clay and quicksand, in all about 110,000 cubic yards. The clay was excavated with a Parsons Trench Excavator digging holes 20.5 feet deep, 8 feet long and 5 feet wide, and followed up by a Potter Trench Machine which took out everything below 20 feet and also the tunnel sections. It consists of a hoisting engine and

Potter Trench Machine handling excavation in a trench 27 feet deep.

and settling plant sites from the Los Angeles Dock and Terminal Co for \$6,000. To the O'Melveny house of Los Angeles bond attorneys was paid \$340 for an opinion on the bonds.

## Scope of Work.

- (1) Main outfall 48-inch pipe.
- (2) Signal Hill Interceptor 33-inch and 27-inch pipe.
- (3) Seventh Ward Interceptor 18-inch pipe.
- (4) Belmont North Branch Interceptor 30, 24, 20, and 12-inch pipe.
- (5) Belmont South Branch Interceptor 22, 18, 12, and 10-inch pipe.

The disposal plant is of the Riensch-Wurl rotating type screen and is the first of its kind completed in the United

Laying 45-inch Reinforced concrete pipe.

car with two cable drums for lowering into the trench the two buckets each of 5-8 yard capacity used for taking up the earth; this car runs on steel rails on top of a frame work situated on top of the ditch and straddling it and being itself on wheels running on rails laid on regular ties laid across the ditch, it can be moved by the hoisting engine along with it as the excavation progresses; the ex-

bordering this alley and backdoors and back porches had to be boarded up. The excavation depth varied from four feet to thirty feet with an average depth of thirteen feet.

Laying 48-inch Reinforced concrete pipe under difficulties.

Excavation 54 inches wide and 23 feet deep for 33-inch Reinforced concrete pipe sewer in an alley 10 feet wide.

excavated material can be used for backfilling over the completed pipe which follows the excavation very closely.

Where strata of sand and gravel were encountered open cut was resorted to using both machines.

Excavation of the blue sticky clay was accomplished by hand and the quicksand was handled by means of power siphon pumps keeping the trench free from water and

Laying 30-inch concrete sewer pipe in trench 12 feet deep.

enabling the men to work therein and lay the pipe as in ordinary moist sand trench.

One alley ten feet wide where the trench is 23 feet deep and 54 inches wide and the space between the ditch and the houses and fences about 33 inches wide the spoil banks in some instances reached the top of the one-story houses

Backfilling with Waterloo power trench filler.

### Pipe and Pipemaking.

There is 2,640 feet of 10-inch machine made concrete pipe.

There is 6,138 feet of 12-inch machine made concrete pipe.

Concrete pipe machine, operator preparing to tamp the bell of a 22-inch glazed cement sewer pipe.

There is 8,381 feet of 18-inch machine made concrete pipe.

There is 2,532 feet of 20-inch machine made concrete pipe.

There is 7,989 feet of 22-inch machine made concrete pipe.

There is 1,320 feet of 24-inch machine made concrete pipe.

Carting away 20-inch concrete pipe from storage yard.

There is 1,145 feet of 27-inch machine made concrete pipe.

There is 16,267 feet of 30-inch machine made concrete pipe. All of the bell and spigot type, made in 21-2 foot lengths.

There is 5,000 feet of 33-inch hand made reinforced concrete pipe.

There is 12,000 feet of 48-inch hand made reinforced concrete pipe. All made in three-foot lengths

California Glazed Cement Pipe Co., Long Beach  
Plant—Storage Yard.

Testing 30-inch Glazed Cement Sewer Pipe for water tightness—Gauge shows 42 lbs.—This pipe is less than 30 days old, has a  $2\frac{1}{2}$  inch shell and is not reinforced or treated.

Foundation and pump pits of Long Beach Sewage Disposal Plant.

Foundation and pump pits with chimney started.

All pipe 30-inch and under was made on the Thomas-Hammond New Model Mixing and Pipe Making Machine and is exceptionally dense and hard.

All factory-made pipe going into the system was tested

Erecting concrete chimney for incinerator in connection with disposal plant.

at the factory. The 10-12-18-20-22-24-30-inch sizes stood forty pounds pressure without seepage or fracture.

All cements used in October, November, December, 1914, and to January 10, 1915, were tested by Captain Milner in his field laboratory. From January 10 to date the Robert W. Hunt Company of Los Angeles has been making the cement tests.

For all sizes from 10-inch to 30-inch the mixture was 1 part of cement to 3 parts of aggregate; the aggregate

Frame of building for Sewage Disposal Plant, showing chimney completed and incinerator partly constructed.

being mixed about one-half sand and one-half rock, or so as to make the densest mixture possible of the materials at hand. For the reinforced pipe the mixture was one part of cement, two parts of sand and four parts of

rock. The sizes of the shell was:  
1-inch thick for 10-inch pipe.  
1 inch thick for 12-inch pipe.  
11-2 inch thick for 18-inch pipe.

By pass channel in Disposal Plant.

1 3-4 inch thick for 20-inch pipe.  
1 7-8 inch thick for 22-inch pipe.  
2 inches thick for 24-inch pipe.

Main channel through which sewage flows to screen

2 1-4 inches thick for 27-inch pipe.  
2 1-2 inches thick for 30-inch pipe.  
3 3-4 inches thick for 33-inch pipe.  
5 inches thick for 48-inch pipe

**Reinforcements:** Electrically welded spirals quarter inch and three-eighths inch wires with four space bars of corresponding size, all according to load on top of pipe.

Incline foundation for the Riensch-Wurl Screen, Sewage Disposal Plant.

Spiral coils manufactured by the Electric Welding Company of Pittsburgh were shipped from the east collapsed, space bars inserted and tied with Curry tier in the field.

#### Disposal Plant.

The disposal plant is of the Riensch-Wurl Rotating Screen Type, which is new in this country, but has been in successful operation in a number of German and other Continental European cities for several years.

Bottom view of steel frame work of Riensch-Wurl Screen—Shows brushes which keep screen clean.

The foundation, screen pit, pump pit, the building and the chimney are all built of concrete. The effluent after having passed the screen is pumped out into the ocean through the 1,100 feet long outlet pipe, which is of cast iron, bell and spigot joints with an occasional specially cast joint to better conform to the ocean bottom. The pipe is laid on reinforced concrete piles driven into and flush

with the ocean bottom, and held in place by reinforced concrete piles driven on each side and close to the pipe. A 36-inch motor driven tide control valve prevents the ocean from backing up into the plant during big tide.

Two 8-inch centrifugal pumps, each of a capacity of 1,000 gallons a minute lifts the effluent from the pump pit into the outlet pipe.

Each pump is directly shaft connected to the motor which is situated upon the floor level of the building.

The screen is suspended in the screen pit at an angle of fifteen degrees and completely closes the canal and intercepts all the solids in the sewage.

The rotation of the screen brings a portion of it above water where it is brushed clean with a set of rotating brushes which in turn deposit the sludge in buckets that take it to the high temperature oil burner incinerator

direction of municipal works. He supervised the spending of millions of dollars by the city of St. Louis. Other incidental expenses are itemized in the following list:

Robert W. Hunt Company for testing cement, \$334.32; oil tank house, made of concrete, \$215; 150 feet of 12-inch concrete pipe, at \$1.10, \$165; hauling earth for back fill \$600; 5,900 pounds of steel at 5 cents, \$295; 37,947 feet of lumber at \$35 per thousand, \$1,328; 1,708 cubic yards of concrete at \$6.50, \$11,102; Southwest Contractor, \$10; Graves & Hersey, \$10.

These items, added to the above \$309,940.06, carry the total to \$327,299.88. Below are figures as to the estimate requisite to completion of the system:

Electric lights at incinerator, \$300; improvement of incinerator grounds, \$700; lavatory at incinerator, \$290; to the Robert W. Hunt Company for testing concrete, \$350; requisitions, \$54.12; extra concrete, \$400; inspection, \$2,600.

Top view of frame work of  
Riensch-Wurl Screen.

where it is consumed. A temperature of from 1,500 to 2,000 degrees Fahrenheit is maintained in the incinerator.

The complete plant at Long Beach costs \$39,400, and is able to take care of the sewage of a city of 50,000 people.

Riensch-Wurl screens are now being installed in Brook-

Riensch-Wurl screen in place.

36-inch Tide Control Valve for Outlet.

Addition of those estimated items to the fixed charges above quoted carries the total cost of the new sewer system to \$331,994.

While the total allowances, as above quoted, are \$215,193.06 to the Bents and \$29,007 to the Mercereaus, the amounts paid them to date are only \$123,352.21 and \$10,920, respectively. Olmsted & Gillelen are also being paid on installments, their remuneration to be liquidated in full only after completion and final acceptance of the system.

The sewer is 68 per cent complete to date, 57.1-2 per cent of the pipe is laid; 75 per cent of all the necessary pipe is made; the incinerator is 90 per cent completed; the 36-inch cast iron ocean outlet of 1,100 feet in length is 75 per cent completed. Here's an idea as to the material used:

Cement, 35 carloads, or 7,000 barrels; sand, 75 carloads; gravel, 150 carloads; brick, 3 carloads; steel, 3 carloads; lumber, 4 carloads; machinery, 2 carloads; tools, 1 carload; steel forms, 1 carload; total, 275 carloads.

For labor and teams the payroll last month, June, was \$18,000. Of the money paid out for labor 94 per cent was to Long Beach labor and of the money paid for teams all was for Long Beach teams.

lyn, New York; Cleveland, Ohio; Rochester, New York; Daytona, Florida, and several other towns in the east.

#### Costs.

Inspection costs \$3,300. The chief inspector for the city is Captain A. N. Milner, whose military title was won in government service. Captain Milner retired from the federal service and for some years has been engaged in

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$14,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owners, J. Risso and G. Obertelli. The building has been designed to contain eight apartments of three rooms each with bath, and will be erected at the corner of 11th and Noe streets. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. Gas steam radiators are specified. Wall beds will be used. There will be a hot water supply. Bath rooms will have tile floor and wainscot. Marble wainscot will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, George W. Mensor. The building will be erected on the south side of Washington street east of Steiner, and has been designed to contain six apartments of four rooms and bath. Interior will be finished in pine with some Philippine mahogany. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be steam heat and a hot water system. Bath rooms will have tile floors and wainscot. Wall beds are specified. Marble and tile will be used in the entrance. Exterior will be covered with cement plaster on metal lath. Plans are complete and the owner is taking figures.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$8,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name not given. The building will be erected at the corner of Union and Stockton streets, and has been designed to contain a store and seven small apartments. Interior will be finished in pine and redwood. There will be wall beds and private baths. Exterior of the building will be covered with rustic and shiplap. Plans are now being prepared. Further mention will be made of the work.

**FRESNO, FRESNO CO., CAL.**—Apartment house, 2 story and base, frame, \$20,000. Architect, Henry F. Starbuck, Rowell Bldg., Fresno. Owner, Jacob Richter. The building will be erected at the corner of Merced and P streets, and has been designed to contain a total of twenty suites of two and three rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and hot water supply. Bath rooms will be finished in tile. Wall beds are specified. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$25,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, Theo E. Rulfs, 1167 Pine street, S. F. The building will be erected on the east side of Hyde street south of Sutter, covering an area of 25 by 86 feet. Interior will be arranged for a number of two and three room suites with baths and wall beds. Interior finish will be of pine and elm panels. Hardwood floors will be used in the living and dining rooms. There will be an automatic elevator, steam heat and a hot water system. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance lobby. Exterior of the building will be faced with pressed brick. Plans are being prepared.

### Contracts Awarded

**OAKLAND, CAL.**—Apartment house, 3 story and base, reinforced concrete, \$35,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mrs. Carrie B. Rousseau. Contractor, N. P. Anderson, 320 Market street, S. F., general construction; J. A. McNaughton, Oakland, grading; R. Masagli & Co., 2298 Turk street, S. F., concrete work. Bids are now being taken for the plumbing and heating.

### BATH HOUSES.

**WHITE SULPHUR SPRINGS, NAPA CO., CAL.**—Bath house, 1 and 2 story and base, hollow tile, \$20,000. Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The building will contain the mud baths, reception room, attendants' quarters and lounging rooms. Interior will be finished in pine, white enamel and metal. There will be a large amount of special plumbing and steam heating equipment. Exterior will be faced with cement plaster. Plans are complete and figures will be called for at once.

### BONDS

**MARICOPA, KERN CO., CAL.**—Sealed bids will be received by the Clerk of the Supervisors until August 1th for the purchase of bonds in the sum of \$15,000. The proceeds of the sale will be used in the construction of a school building.

Bids will also be received on the same date for the purchase of the bonds of the Conley High School District, amounting to \$50,000, to provide for the construction of a new school for the district.

**SAN FRANCISCO**—With the issuance of \$2,500,000 of two-year 5 per cent gold notes to be dated September 1, 1915, and to mature September 1, 1917, the Spring Valley Water Co. has taken its first step to finance the extension of the water mains in the districts that have suffered for lack of water since the fire. It is proposed to retire

the issue of \$1,000,000 gold notes that fall due on December 1, 1915. The remainder of the fund gained from the sale of the present issue will be expended in the construction of the Calaveras dam and the extension of the mains in the city.

**FORTUNA, HUMBOLDT CO., CAL.**—On July 21st an election will be held in Fortuna to decide the question of issuing and selling bonds of \$24,000 to provide funds for the purchase of a site and the erection of a new school building. From present indications the issue will carry by a large majority.

**SACRAMENTO, CAL.**—The Sacramento Good Roads Association, recently organized, are planning a campaign to secure 4,000 members with the intention to work for better business conditions and good roads for Sacramento County.

**CALEXICO, IMPERIAL CO., CAL.**—July 21st is the date set for the election to vote bonds of \$60,000 to provide funds for repairing the city grammar school and for the erection of another school building which will cost approximately \$20,000.

**VEGA JOINT SCHOOL DISTRICT, SANTA CRUZ CO., CAL.**—An election will be held on August 10th in the Vega Joint High School District of the Counties of Monterey, Santa Cruz and San Benito, to vote bonds of \$8,000 with which to erect and equip a new school building.

**ARBuckle, COLUSA CO., CAL.**—The Supervisors have called an election for August 4th to vote on the proposition of forming a lighting district.

**REDONDO, LOS ANGELES CO., CAL.**—The proposed bond issue in the sum of \$144,225 for the purpose of purchasing the Redondo Beach water system failed to carry at a special election held here recently.

**BREA, CAL.**—The Board of Trustees of the Brea School District is planning the purchase of a five-acre site for a new school building. Bonds will be voted for the building shortly.

**PASO ROBLES, SAN LUIS OBISPO CO., CAL.**—An election will soon be called to vote bonds of \$40,000 for the purchase of sites and the erection of new schools.

**TAFT, KERN CO., CAL.**—Bonds of \$60,000 to provide for the erection of a new school building will be sold by the County Supervisors on August 4th.

**VENTURA, VENTURA CO., CAL.**—The Board of Supervisors has set August 24th as the date when the voters of the county will decide on the question of issuing and selling bonds of \$1,000,000 with which to build a system of roads 108.54 miles long. The system of roads will be divided into sixteen units, ranging from a mile and one half to fourteen miles in length. All the road is to be macadamized 16 feet wide, and about 30 miles of the system will be asphalt macadam. A system of drainage will also be included in the work. The Ventura Commissioners are A. C. Hardison, H. H. Eastwood and Wm. McGuire.

**DINUBA, TULARE CO., CAL.**—Papers calling for a special bond election for the erection of two schools costing \$13,000 are now being prepared in the District Attorney's office at Visalia.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—Bonds of \$40,000 were voted last week for the completing of the city's road system. An election was also held to decide the question of issuing bonds of \$30,000 to provide for the erection of a high school building. The city engineer has been instructed to prepare plans and specifications for completing the road system. As yet no architect has been selected to design the proposed school.

## BRIDGES AND DAMS

**OROVILLE, BUTTE CO., CAL.**—Bridges, 3 steel and concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans and specifications for two of eight bridges Butte County will build on the state highway between Chico and Nelson have been adopted by the Supervisors. The longest, 300 feet, will cross Butte Creek. The eight will cost \$10,000.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, 3 timber and concrete. Cost not stated. Engineer, County Surveyor Red Bluff. Owners, Tehama County. At the last meeting of the County Supervisors the Clerk was instructed to advertise for bids to be received on August 2nd at 10 a. m. for construction of concrete and steel bridges across Sand Slough, Samson Slough and the Paynes Creek Slough, in Road District No. 3. Further information, together with plans and specifications may be had from the County Surveyor.

**UKIAH, MENDOCINO CO., CAL.**—Bridge repairs, concrete. Cost not stated. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Plans and specifications prepared by the County Surveyor for the repairs on the Pudding Creek bridge have been adopted and bids for the work have been ordered called. Further information, together with the plans and specifications, may be had from the County Surveyor.

**OROVILLE, BUTTE CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans have been completed and figures are now being taken for the construction of a reinforced concrete bridge over Edgar Slough on the line of the state highway between Nelson and Chico. Plans and specifications can be secured from the office of the County Surveyor. Bids will be opened on August 1th.

**REDDING, SHASTA CO., CAL.**—Bridge, steel and timber, \$20,000. Engineer, County Surveyor, Redding. Owners, Shasta County. Plans for a new bridge across the Sacramento River at Kennett have been adopted by the Supervisors and bids will be taken until August 21st. The bridge is to be a combination steel and wooden structure and is to span the river just above the depot. It will be three spans of 200 feet each, with approaches 80 feet in length at each end.

**PLACERVILLE, EL DORADO CO., CAL.**—Bridge, steel and concrete, \$12,000. Engineers, A. V. Saph and C. B. Rushmer, Rialto Bldg., S. F. Owners, El Dorado County. Plans and specifications have been completed for the construction of a steel bridge with reinforced concrete approaches to be erected over the South Fork of the

American River at Coloma. The main span will be 162 feet long. Bids are now being taken and will be opened by the Board of Supervisors on August 16th. Plans and specifications can be secured from the office of the County Clerk.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Jetty, earth and concrete. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. The County Supervisors have directed the Surveyor to prepare plans and specifications for the construction of a jetty or such other improvements as may be necessary to confine the water of the Santa Maria River in the channel of said river under the Santa Maria bridge at the Santa Maria River crossing.

**FRESNO, FRESNO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed and figures are now being taken for the reinforced concrete bridge to be erected over Fish Slough on the Elkhorn grade. Bids will be opened for this work on August 4th. Plans and specifications can be secured from the office of the County Clerk.

**MODESTO, STANISLAUS CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor E. H. Annear, Modesto. Owners, Stanislaus County. Stanislaus County will build a new bridge across the Tuolumne River eight miles east of Waterford on the road to the La Grange country. Plans and specifications for the structure have been adopted by the Board of Supervisors. Bids will soon be taken.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Bids are now being taken by the County Supervisors for the construction of a bridge across Pacheco Slough, also for 1,100 feet of trestle. The bridge will have concrete piers and will be 65 feet in width.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor Ralph Arnold, Martinez. Owners, Contra Costa County. County Engineer Ralph Arnold has completed plans and specifications for the construction of a bridge over Peyton Slough and has presented them to the Supervisors who will consider them at their next meeting, when bids will probably be called.

**SANTA ROSA, SONOMA CO., CAL.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma County. Bids will be opened on August 12th for the construction of a reinforced concrete bridge over Maacama Creek, and for a similar structure on the Petaluma and Santa Rosa road. Plans can be secured from the office of the County Clerk.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Martinez. Owners, City of Martinez. Plans are complete and figures will be opened on August 4th for the construction of two reinforced concrete bridges in the city of Martinez. Included in the work will be the re-

removal of steel girders in the Main street bridge. The bridges can be bid on a whole or separately. Plans can be secured from the office of the City Clerk.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Bridge and flume construction. Cost not stated. Engineer, City Engineer, Martinez. Owners, City of Martinez. The City Trustees have instructed the City Attorney to immediately prepare for the calling of bids for the construction of a concrete flume across the creek at Main street and for the construction of a concrete bridge over the creek at Ferry street. The bids will include the amount necessary to straighten out the bend in the creek at Ferry street. The flume on Main street will be 77 feet long, 30 feet wide and 11 feet high. The new Ferry street structure will increase the width of the creek crossing from 16 to 50 feet, thus making it as wide as the street. Bids on the work close August 3rd.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Bridge construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Bids will be opened on August 2nd for the construction of a timber bridge over Robinson Creek at Station 436x50, a timber trestle over White House Creek at Station 557x50 and a timber trestle over Gazos Creek at Station 476x20 on the Pescadero to Santa Cruz County line road, known as Route 3, Division 3, of the San Mateo County Highways.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Trestle, reinforced concrete and pile. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans are complete and figures are now being taken for a combination reinforced concrete and timber trestle. Bids will be opened on August 16th. Plans can be secured from the County Surveyor's office. The Supervisors have accepted two sets of plans for this work. One a combination reinforced concrete pile trestle, and the other for pile trestling without concrete, and the Board of Supervisors desires bids on each set of specifications.

**BERKELEY, ALAMEDA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Bids will be opened on August 3rd for a reinforced concrete bridge over Cordones Creek. The bridge will be 106½ feet long and 40 feet wide. Plans and specifications can be secured from the City Engineer.

#### Contracts Awarded

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Bridge, reinforced concrete, \$18,900. Engineer, City Engineer, Santa Barbara. Owners, City of Santa Barbara. Contractors, Munoz & Munoz, Central Bldg., 1. A. Contract price, \$18,900.

**TOLT, KING CO., WASH.**—Bridge, steel and concrete, \$27,522. Engineer, County Surveyor, Seattle. Owners, King County. Contractor, M. P. Zindorf, Alaska Bldg., Seattle. Contract price, \$27,522.

**HANFORD, KINGS CO., CAL.**—Bridge, reinforced concrete, \$6,000. Engineer, County Surveyor, Hanford. Owners, Kings County. Contractor, S.

G. Smartt, Bakersfield. Contract price, \$6,000.

**EUREKA, HUMBOLDT CO., CAL.**—Bridge, reinforced concrete, \$2,480. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Contractor, Frank H. Green, Eureka. Contract price, \$2,480.

**UKIAH, MENDOCINO CO., CAL.**—Bridge, reinforced concrete, \$6,000. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractor, V. M. Price. Contract price, \$6,000.

**NAPA, NAPA CO., CAL.**—Bridge repairs, \$1,819. Engineer, Town Engineer, Napa. Owners, Town of Napa. Contractor, William M. Coffield, Napa. Contract price, \$1,819.

**SHASTA CO., CAL.**—Bridge, reinforced concrete, \$28,235. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractors, Ross Construction Co., Sacramento. Contract price, \$28,235.

**SHASTA CO., CAL.**—Bridge, 2, reinforced concrete, \$5,450. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractor, F. Rolandi, S. F. Contract price, \$5,450.

#### CHURCHES

**WILMINGTON, LOS ANGELES CO., CAL.**—Church and rectory, 1 and 2 story, frame, \$20,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. The church will cover an area of 50 by 140 feet and, besides the main auditorium, which will seat 400 people, there will be Sunday school rooms and a parish hall. The rectory will contain eight rooms, baths and sleeping porch. Interior of both the church and rectory will be finished in pine. Some hardwood floors will be used. There will be open fire places and tile mantels. Exteriors will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**TURLOCK, STANISLAUS CO., CAL.**—Church, 1 story and base, brick, \$10,000. Architect, C. C. Edburg, Turlock. Owners, First Church of Christ, Scientist. The building will have a seating capacity of 600 people. Sunday school rooms and reading rooms are also provided. Interior will be finished in pine with some ornamental plaster. Art glass is also specified. Exterior will be faced with pressed brick veneer. Plans are being prepared.

**SAN RAFAEL, MARIN CO., CAL.**—Mausoleum, 1 story, reinforced concrete and stone, \$10,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, A. W. Foster. The building has been designed in the classic style and will contain six receptacles. Interior will be finished in stone and ornamental plaster. There will be modern plumbing and electric work. Exterior of the building will be faced with granite. Plans are nearly complete and figures will be called for shortly.

#### Contracts Awarded.

**SAN FRANCISCO**—Church, 1 story and base, frame. Cost not stated. Architect, C. D. Clausen, Hearst Bldg., S. F. Owners, Swedish Baptist Church. Contractor, M. S. Shaw, 2201 Larkin street, S. F. Contract price not stated.

**DIXON, SOLANO CO., CAL.**—Church, 1 story and base, frame and brick, \$14,950. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Contractor, Charles P. Rose, Dixon. Contract price, \$14,950.

#### COURT HOUSES.

**MODESTO, STANISLAUS CO., CAL.**—Court house alterations and repairs. Cost not stated. Architect, none. Owners, Stanislaus County. Bids will be opened on August 11th for extensive alterations and repairs, including painting, plastering, interior finish and electric work at the County Court House. Plans and specifications can be secured from the County Clerk at Modesto.

#### FACTORIES AND WAREHOUSES

**OAKLAND, CAL.**—Factory, 4 story and base, reinforced concrete, \$75,000. Architect, Louis P. Hobart, Crocker Bld., S. F. Owners, Shredded Wheat Biscuit Co. Segregated figures are being taken on all parts of this work except the excavating, which has already been awarded to James P. McLaughlin, 241 Kearny street, S. F. Bids will be opened on August 2nd. Plans and specifications can be secured from the architect.

**OAKLAND, CAL.**—Factory, 2 story, frame, \$5,000. Architect's name not given. Owners, California Cotton Mills Co., Oakland. The building will be erected on East 22nd avenue south of Railroad avenue, and will cover a considerable ground area. Interior will be finished in pine. There will be a large amount of special machinery installed. Exterior will be covered with brick veneer and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Storage warehouse, 3 story and base, reinforced concrete. Cost not stated. Engineer, Edward L. Soule, Rialto Bldg., S. F. Owners, Bekins Van and Storage Co., Oakland. The building will be erected on San Pablo avenue near 21st street and will be fireproof. Interior will be arranged for small private storage vaults and public space. There will be automatic sprinklers, elevator service and metal window sash and frames. The Turner system of reinforced concrete construction will be used. Exterior will be faced with cement plaster. Plans are in the hands of Martin Bekins, Oakland, who will let segregated contracts.

#### Contracts Awarded.

**SAN FRANCISCO**—Factory, 1 story and base, reinforced concrete, \$199,000. Architect, Engineering Department American Can Co., New York City. Owners, American Can Co. Contractors, Lindgren & Co., Monadnock Bldg., S. F. Contract price, \$199,000.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Converter pump house, 1 story, steel and concrete. Cost not stated. Engineer, Engineering Dept. Shell Oil Co., 113 Sansome street, S. F. Owners, Shell Oil Co. Contractors, Gutleben Bros., New Call Bldg., S. F. Contract price not stated.

## FIRE HOUSES AND JAILS.

## Contracts Awarded.

OAKLAND, CAL.—Detention home, 4 story and base, reinforced concrete, \$75,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Alameda County. The following contracts have been awarded by the Alameda County Supervisors for the four-story and basement reinforced concrete Detention Home under bids opened on July 19th: Excavating and concrete work, J. V. Westerlund, 320 Market street, S. F., \$12,984. Carpentry work, W. D. Henderson, Monadnock Bldg., S. F., \$14,962. Ornamental iron work, C. Frauneder, 325 5th street, Oakland, \$2,540. Plastering, Schnebly, Hostawser & Pedgriff, 6th and Jackson streets, Oakland, \$6,522. Sheet metal work, Yager Sheet Metal Works, 3309 Chestnut street, Berkeley, \$2,828. ## Schedule 8539.

## Steam Engineering.

Class 1. Mare Island—Refrigerating plants for deliveries as follows:

Bid A—Mare Island.

Bid B—F. o. b. works.

## Schedule 8540.

## Steam Engineering.

Class 2. 15 pumps and condensers for delivery as follows:

Bid A—Mare Island.

Bid B—F. o. b. works.

## Schedule 8541.

## Steam Engineering.

Class 3. Puget Sound—Furnishing and installing sand-blast outfit at the navy yard, Puget Sound, Wash.

# Public Building Policy Changed.

An order has been issued by Secretary McAdoo to the supervising architect's office putting into force his policies with reference to the construction of post offices and federal buildings. The new order seeks to establish a rational system of uniformity and business economy in the construction of government buildings and to get away from the old "hit and miss" system that has cost the government many millions of dollars.

Under the old system buildings were constructed to fit whatever appropriation congressmen were able to get for their towns, practically regardless of whether or not the building was adapted to the actual conditions and requirements of the locality and the government service. As a result of this system, small villages often got costly and elaborate stone structures where they were not needed and other localities less fortunate and where increased facilities were greatly needed were given inadequate buildings or none at all. Under this system Congress authorized by the score post office buildings costing from \$50,000 to \$150,000 in towns where the total receipts of the post office would not pay for the maintenance of the building when erected.

Secretary McAdoo proposes hereafter to construct in a locality such a building as local conditions and the present and future needs of the service demand and not to be governed entirely by the size of the appropriation. By application of this method it is believed that hundreds of thousands of dollars will be saved in the construction of buildings already authorized by Congress, but not yet reached by the architect's office.

For the past two years the Treasury Department has been following the

same general business policy in the purchase of post office sites. The public buildings act of March 1, 1913, authorized the purchase of 303 public building sites in various parts of the country. To date only 136 of that number have been acquired, and in the purchase of these sites the department's invariable policy has been to acquire sites only in towns where a post office is actually needed and not to pay one dollar more for the property than it is actually worth. As a result of this policy, the government has acquired 136 parcels for \$571,775 less than the amount Congress authorized to be paid.

# Sheridan, Wyo., Repairs.

The contract for repairs to driveway, etc., at the U. S. post office, Sheridan, Wyo., has been awarded to O. M. Walsh at \$890.

# HOTELS.

## Contracts Awarded

OAKLAND, CAL.—Municipal wood-yard hotel and office, 3 story and base, brick, \$12,477. Architect, J. J. Donovan, Dalziel Bldg., Oakland. Owners, City of Oakland. Contractor, William A. Newsom, Sharon Bldg., S. F. Contract price, \$12,477.

FRESNO, FRESNO CO., CAL.—Hotel and stores, 2 story and base, brick, \$60,000. Architects, Coates & Traver, Rowell Bldg., Fresno, and Head Bldg., S. F. Owners, Olender Bros, 1833 Tulare street, Fresno. Contractors, Riggs & Palmer, 1908 Fresno street, Fresno. Contract price, \$60,000.

# LIBRARIES.

DINUBA, TULARE CO., CAL.—Library, 1 story and base, brick, \$5,000. Architects, Bowen & Davis, McKenzie Bldg., Fresno. Owners, Town of Dinuba. Hardwood floors will be used in the living room, dining room and reception hall. There will be an

open fire place and tile or brick mantel. Exterior of the dwelling will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO** — Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. The house has been designed to contain seven rooms, bath and sleeping porch, and will be erected on the west side of 21st avenue south of Clement. Interior will be finished in pine and elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO** — Residence, 2 story and base, steel and brick, \$100,000. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Andrew Welch, Jr. The house will be erected on Broadway between Broderick and Baker streets, and when complete will take its place among the finest homes in the city. There will be in the neighborhood of twenty rooms, a number of baths and sleeping porch. Interior finish will be of hardwoods and white enamel. Hardwood floors will be used throughout except in the bath rooms which will be finished in tile and marble. There will be a central heating system, probably hot water, vacuum cleaning and dumb waiters. Mantels will be of marble and tile. Exterior of the house will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**SAN LORENZO, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$4,000. Architects, Mau & Sprague, MacDonough Bldg., Oakland. Owner, J. P. Marlin. The dwelling will contain ten rooms and bath. Interior will be finished in pine throughout. Some hardwood floors will be used. There will be open fire places and tile or brick mantels. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,500. Architects, F. R. Peake Co., 2127 University avenue, Berkeley. Owner's name not given. The dwelling has been designed for a seven-room house and will be erected on Mariposa north of Terrace Walk. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO** — Residence, 2 story and base, frame, \$5,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Stewart Smith, Mission Bank, S. F. The dwelling will be erected on the east side of 7th avenue near Lake, and has been designed for an eight-

room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are being prepared.

### Contracts Awarded

**BEVERLY HILLS, LOS ANGELES CO., CAL.**—Residence, 2 story and frame and plaster. Cost not stated. Architects, Milwaukee Building Co., Wright & Callender Bldg., L. A. Owner, Kling C. Gillette. Contractors, Milwaukee Building Co., Wright & Callender Bldg., L. A. Contract price not stated.

**BURLINGAME, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, A. L. Elford. Contractor, D. Charles Scanlan, Burlingame. Contract price, \$5,000.

**LOS ANGELES, CAL.**—Residence, 2 story and base, brick and frame. Cost not stated. Architects, Montgomery & Montgomery, Trust and Savings Bldg., L. A. Owner's name not given. Contractor, Charles H. Thompson, Shoreham Apts., L. A. Contract price not stated.

### SCHOOLS.

**SAN FRANCISCO**—School auditorium, 2 story and base, brick and steel. Cost not stated. Architect, William C. Hays, First National Bank Bldg., S. F. Owners, Wilmerding School of Industrial Arts. The building will be erected on Potrero avenue, between 16th and 17th streets, and has been designed for a large auditorium and meeting halls. Interiors will be finished in pine throughout. There will be a central heating system, probably steam heat. Modern plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared. This is the first of several new buildings which will be erected for the Wilmerding School.

**OAT SCHOOL DISTRICT, TEHAMA CO., CAL.**—School, 1 story, frame. Cost not stated. Architect, none. Owners, Oat School District. Plans for a one-story frame building containing two rooms have been completed and are now out for figures. Bids will be opened on August 2nd at 2 p. m. Plans and specifications can be secured from A. N. Norcott, Trustee, at Red Bluff.

**BEAVERTON, ORE.**—School, 1 story and base, brick and hollow tile, \$23,500. Architects, Tourtellotte & Hummel, Rocheild Bldg., Portland. Owners, City of Beaverton. The building will contain eight class rooms, an auditorium, departments of domestic science and manual training and a large gymnasium. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, modern school plumbing and program clocks. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**SEASIDE, ORE.**—School, 2 story and base, brick or hollow tile, \$33,000. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, City of Seaside. The building will contain eight class rooms, library, an auditorium, office and manual training and domestic science departments. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, a program clock system, vacuum cleaning and modern school plumbing. Exterior of the building will be faced with pressed brick or cement plaster. Plans are now being prepared.

**MONMOUTH, ORE.**—School, 2 story and base, \$50,000. Architect, John V. Benes, Chamber of Commerce Bldg., Portland. Owners, State of Oregon. The building has been designed for a State Normal School, and will cover an area of 128 by 84 feet. The first floor will contain an auditorium seating 240 people, three class rooms, offices and rest rooms. The second floor has been arranged for four class rooms, art and music departments and library. Manual training rooms and domestic science department will occupy the basement. Interior will be finished in pine with maple floors. Plans provide for steam heat, vacuum cleaning, program clocks and modern school plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SUNNYSIDE SCHOOL DISTRICT, TULARE CO., CAL.**—School completion, frame. Cost not stated. Architect, F. W. Griffin, First National Bank Bldg., Porterville. Owners, Sunnyside School District. Plans and specifications have been completed for the alterations and work necessary to complete the Sunnyside School. Bids are now being taken and will be opened on August 2nd. Plans can be secured from the architect.

**MARICOPA, KERN CO., CAL.**—School, 1 story, frame. Cost not stated. Architect, Thomas R. Wiseman, 1933 Chester avenue, Bakersfield. Owners, Maricopa Union High School. The building will be in the nature of an addition to the present school and will contain three class rooms and study hall. Interior will be finished in pine with some maple floors. There will be steam heat. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on July 30th.

**LOS ANGELES, CAL.**—School, 1, 2 and 3 story, brick. Cost not stated. Architects, Nedham & Cline, Brockman Bldg., L. A. Owners, City of Los Angeles. The building will be known as the Lincoln High School and will be erected on North Broadway. The auditorium will cover an area of 110 by 100 feet and will seat 1500 people. The library building will be three stories, covering an area of 93 by 88 feet, and the music building, a two-story structure covering an area of 54 by 110 feet. Interiors will be finished in pine with maple floors. There will be considerable marble and tile work and ornamental plaster. Plans provide for steam heat, modern school plumbing, vacuum cleaning and program clocks. Exterior will be faced with cement plaster. Roofs will be of clay

tile. Plans are complete and figures are being taken.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—School, 1 story and base, brick, \$30,000. Architect, L. B. Penberton, Auditorium Bldg., L. A. Owners, Redondo Beach Grammar School District. The building will cover an area of 213 by 187 feet and will contain eight class rooms, office, an auditorium seating 450 people and two play rooms. Interior will be finished in pine. Maple floors will be used in the class rooms. Plans provide for steam heat, oil burning furnace and modern school plumbing. Exterior of the building will be faced with ruffled brick. Plans are now being prepared.

**LOS ANGELES, CAL.**—School, 1 story and base, brick. Cost not stated. Architects, O. P. Dennis and H. H. Hewitt, Fay Bldg., L. A. Owners, City of Los Angeles. The building will be erected on the 21th street lot, and has been out for figures recently. All bids were rejected and plans are now being revised. New bids will be called for shortly.

**LOS ANGELES, CAL.**—School, 2 story and base, brick, \$30,000. Architects, Jeffery & Schaefer, Citizens' National Bank Bldg., L. A. Owners, City of Los Angeles. This building has recently been out for figures but all bids were rejected and plans are now being revised. New bids will be called for shortly. The building will be erected on the Annandale School site.

**SATICOY SCHOOL DISTRICT, VENTURA CO., CAL.**—School 1 story, brick and frame. Cost not stated. Architect, G. S. Bliss, Thomas Bldg., Santa Barbara. Owners, Saticoy School District. The building will be partly of brick and partly of frame construction. Interior will be finished in pine with some maple floors. Separate bids are being taken for the general construction, heating, plumbing, electric work and painting. Plans can be secured from the architect. Bids will be opened on August 2nd.

### Contracts Awarded

**OAKLAND, CAL.**—Portable schools, frame, \$6,150. Architect, none. Owners, City of Oakland. Contractor, J. R. Faulkes, 9525 East 11th street, Oakland. Contract price, \$6,150.

**ANGELES MESA, LOS ANGELES CO., CAL.**—School, 1 story and base, reinforced concrete, \$22,500. Architect, Thomas Franklin Power, Higgins Bldg., L. A. Owners, Angeles Mesa School District. Contractors, The Mann-Knox Construction Co., Delta Bldg., L. A. Contract price, \$22,500.

**EL CENTRO, IMPERIAL CO., CAL.**—School, 1 story and base, frame, \$33,281. Architect, Fred T. Harris, Holt Bldg., El Centro. Owners, City of El Centro. Contractors, Long Beach Construction Co., Long Beach. Contract price, \$33,281.

### SEWERS, STREET WORK & WATER SYSTEMS.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Sewer construction, \$9,120. Engineer, City Engineer, Santa Cruz. Bids opened for the construction of the National Street Sewer. Show W. J. Tobin, of Santa Cruz box 10, Santa Cruz. All bids will be taken under reservation.

**BURKET, CALIFORNIA, CAL.**—Bridges, reinforced concrete. Cost not

stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. A resolution approving the construction of a new bridge over Cordomies Creek in Walnut street has been approved by the City Council. Bids on the work will soon be called for.

**BAKERSFIELD, KERN CO., CAL.**—Water tank and tower, steel. Cost not stated. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. Bids are now being received at the office of the City Manager for a steel tower and 5,000 gallon tank to be erected at Beale Park for the water system there.

**MODESTO, STANISLAUS CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Modesto. Owners, City of Modesto. Preliminary steps have been taken by the City Council to provide for the paving of L street between 7th and 9th. Bids will be called for on this work when the plans and specifications have been approved.

**FRESNO, FRESNO CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. Plans have been completed and figures are now being taken for the construction of a 16-inch sewer in El Dorado street. Brick manholes and Y branches are included in the work. Plans can be secured from the office of the City Clerk. Bids will be opened on August 2nd.

**VISALIA, TULARE CO., CAL.**—Street paving, concrete curbs and gutters. Cost not stated. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bids will be received by the Board of Trustees up to 5 p. m. of August 4, 1915, for paving and constructing concrete curbs and gutters in West Main street from Encina avenue to Conyer street in accordance with plans and specifications on file in the office of the City Engineer. Certified check or bond for 10 per cent is required. Ida Markham is City Clerk.

**SAN RAFAEL, MARIN CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. At the last meeting of the County Supervisors bids were ordered called to be received on August 3rd for constructing a piece of road in District One, across the marsh near McNear's Point. Bids are to be received for four different specifications, and the Board will decide which is the best after the bids are received. One specification calls for the necessary fill with a 12-inch rock rip-rap; another calls for pile bulkhead; another for a bulkhead composed of rock each containing a cubic yard and one for embankment obtained from any source. Further information may be had from the County Surveyor at San Rafael.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Lighting system. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans and specifications have been adopted by the County Supervisors for a lighting district known as Crockett-Croloña and Valona lighting district, and the Clerk of the Board was ordered to advertise for bids for furnishing and installing lights in accordance with plans.

**SAUSALITO, MARIN CO., CAL.**—Sewer system, \$12,500. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Plans and specifications for adequate sewerage in South Sausalito have been approved by the Board of Trustees. The sewage from all that portion of Sausalito in the watershed between the boundary lines of the Sausalito Land and Ferry Co. and the Sausalito Bay Land Co. will be collected in the Main street and the Water street sewers and carried 125 feet out into the bay by a cast iron pipe outlet. Plans are on file at the office of the Town Engineer. Bids will be called for shortly.

**NAPA, NAPA CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. The City Council has adopted resolutions providing for sewer work in Nursey, Vallejo and Juarez streets. Bids for the work will soon be called for.

**NAPA, NAPA CO., CAL.**—Street work. Cost as follows. Engineer, City Engineer, Napa. Owners, City of Napa. Bids for doing certain street work on First street have been taken under advisement by the Council and a contract will probably be awarded at the next meeting. The following bids were received: F. E. Burge, \$1,915; Geo. Errington, \$2,191.65.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The County Surveyor has been instructed to prepare plans and specifications for a road from Moss Beach to Montara and from Farrelone to Martini's. On completion and approval of the plans bids will be called for.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, Redwood City. Owners, Redwood City. Plans and specifications providing for the paving of Main and East Bradford streets have been adopted by the City Trustees. The work will probably be done under private contract. The specifications call for a reinforced concrete base and a Topeka wearing surface.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Highway work. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans are complete and figures will be opened on August 2nd for the following work: For grading and partly macadamizing 14,825 miles of highway, located in the Fifth Road District of San Mateo County, beginning at a point in the center of the present county road from Pescadero to the Santa Cruz County line. The work has been figured before, bids being opened on July 12th. Plans and specifications can be secured from the office of the County Surveyor.

**SALINAS, MONTEREY CO., CAL.**—Road grading, \$9,050. Engineer, County Surveyor, Salinas. Owners, Monterey County. Bids have been opened for the grading of the Monterey-Castroville road, a distance of approximately 11 miles in length, extending from the Huerta del Rey lagoon at Seaside to the Neponset bridge. The Engineer's estimate is \$9,050 and the lowest bid was that of L. G. Hare, Salinas, at \$6,723. The next low bid was Ruth-

ven & Serano, Monterey, at \$9,352. Bids were taken under advisement.

**MAYFIELD, SANTA CLARA CO., CAL.**—Street improvements. Cost not stated. Engineer, City Engineer, Mayfield. Owners, City of Mayfield. Plans and specifications for the paving of all principal streets of Evergreen Park and College Terrace have been ordered. The streets to be improved are Palo Alto and Amherst avenues in College Terrace and all streets running at right angles to the state highway in Evergreen Park. The work will probably be done under the Vrooman act or the Act of 1911. The City Engineer has been instructed to plan for an 18-foot roadway in the middle of each street of the same quality as the state highway, the rest of the street to be graded to the curb line.

**HOLLISTER, SAN BENITO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Hollister. Owners, City of Hollister. The Ransome-Crummey Co., First National Bank Bldg., Oakland, will pave Monterey street from Fifth to B streets under private contract. The plans and specifications for the work will be prepared by the City Engineer and will call for a 4-inch concrete base with one-half inch covering of dursaphte after the sub-base has been properly graded and tamped. The cost of the concrete base is set at 30 cents per lineal foot and 11½ cents per square foot for the dursaphte.

**SAN JOSE, SANTA CLARA CO., CAL.**—Street improvements. Cost not stated. Engineer, City Engineer, San Jose. Owners, City of San Jose. At the last meeting of the City Council the City Engineer was instructed to prepare plans and specifications for the improvement of the remainder of West San Carlos street, Grant street, Orchard street from Grant southward, Taylor street from First to Thirteenth street, South Tenth street from Reed to Keys, Autumn from Julian to Santa Clara, and Julian from the Guadalupe bridge to the westerly city limits.

**SAN JOSE, SANTA CLARA CO., CAL.**—Furnishing cement. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids were received from the Standard Portland Cement Co., Santa Cruz Portland Cement Co., Henry Cowell Lime and Cement Co., and the Pacific Portland Cement Co., Consolidated, by the Supervisors at their last meeting for furnishing the county with 50,000 barrels of cement and were rejected. The District Attorney has been directed to furnish the Board with an opinion as to the right of their purchasing the cement in the open market without a further call for bids.

**SAN JOSE, SANTA CLARA CO., CAL.**—Highway construction. Costs as follows. Owners, Santa Clara County. The low bids presented at the last meeting of the Board of Supervisors for highway construction in Santa Clara County were as follows: District No. 2, Ransome-Crummey Co., \$31,854.65. Ford road, same district, J. McReynolds, 249 North 15th street, San Jose, \$7,991; second low, John W. McDonald, San Jose, \$14,887. Union avenue and Foxworthy road, J. F. Adams, 621 Home street, San Jose, \$10,300, second low, Howard & Ellison

Paving Co., \$13,500. No contracts have been awarded.

**SONORA, TUOLUMNE CO., CAL.**—Road machinery. Cost not stated. Engineer, County Surveyor, Sonora. Owners, Tuolumne County. The County Board of Supervisors are taking under advisement the purchase of a ten-ton gasoline roller, a six thousand pound scarifier and an immense grader for the improving of the county roads.

**SACRAMENTO, CAL.**—Sewer construction, \$43,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Four bids were received by the City Commission for the construction of Unit 4 of the reinforced concrete sewer in East Sacramento. It appears that the James Kennedy Co. of Los Angeles is the low bidder. Other bidders were A. Teichert, Tibbits Pacific Co. and Contra Costa Construction Co. The work will cost about \$43,000. The sewer will be laid on Montclair avenue to J. north on Montclair to the alley between G and H and thence east to Wright & Kimbrough Tract No. 10, and up Burns Slough to Ashley Place.

**BERKELEY, ALAMEDA CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. At the last meeting of the City Council specifications for the construction of a sewer in Sixth street from Harrison north 400 feet were adopted, and a resolution of intention ordering the work was made.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. Plans are complete and figures will be opened on August 4th for the following: Improvement of a portion of Divisions B and C, Route No. 2 (Murrieta to foot of Temecula grade). The improvement consisting in part of grading and paving with concrete 16 feet wide and 4 inches thick 5.67 miles of road; also a 60-foot concrete bridge which may be bid on separately. Plans are on file at the office of the County Clerk at Riverside.

#### Contracts Awarded.

**RIO VISTA, SOLANO CO., CAL.**—Paving, curbs and gutters. Cost not stated. Engineer, Town Engineer, Rio Vista. Owners, Town of Rio Vista. Contractors, Frank Duffum and W. J. Jessup, Rio Vista. Contract price not stated.

**BERKELEY, ALAMEDA CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractor, Michael Heafey, 2030 McKinley avenue, Berkeley. Contract price not stated.

**SACRAMENTO, CAL.**—Sewer construction, Unit No. 4, \$37,280.40. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, James Kennedy, 901 Washington Bldg., L. A. Contract price, \$37,280.40.

**SACRAMENTO, CAL.**—Street paving, \$10,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Clark-Henry Construction Co., Ochsner Bldg., Sacramento. Contract price, \$10,000.

**CORNING, TEHAMA CO., CAL.**—Water extension and sewer work. Cost as follows. Engineer, City Engineer, Corning. Owners, City of Corning. Con-

tractor, P. A. Wheeler, Corning, water extension, \$4,755. A. C. Hamlin, San Jose, sewer extensions, \$15,381.

#### STORES AND OFFICES.

**BERKELEY, ALAMEDA CO., CAL.**—Stores, 1 story and base, brick, \$5,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Heron. The building will be erected on Shattuck avenue near University, and has been designed to contain two stores and a branch station. Interior will be finished in pine. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**OAKDALE, STANISLAUS CO., CAL.**—Offices, 2 story and base, reinforced concrete, \$10,000. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Oakdale Irrigation District. The building has been designed for the administrative offices of the company. Interior will be finished in pine and hardwood. Fireproof vaults will be installed. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for shortly.

**SAN FRANCISCO**—Stores and lofts, 3 story and base, Class C construction, \$25,000. Architect, Nathaniel Blaisdell, 255 California street, S. F. Owners, San Francisco Investment Co., Clunie Bldg. The building will be erected on the north side of California street east of Leidesdorff, and has been designed for a store on the first floor and a number of small offices and lofts on the upper two floors. Interior will be finished in pine and hardwood. There will be elevator service, steam heat and hot water supply. Patent store fronts and marble bases are specified. Exterior of the building will be faced with pressed brick, trimmed with terra cotta. Plans are complete and figures are being taken. A contract for the pile foundation work has been awarded to McGowan & Butler, 180 Jessie street, for \$1,244.

#### THEATRES.

**TURLOCK, STANISLAUS CO., CAL.**—Theatre and lodge hall, 2 story and base, reinforced concrete, \$25,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The building will cover an area of 56 by 150 feet, and will have three street frontages. The main floor will contain a high class theatre with a seating capacity of 750 people. There will also be a large balcony. Upper floor has been designed for lodge rooms for the local Odd Fellows and will be finished in pine and hardwood. A central heating system will be installed. Considerable ornamental plaster will be used in the theatre. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

#### SEALED PROPOSALS

**PROPOSALS FOR CANAL SUPPLIES.**—PANAMA CIRCULAR 957—Proposals for Electrically-operated Passenger Elevator and Dumbwater and Hand-Operated Freight Elevators, Bolter

Tub, Steam Cocks, Portable Tool Stands and Lathes, Pans, Cold-Rolled Steel, Tool Steel, Steel Cable, Valves, Brass Floor Drains, Air Hose, Magnesia Pipe Covering, Paper, Bristol Board, Memorandum Books, Douglas Fir and Yellow Pine Lumber, Spud Timbers and White Oak Lumber. Sealed proposals will be received at the office of the general purchasing agent, the Panama Canal, Washington, D. C., until 10:30 a. m. August 4, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 955) may be obtained from this office or the offices of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### PROPOSALS FOR BUILDING.

**BUILDING, ETC.**—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. August 24, 1915, for the construction, complete (including mechanical equipment and appliances) of the United States post office at Grand Junction, Colo. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or at this office, at the discretion of the supervising architect, JAMES A. WETMORE, acting supervising architect.

#### PROPOSALS FOR EXCAVATION.

**EXCAVATION**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. August 12, 1915, for about 355,000 cubic yards of canal excavation. The canal is located from three to ten miles from Saco, Mont., on the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C. or Denver, Colo., or Malta, Mont. MORRIS BIEN, acting director.

#### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 954**—Proposals for Cement Roofing Tile.—Sealed proposals will be received at the office of the general purchasing agent, the Panama Canal, Washington, D. C., until 10:30 a. m. August 3, 1915, at which time they will be opened in public, for furnishing or erecting the above mentioned supplies. Blanks and general information relating to this circular (No. 954) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 951**—Proposals for Mechanical Range Indicators and Patterns, Steel, Wrought Iron and Steel Pipe, Iron and Steel Chain, Nuts, Rivets, Bolts, Fusible Plugs, Rider Roll, Switch Pins, Washers, Valves, Steam Whistles, Saw Blades, Forges, Manure Forks, Hatchet Handles, Brass Hooks, Bits, Grommets, Flexible Joint, Gasoline, Gasoline Window Glass, Marine Cocks, Stepladders, Ash Cans and Covers, Water Closets, Sheet Copper, Lead Washers, Leather Belting, Escutcheon Pins, Air Hose, Fire Clay, Fire Brick, Engine Lubricators, Floor Mats, Poultry Netting, Asbestos Cement, Asbestos Packing, Brass Condensers, Leadings, Crash Trowels, Paper, Drinking Glasses, Drinking Glasses, Chinaware, Lined Oil, Alcohol, Benzine, Paints, Shellac, Umber, Zinc, Litharge, Carbon, Bisulphide, Turpentine, Substanz and Pine Tar. Sealed proposals will be received at the office of the general purchasing agent, the Panama Canal, Washington, D. C., until 10:30 a. m. August 2, 1915, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular

(No. 951) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### PROPOSALS FOR WHARF CONSTRUCTION.

**WHARF**—Sealed proposals indorsed "Proposals for Reinforced Concrete Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then and there publicly opened, for constructing a reinforced concrete wharf at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR CONCRETE PIERS.

**CONCRETE PIERS**—Sealed proposals indorsed "Proposals for Torpedo Boat Piers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then and there publicly opened, for constructing reinforced concrete torpedo boat piers at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR RAILROAD.

**MARINE RAILWAY**—Sealed proposals indorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then and there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR DREDGING.

**DREDGING**—Sealed proposals, indorsed "Proposals for Dredging," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 14, 1915, and then and there publicly opened, for dredging at the navy yard, Puget Sound, Wash. Amount available, \$15,000. #### PROPOSALS FOR DREDGING.

1915, and then and there publicly opened for dredging 72,000 cubic yards.

**DREDGING**—Sealed proposals, indorsed "Proposals for Dredging," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 31, more or less, at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, Chief of Bureau.

#### FINAL FIGURES FOR ALASKA'S MINERAL PRODUCTION IN 1914.

Alaska produced gold in 1914 to the value of \$15,764,259, an increase of about \$10,000,000 over that of the previous year. In 1914 21,450,628 pounds of copper were produced in Alaska, compared with 21,659,953 pounds in 1913. The value of Alaska's total mineral production for 1914 is \$19,115,080; that of 1912 was \$19,476,356. This decrease is due to the low price of copper in 1912.

It is estimated that up to the close of 1914 Alaska has produced minerals to a total value of \$268,150,000, of which \$244,156,000 represents the value of the gold output. These statistics are taken from a report by Alfred H. Brooks, of the United States Geological Survey, which is now in press.

#### SECONDARY METAL REPORT.

The U. S. Geological Survey now has available for distribution copies of the annual statement on the recovery of secondary metals in 1914. It is reported that \$57,029,706 worth of secondary metals was recovered in the United States last year.

## SAN FRANCISCO.

**RESIDENCES**—2, 1½ story and base, frame, \$1,500 each. San Francisco. Architect, none. Owner, Lazar Aydukovich, 1238 Hollister street, S. F. These two houses will be erected on the east side of 46th avenue north of Judah, and each has been designed for a five-room house with bath. Interior will be finished in pine and redwood. There will be an open fire place in the living rooms. Mantels will be of tile and brick. Exterior of the houses will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**RESIDENCES**—6, 2 story and base, frame, \$10,000 each. San Francisco. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. These dwellings will be erected in Forest Hill, and each will contain eight rooms, two baths and sleeping porches. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living and dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. There will be vacuum cleaning and hot water circulating systems. Exteriors will be covered with cement plaster on metal lath and brick veneer. Plans are now being prepared.

**RESIDENCES**—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, P. Algot Nelson, 4333 19th street, S. F. These two houses will be erected on the north side of Lawton west of 9th avenue, and each has been designed to contain seven rooms and bath. Interiors will be finished in pine with some hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owners, Nelson Bros., 515 Dolores street, S. F. The dwelling will be erected on the east side of 18th avenue south of Geary street, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile or brick mantel. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exter-

rior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—10, 1 and 2 story and base, frame, \$5,000 to \$7,000. San Francisco. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner's name withheld. These houses, which have been designed to contain from seven to eight rooms, will be erected in Lincoln Manor. Each will have a sleeping porch. Interiors will be finished in pine and hardwood with white enamel in the bed rooms. There will be open fire places and tile or brick mantels. The more expensive homes will have furnace heat. Bath rooms will have tile floors and wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are now being prepared.

**APARTMENT HOUSE**—3 story and base, frame, \$14,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owners, J. Risso and G. Oberfell. The building has been designed to contain eight apartments of three rooms each with bath, and will be erected at the corner of 19th and Noe streets. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. Gas steam radiators are specified. Wall beds will be used. There will be a hot water supply. Bath rooms will have tile floor and wainscot. Marble wainscot will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$12,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, George W. Mensor. The building will be erected on the south side of Washington street east of Steiner, and has been designed to contain six apartments of four rooms and bath. Interior will be finished in pine with some Philippine hagogany. Hardwood floors will be used in the living rooms, dining rooms and reception rooms. There will be steam heat and a hot water system. Bath rooms will have tile floors and wainscot. Wall beds are specified. Marble and tile will be used in the entrance. Exterior will be covered with cement plaster on metal lath. Plans are complete and the owner is taking figures.

**FLATS**—2 story and base, frame, \$6,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name not given. The building will be erected on Oak street near Fillmore, and has been designed to contain two residential flats of six rooms each. Interiors will be finished in pine, oak and white enamel. There will be furnace

heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot. Automatic water heaters will be installed. Both flats will be provided with sleeping porches. Exterior will be covered with cement plaster and brick veneer. Plans are being prepared.

**FLATS**—3 story and base, frame, \$1,500. San Francisco. Architect, none. Owner, Thomas D. Quigley, 1590 8th avenue, S. F. The building has been designed to contain three modern flats and will be erected on the south side of Minna street east of Julia. Interior finish will be of pine and redwood. There will be an open fire place in each living room. Mantels will be of tile. Imitation tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS**—3 story and base, frame, \$5,000. San Francisco. Architect, Charles Carlson, 200 Gates street, S. F. Owner, George D. Gilmour, 2376 Howard street. The building will be erected on the east side of Howard street north of 16th, and has been designed to contain three flats of five rooms each. Interiors will be finished in pine with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be an open fire place in each living room. Mantel will be of tile or brick. Imitation tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and the work will be done by Day Labor.

**FLATS**—2 story and base, frame, \$6,500. San Francisco. Architect, none. Owner, C. S. Allred, 150 Onondago avenue, S. F. The building will be erected on the south side of Union street west of Steiner, covering an area of 27 by 80 feet. There will be four small flats. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS AND STORE**—3 story and base, frame, \$8,500. San Francisco. Architect, Carl Gellfuss, 16 Kearny street, S. F. Owner, Anna R. Wisman. The building will be erected at the southeast corner of Clement and 24th streets and will contain a store on the first floor and flats above. The flats have been designed for offices for doctors and dentists and will be finished in pine and white enamel. Hardwood

floors will be used in the principal rooms. In the rear of the building a garage to contain three machines has been provided for. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile and white enamel. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

**FLATS AND STORES**—3 story and base, frame, \$6,000. San Francisco. Architect, C. Fantoni, 916 Kearny street, S. F. Owner, Caetano Ciampa, 414 Madrid. The building will be erected on Brazil and has been designed to contain two stores and three flats. Interior will be finished in pine throughout. Some hardwood floors will be used. There will be open fire places and tile or brick mantels. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**POST OFFICE**—1 story and base, brick, stone and concrete. Cost not stated. Grand Junction, Colo. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Revised plans for this building have been completed and figures are again being taken. The building will be finished in pine and hardwood. There will be a considerable amount of tile and marble work. Plans provide for steam heat. Exterior will be faced with pressed brick and stone. Plans can be secured from either the Custodian of the site at Grand Junction or from the Supervising Architect. Bids will be opened on August 24th.

**SCHOOL AUDITORIUM**—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, William C. Hays, First National Bank Bldg., S. F. Owners, Wilmerding School of Industrial Arts. The building will be erected on Potrero avenue between 16th and 17th streets, and has been designed for a large auditorium and meeting halls. Interior will be finished in pine throughout. There will be a central heating system, probably steam heat. Modern plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared. This is the first of several new buildings which will be erected for the Wilmerding School.

**APARTMENT HOUSE**—2 story and base, frame, \$8,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name not given. The building will be erected at the corner of Union and Stockton streets and has been designed to contain a store and several small apartments. Interior will be finished in pine and redwood. There will be wall beds and private baths. Exterior of the building will be covered with rustic and shiplap. Plans are now being prepared. Further mention will be made of the work.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name not given. The building will be erected on the south side of Norton street near Mission, and will contain two flats of five rooms each. A basement garage is also provided. Interior will be finished in pine with some elm panels. Hardwood floors will

be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Imitation tile will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, steel and brick, \$100,000. San Francisco. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Andrew Welch, Jr. The house will be erected on Broadway between Broderick and Baker streets and when complete will take its place among the finest homes in the city. There will be in the neighborhood of 20 rooms, a number of baths and sleeping porch. Interior finish will be of hardwoods and white enamel. Hardwood floors will be used throughout except in the bath rooms which will be finished in tile and marble. There will be a central heating system, probably hot water, vacuum cleaning and dumb waiters. Mantels will be of marble and tile. Exterior of the house will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. The house has been designed to contain seven rooms, bath and sleeping porch, and will be erected on the west side of 21st avenue south of Clement. Interior will be finished in pine and elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, Gus A. Brown, 123 Carl street, S. F. Owners, S. F. and L. A. Realty Co., Foxcroft Bldg. The dwelling will be erected on the west side of 15th avenue south of Pacheco, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile or brick mantel. Exterior of the dwelling will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS**—2 story and base, frame, \$7,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name not given. The building will be erected near the corner of Union and Hyde streets, and has been designed to contain three flats of five rooms each and a basement garage. Interior will be finished in pine with some hardwood floors. There will be an open fire place in each living room. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Marble wainscot will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS AND STORES**—3 story and base, frame, \$6,500. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name not given. The building will be erected on the west side of Mission street near 28th and will contain four flats and two stores. Interior will be finished in pine and redwood. Some oak floors will be used. Patent store fronts are specified. There will be an open fire place and tile mantel in each living room. Exterior of the building will be covered with rustic and shiplap. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, T. J. Houweling, 506 Chenery street, S. F. The dwelling will be erected on Sprague street east of Naylor, and has been designed for a six-room house with bath. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be an open fire place and tile or brick mantel. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**STORES AND LOFTS**—3 story and base. Class C construction, \$25,000. San Francisco. Architect, Nathaniel Blaisdell, 255 California street, S. F. Owners, San Francisco Investment Co., Clunie Bldg. The building will be erected on the north side of California street east of Leidesdorff, and has been designed for a store on the first floor and a number of small offices and lofts on the upper two floors. Interior will be finished in pine and hardwood. There will be elevator service, steam heat and hot water supply. Patent store fronts and marble bases are specified. Exterior of the building will be faced with pressed brick, trimmed with terra cotta. Plans are complete and figures are being taken. A contract for the pile foundation work has been awarded to McGowan & Butler, 180 Jessie street, for \$1,244.

**APARTMENT HOUSE**—4 story and base, brick and steel, \$25,000. San Francisco. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, Theo. E. Rulfs, 1167 Pine street, S. F. The building will be erected on the east side of Hyde street south of Sutter, covering an area of 25 by 86 feet. Interior will be arranged for a number of two and three room suites with baths and wall beds. Interior finish will be of pine and elm panels. Hardwood floors will be used in the living and dining rooms. There will be an automatic elevator, steam heat and a hot water system. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance lobby. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Stewart Smith, Mission Bank, S. F. The dwelling will be erected on the east side of 7th avenue near Lake, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining

room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are being prepared.

**OAKLAND AND ALAMEDA COUNTY.**

RESIDENCE—1 1/2 story and base, frame, \$2,300. Oakland, Cal. Architect, Yerrick & Smith, Blake Bldg., Oakland. Owner, John Michels. The dwelling has been designed to contain six rooms and bath. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—1 1/2 story and base, frame, \$2,000. Oakland, Cal. Architect, M. L. Newsum, 1748 Broadway, Oakland. Owner, C. A. Verele. The dwelling has been designed for a six-room house with bath and sleeping porch and will be erected in Fourth Avenue Terrace. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire place. Mantel will be of tile or brick. An automatic water heater will be installed. Tile floor and wainscot will be used in the bath room. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$1,250 each. Oakland, Cal. Architect, none. Owner, C. M. MacGregor, 470 13th street, Oakland. These two houses will be erected on the north side of Mandana Boulevard east of Paloma, and each will contain seven rooms and bath. Interiors will be finished in pine and white enamel. Hardwood floors will be used in the living and dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath rooms. Plans provide for automatic water heaters. Exteriors will be covered with rustic and cement

plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—1½ story and base, frame, \$3,200. Oakland, Cal. Architect, M. L. Newsom, 1748 Broadway, Oakland. Owner, Mr. Anderson. The dwelling will be erected in Rockridge Park, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**FACTORY**—4 story and base, reinforced concrete, \$75,000. Oakland, Cal. Architect, Louis P. Hobart, Crocker Bldg., S. F. Owners, Shredded Wheat Biscuit Co. Segregated figures are being taken on all parts of this work except the excavating, which has already been awarded to James L. McLaughlin, 244 Kearny street, S. F. Bids will be opened on August 2nd. Plans and specifications can be secured from the architect.

**FLATS**—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, C. C. Foss, 1242 First avenue, Oakland. The building will be erected at the southwest corner of Park Boulevard and East 19th street, and has been designed to contain fourteen rooms which will be arranged in three flats. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**STORES**—1 story and base, brick, \$6,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Heron. The building will be erected on Shattuck avenue near University and has been designed to contain two stores and a branch station. Interior will be finished in pine. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**BRIDGE**—Reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. A resolution approving the construction of a new bridge over Cordornices Creek in Walnut street has been approved by the City Council. Bids on the work will soon be called for.

**RESIDENCE**—2 story and base, frame, \$1,000. San Lorenzo, Alameda Co., Cal. Architects, Mau & Sprague, MacDonald Bldg., Oakland. Owner, J. F. Martin. The dwelling will contain ten rooms and bath. Interior will be finished in pine throughout. Some

hardwood floors will be used. There will be open fire places and tile or brick mantels. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architects, P. R. Peake Co., 2127 University avenue, Berkeley. Owner's name not given. The dwelling has been designed for a seven-room house and will be erected on Mariposa north of Terrace Walk. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SEWER CONSTRUCTION**—Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. At the last meeting of the City Council specifications for the construction of a sewer in Sixth street from Harrison north 100 feet were adopted and a resolution of intention ordering the work was made.

**BRIDGE**—Reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Bids will be opened on August 3rd for a reinforced concrete bridge over Cordornices Creek. The bridge will be 106½ feet long and 40 feet wide. Plans and specifications can be secured from the City Engineer.

**FACTORY**—2 story and base, frame, \$5,000. Oakland, Cal. Architect's name not given. Owners, California Cotton Mills Co., Oakland. The building will be erected on East 22nd avenue south of Railroad avenue, and will cover a considerable ground area. Interior will be finished in pine. There will be a large amount of special machinery installed. Exterior will be covered with brick veneer and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**STORAGE WAREHOUSE**—3 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Engineer, Edward L. Soule, Rialto Bldg., S. F. Owners, Bekins Van and Storage Co., Oakland. The building will be erected on San Pablo avenue near 21st street and will be fireproof. Interior will be arranged for small private storage vaults and public space. There will be automatic sprinklers, elevator service and metal window sash and frames. The Turner system of reinforced concrete construction will be used. Exterior will be faced with cement plaster. Plans are in the hands of Martin Bekins, Oakland, who will let segregated contracts.

#### Contracts Awarded.

# SAN JOSE AND THE SANTA CLARA VALLEY

BRIDGE CONSTRUCTION—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Bids will be opened on August 2nd for the construction of a timber bridge over Robinson Creek at Station 436x50; a timber trestle over White House Creek at Station 557x50, and a timber trestle over Gazos Creek at Station

476x20 on the Pescadero to Santa Cruz County line road, known as Route 3, Division 3, of the San Mateo County Highways.

**SEWER CONSTRUCTION** — \$9,842.09. Santa Cruz, Santa Cruz Co., Cal. Engineer, City Engineer, Santa Cruz. Bids opened for the construction of the National street sewer show W. J. Tobin of Santa Cruz low at \$9,842.09. All bids were taken under advisement.

**ROAD CONSTRUCTION**—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The County Surveyor has been instructed to prepare plans and specifications for a road from Moss Beach to Montara and from Farelone to Martini's. On completion and approval of the plans bids will be called for.

**STREET PAVING** — Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, Town Engineer, Redwood City. Owners, Redwood City. Plans and specifications providing for the paving of Main and East Bradford streets have been adopted by the City Trustees. The work will probably be done under private contract. The specifications call for a reinforced concrete base and a Topeka wearing surface.

**HIGHWAY WORK**—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans are complete and figures will be opened on August 2nd for the following work: For grading and partly macadamizing 14,825 miles of highway, located in Fifth Road District of San Mateo County, beginning at a point in the center of the present county road from Pescadero to the Santa Cruz County line. The work has been figured before, bids being opened on July 12th. Plans and specifications can be secured from the office of the County Surveyor.

**ROAD GRADING**—\$9,050. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. Bids have been opened for the grading of the Monterey-Castroville road, a distance of approximately 11 miles in length, extending from the Huerta del Rey lagoon at Seaside to the Neponset bridge. The Engineer's estimate is \$9,050, and the lowest bid was that of L. G. Hare, Salinas, at \$6,725. The next low bid was Ruthven & Serano, Monterey, at \$9,352. Bids were taken under advisement.

**STREET IMPROVEMENTS** — Cost not stated. Mayfield, Santa Clara Co., Cal. Engineer, City Engineer, Mayfield. Owners, City of Mayfield. Plans and specifications for the paving of all principal streets of Evergreen Park and College Terrace have been ordered. The streets to be improved are Palo Alto and Amherst avenues in College Terrace and all streets running at right angles to the state highway in Evergreen Park. The work will probably be done under the Vrooman act or the Act of 1911. The City Engineer has been instructed to plan for an 18-foot roadway in the middle of each street of the same quality as the state highway, the rest of the street to be graded to the curb line.

**STREET PAVING**—Cost not stated. Hollister, San Benito Co., Cal. Engineer, City Engineer, Hollister. Owners, Town of Hollister. The Ransome-Crummey Co., First National Bank Bldg., Oakland, will pave Monterey street from Fifth to B streets under private contract. The plans and specifications for the work will be prepared by the City Engineer and will call for a 4-inch concrete base with one-half inch covering of dursaphite after the sub-base has been properly graded and tamped. The cost of the concrete base is set at 30 cents per lineal foot and 1 1/2 cents per square foot for the dursaphite.

**STREET IMPROVEMENTS** — Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. At the last meeting of the City Council the City Engineer was instructed to prepare plans and specifications for the improvement of the remainder of West San Carlos street, Grant street, Orchard street from Grant southward, Taylor street from First to Thirteenth street, South Tenth street from Reed to Keys, Autumn from Julian to Santa Clara and Julian from the Guadalupe bridge to the westerly city limits.

**FURNISHING CEMENT**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids were received from the Standard Portland Cement Co., Santa Cruz Portland Cement Co., Henry Cowell Lime and Cement Co., and Pacific Portland Cement Co., Consolidated, by the Supervisors at their last meeting for furnishing the county with 50,000 barrels of cement and were rejected. The District Attorney has been directed to furnish the Board with an opinion as to the right of their purchasing the cement in the open market without a further call for bids.

**HIGHWAY CONSTRUCTION**—Costs as follow. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The low bids presented at the last meeting of the Board of Supervisors for highway construction in Santa Clara County were as follows: District No. 2, Ransome-Crummey Co., \$31,854.05; Ford Road, same district, J. McKeynolds, 249 North 15th street, San Jose, \$7,991; second low, John W. McDonald, San Jose, \$14,887; Union avenue and Foxworthy road, J. F. Adams, 621 Home street, San Jose, \$10,300; second low Howard & Ellison Paving Co., \$13,500. No contracts have been awarded.

#### Contracts Awarded.

**RESIDENCE** — 2 story and base, frame, \$5,000. Burlingame, San Mateo Co., Cal. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, A. L. Elford. Contractor, D. Charles Scanlan, Burlingame. Contract price, \$5,000.

#### ROAD EXPENDITURES IN SAN MATEO COUNTY.

REDWOOD CITY, San Mateo Co., Cal.—Operating expenses in the five road districts of San Mateo county amounted to \$132,008.33 during the year 1914, according to an analysis of expenditures made by Accountant E. J. White in his report to the Board of Supervisors.

The operating expense was heaviest in Supervisor John MacBain's district—the Third—and was lightest in the Fifth district—that of the late Supervisor D. E. Blackburn. Operating expenses in the five districts were as follows:

First district (Supervisor Casey) .....\$ 41,262.87

Second district (Supervisor Brown) ..... 27,929.26  
 Third district (Supervisor MacBain) ..... 46,605.23  
 Fourth district (Supervisor Francis) ..... 10,278.67  
 Fifth district (late Supervisor Blackburn) ..... 5,932.55  
**Total .....\$132,008.58**

### MARIN, CONTRA COSTA AND SONOMA COUNTIES

BATH HOUSE—1 and 2 story and base, hollow tile, \$20,000. White Sulphur Springs, Napa Co., Cal. Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The building will contain the mud baths, reception room, attendants' quarters and lounging room. Interior will be finished in pine, white enamel and metal. There will be a large amount of special plumbing and steam heating equipment. Exterior will be faced with cement plaster. Plans are complete and figures will be called for at once.

BRIDGE—Reinforced concrete. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Bids are now being taken by the County Supervisors for the construction of a bridge across Pacheco Slough, also for 1100 feet of trestle. The bridge will have concrete piers and will be 6 feet in width.

BRIDGE—Reinforced concrete. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor Ralph Arnold, Martinez Owners, Contra Costa County. County Engineer Ralph Arnold has completed plans and specifications for the construction of a bridge over Peyton Slough and has presented them to the Supervisors, who will consider them at their next meeting when bids will probably be called.

BRIDGES—2, reinforced concrete. Cost not stated. Santa Rosa, Sonoma Co., Cal. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma County. Bids will be opened on August 12th for the construction of a reinforced concrete bridge over Maacama Creek, and for a similar structure on the Petaluma and Santa Rosa road. Plans can be secured from the office of the County Clerk.

BRIDGES — Reinforced concrete. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, City Engineer, Martinez. Owners, City of Martinez. Plans are complete and figures will be opened on August 4th for the construction of two reinforced concrete bridges in the city of Martinez. Included in the work will be the removal of steel girders in the Main street bridge. The bridges can be bid on as a whole or separately. Plans can be secured from the office of the City Clerk.

BRIDGE AND FLUME CONSTRUCTION—Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, City Engineer, Martinez. Owners, City of Martinez. The City Trustees have instructed the City Attorney to immediately prepare for the calling of bids for the construction of a concrete flume across the creek at Main street, and for the construction of a concrete bridge over the creek at Ferry street. The bids will include the amount necessary to straighten out the bend in the creek at Ferry street. The flume on Main street will be 77 feet long, 30

feet wide and 11 feet high. The new Ferry street structure will increase the width of the creek crossing from 16 to 50 feet, thus making it as wide as the street. Bids on the work close August 3rd.

MAUSOLEUM—1 story, reinforced concrete and stone, \$10,000. San Rafael, Marin Co., Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, A. W. Foster. The building has been designed in the classic style and will contain six receptacles. Interior will be finished in stone and ornamental plaster. There will be modern plumbing and electric work. Exterior of the building will be faced with granite. Plans are nearly complete and figures will be called for shortly.

ROAD CONSTRUCTION — Cost not stated. San Rafael, Marin Co., Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. At the last meeting of the County Supervisors bids were ordered called to be received on August 3rd for constructing a piece of road in District One, across the marsh near McNear's Point. Bids are to be received for four different specifications, and the board will decide which is best after the bids are received. One specification calls for the necessary fill with a twelve-inch rock rip-rap; another calls for pile bulkhead; another for bulkhead composed of rock each containing a cubic yard; and one for embankments obtained from any source. Further information may be had from the County Surveyor at San Rafael.

LIGHTING SYSTEM — Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans and specifications have been adopted by the County Supervisors for a lighting district known as Crockett-Crolona and Valona lighting district, and orders that the Clerk of the Board advertise for bids for furnishing and installing lights in accordance with plans.

SEWER SYSTEM—\$12,500. Sausalito, Marin Co., Cal. Engineer, Town Engineer, Sausalito. Owners, Town of Sausalito. Plans and specifications for adequate sewerage in South Sausalito have been approved by the Board of Trustees. The sewage from all that portion of Sausalito in the watershed between the boundary lines of the Sausalito Land and Ferry Co. and the Sausalito Bay Land Co. will be collected in the Main street and the Water street sewers and carried 125 feet out into the bay by a cast iron pipe outlet. Plans are on file at the office of the Town Engineer. Bids will be called for shortly.

SEWER CONSTRUCTION — Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. The City Council has adopted resolutions providing for sewer work in Nursey, Vallejo and Juarez streets. Bids for the work will soon be called for.

STREET WORK—Cost as follow. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. Bids for doing certain street work on First street have been taken under advisement by the Council and a contract will probably be awarded at the next meeting. The following bids were re-

COST, \$1800

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

RESIDENCE—1 story and base, frame, \$1,00. Fresno, Fresno Co., Cal. Architect, none. Owner, Conrad Kinzel, Fresno. The dwelling will be erected at 445 F street, and has been designed for a five-room house with bath and sleeping porch. Interior will be finished in pine and redwood. There will be an open fire place and tile mantel. Exterior will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BRIDGE—Reinforced concrete. Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed and figures are now being taken for the reinforced concrete bridge to be erected over Fish Slough on the Elkhorn grade. Bids will be opened for this work on August 4th. Plans and specifications can be secured from the office of the County Clerk.

BRIDGE—Steel and concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor E. H. Annear, Modesto. Owners, Stanislaus County. Stanislaus County will build a new bridge across the Tuolumne River eight miles east of Waterford on the road to the La Grange country. Plans and specifications for the structure have been adopted by the Board of Supervisors. Bids will soon be taken.

CHURCH—1 story and base, brick, \$10,000. Turlock, Stanislaus Co., Cal. Architect, C. C. Edburg, Turlock. Owners, First Church of Christ, Scientist. The building will have a seating capacity of 600 people. Sunday school rooms and reading rooms are also provided. Interior will be finished in pine with some ornamental plaster. Art glass is also specified. Exterior will be faced with pressed brick veneer. Plans are being prepared.

SCHOOL—1 story, frame. Cost not stated. Maricopa, Kern Co., Cal. Architect, Thomas B. Wiseman, 1323 Chester avenue, Bakersfield. Owners, Maricopa Union High School. The building will be in the nature of an addition to the present school and will contain three class rooms and study hall. Interior will be finished in pine with some maple floors. There will be steam heat. Interior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on July 30th.

THEATRE AND LODGE HALL—2 story and base, reinforced concrete, \$25,000. Turlock, Stanislaus Co., Cal. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name

withheld. The building will cover an area of 56 by 150 feet, and will have three street frontages. The main floor will contain a high class theatre with a seating capacity of 750 people. There will also be a large balcony. Upper floor has been designed for lodge rooms for the local Odd Fellows and will be finished in pine and hardwood. A central heating system will be installed. Considerable ornamental plaster will be used in the theatre. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—2 story and base, frame, \$20,000. Fresno, Fresno Co., Cal. Architect, Henry F. Starbuck, Howell Bldg., Fresno. Owner, Jacob Richter. The building will be erected at the corner of Merced and P streets, and has been designed to contain a total of twenty suites of two and three rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and hot water supply. Bath rooms will be finished in tile. Wall beds are specified. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

SCHOOL COMPLETION—Frame. Cost not stated. Sunnyside School District, Tulare Co., Cal. Architect F. W. Griffin, First National Bank Bldg., Porterville. Owners, Sunnyside School District. Plans and specifications have been completed for the alterations and work necessary to complete the Sunnyside School. Bids are now being taken and will be opened on August 2. Plans can be secured from the architect.

WATER TANK AND TOWER—Steel. Cost not stated. Bakersfield, Kern Co., Cal. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. Bids are now being received at the office of the City Manager for a steel tower and 5,000 gallon tank to be erected at Beale Park for the water system there.

STREET PAVING—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. Preliminary steps have been taken by the City Council to provide for the paving of L street between 7th and 9th. Bids will be called for on this work when the plans and specifications have been approved.

SEWER CONSTRUCTION—Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Plans have been completed and figures are now being taken for the construction of a 16-inch sewer in El Dorado street. Brick man-holes and Y branches are included in the work. Plans can be secured from the office of the City Clerk. Bids will be opened on August 2nd.

STREET PAVING, CONCRETE CURBS AND GUTTERS—Cost not stated. Visalia, Tulare Co., Cal. Engineer, City Engineer, Visalia. Owners, City of Visalia. Bids will be received by the Board of Trustees up to 5 p. m. of August 4, 1915, for paving and constructing concrete curbs and gutters in East Main St. from Encina avenue to Conyer street, in accordance with plans and specifications on file in the office of the City Engineer. Certified check or bond for 10 per cent

ceived: F. E. Burge, \$1,915; Geo. Erington, \$2,191.05.

TRESTLE—Reinforced concrete and pile. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans are complete and figures are now being taken for a combination reinforced concrete and timber trestle. Bids will be opened on August 16th. Plans can be secured from the County Surveyor's office. The Supervisors have accepted two sets of plans for this work. One a combination reinforced concrete pile trestle and the other for pile trestling without concrete. The Board of Supervisors desires bids on each set of specifications.

## Contracts Awarded.

CHURCH—1 story and base, frame and brick, \$14,950. Dixon, Solano Co., Cal. Architect, John J. Foley, 46 Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church. Contractor, Charles P. Rose, Dixon. Contract price, \$14,950.

Plans and specifications for two of eight bridges Butte County will build on the state highway between Chico and Nelson have been adopted by the Supervisors. The longest, 300 feet, will cross Butte Creek. The eight will cost \$40,000.

**BRIDGES**—3, timber and concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. At the last meeting of the County Supervisors the Clerk was instructed to advertise for bids to be received on August 2nd at 10 a. m. for construction of concrete and steel bridges across Sand Slough, Samson Slough and the Paynes Creek Slough in Road District No. 3. Further information together with plans and specifications may be had from the County Surveyor.

**BRIDGE REPAIRS**—Concrete. Cost not stated. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Plans and specifications prepared by the County Surveyor for the repairs on the Pudding Creek bridge have been adopted and bids for the work have been ordered called. Further information together with the plans and specifications may be had from the County Surveyor.

**BRIDGE**—Reinforced concrete. Cost not stated. Oroville, Butte Co., Cal.

Engineer, County Surveyor, Oroville. Owners, Butte County. Plans have been completed and figures are now being taken for the construction of a reinforced concrete bridge over Edgar Slough on the line of the state highway between Nelson and Chico. Plans and specifications can be secured from the office of the County Surveyor. Bids will be opened on August 7th.

**BRIDGES**—Steel and timber, \$20,000. Redding, Shasta Co., Cal. Engineer, County Surveyor, Redding. Owners, Shasta County. Plans for a new bridge across the Sacramento River at Kennett have been adopted by the Supervisors and bids will be taken until August 21st. The bridge is to be a combination steel and wooden structure and is to span the river just above the depot. It will be three spans of 200 feet each, with approaches 80 feet long at each end.

**BRIDGE**—Steel and concrete, \$12,000. Placerville, El Dorado Co., Cal. Engineers, A. V. Saph and O. B. Rushmer, Rialto Bldg., S. F. Owners, El Dorado County. Plans and specifications have been completed for the construction of a steel bridge with reinforced concrete approaches to be erected over the South Fork of the American River at Coloma. The main span will be 162 feet long. Bids are now being taken and will be opened by the Board of Supervisors on August 16th. Plans and specifications can be secured from the office of the County Clerk.

**SCHOOL**—1 story, frame. Cost not stated. Oat School District, Tehama Co., Cal. Architect, none. Owner, Oat School District. Plans for a one-story frame building containing two rooms have been completed and are now out for figures. Bids will be opened on August 2nd at 2 p. m. Plans and specifications can be secured from A. N. Norcott, Trustee, at Red Bluff.

**SEWER CONSTRUCTION**—\$43,000. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Four bids were received by the City Commission for the construction of Unit 4 of the reinforced concrete sewer in East Sacramento. It appears that the James Kennedy Co. of Los Angeles is the low bidder. Other bidders were A. Teichert, Tibbits Pacific Co. and Contra Costa Construction Co. The work will cost about \$43,000. The sewer will be laid on Montclair avenue to J. north on Montclair to the alley between G and H and thence east to the Wright & Kimbrough Tract No. 10, and up Burns Slough to Ashley Place.

#### Contracts Awarded

**STREET PAVING**—\$10,000. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Clark-Henry Construction Co., Ochsner Bldg., Sacramento. Contract price, \$10,000.

**WATER EXTENSION AND SEWER WORK**—Cost as follows. Corning, Tehama Co., Cal. Engineer, City Engineer, Corning. Owners, City of Corning. Contractor, P. A. Wheeler, Corning. water extension, \$4,755; A. C. Hamlin, San Jose, sewer extensions, \$15,381.

**SEWER CONSTRUCTION**—Unit No. 4, \$37,250.40. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, James Kennedy, 901 Washington Bldg., L. A. Contract price, \$37,250.40.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, August 4, 1915

Fifteenth Year, No 29

The Los Angeles County Board of Flood Control has filed its report as the County Supervisors recommending the expenditure of \$16,508,900 on a comprehensive work to control the floods of storm waters and at the same time conserve these waters for irrigation and reforestation purposes.

A total of \$4,000,000 is proposed by the engineers to be spent in building check dams in all the canyons in the county and the conservation work incidental to this.

The remaining \$12,508,900 is recommended to be spent on the building of channels of rivers, arroyos and other water courses leading to the sea outlets, together with levees where they are needed.

The problem of Flood Control is not a new one in this country, but it has never been satisfactorily solved, and it is not likely that the county will embark on any elaborate control scheme until the check dams now being experimented with have proven beyond a doubt that they will do the work for which they were designed and built. If the check dam system proves a success in Los Angeles County there is no reason why it cannot be applied to other places that are now being heavily eroded every time a rainstorm hits them.

The report contemplates control of all storm waters in the Los Angeles and San Gabriel Rivers, Rio Hondo, Arroyo Seco, the San Antonio flood district and all other waterways.

The Board of Flood Control consists of Engineers Frank H. Olmsted, H. Hawgood, J. B. Lippincott, J. W. Reagan and Captain Leeds.

The County of Los Angeles is getting ready to spend some three millions on new highways to develop sections of the county that were left unprovided for in the first bond issue of three and a half millions that built the first 305 miles of good roads in the county some five years ago. There is no doubt that the bond issue will carry as there is not a knocker in Southern California when the question is up for more good roads.

As an example, the deep interest that is taken in road building was conclusively shown several days ago when a straw vote was taken at a meeting of the Board of Supervisors, attended by more than a hundred representative citizens, as to the advisability of voting \$3,000,000 in bonds for additional road building in the county. For

every man and woman who voted said "aye," when the question was put.

The proposed highways are as follows:

Through the San Gabriel Canyon, from a point near Azusa to the Antelope Valley, near Big Rock Creek, thence west to Palmdale, approximately 63 miles, at an estimated cost of \$950,000, or as an alternate through the Arroyo Seco Canyon from Pasadena to Palmdale, approximately 44 miles; estimated cost \$850,000.

Through Mint Canyon, from Saugus to the Antelope Valley, connecting with the road under construction from Palmdale to Lancaster, 30 miles; estimated cost, \$200,000.

The Harbor-Truck boulevard, extending from Los Angeles city through Compton to the harbor front, 15 miles; estimated cost, \$400,000.

Pico boulevard from Los Angeles to the sea, (to complete) 4 miles; estimated cost, \$45,000.

The coast road from Venice to Manhattan and Redondo Beach, 2 miles; approximate cost, \$50,000.

A road from the valley near Pomona, through La Brea Canyon, connecting with the Orange County highway system, 6 miles; estimated cost, \$65,000.

Millions of dollars' worth of natural gas has been going to waste each year near the city limits of Los Angeles. Some of this gas—at least several million cubic feet a day—has been going to waste within ten miles of the central part of the business district, and right at the door of the residence district. The balance, in the Fullerton district, has been going to waste within twenty miles of the city.

But investigations carried on in what is known as the Rancho la Brea oil fields, owned by G. Allan Hancock, and in the Fullerton fields, has resulted in steps being taken to conserve the gas, as well as to further develop the gas fields. And the direct result has been to give to Los Angeles homes and manufacturing plants served by the Economic Gas Company the first pure natural gas sold in the city.

With more than 900 heat units, as compared with 500 to 700 heat units obtainable from the artificial or mixed gas, the patrons of the Economic Company are enjoying cheaper fuel than ever before, and the almost unlimited supply obtainable assures a continuation of this desirable service.

# Lessons from the Exposition.

## INTERESTING SANGAMO EXHIBIT.

### Story of the Sangamo Exhibit.

The Sangamo Electric Company of Springfield, Illinois, has one of the most interesting and instructive exhibits to be found in the Palace of Machinery. This exhibit is located in what is known as "Block 22" situated at the corner of 2nd street and Avenue C2. The factory of this company is devoted exclusively to the manufacture of electric meters and their accessories and in its exhibit will be found a most comprehensive line of both integrating and graphic meters. In order to better show the operation of its meters the company has installed a great deal of equipment with which its meters are used.

One of the first things the visitor sees on approaching the booth is a large glass dial hanging in the center arch. This dial is electrically operated from a meter located on the east wall of the Palace of Machinery. This meter records the entire alternating current load of the building; the reading of this meter is duplicated on the dial by means of a contact-magnifying mechanism in the meter, which operates electro-magnets in the dial. As each ten kilowatt-hours is recorded on the meter a contact is made closing the local circuit to the dial, which causes the large hand to move one point; the visitor can therefore determine how long it takes for ten kilowatt-hours to be consumed in the building by noting the time between contacts. In other places in the exhibit there are on display a number of smaller dials of this type such as is used on electric vehicles and in other places where it is desirable to duplicate the reading of a meter at any distance from the meter.

Floor plan of Sangamo Exhibit

To the left of the entrance is the front end of a Hudson Motor Car (14), containing the gasoline engine and the Delco self-starting and lighting equipment. On this equipment this company shows the operation of one of its types of amperehour meters in connection with the storage battery. The type of meter used on this car was recently developed to meet the demand for a small, inexpensive instrument which would show at all times the exact condition of the battery with respect to charge or discharge, and is known as the type "MS." With this meter it is

possible to tell at a glance whether or not there is sufficient current left in the batteries to start the engine or to burn the lights without injury to the battery. The meter also contains a current indicator which shows at all times whether the battery is being charged or discharged and the approximate rate. This feature is valuable in determining whether the car is being driven at a fast enough speed to charge the battery. This meter also automatically gives the necessary overcharge to the battery, so that with this instrument the most inexperienced person can keep the batteries in good condition. This type of meter can be used with any self-starting and lighting system on any car and is very easily installed.

To the right of the main entrance a small isolated lighting plant (9) is shown in actual operation. This plant consists chiefly of a gas engine, a generator, and a set of storage batteries. This plant supplies a part of the current that is used in lighting the booth. The current can be taken from the batteries when the engine is not running or from the generator and batteries when the engine is going. An amperehour meter is used on the switchboard of this plant to show the exact amount of charge in the batteries at any time. In this plant, the meter is so arranged that when the batteries need recharging a contact is made which lights a lamp or rings a bell to notify the owner to start the engine; when the batteries become fully charged it will also stop the engine, thereby preventing the batteries from becoming overcharged. These plants are used on farms and ranches and other places where electric current cannot be obtained in the usual way from some electric light company.

In the rear center of the booth is located a complete axle generator equipment (2) manufactured by the United States Light and Heating Co. These equipments are used on steam railway cars to furnish the power for the electric lights and other electrical devices used on the cars. In this installation the generator is driven by an electric motor, but in actual service it is belted to the axle of the car. An electric tachometer mounted on the panel shows the speed of the set corresponding to the speed in miles per hour of the railway train. In this equipment, the amperehour meter not only shows the condition of the batteries but also controls the charging and discharging of the batteries by operating devices on the standard control panel.

Adjacent to this is the vestibule of a street car (1) showing the installation and operation of a street railway amperehour meter. This meter records the amount of current used to run the car and is used to develop efficiency among the motormen, which results in a marked decrease in the power bill. These meters, at the same time, bring to light defective equipment such as tight brake shoes, inefficient gear reductions, and inefficient motors. Watt-hour meters are also designed for the same class work. On systems where these meters have been installed, savings as high as 20 per cent have been effected in the power bills alone.

In the same section of the booth will be found a marble switchboard (3) on which are mounted samples of various types of amperehour meters used in electric vehicles, electric starting systems, train lighting systems and garages. These meters are all connected in circuit and so arranged that the visitor can easily operate them. There are also mounted on this board a number of circuit breakers such as used in connection with battery charging. These circuit breakers are arranged to open the charging circuit when the batteries are fully charged, as indicated by the position of the large hand of the meter.

Another marble switchboard (6) supports the meters, registering the different loads in the booth. There are both amperehour and watt-hour meters in the service or house types and also switchboard type. To the right of this switchboard are shown two testing racks for testing (7) alternating and (8) direct current meters and instruments. Of these racks tests of various types of meters are conducted daily.

In several places in the booth are located showcases (11) containing groups of transformers, shunts, and portable testing meters. There are also showcases (13) showing the parts of typical meters and their method of assembly and the processes of manufacturing the parts. Thus the visitor may see the steps in the making of the meter from the raw stock to the finished meter, then the method of testing and calibrating the meter, and finally the operation of the meter in the actual service for which it was designed.

In addition to this interesting and educational exhibit, this company has provided a large rest room where visitors may rest in comfort and read the New York, Chicago and San Francisco papers or write letters to their friends back home on the stationery provided for this purpose, consisting of souvenir postcards of the booth and handsomely embossed note paper. A cordial invitation to visit this booth is extended to all Exposition visitors.

#### Key to Diagram Group of Panels, Space 6, Panama-Pacific Exposition.

1. Service type amperhour meter with variable resistor to give overcharge automatically, and totalizing dials, as built for Consolidated Railway, Electric Lighting & Equipment Company, for automatic control of battery in railway train lighting.

2. Garage type wattour meter, back connected, large dial showing charge put in each car, small dials keeping total record.

3. Service type amperehour meter with differential shunt to give overcharge automatically and double-acting contact train operating distant dials, 20 and 21.

4. Auto type amperehour meter with variable resistor, bottom cable connections as built for Grinnell Electric Car Company, Detroit.

5. Service type amperehour meter with simple shunt and large dial not arranged to give overcharge automatically.

6. Service type amperehour meter with totaling circles for discharge.

7. Panel with auto type amperehour meter with variable resistor and with Sangamo shunt trip circuit breaker as built especially for the Pennsylvania Railroad Company for use on electric lighted cars with straight storage battery or axle generator equipment.

Diagram Group Panels—Space 6

8. Auto type amperehour meter with variable resistor, zero contact and reset for main hand, as used by the U. S. Light & Heating Company, Niagara Falls, N. Y., for control of battery charge on electric lighted railway cars.

9. Auto type amperehour meter same as No. 12, except made for the Pullman Company.

10. Extension back amperehour meter with standard dial, variable resistor to give overcharge.

11. Same as no. 10, except with special dial and special locking bezel ring as built for General Motors Truck Co.

12. Service type amperehour meter with variable resistor and with special dial and terminals as built for the B. & O. R. R. Co. for use on electric lighted cars.

13. Service type amperehour meter with duplex recording train and dial; recording on one row of circles, total charge, and on the other, total discharge of battery.

14. Weston ammeter, reversing switch and controlling rheostat for operating meters on panel at left.

15. Ditto. For operating meters on center panel.

16. Ditto. For operating meters on panel at right.

17. Sangamo Shunt Trip Circuit Breaker, back con-

needed, operated from zero on full charge contacts in several different meters on these panels.

18. Typ MS amperehour meter with full circular dial, zero contact and side supporting lugs as used on electric vehicles with isolated-lighting plant batteries, etc.

19. Type MS amperehour meter similar to No. 18 but with current indicator showing rate of charge or discharge of battery at any time, and without supporting lugs. Designed for use on gas cars with self-starting batteries, with batteries of isolated lighting plants, and other services.

20. Flush type distant dial mechanism recording electrically from meter No. 3 on center panel.

21. Same as No. 20, except projecting type mechanism.

Diagram Group Panels—Space 8

#### Key to Diagram Group of Panels, Space 8, Panama-Pacific Exposition.

1. Single-phase, alternating current Type H switchboard wattour meter as used on power plant and other switchboards.

2. 2-wire direct current Type D-5 switchboard wattour meter for use on switchboards of central station or isolated power plants.

3. 3-wire direct current D-5 switchboard type wattour meter adapted to measure total load on any 3-wire current system.

4. 2-wire direct current D-5 service type wattour meter as used in general service. This meter arranged with special contact device in the train to operate distant dials 11 and 13.

5. 2-wire direct current D-5 service type wattour meter with special test dial and sealing cup for Government seal, as built for Canadian use.

6. Single-phase Type H service type wattour meter as used for house lighting service and all general conditions of metering single-phase alternating currents.

7. Single-phase alternating current meter, same as No. 6, except with special Canadian test dial and Government sealing cup.

8. Amperehour meter, switchboard type, with large circular dial, zero contact and reset, as used with large central station batteries.

9. Amperehour meter, switchboard type, with duplex dial for recording total charge and total discharge of batteries, as used with large central station batteries.

10. Polyphase switchboard Type H wattour meter for 3-wire and 4-wire 2-phase or 3-phase circuits, as used on power plant and other switchboards.

11 and 13. Single-acting distant dials recording kilowatt-hours, arranged to be operated at any distance from meter; these dials operating from contact in meter No. 4, above.

12. 3-wire service type D-5 wattour meter for general service, adapted to measure all conditions of load on 3-wire direct current systems.

14. Polyphase Type H service wattour meter for 2-phase and 3-phase circuits adapted to measure all conditions of polyphase alternating current loads, as used in mills, factories, stores, and all places operating with poly-phase currents.

15. 3-wire shunt for operating 3-wire Sangamo direct current meter as No. 12 for currents 100 to 200 amperes, inclusive.

16. Single-phase Type H large capacity service wattour meter.

17. Same as No. 16, except as built for Canadian use, with special dial and sealing cup.

### Story of the Sangamo Electric Company.

The Sangamo Electric Company may justly be called one of the pioneers in the electric meter industry of the United States; having been organized in January, 1899, after those interested in the company had spent several years in the development of an induction meter.

At that time the induction watt-hour meter for alternating current was practically unknown in this country, although lamp-hour or ampere-hour meters had been used for several years. The best known meters at that time were the Edison chemical type meters for direct currents only, and the Thompson recording watt meter which had been successfully used for direct currents, and to a considerable extent on alternating currents, for over ten years.

The Sangamo Company was successful from the start with the Gutmann induction meter, first brought out in the spring of 1899, and at the same time, the Westinghouse, Stanley and Diamond meter companies brought out induction meters, followed shortly by an induction meter of the General Electric Company. Through a period of several years, the Sangamo Company continued to develop and improve induction meters, and sold large quantities of Gutmann disc type meters until the fall of 1903 when, owing to patent litigation under the well known Tesla patents, the manufacture of induction meters was discontinued, and for a number of years thereafter, until the expiration of these patents in 1910, such meters were made only by two companies owning or controlling these patents.

Before this time the Sangamo Company had started on the development of a mercury motor type meter for direct currents, believing that this principle offered many advantages over the small shunt motor or so called commutator type of meter for direct current. After stopping the manufacture of induction meters, the first Sangamo mercury type direct current meter was made in the fall of 1904 and then for a period of several years the development and improvement of mercury meters, both for direct and alternating currents, was continued under considerable difficulties and with many discouragements, but as a result, a highly improved and perfected type of mercury meter was made possible, and today, the Sangamo Electric Company is the largest manufacturer in the world of mercury motor meters for all purposes, including service

type watt-hour meters for 2-wire and 3-wire circuits, switchboard watt-hour meters of both types, ampere-hour meters for use with storage batteries, and in all other services where measurement in ampere-hours instead of watt-hours is necessary or desirable.

The development of the 3-wire type of direct current meter, something over two years ago, was really the most remarkable achievement in this line, as it had been considered for many years physically impossible to build a 3-wire mercury meter, in which it is necessary to have two elements immersed in mercury, but entirely separated, and with the shaft of the upper element actually passing out through a jewel bearing under mercury and without the mercury following through.

In the fall of 1910, the Sangamo Electric Company, as a result of its original experience in the development and manufacture of the Gutmann induction meter, and with the added and much more difficult experience of many years in the mercury meter art, designed and brought out the Type H induction meter, which, since its introduction in the spring of 1911, has had an extensive sale. This meter, of which over 300,000 have now been made, is offered in all combinations, single-phase and polyphase, for circuits of any voltage, frequency and magnitude, and in service and switchboard forms.

Aside from standard types of alternating and direct current meters which we have mentioned, the Sangamo Company has, during the past few years, developed many special devices, more or less related to meters and their use, such as small circuit breakers for control of battery charge, graphic recording devices of various kinds, including graphic ampere-hour meters for analyzing operation of batteries, distant recording and transmitting devices for use with gauges and instruments of various types, distant dials, permitting the record of any meter to be made at a long distance from the point where the current is measured, etc. It is interesting to note, in this connection, that the Sangamo Company made, two years ago, the largest meter in the world, rated at 60,000 amperes, 650 volts, which was built for the Hydraulic Power Company at Niagara Falls. This meter has been in successful operation for nearly two years, measuring loads day and night from 40,000 to 50,000 kilowatts.

At the present time the Sangamo Electric Company is developing many new and interesting devices, more or less related to meters and their applications.

### THE SOLDIER'S RIFLE PASSES.

Nothing seems to stay put in this changeful world. The theories of yesterday are discarded today; the inventions of yesterday, today are punk and tomorrow will be forgotten. Newton's conception of gravity no longer stands as first enunciated; the theory of the ultimate constituents of matter is involved in the fog of uncertainty as to what matter really is, or whether it really is. And there you are.

Since the days of the crossbow and the stinkpot—from the time when gunpowder was first made—the soldier's rifle by one name and another, has been identified with the soldier, one and inseparable. War without a soldier, like a soldier without a rifle, has been considered unthinkable.

But now, behold, the rifle is passing. It is wholly unlikely that any other war than this will be fought with the rifle in the soldier's hands. As the bicycle became machined into the motor vehicle, the rifle has become machined into a device far deadlier than a company's rifles combined, equally portable, even lighter in weight than many five-shot bayoneted guns now in the Allies' trenches. One modern machine gun, which a single soldier may now carry upon his back with as little or less burden than the soldiers of the English squares bore at Waterloo, is capable of far deadlier service than the whole force of a square 100 years ago.

Formerly the soldiers "fired upon the enemy." Now they "squirt death," if they are armed with the modern German hell-maker. Posted in concealed positions, any one of these new contrivances is more effective than a whole company of infantry, for the delivery of bullets. They literally sweep the field before them, "spray" the enemy with a flood of deadly projectiles, "squirt death."

So far has this modern device been perfected that it can be made even more cheaply than the best rifles now in European use. Not only this, but it is so made that interchangeable parts may be supplied upon the field. It is simpler, lighter and vastly more powerful than any gun that ever "kicked" a shoulder, and will "carry" farther by 100 per cent.

Many pet theories of warfare have fighting man becomes a galling gun for efficiency; a whole company for volume of fire.

And as the soldier has become a company, the whole face of a square, he has become, relatively, a smaller target. With smokeless powder he has become well-nigh invisible, even when his immediate vicinity is known. With his long range machine gun he becomes many times a company—he can fire, with equal accuracy, twice as far.

—Oakland Enquirer.

Walt Mason, the Emporia ex-stad-patter, lately converted to the single tax, wrings this protest from his typewriter: "The whole system of taxation is wrong. Joshua Spoodruff had a vacant lot that raised a crop of cockleburrs and sunflowers every year. It got to be a sort of general dumping ground for the neighborhood. People used to write letters to the newspapers saying the Spoodruff's lot was a menace to the public health as well as a blot on the escutcheon of our beautiful city. Spoodruff paid a few dollars a year taxes and laughed merrily when people said his lot was a public nuisance. Finally he had a change of heart. He cleaned all the junk off his lot and put up a handsome residence on it. He graded the place in fine shape and set out flower beds and fussed around until he had the finest property in his end of town. The assessor got wise to what he was doing and determined to punish him severely. When Spoodruff found out how much taxes he would have to pay he swooned away and he's never smiled since. Now, if there was any sense in taxation the man who improves his property would be rewarded and the one who lets it run to cockleburrs would be punished. It's such injustice as this, professor, that makes a man wonder whether George Washington crossed the Delaware in vain."

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$25,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, Theo. E. Rulfs. The building will be erected on the east side of Hyde street north of Sutter, having a frontage of 25 feet and a depth of 36 feet. There will be eight apartments of three and four rooms. Interiors will be finished in pine and elm with hardwoods floors in the living rooms and reception halls. Plans provide for steam heat, elevator service and a hot water system. All suites will have wall beds and private baths. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance lobby. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and sub-figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architect, William H. Armitage, 328 Montgomery street, S. F. Owner, Mrs. E. McGlew. The building will be erected at the corner of Folsom and Norfolk streets and has been designed for a store on the first floor and four modern apartments of four rooms each on the two upper floors. Interiors will be finished in pine. Patent store fronts will be installed. There will be wall beds. Exterior of the building will be covered with cement plaster and shiplap. Plans are complete and a contract will be awarded shortly.

**SAN FRANCISCO**—Apartment house alteration, 2 story, frame, \$4,000. Architects, O. R. Thayer and Charles C. Frye, 20 Montgomery street, S. F. Owners, H. M. and Francis C. Berthiaume. The building to be altered is located at the northwest corner of Geary and Cook streets. The work will consist of rearranging the interior for four-room apartments. There will be new plastering, plumbing, painting, interior finish, wall beds and hardwood floors. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. M. Cook. Owner represented by Olin Offield, Phelan Bldg., S. F. The building will be erected at the corner of Durant Way and Telegraph avenue, and will cover an area of 80 by 120 feet. There will be a total of 31 apartments of two and three rooms. Interior will be finished in pine and hardwood veneer. Some hardwood floors will be used. There will be steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will be finished in tile. Marble and tile wainscot will be used

in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by Mr. Offield, Phelan Bldg.

**SEATTLE, WASH.**—Apartment house 3 story and base, brick, \$40,000. Architect, C. W. Saunders, Alaska Bldg., Seattle. Owner, Alice Cosgrove. The building will be erected at 1509 Broadway and has been designed to contain a total of 20 apartments of two, three and four rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat, a hot water system and vacuum cleaning. Bath rooms will be finished in tile. All apartments will have wall beds and private bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$35,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Smith & Stewart. The building will be erected on the south side of O'Farrell street between Polk and Van Ness, having a frontage of 27½ feet and a depth of 120 feet. There will be a total of 27 suites of two rooms each besides a large and attractive lobby, office and amusement room. Interior will be finished in pine, white enamel and mahogany. All suites will have private baths and wall beds. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Plans provide for steam heat, an automatic elevator, oil burning furnace, hot water supply and vacuum cleaning. Exterior has been designed in the Pueblo style and will be faced with cement plaster. Plans are being prepared.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$35,000. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner's name not given. The building will be erected at the corner of Harrison and Grand avenue, and has been designed to contain a total of 25 suites of two, three and four rooms, all with private baths and wall beds. Interior will be finished in pine with some elm panels and hardwood floors. Plans provide for steam heat, oil burning system and hot water system. Bath rooms will have tile wainscot. Marble and tile will be used in the entrance lobby. Exterior of the building will be covered with veneer pressed brick and cement plaster. Plans are being prepared.

### Contracts Awarded.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$5,000. Architect, J. Henry Boehrer, Delger Bldg., Oakland. Owner, Dora Krohnner. Contractors, Boehrer & Loggatt, Delger Bldg., Oakland. Contract price, \$5,000.

**BANKS**

**RIO VISTA, SOLANO CO., CAL.**—Bank, 2 story and base, reinforced concrete. Cost not stated. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Bank of Rio Vista. The building will be designed in the classic style and will be a fireproof structure. The entire main floor and basement will be occupied by the bank. Upper floors will be used for offices. Interior will be finished in pine, hardwood and ornamental plaster. Fireproof vaults will be specified. There will be a central heating system with oil burning equipment. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**Contracts Awarded.**

**SACRAMENTO, CAL.**—Bank and offices, 7 story and base. Class A construction, \$200,000. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Capitol National Bank. Contractors, McGillivray Construction Co., Nicholas Bldg., Sacramento. Contract price, \$200,000.

**RIO VISTA, SOLANO CO., CAL.**—Bank, 1 story and base, brick and concrete, \$20,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners First National Bank of Rio Vista. Contractors, Harvey A. Klyce, Sheldon Bldg., S. F. Contract price, \$20,000.

**BONDS.**

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—August 30th is the date set by the County Board of Supervisors for the voting of bonds of \$1,500,000 to finance the construction of several bridges and roads throughout Santa Barbara County. The amounts will be expended as follows: Bridges, \$350,000; Cuyama road, \$95,000; other roads, \$892,000; hospital, \$100,000; detention home, \$15,000, making a total of \$1,453,000.

Information as to plans for the above mentioned work may be had from the County Surveyor at Santa Barbara.

**EUREKA, HUMBOLDT CO., CAL.**—The County Supervisors have sold the \$150,000 state highway bonds to Byrne & McDonnell. The proceeds of this sale will be used in the completion of the state highway in Humboldt County.

**SACRAMENTO, CAL.**—Commissioner of Education E. J. Carragher is negotiating for the purchase of a block of land between Thirteenth and Fourteenth, E and F streets, for a new school building.

**SAUSALITO, MARIN CO., CAL.**—A number of meetings have been scheduled in various districts in Marin County to discuss the proposition of issuing bonds to secure an ample supply of water for the residents in the Marin Municipal Water District.

**REDDING, SHASTA CO., CAL.**—The Shope National Concrete Company of Portland is making preparations to establish a plant in this city, according to a letter received by R. J. Anderson, secretary of the Shasta County Promotion and Development Association. If the scheme is carried through a new plant will be erected.

**YUBA CITY, SUTTER CO., CAL.**—The West Sacramento Club of Sacramento plans to construct a handsome club house in Yuba City, the site for

the proposed structure having already been secured. As far as can be learned no architect has been selected to design the building.

**AUBURN, PLACER CO., CAL.**—The \$250,000 worth of state highway bonds which Placer County purchased last week from the Highway Commission have been sold to Byrne & McDonnell, the highest bidders. The bonds were taken on the agreement that highway work be commenced on the Auburn-Roseville lateral immediately.

**SAN DIEGO, SAN DIEGO CO., CAL.**—After having bought \$200,000 worth of highway bonds last March with the understanding that the money was to be expended in improving the highway through San Diego County chosen by the State Commission, the Supervisors have been asked by that body to invest \$50,000 more in the securities. The request was accompanied by another promise that the money would be used in this county.

Supervisor Smith has been authorized to demand of the Commission that it comply without further delay with its promise to expend the \$200,000 on the improvement of San Diego County roads.

**JACINTO, GLENN CO., CAL.**—The residence of Frank B. Glenn, recently destroyed by fire, will be rebuilt immediately according to statements made by Glenn. The structure carried an insurance of \$20,000. Glenn plans to expend \$40,000 in the new structure.

**RODEO SANITARY DISTRICT, CONTRA COSTA CO., CAL.**—Sealed bids will be received by the Rodeo Sanitary District of Contra Costa County until August 11th for the purchase of bonds of \$17,000. The proceeds of the sale will be used in the construction of a sewer system for the Rodeo District. Further information may be had from J. D. Smith, secretary of the Sanitary Board of Rodeo Sanitary District.

**BAKERSFIELD, KERN CO., CAL.**—The City Council has voted to call a special election for the voting of bonds of \$200,000 for the purchase and improvement of city parks. Of this amount \$10,000 will be used as prizes in a competition to secure proper plans for the development of the properties.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Theo. Crossley of Riverside has purchased the lot on Main and Eleventh streets and will erect a \$25,000 fireproof garage building.

**LOS ANGELES, CAL.**—The Chamber of Commerce and Auto Club of Southern California have opposed the proposition of a \$3,000,000 bond issue for more good roads.

**EL CENTRO, IMPERIAL CO., CAL.**—The Imperial Irrigation District bonds, aggregating \$3,500,000, which were voted by the people of Imperial Valley for the purchase of the irrigation system of the valley, have been properly printed and signed and have been forwarded to Los Angeles.

**SACRAMENTO, CAL.**—The Road Selection Committee of the Sacramento Good Roads Association at a recent meeting prepared a tentative plan for road construction, which calls for the construction of 160 miles of concrete highway. It is the intention of the association to keep the bond issue as near as possible to \$1,500,000.

**ANAHEIM, ORANGE CO., CAL.**—The City Council has decided to call a special election to vote bonds of \$50,000 to

provide for the erection of a new city hall building.

**VICTORVILLE, SAN BERNARDINO CO., CAL.**—On account of a technicality, the Board of Trustees of the Victor Valley Union High School District has decided to call a new election to vote bonds for the erection of a new high school building. The previous bond issue was for \$25,000 but it is probable that the amount will be increased.

**WASCO SCHOOL DISTRICT, KERN CO., CAL.**—A \$25,000 bond issue to provide a high school building is being considered by residents of the Wasco Union High School District. An election will be called in the near future, it is thought.

**BRIDGES AND DAMS**

**REDDING, SHASTA CO., CAL.**—Bridge, steel or reinforced concrete. Cost not stated. Engineer, County Surveyor, Redding. Owners, Shasta County. Plans A and B for a wagon bridge across Clear Creek on the Igo road were adopted at the last meeting of the County Supervisors and bids were ordered received until August 21st. Plan A calls for a reinforced concrete bridge and plan B for a steel structure. Plans and specifications together with full information may be had from the County Surveyor at Redding.

**OROVILLE, BUTTE CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans have been completed and approved for the construction of a highway bridge over Butte Creek on the State Highway between Nelson and Chico. Bids are now being taken and will be opened on August 7th. Plans and specifications can be secured from the County Clerk.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the County Supervisors plans and specifications prepared by the County Surveyor for two bridges in Santa Clara County were approved and the Clerk of the Board was instructed to receive bids for same until August 23rd at 11 a. m. Both structures will be of reinforced concrete. One will be a slab type bridge with reinforced concrete culverts and will be erected on the Shannon road. The other will be a two-span girder bridge and will be erected on Bodfish road over Bodfish Creek. Plans may be obtained from the County Surveyor.

**SEATTLE, WASH.**—Bridges, steel and concrete. Cost as follows. Engineer, City Engineer, Seattle. Owners, City of Seattle. Figures given out by F. A. Rapp, bridge engineer, regarding the two Lake Washington Canal bridges, show the low bidders as follows: Fifteenth Avenue Bridge—Booker, Kiehl & Whipple, substructure, \$95,145.50; Beers Building Co., superstructure, \$146,049.50. Substructure and superstructure—Beers Building Co., \$238,416; Hans Pederson, \$242,620.30. Engineer's estimate, \$316,391. Fremont Avenue Bridge—Pacific States Construction Co., substructure, \$112,651.50; Beers Building Co., superstructure, \$154,601. Substructure and superstructure — Beers Building Co.,

\$271,701.50; Hans Pederson, \$271,471. Engineer's estimate, \$360,076.

**DUNSMITH, SISKIYOU CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans are complete and figures are now being taken for the construction of the large reinforced concrete bridge over the Sacramento River. The structure will be 532 feet long with one arch of 180 feet clear span and two arches of 114 feet clear span. Bids will be opened on August 23rd. Plans and specifications can be secured from the State Highway Commission at Sacramento or its branch offices in San Francisco or Los Angeles.

**VISALIA, TULARE CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Visalia. Owners, Tulare County. Bids will be received by the Board of Supervisors up to August 16, 1915, for the construction of a 40-foot reinforced concrete bridge across the Alta District Canal.

#### Contracts Awarded.

**BURLINGAME, SAN MATEO CO., CAL.**—Bridges, 10, reinforced concrete, \$20,575.57. Engineer, City Engineer, Burlingame. Owners, City of Burlingame. Contractor, Chris Larsen, Easton. Contract price, \$20,575.57.

#### CHURCHES

**SACRAMENTO, CAL.**—Church, 2 story and base, reinforced concrete, \$30,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Roman Catholic Church of Sacramento. The building has been designed in the Mission style and will contain an auditorium seating 750 people. The plans also provide for Sunday school rooms and a large hall. Interior will be finished in pine and ornamental plaster. There will be a central heating system. Art glass windows and marble altars will be provided. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**FRESNO, FRESNO CO., CAL.**—Church, 2 story and base, brick and steel, \$75,000. Architect, R. F. Hotchkin, Fresno. Owners, First Church of Christ, Scientist. The building will be designed in the classic style and will cover a large ground area. There will be a main auditorium, Sunday school rooms and reading rooms. Interior will be finished in pine and ornamental plaster. Art glass windows are specified. Plans provide for a steam heating system. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Church, 1 story and base, brick. Cost not stated. Architect, Thomas Franklin Power, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building has been designed in the classic style, and will cover a considerable ground area. The main auditorium will seat 550 people. Plans also provide for Sunday school rooms. Interior will be finished in pine with ornamental plaster. Art glass windows are specified. Exterior of the building will be faced with cement plaster. Plans have been revised and new figures are being

taken. The foundation work is complete.

#### FIRE HOUSES AND JAILS.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Fire houses, 2, 1 and 1½ story and base, brick and frame. Cost as follows. Architects, Ralph P. Morrell, Odd Fellows Bldg., and W. B. Thomas, Yosemite Bldg., Stockton. Owners, City of Stockton. A. J. McPhee & Son, Stockton, presented the lowest figures for both the Rose street and California street fire houses and will probably be awarded the contracts. Their bid for the Rose street house was \$3,636.50, oak floor, \$150 extra, and slate roof, \$160 extra. California street house, \$6,975.

#### FLATS

**SAN FRANCISCO**—Flats and store, 3 story and base, frame, \$5,000. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owner, Mrs. Perry. The building will be erected on 16th street near Guerrero, and has been designed for one store on the first floor and two modern flats above. Interiors will be finished in pine and elm panels. Hardwood floors will be used in the principal rooms. There will be an open fire place in each living room with tile or brick mantel. Bath rooms will have tile floors. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Flats and store, 3 story and base, frame, \$8,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mrs. Bunner. The building will be erected at the corner of 20th and Bryant streets, and has been designed for a store on the first floor and two modern flats of five and six rooms on the upper floors. Interiors will be finished in pine. Hardwood floors will be used in the principal rooms. There will be an open fire place in each living room. Mantel will be of tile. Automatic water heaters are specified. The wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, W. A. Hemminga, 1600 Fell street, S. F. The building will be erected on the north side of California east of 15th avenue, and will cover an area of 25 by 63 feet. There will be two flats of six rooms each and a basement garage. Interior finish will be of pine and elm. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot. Exterior of the building will be covered with asbestos cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$5,000. Architect, Theo S. Boehm, 4119 19th street, S. F. Owner, F. J. Boehm, 4119 19th street, S. F. The building will be erected on the east side of 16th avenue north of Balboa,

and has been designed to contain three modern flats of five and six rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. The wainscot will be used in the bath rooms. Each living room will have an open fire place and tile or brick mantel. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**LOS ANGELES, CAL.**—Flats, 2 story and base, frame, \$30,000. Architect, H. H. Whiteley, Story Bldg., L. A. Owner, Henry M. Jones. The building will be erected on West Washington street near Rose Hill, and will contain a total of 15 flats. The design is in the Italian patio style. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. A central heating system will be installed. Bath rooms will be finished in tile. Exterior will be covered with cement plaster on metal lath. Plans are being prepared.

#### GARAGES

**SAN FRANCISCO**—Garage, 1 story and base, reinforced concrete. Cost not stated. Architects, Havens & Toepeke, 46 Kearny street, S. F. Owner's name withheld. The building has been designed for a commercial garage and will be erected at the corner of Powell and Union streets, covering a considerable ground area. There will be a cement floor, concrete walls and roof slabs. Interior will be finished in pine. There will be metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**SAN FRANCISCO**—Garage, 1 story, frame. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner, B. Schmidt. The building has been designed for a private garage and will be erected at the corner of 21st and Folsom streets. A cement floor will be used. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

#### GOVERNMENT WORK & SUPPLIES

##### Greeley, Colo., Furniture.

The contract for installing furniture in the U. S. post office at Greeley, Colo., has been awarded to Federal Equipment Co., Carlisle, Pa., at \$1,096.

##### Casper, Wyo., Furniture.

The contract for installing furniture in the U. S. post office at Casper, Wyo., has been awarded to Federal Equipment Co., Carlisle, Pa., at \$795.

##### Grass Valley, Cal., Furniture.

The contract for installing furniture in the U. S. post office at Grass Valley, Cal., has been awarded to Federal Equipment Co., Carlisle, Pa., at \$1,029.

##### Salem Indian School, Building.

The following bids were received by the commissioner of Indian Affairs, Washington, D. C., for the construction of an addition to the brick as-

sembly hall at the Salem Indian School, Ore.:

L. C. Denison, 185 S. 19th street, Salem, Ore., work, complete, \$10,719.20; add for metal roof, \$350 add for steel trusses, \$1,625.

Stewart & Engstrom, 575 N. Capitol street, Salem, Ore., \$12,927; with metal roof, \$13,450 with steel trusses, \$14,500; 120 days.

W. D. Lovell, Minneapolis, Minn., work, complete, \$18,500; with metal roof, \$306; with steel trusses, \$800; 180 days.

Southwick & Headrick, Salem, Ore., work, complete, \$13,597; with metal roof, add \$400; steel trusses, add \$1,200; 180 days.

John Almeter, 294 E. 51st street, Portland, Ore., work, complete, \$13,829; add for metal roof, \$720; add for steel trusses, \$1,550; 180 days.

#### Port Townsend, Wash., Elevator.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., July 21 for the installation of an elevator in the U. S. public building at Port Townsend, Wash.:

Kaestner & Hecht Co., Chicago, Ill., \$4,200; time December 15.

Llewellyn Iron Works, Los Angeles, Cal., \$5,580; time December 21.

Otis Elevator Co., Washington, D. C., \$3,838; time November 27.

#### Pendleton, Ore., Post Office.

As previously reported, the contract for the construction, complete, of the U. S. post office at Pendleton, Ore., has been awarded to James B. Winters, Portland, Ore., at \$99,537; time to complete 18 months. In the construction of the building fixtures and material manufactured by the following firms will be used: Plumbing fixtures, John Douglas Co.; cast iron column and wall radiators, American Radiator Co.; radiator valves, Jenkins Bros. damper regulator, Standard Regulator Co.; air valves for radiator, Hoffman Specialty Co.; air valves for steam mains, Jenkins Bros.; vacuum cleaner, United Vacuum Appliance Co.; motor for vacuum cleaner, General Electric Co.; cabinet and tablet, McPhee, McKenny Co.; conduit, National Metal Molding Co.; rubber-covered wire, Simplex Wire & Cable Co.; flush switches, General Electric Co.; pendant switches, Cutler-Hammer Mfg. Co.; canopy switches, Cutler-Hammer Mfg. Co.; keyless sockets, Weber; reflectors and glassware, Macheth-Evans Co.

#### Reclamation Service, Cylinder Gates.

The following bids were received by the director, U. S. Reclamation Service, Washington, D. C., for furnishing two cast iron cylinder gates for Keechelus reservoir and a duplicate set for Sherburne reservoir.

Item 1, iron and steel; 2, brass and bronze.

Fulton Engineering Works, Los Angeles, Cal., item 1, 8c per lb; 2, 50c per lb.

Power Mining Machinery Co., Cudahy, Wis., item 1, 5.36c; 2, 43c.

R. D. Wood & Co., Philadelphia, Pa., items 1 and 2, 7.32c.

Payne & Joubert, Birmingham, Ala., item 1, 5.27c; 2, 52.72c.

Hardie-Tyres Mfg. Co., Birmingham,

Ala., item 1, 5.26c; 2, 48.4c.

Rosedale Foundry & Machine Co., Pittsburgh, Pa., item 1, 4.65c; 2, 62.25c.

#### Denver, Colo., Furniture.

The contract for installing furniture in the U. S. post office at Denver, Colo., has been awarded to the Louck & Hill Co., Richmond, Ind., at \$12,608.94.

#### Port Townsend, Wash., Oil-Burning Plant.

As previously reported, the contract for installing an oil-burning plant in the U. S. Marine Hospital, at Port Townsend, Wash., was awarded to Appling-Griggs Co., Tacoma, Wash., who will use the following fixtures in the prosecution of the work: Oil-burning apparatus, S. T. Johnson Co.; motor, General Electric Co.; thermostatic element for controlling oil supply, American Radiator Co.

#### San Francisco, Cal., Mint.

As previously reported, the contract for installing conduits and wiring in the U. S. mint, San Francisco, Cal., was awarded to Possett & Wilhelm, Denver, Colo., at \$6,200. In the prosecution of the work the following fixtures and material will be used: Cabinet and tablet, Frank Adam Electric Co.; conduit, Western Conduit Co.; rubber-covered wire, General Electric Co.; flush switches, Perkins; conduit type fittings, V. V. Fittings Co. and Crouse-Hinds Co.; outlet boxes, Flint Electric Mfg. Co.

#### Laterals, Greenfields Distribution System.

The following bids were received July 1 by the U. S. Reclamation Service at Fort Shaw, Mont., under specification 292, for furnishing earthwork and structures, first unit of laterals on Greenfields distribution system:

Bid 1. West Coast Construction Co. & Hans Pederson, Madison Building, Seattle, Wash.

2. Winston Bros. Co., 801 Globe Building, Minneapolis, Minn.

3. J. E. Hinton, Billings, Mont.

4. O'Connor & Healan, Great Falls, Mont.

5. Charles Wilhite & Co., Malta, Mont.

6. I. J. Denton, Gilman, Mont.

7. Security Bridge Co., Minneapolis, Minn.

8. Threot Bros. & Jolly, Lovell, Wyo.

#### Schedule 1.

Item 1, excavation, class 1—Bid 1, 12c; 2, 11.5c; 3, 11c; 4, 11.9c; 5, 14c.

Item 2, excavation, class 2—Bid 1, 25c; 2, 35c; 3, 20c; 4, 30c; 5, 50c.

Item 3, excavation, class 3—Bid 1, 25c; 2, 75c; 3, 70c; 4, 50c; 5, \$1.

Total schedule 1—Bid 1, \$10,333.50; 2, \$10,028.50; 3, \$9,471; 4, \$10,307; 5, \$12,276.

#### Schedule 2.

Prices the same as schedule 1, excepting bid 1, which is as follows: Item 5, 12c; 6, 25c; 7, 50c; 8, 2c.

Total, schedule 2—Bid 1, \$12,173; 2, \$11,790.50; 3, \$11,143; 4, \$12,124; 5, \$14,428.

#### Schedule 3.

Prices of all bidders the same as schedule No. 2.

Total schedule 3—Bid 1, \$11,442; 2, \$11,079.50; 3, \$10,477; 4, \$11,394; 5, \$13,552.

#### Schedule 4.

Prices of all bidders same as schedule No. 2.

Total, schedule 4—Bid 1, \$9,666; 2, \$9,363.50; 3, \$8,849; 4, \$10,020; 5, \$11,456.

#### Schedule 5.

Prices and bidders same as schedule No. 2.

Total, schedule 5—Bid 1, \$8,058.50; 2, \$7,023.50; 3, \$6,583; 4, \$7,476; 5, \$8,626.

#### Schedule 6.

Item 21. Excavation, class 1—Bid 1, 35c; 2, 32c; 6, 28c; 7, 30c.

Item 22. Excavation, class 2—Bid 1, 50c; 2, 45c; 6, 28c; 7, 60c.

Item 23. Excavation, class 3—Bid 1, 50c; 2, \$1; 6, 28c; 7, \$1.50.

Item 24. Back fill—Bid 1, 30c; 2, 30c; 7, 12c; 8, 25c.

Item 25. Puddling—Bid 1, 10c; 2, 75c; 3, 50c; 4, 75c.

Item 26. Concrete—Bid 1, \$8; 2, \$10.50; 6, \$9.40; 7, \$13.20.

Item 27. Placing reinforcing steel—Bid 1, 1c; 2, 1c; 6, 1.5c; 7, 1.4c.

Item 28. Placing structural steel—Bid 1, 2.5c; 2, 5c; 6, 4c; 7, 1.26c.

Item 29. Grouted paving—Bid 1, 12c; 2, 30c; 3, 20c; 4, 25c.

Total, schedule 6—Bid 1, \$19,687.60; 2, \$26,979.50; 6, \$23,064.50; 7, \$29,229.

#### Schedule 7.

Item 31. Excavation, class 1—Bid 1, 40c; 2, 32c; 6, 28c.

Item 32. Excavation, class 2—Bid 1, 50c; 2, 45c; 6, 28c.

Item 33. Excavation, class 3—Bid 1, 50c; 2, \$1; 6, 28c.

Item 34. Back fill—Bid 1, 30c; 2, 30c; 6, 12c.

Item 35. Puddling—Bid 1, 12c; 2, 75c; 6, 50c.

Item 36. Concrete—Bid 1, \$8; 2, \$12.50; 6, \$11.

Item 37. Placing reinforcing steel—Bid 1, 1c; 2, 2c; 6, 1.5c.

Item 38. Erecting gates and other metal work—Bid 1, 2c; 2, 5c; 6, 4c.

Item 39. Grouted paving—Bid 1, \$1; 2, \$2.50; 6, \$2.25.

Item 40. Laying 12-inch vitrified pipe—Bid 1, 75c; 2, 70c; 6, 50c.

Item 41. Manufacture and laying 18-inch concrete—Bid 1, \$1.60; 2, \$1.10; 6, \$1.50.

Item 42. Do, 20-inch—Bid 1, \$2; 2, \$1.25; 6, \$1.75.

Item 43. Do, 24-inch—Bid 1, \$2.50; 2, \$1.50; 6, \$2.

Item 44. Laying 18-inch and 20-inch corrugated metal pipe—Bid 1, 50c; 2, 45c; 6, 25c.

Item 45. Laying 30-inch corrugated metal pipe—Bid 1, 60c; 2, 60c; 6, 35c.

Item 46. Do, 36-inch—Bid 1, 80c; 2, 75c; 6, 40.

Item 47. Laying 42-inch do—Bid 1, \$1; 2, 90c; 6, 50c.

Item 48. Erecting lumber—Bid 1, \$10; 2, \$18; 6, \$30.

Total, schedule 7—Bid 1, \$13,952.30; 2, \$18,073; 6, \$15,742.40.

#### Schedule 8.

Item 49. Excavating, class 1—Bid 1, 55c; 2, 32c; 6, 28c.

Item 50. Excavation, class 2—Bid 1, 50c; 2, 45c; 6, 28c.

Item 51. Excavation, class 3—Bid 1, 50c; 2, \$1; 6, 28c.

Item 52. Back fill—Bid 1, 35c; 2, 30c; 6, 12c.

Item 53. Puddling—Bid 1, 10c; 2, 75c; 6, 50c.

Item 54. Concrete—Bid 1, \$8, 2, \$12.50; 6, \$11.

Item 55. Placing reinforcing steel—Bid 1, 1c; 2, 2c; 6, 1.5c.

Item 56. Erecting gates and other metal work—Bid 1, 2c; 2, 6c; 6, 4c.

Item 57. Grouted paving—Bid 1, \$1; 2, \$2.50; 6, \$2.25.

Item 58. Laying 12-inch vitrified pipe—Bid 1, 75c; 2, 70c; 6, 50c.

Item 59. Manufacturing and laying 18-inch concrete pipe—Bid 1, \$1.60; 2, \$1.10; 6, \$1.50.

Item 60. Do, 20-inch—Bid 1, \$2; 2, \$1.25; 6, \$1.75.

Item 61. 24-inch do—Bid 1, \$2.30; 2, \$1.50; 6, \$2.

Item 62. Laying 18 and 20 inch corrugated metal pipe—Bid 1, 50c; 2, 45c; 6, 25c.

Item 63. Laying 24-inch corrugated metal pipe—Bid 1, 60c; 2, 50c; 6, 30c.

Item 64. 30-inch do—Bid 1, 60c; 2, 60c; 3, 35c.

Item 65. 36-inch do—Bid 1, 80c; 2, 75c; 6, 40c.

Item 66. 42-inch do—Bid 1, \$1; 2, 90c; 3, 50c.

Item 67. Erecting metal flumes, diameter 2 ft 7 ins—Bid 1, 40c; 2, 75c; 3, 50c.

Item 68. Do, 3 ft 2 ins—Bid 1, 40c; 2, 90c; 6, 60c.

Item 69. Do, 3 ft 10 ins—Bid 1, 50c; 2, \$1; 6, 75c.

Item 70. Laying 4-inch drain pipe—Bid 1, 10c; 2, 30c; 6, 15c.

Item 71. Erecting lumber—Bid 1, \$10; 2, \$18; 6, \$30.

Total, schedule 8—Bid 1, \$15,865.40; 2, \$20,559.80; 6, \$17,959.85.

Schedule 9.

Item 72. Excavation, class 1—Bid 1, 35c; 2, 32c; 6, 28c.

Item 73. Excavation, class 2—Bid 1, 50c; 2, 45c; 6, 28c.

Item 74. Excavation, class 3—Bid 1, 50c; 2, \$1; 6, 25c.

Item 75. Back fill—Bid 1, 30c; 2, 30c; 6, 12c.

Item 76. Puddling—Bid 1, 10c; 2, 75c; 6, 50c.

Item 77. Concrete—Bid 1, \$8; 2, \$12.50; 6, \$11.

Item 78. Placing reinforcing steel—Bid 1, 1c; 2, 1c; 6, 1.5c.

Item 79. Erecting gate and other metal work—Bid 1, 2c; 2, 6c; 6, 4c.

Item 80. Grouted paving—Bid 1, 90c; 2, \$2.50; 6, \$2.25.

Item 81. Manufacture and laying 18-inch concrete pipe—Bid 1, \$1.75; 2, 61-10; 6, \$1.50.

Item 82. Do, 20-inch—Bid 1, \$2; 2, \$1.25; 6, \$1.75.

Item 83. Do, 24-inch—Bid 1, \$2.25; 2, \$1.50; 6, \$2.

Item 84. Laying 18-inch and 20-inch corrugated metal pipe—Bid 1, 50c; 2, 45c; 6, 25c.

Item 85. Laying 24-inch corrugated metal pipe—Bid 1, 60c; 2, 50c; 6, 30c.

Item 86. Laying 30-inch do—Bid 1, 65c; 2, 60c; 6, 35c.

Item 87. Laying 36-inch do—Bid 1, 75c; 2, 75c; 6, 40c.

Item 88. Laying 42-inch do—Bid 1, \$1; 2, 90c; 6, 50c.

Item 89. Erecting lumber—Bid 1, \$10; 2, \$18; 6, \$30.

Total, schedule No. 9—Bid 1, \$16,471; 2, \$21,595; 6, \$19,028.60.

Schedule 10.

Item 90. Excavation, class 1—Bid 1, 35c; 2, 32c; 4, 34c; 6, 28c; 7, 35c; 8, 22.5c.

Item 91. Excavation, class 2—Bid 1, 50c; 2, 45c; 4, 40c; 6, 28c; 7, 70c; 8, 75c.

Item 92. Excavation, class 3—Bid 1, 50c; 2, \$1; 4, 80c; 6, 28c; 7, \$1.50; 8, \$1.25.

Item 93. Back fill—Bid 1, 40c; 2, 30c; 4, 45c; 6, 12c; 7, 25c; 8, 22.5c.

Item 94. Concrete—Bid 1, \$10; 2, \$12.50; 4, \$13.90; 6, \$10; 7, \$13; 8, \$10.

Item 95. Erecting lumber—Bid 1, \$10; 2, \$18; 4, \$11.85; 6, \$16; 7, \$11; 8, \$12.50.

Total, schedule 10—Bid 1, \$7,880; 2, \$10,002.50; 4, \$9,532.75; 6, \$8,207.60; 7, \$8,830; 8, \$7,517.50.

## HALLS AND SOCIETY BUILDINGS

SAN FRANCISCO—Lodge hall alterations, 2 story, frame. Cost not stated. Architect, Albert Lapachet, 110 Sutter street, S. F. Owners, Knights of Columbus Hall Association. The architect has awarded the following contracts in connection with the alterations to the Knights of Columbus building on Golden Gate avenue near Pierce street: Painting to J. P. Murphy for \$1,250; plastering to Martin Carrick for \$263; bowling alleys to Brunswick-Balke-Clendell Co. Bids are now being taken for the mill work, hardwood floors and lighting fixtures.

LOS ANGELES, CAL.—County club, 1 story and base, frame, \$20,000. Architects, Edelman & Barnett, Black Bldg., 14 A. Owners, Concordia Country Club. The building will be erected about seven miles out of the city and has been designed for living rooms as well as the usual club rooms. There will be a large banquet hall, ball rooms and office. Interior will be finished in pine with some hardwood. Hardwood floors will be used throughout. Plans provide for a central heating system and open fire places. Mantels will be of field stone. Exterior of the building will be covered with cement plaster and shingles. Plans are now being prepared.

## HOSPITALS

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—Hospital group. The main building will be a four-story structure and will contain the administration offices, reception rooms, consulting rooms, dispensary, nurses quarters, etc. There will be two two-story wings to contain the operating rooms, wards and private rooms for patients. The tuberculosis ward, indigent quarters, and criminal ward buildings will be located at different points on the site. The entire group of buildings will accommodate about 246 patients. The style of architecture will be Spanish Renaissance. The main building will be of reinforced concrete construction with plastered exterior and clay tile roof. The other buildings will be of metal stud and metal lath and plaster construction with tile roofs. The equipment will be modern in every particular with hospital plumbing, elevators, steam heat, marble and tile work, etc. There will also be a number of residences and cottages for the superintendent, doctors and other members of the hospital staff. Plans are being prepared.

## HOTELS.

SAN FRANCISCO—Hotel alterations, 2, 4 story class C construction. Cost not stated. Architect, William H. Armitage, 328 Montgomery street, S. F. Owners, Keane Estate. Two buildings belonging to this estate and located on the west side of Grant avenue between Washington and Jackson streets are to undergo extensive alterations. The work will include interior partitions, plastering, plumbing, electric work and painting. No exterior changes will be made. Plans are complete and figures are being taken.

## IRRIGATION PROJECTS

LIME POINT, MARIN CO., CAL.—Substation, 1 story, reinforced concrete. Cost not stated. Engineer, Engineering Dept. Pacific Gas and Electric Co., S. F. Owners, Pacific Gas and Electric Co. Plans are complete and a contract will be let at once for a new substation which will be erected by the Pacific Gas and Electric Co. at what is known as the Lime Station in Marin County. The building will be 40 by 50 feet and will have steel frame, steel roof trusses and reinforced concrete walls and roof. The steel work is being done by the Western Iron Works.

### Contracts Awarded

MODESTO, STANISLAUS CO., CAL.—Flume, reinforced concrete, \$60,602.95. Engineer, Chief Engineer, Modesto. Owners, Modesto Irrigation District. Contractor, Ernest Green, Modesto. Contract price, \$60,602.95.

WEST LINN, ORE.—Water system, \$60,000. Engineers, S. A. Cobb and H. A. Rands, West Linn. Owners, Town of West Linn. Contractors, Oregon Engineering & Construction Co. Contract price, \$60,000.

## RAILROAD CONSTRUCTION AND EQUIPMENT

### Contracts Awarded

RIVERTON TO CRANE CREEK, ORE.—Railroad construction, \$1,500,000. Engineer's name not given. Owners, Oregon-Easton Railroad Co. Portland. Contractors, Twohy Bros. Co., Railroad Bldg., Portland. Contract price, \$1,500,000.

SAN FRANCISCO — Municipal railroad equipment. Cost as follows. Engineer, City Engineer, City Hall. Owners, City and County of San Francisco. Contractors, Pacific Car Equipment Co., work car, \$3,250; Westinghouse Electric Co., motor equipment for same, \$2,343, and J. G. Brill, car trucks for same, \$983.

SAN FRANCISCO—Car barn additions, reinforced concrete, \$27,947. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, James McLaughlin, 24 Kearny street, S. F. Contract price, \$27,947.

## RESIDENCES.

SAN FRANCISCO—Residences, 3, 2 story and base, frame. Cost not stated. Architect, Charles W. McCull, Central Bank Bldg., Oakland. Owner, H. P. Livermore. These houses will be erected on Vallejo street near Jones, and each has been designed to contain

seven rooms and bath. Interiors will be finished in pine with some hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. Automatic water heaters are specified. Tile wainscot will be used in the bath rooms. Exteriors will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**SAN FRANCISCO**—Residence alterations, frame, \$2,500. Architect, none. Owner, Charles Bills, 297 Edgewood, S. F. This work will consist of moving the building to the front of the lot, adding two rooms, making the dwelling a six-room house with bath. There will be new interior finish, plastering, painting, plumbing and electric work. Some hardwood floors will be used. Exterior will be repainted. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Carl Menzel, 850 15th avenue, S. F. The dwelling will be erected on the east side of 15th avenue north of Fulton, and has been designed to contain six rooms and bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room. Mantel will be of tile or brick. Tile wainscot and floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$8,500. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owners, Allen Bros. The dwelling has been designed for an eight-room house with two baths and two sleeping porches, and will be erected in indoor Terrace. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A separate garage will also be erected on the property. Plans are being prepared and when complete the work will be done by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architects, Banning & Stewart, 5215 Broadway, Oakland. Owner, Mr. Blair. The dwelling will be erected at the corner of Uplands and El Camino Real, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic

water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,500. Architect, none. Owner, William P. Neary, 1723 Telegraph avenue, Oakland. The dwelling will be erected at the corner of South Court and Walk streets, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$7,000. Architect, Sidney B. Newson, Nevada Bank Bldg., S. F. Owner, Sidney B. Newson. The dwelling will be erected in Crocker Highlands, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. A hot water circulating system will be installed. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being revised, and new figures will be called for shortly.

**OAKLAND, CAL.**—Residences, a, 2 story and base, frame, \$4,500 each. Architect, none. Owner, C. M. MacGregor, 470 13th street, Oakland. These dwellings will be erected on the north side of Mandana Boulevard west of Paloma, and each has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and floors will be used in the bath rooms. Plans provide for automatic water heaters. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN LORENZO, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$4,000. Architects, Mau & Sprague, MacDonaldough Bldg., Oakland. Owner, J. P. Marlin. The dwelling will contain eight rooms and bath. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**YOUNTVILLE, NAPA CO., CAL.**—Residence, 2 story and base, frame, \$16,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Bertran E. Nixon. The dwelling has been designed to contain fifteen rooms, three baths and sleeping porches. A separate garage and summer house will also be erected on the grounds. Interior of the dwelling will be finished in pine and hardwood. Walls will be covered with painted canvas. Hardwood floors will be used in the principal rooms. There will be a vapor system of steam heat with wood burning furnace. Bath rooms will be finished in tile and equipped with showers. A hot water circulating system will be installed. Vacuum cleaning is specified. The grounds have been laid out in formal gardens and will contain a large lily pond. Exterior of the house will be covered with cement plaster on metal lath, brick and filed stone. Plans are complete and figures are being taken.

**BURLINGAME, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner's name withheld. The dwelling will contain eight rooms, bath and sleeping porch. A separate garage will also be erected on the property. Interior of the house will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and marble. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**SAN FRANCISCO**—Residence, 1 story and base, frame, \$3,000. Architect, Parkside Home Builders, Crocker Bldg., S. F. Owner, Oscar E. Middlestadt. The dwelling has been designed for a seven-room house and will be erected on 21st avenue south of Ulloa. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantel. An automatic water heater will be installed. Bath room will have tile wainscot and floor. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,800. Architect, none. Owner, B. J. Hooper, 766 5th avenue, S. F. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on the east side of 17th avenue south of Geary street. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Bath room will be finished in tile. Plans provide for furnace heat and open fire place. Mantel will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

#### Contracts Awarded.

**SEATTLE, WASH.**—Residence, 2 story and base, frame and stucco, \$30,-

000. Architects, Somerville & Putnam, White Bldg., Seattle. Owner, Dr. A. L. Bouffleur. Contractor, M. Arverson, Downs Bldg., Seattle. Contract price, \$30,000.

### SCHOOLS.

SAN FRANCISCO—School, 3 story and base, brick and steel, \$100,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Coxs-well School. The building will be erected at the corner of 26th and Folsom streets and will be a fireproof structure. Interior has been designed for a number of class rooms, auditorium and library. The trim will be of pine and hardwood. Maple floors will be used in the class rooms. Plans provide for steam heat, an oil burning system and hot water supply. Vacuum cleaning is also specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken for the structural steel work. Other parts of the work will be figured later.

MODESTO, STANISLAUS CO., CAL.—School, 1 story frame. Cost not stated. Architect, E. H. Zion, Masonic Bldg., Modesto. Owners, Town of Modesto. The building will contain four class rooms. Interior will be finished in pine. There will be modern school plumbing. Exterior will be covered with shiplap. Plans are complete and figures are being taken. Bids will be opened on August 6th. Plans and specifications can be secured from the architect.

GALT, SACRAMENTO CO., CAL.—School, 1 story, hollow tile construction, \$15,610. Architect, Clarence C. Cuff, Ochsner Bldg., Sacramento. Owners, Galt School District. Contractors, E. E. Eberthorn & Co., Monadnock Bldg., S. F. The contractors are now taking sub-figures on all parts of the work except the concrete and carpentry.

CITRUS GROVE, FRESNO CO., CAL.—School, 1 story, frame. Cost not stated. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owners, Citrus Grove School District. The building will contain four class rooms and an assembly hall. Interior will be finished in pine. With some maple floors. Exterior will be covered with cement plaster on metal lath. Plans are complete and bids are being taken. Figures will be opened on August 7th. Plans and specifications can be secured from the architect.

### Contracts Awarded

GALT, SACRAMENTO CO., CAL.—School, 1 story and base, hollow tile, \$14,110. Architect, Clarence C. Cuff, Ochsner Bldg., Sacramento. Owners, City of Galt. Contractor, E. E. Eberthorn, Monadnock Bldg., S. F. Contract price, \$14,410.

SACRAMENTO, CAL.—School auditorium, 2, 1 story, frame, \$8,200 and \$2,000. Architect, none. Owners, City of Sacramento. Contractor, W. J. Matthews, City Hall, Sacramento. Contract price, Marshall School addition, \$9,200; Lincoln School addition, \$2,700.

BARRY SCHOOL DISTRICT, SUTTER CO., CAL.—School alterations and additions, \$2,700. Architect, none. Owners, Barry School District. Contractors, Gould Bros., Yuba City. Contract price, \$2,700.

OREGON CITY, ORE. School, 2 story and base, brick and concrete, \$15,362.

Architects, Vonderahle & Forbes, Oregon City. Owners, Oregon City. Contractors, Stibinger Bros., 626 7th street, Portland. Contract price, \$15,362.

PORTLAND, ORE.—Sunday school, 2 story and base, brick and steel, \$20,000. Architects, Tourtellotte & Hummell, Rothchild Bldg., Portland. Owners, First Methodist Church. Contractor, E. B. White, Lumber Exchange Bldg., Portland. Contract price, \$20,000. This contract does not include the plumbing, heating, electric work, painting sheet metal work or roofing.

### SEWERS, STREET WORK & WATER SYSTEMS.

SACRAMENTO, CAL.—Highway construction. Cost not stated. Engineer, State Highway Commission Forum Bldg., Sacramento. Owners, State of California. Bids were opened at the last meeting of the State Highway Commission for constructing highways in five counties. A complete list of these bids will be found under the heading of San Francisco in this issue.

SAN LEANDRO, ALAMEDA CO., CAL.—Street paving, grading and curbs. Cost not stated. Engineer, City Engineer, San Leandro. Owners, City of San Leandro. Bids for a large amount of street work are now being received by the Board of Trustees. Bids on the work close August 16th between 8 and 9 p. m. The following streets will be improved: Hays, San Miguel and Santa Rosa streets, between Callan and Estudillo avenue; San Rafael street from Estudillo to Juana avenue; San Leandro street from Joaquin to Juana avenues; Juana avenue from Santa Clara street to Grand avenue. The improvement will consist of construction of sidewalks, grading, paving, curbing and macadamizing, construction of cast iron and concrete culverts, etc. Plans together will full information regarding the work may be had from the City Engineer.

SAN JOSE, SANTA CLARA CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The County Supervisors have instructed the County Surveyor to prepare plans and specifications for the improvement of Stevens Creek road from San Jose to Meridian Corners, and Saratoga avenue from Meridian Corners to Saratoga. Plans were also ordered for improving the following roads: Saratoga avenue from Santa Clara to Meridian Corners and Stevens Creek road from Meridian Corners to Saratoga and Mountain View road from San Francisco road to the town of Los Gatos; Alum Rock avenue from San Jose to Alum Rock Park; also Congress Springs and Summit road. On completion of plans bids will be called for.

STOCKTON, SAN JOAQUIN CO., CAL.—Street improvements. Cost as follows. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids received for the improvement of Weber and Miner avenues, Market, Commerce, Sonora, Church, Washington, Sutter and San Joaquin streets, are as follows: Eaton & Smith, 107 11th street, S. F., \$84,556.70; Federal Construction Co., Sharon Bldg., S. F., \$98,007.55; Clark & Henery, Ochsner Bldg., Sacramento, \$99,007.02. All bids were taken under advisement. An award will prob-

ably be made at the next meeting.

STOCKTON, SAN JOAQUIN CO., CAL.—Sewers and street improvements. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has adopted plans and specifications and has ordered bids called for the construction of storm sewers in parts of Maple, Elm, North Commerce, North Center and North El Dorado streets. Plans for the work may be secured from the City Engineer at Stockton. The Council also adopted a resolution of intention for the improvement of East street between Park and Poplar, to consist of asphalt concrete paving and concrete curbs and gutters.

BAKERSFIELD, KERN CO., CAL.—Road construction. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans are complete and figures are now being taken for the construction of division 10, Section 4, of the Bakersfield-Mojave road. The work consists of constructing about 6 1/2 miles of road, grading, culverts and concrete pavement. Bids will be opened on August 9th. Plans and specifications can be secured from the County Highway Commission, Bakersfield.

MARTINEZ, CONTRA COSTA CO., CAL.—Boulevard construction, \$38,665. Engineer, County Surveyor E. E. Arnold, Martinez. Owners, Contra Costa County. The Board of Supervisors has decided to call for bids for the construction of the first unit of the boulevard system to run through Contra Costa County. The first strip will extend for a distance of about three miles, ending about 150 feet below the bridge over San Pablo Creek. The construction of this road will cost about \$12,000 a mile, according to County Engineer E. E. Arnold, the amount of the first contract being approximately \$38,665. Plans call for concrete road with macadam shoulder on each side, making a road about 22 feet wide.

PITTSBURG, CONTRA COSTA CO., CAL.—Septic tank, \$800. Engineer, W. H. Castner, Pittsburg. Owners, Town of Pittsburg. All bids received by the Town Board for the septic tank have been rejected as they were higher than the estimate of W. H. Castner, designer of the system, which was \$800, while the lowest bid received was that of S. E. Withers at \$1,250.

RICHMOND, CONTRA COSTA CO., CAL.—Street improvement. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. City Engineer Chapman has recommended to the City Council the improvement of First, Third and Fourth streets between Chanslor avenue and the Santa Fe right-of-way.

NAPA, NAPA CO., CAL.—Street improvements. Cost not stated. Engineer, Town Engineer, Napa. Owners, Town of Napa. All bids received by the City Council for the improvement of First street have been rejected and new bids have been ordered called.

RICHMOND, CONTRA COSTA CO., CAL.—Street improvement, \$8,000. Engineer, City Engineer, Richmond. Owners, City of Richmond. Ten bids were received by the Council for the improvement of Laurel avenue in the Stege District. Galbraith & Jones, 156 14th street, Richmond, it is thought, sub-

mitted the lowest bid at approximately \$8,000.

#### Contracts Awarded

**SAN JOSE, SANTA CLARA CO., CAL.**—Road improvement. Costs as follows. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractors, Ransome-Crummey Co., First National Bank Bldg., Oakland, improvement of Tully, White and San Felipe roads, \$31,554.05. John W. McDonald, Jr., San Jose, improvement of Ford road, Fontenrose and Phelan avenues, \$14,887.

**OROVILLE, BUTTE CO., CAL.**—Street paving, \$15,700. Engineer, City Engineer, Oroville. Owners, City of Oroville. Contractors, Clark-Henery Co., Ochsner Bldg., Sacramento, \$15,700.

**ANAHEIM, ORANGE CO., CAL.**—Street paving, \$10,606.01. Engineer, County Surveyor, Santa Ana. Owners, Orange County. Contractor, Oscar Ford, Riverside. Contract price, \$10,606.01.

#### SEALED PROPOSALS

##### PROPOSALS FOR RECLAMATION WORK.

**RECLAMATION WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at St. Ignatius, Mont., until 3 o'clock p. m. August 18, 1915, for the construction of laterals, sublaterals and appurtenant structures on the Flathead project, involving about 32,900 cubic yards of excavation, 500 cubic yards of concrete, 3,500 square yards of paving, the placing of about 32,500 pounds of reinforcing steel and 74,000 feet, b. m., of lumber and the manufacturing and laying of about 1,000 linear feet of concrete pipe. The work is situated on the east side of the Flathead River, from 10 to 18 miles southwest of Polson and 9 to 16 miles northwest of Ronan, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Denver, Colo., or St. Ignatius, Mont. A. P. DAVIS, chief engineer.

##### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 956**—Office of the General Purchasing Office, Panama Canal, Washington, D. C.—Sealed proposals will be received here until August 19, 1915, under circular 956 for furnishing the following: 50 brackets, brake shaft; 2,000 feet trolley wire, 20 reams Manila paper, 40 cast iron posts, 1,200 feet vulcanized rubber strips, 500 spinning plates, 12 machinists' vise, 50 lengths corrugated tender hose, 3 lengths steel rails, 108 hand saws, 2 water gauges, 500 handles, 72 hatchets, 24 vises, 288 wrenches for Barnes pipe cutters, 12 all-steel chisels, 144 blacksmiths' anvils, 144 blacksmiths' chisels, 3,600 hacksaw blades, 24 breast drills, 72 saw frames, 12 buckets for ladder dredge and 24 manganese steel lips, 400,000 feet ceiling, 275,000 feet flooring, 200 feet siding, 2,200,000 feet service and rough lumber; also a quantity of files, bits, augers, cape and machine chisels, monkey and Stilson wrenches, machinists' hand taps, pipe cutters, drills, dies, claw, machinists' and sledge hammers, stocks and dies and condulets. For further information address F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

##### PROPOSALS FOR SUBMARINES.

**SUBMARINES**—The date for the opening of proposals for building submarine boats Nos. 62-77, as fixed by the department's advertisement of May 29, 1915, is hereby changed from August 2 to September 29, 1915. JOSEPHUS DANIELS, Secretary of the Navy.

#### PROPOSALS FOR WHARF.

**WHARF**—Sealed proposals indorsed "Proposals for Extensions of Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 21, 1915, and then there publicly opened, for extension of wharf at the naval training station, San Francisco, Cal. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval training station named. H. R. STANFORD, chief of bureau.

#### STATE OF CALIFORNIA.

##### DEPARTMENT OF ENGINEERING.

##### CALIFORNIA HIGHWAY COMMISSION.

##### NOTICE TO CONTRACTORS.

Sealed proposals will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until 2 o'clock p. m. on August 25, 1915, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of state highway as follows: Siskiyou County across the Sacramento River near Dunsuir (II-Sis-3-A), a reinforced concrete bridge about 532 feet long with one arch of 180 feet clear span and two arches of about 114 feet clear span.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The division engineers are located at Willets, Dunsuir, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the state.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS, Secretary.

##### NOTICE TO CONTRACTORS.

**OFFICE OF THE BOARD OF STATE Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal., July 30, 1915.**

Sealed proposals or bids will be received at this office at or prior to 11 o'clock a. m. on Thursday, August 12th, 1915, for furnishing materials and constructing Pier No. 22 and shed over same, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board July 8, 1915, and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of Portland cement and piles (which will be furnished to the contractor by the Board), merchantable yellow fir lumber, redwood lumber, cedar lumber, sand, reinforcing materials, metal lath, castings, structural steel, rods, bolts, spikes, nuts and fastenings, bituminous concrete paving, roofing and painters' materials, glass, window frames, etc. All materials used must be of the best of their respective kinds, if not specified herein. All materials used in these structures will be subjected to a rigid examination and test, and, if found defective, under size, unsuitable or not as specified, will be condemned and must be

immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or refuse to execute a contract, and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to true intent and meaning thereof and to the satisfaction of said Board; and said bond shall also be effective as provided in the approved May 1, 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary, Room 17, Union Depot and Ferry House, at or prior to 11 o'clock a. m. on Thursday, August 12, 1915, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids at the Union Depot and Ferry House upon depositing \$2000 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, "Bid for Pier No. 22."

J. J. DWYER,  
THOMAS S. WILLIAMS,  
J. H. McCALLUM,  
Board of State Harbor Commissioners.  
JEROME NEWMAN,  
Assistant State Engineer.  
LEO V. MERLE, JR.,  
Secretary.

##### PROPOSALS FOR WHARF CONSTRUCTION.

**WHARF**—Sealed proposals indorsed "Proposals for Reinforced Concrete Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then there publicly opened, for constructing a reinforced concrete wharf at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

##### PROPOSALS FOR CONCRETE PIERS.

**CONCRETE PIERS**—Sealed proposals indorsed "Proposals for Concrete Boat Piers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then there publicly opened, for constructing reinforced concrete torpedo boat piers at the naval station Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

##### PROPOSALS FOR RAILROAD.

**MARINE RAILWAY**—Sealed proposals indorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 18, 1915, and then there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be ob-

tained on application to the bureau or to the commandant of the naval station command. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR DREDGING.

**DREDGING.**—Sealed proposals, indorsed "Proposals for Dredging," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 14, 1915, and then there publicly opened, for dredging at the navy yard, Puget Sound, Wash. Amount available, \$15,000. Plan and specification may be obtained on application to the bureau of yards and docks, Navy Department, Washington, D. C., or to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

#### PROPOSAL FOR BIDS.

**SEALED BIDS** will be received at the Office of the Comptroller of the United States, California, Berkeley, California, at or before 11 A. M. August 9, 1915, for the Excavation and Concrete, Structural Steel, Steel Erection, Roofing and Sheet Metal, Lathing and Plastering, Carpentry and Interior Finish, Plumbing, Ornamental Metal, Elevator and Acoustic Felt for Benjamin Ide Wheeler Hall on the grounds of the University of California, Berkeley, as per plans and specifications on file and obtainable after 9 A. M., Saturday, July 17th, at the Cashier's window in said Office.

A deposit of \$5.00 will be required for each set of plans and specifications, which deposit will be refunded upon return of said plans and specifications, provided such return is made prior to 12 o'clock, noon, August 10, 1915; no refund will be made after said date. The time of completion of the work will be an important element in the consideration of bids.

No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid, to secure execution of the contract by the successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. (\*)

#### NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Forum Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, August 10, 1915, said bids then and there to be publicly opened and read and for furnishing all plant, material and labor, and doing the work required for the complete construction of the Main Sewer for the Fresno State Normal School, Fresno, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposal for Main Sewer, Fresno State Normal School, Fresno, California." (SIGNATURE)

W. F. MCCLURE,  
State Engineer. (\*)

#### PROPOSALS FOR BUILDING.

**BUILDING.**—Sealed proposals indorsed "Proposals for Officers' Quarters" will be received at the bureau of

yards and docks, Navy Department, until 11 o'clock a. m. August 21, 1915, and then and there publicly opened for 4 one-story officers' quarters of wooden construction at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station command. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR BUILDING.

**BUILDING, ETC.**—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. August 21, 1915, for the construction, complete (including mechanical equipment and approaches) of the United States post office at Grand Junction, Colo. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or at this office, at the discretion of the supervising architect. JAMES A. WETMORE, acting supervising architect.

#### PROPOSALS FOR EXCAVATION.

**EXCAVATION.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the Office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. August 12, 1915, for about 355,000 cubic yards of canal excavation. This work is located from three to ten miles from Saco, Mont., on the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C., Denver, Colo., or Malta, Mont. MORRIS BLEN, acting director.

#### TOWER OF BABEL.

Its Remains Are Believed to Stand Near Babylon's Ruins.

It is doubtful if there is any place in the world so rich in ancient remains as the valley of the Euphrates, in Mesopotamia. The result is that to archaeologists and scholars the place is a veritable "Tom Tiddler's ground," and new "finds" are constantly being reported.

When it is remembered that tradition places the site of the Garden of Eden here, while among its many ruins are those of ancient Babylon, the promising nature of the valley to the scientific excavator becomes apparent.

It is near the ruins of Babylon that we find what many scholars believe to be the remains of the Tower of Babel—an immense cube of brickwork, called by the natives Birs Nimrud.

Recent exhaustive examination of the strange pile and its site has revealed the fact that the tower that once stood here consisted of seven stages of brickwork on an earthen platform, each being of a different color.

The tower boasted of a base measurement of nearly 600 square feet and rose to an unknown height. Even today the ruins rise some 160 feet above the level of the surrounding plain.—Wide World Magazine.

#### REINFORCED CONCRETE WORK IN EGYPT.

A remarkable piece of reinforced concrete work is the jetty at the port of Alexandria, Egypt. The entire construction has a total length of 330 feet, and is made up of a series of caissons in reinforced concrete which are floated into place in the sea. Such caissons are 5 in number and measure 66 feet long by 26 feet wide and 20 to 22 feet high, and are built on the Hennebique system. Caissons are let down a slipway into the water, and one or more steam tugs serve to tow them into place, where they are let down on the prepared bed of the sea. Concerning recent work in Egypt we may also mention an embankment wall on the Nile at Ghiesreh which was very successfully carried out—Portland Cement.

Notwithstanding the great improvement in farm implements and methods of agriculture in the western hemisphere, there are still sections of China in which the primitive methods of hundreds of years ago are still employed. In plowing two men with ropes over their right shoulders and going tandem haul a very crude affair that turns a furrow six inches wide. In plowing an acre they travel fifteen miles. As each furrow is opened the seed is scattered, the next furrow covers it.

## White Brothers

5th and Brannan Streets San Francisco

**\$255;** bowling alleys to Brunswick-Balke-Coffender Co. Bids are now being taken for the mill work, hardwood floors and lighting fixtures.

**HOTEL ALTERATIONS**—2, 4 story class C construction. Cost not stated. San Francisco. Architect, William H. Armistage, 323 Montgomery street, S. F. Owners, Keane Estate. Two buildings belonging to this estate and located on the west side of Grant avenue between Washington and Jackson are to undergo extensive alterations. The work will include interior partitions, plastering, electric work and painting. No exterior changes will be made. Plans are complete and figures are being taken.

**SCHOOL**—3 story and base, brick and steel, \$100,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Cogswell School. The building will be erected at the corner of 26th and Folsom streets and will be a fireproof structure. Interior has been designed for a number of class rooms, auditorium and library. The trim will be of pine and hardwood. Maple floors will be used in the class rooms. Plans provide for steam heat, an oil burning system and hot water supply. Vacuum cleaning is also specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken for the structural steel work. Other parts of the work will be figured later.

**RESIDENCE**—2 story and base, frame, \$2,800. San Francisco. Architect, none. Owner, B. J. Hooper, 766 5th avenue, S. F. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on the east side of 17th avenue south of Geary street. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Bath room will be finished in tile. Plans provide for furnace heat and open fire place. Mantel will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—1 story and base, frame, \$2,000. San Francisco. Architect, Parkside Home Builders, Crocker Bldg., S. F. Owner, Oscar E. Middlestadt. The dwelling has been designed for a seven-room house and will be erected on 21st avenue south of Ulloa. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantel. An automatic water heater will be installed. Bath room will have tile wainscot and floor. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**APARTMENT HOUSE**—4 story and base, reinforced concrete, \$35,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Smith & Stewart. The building will be erected on the south side of O'Farrell street between Polk and Van Ness, having a frontage of 27½ feet and a

depth of 120 feet. There will be a total of 27 suites of two rooms each besides a large and attractive lobby, office and amusement room. Interior will be finished in pine, white enamel and mahogany. All suites will have private baths and wall beds. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Plans provide for steam heat, an automatic elevator, oil burning furnace, hot water supply and vacuum cleaning. Exterior has been designed in the Pueblo style and will be faced with cement plaster. Plans are being prepared.

**FLATS**—3 story and base, frame, \$3,000. San Francisco. Architect, Theo S. Boehm, 4419 19th street, S. F. Owner, F. J. Boehm, 4419 19th street, S. F. The building will be erected on the east side of 16th avenue north of Balboa, and has been designed to contain three modern flats of five and six rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath rooms. Each living room will have an open fire place and tile or brick mantel. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

## City Bids Opened.

### Board of Works Received Figures For Addition to Municipal Car Barns And For Railroad Equipment.

At the Wednesday afternoon meeting of the Board of Public Works bids were opened for constructing the second story addition to the Municipal Car barns at Geary street, also for furnishing a work car for the Municipal Railways.

At the same meeting the Board of Public Works awarded the contract for the improvement of Irving street from 26th to 23rd avenues to J. McHugh for approximately \$11,000. Other awards made were to the United States Steel Products for Sec. A and D of the Municipal Railroad for track fastenings; to Eccles & Smith for Sec. B of the same contract and to the Track Specialties Co. for Sec. C.

A resolution, passed to print by the Board of Supervisors, was received by the Board of Works calling for the construction of sewers in El Portal

Way, between Kennington and the Twin Peaks Tunnel Reservation. Bids will be called for as soon as the plans are approved by the Board of Works.

### BUILDING IN JUNE ACTIVE.

#### City Building Department Reports Over Million and One-Half In- vested in Building Construc- tion.

Approximately \$1,500,206 were spent  
 in the erection of buildings during the  
 month of July, according to the figures  
 of the City Building Department. For  
 this amount 620 permits were issued.  
 In the report is included the \$550,000  
 hospital building to be erected at  
 Fourth avenue and Parnassus by the  
 Regents of the University of California,  
 the second story addition to the  
 Geary Street Municipal Car Barn at  
 \$26,747 and a building for the Harbor  
 Commissioners at an estimate of \$14,-  
 281.

The complete report is as follows:

Class	No. of Bldgs.	Amount.
Class "C"	13	\$182,282
Frames	570	\$80,831
Alterations	434	146,065
State Building	1	550,000
Harbor Commissioners	1	14,281
Public Buildings	1	26,747
	620	\$1,500,206

### OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,  
 frame, Cost not stated, Berkeley, Alameda  
 Co., Cal. Architects, Banning &  
 Stewart, 5215 Broadway, Oakland.  
 Owner, Mr. Blair. The dwelling will  
 be erected at the corner of Uplands  
 and El Camino Real, and has been de-  
 signed for an eight-room house with  
 bath and sleeping porch. Interior will  
 be finished in pine and hardwood with  
 white enamel in the bed rooms. Hard-  
 wood floors will be used in the living  
 room, dining room and reception hall.  
 Plans provide for furnace heat and  
 open fire places. Mantels will be of  
 tile and brick. Bath room will have  
 tile floor and wainscot. An automatic  
 water heater will be installed. Exter-  
 ior of the dwelling will be covered  
 with cement plaster on metal lath.  
 Plans are complete and figures are  
 now being taken.

RESIDENCE — 1 story and base,  
 frame, \$2,500, Oakland, Cal. Architect,

home. Owner, William F. Neary, 1723 Telegraph avenue, Oakland. The dwelling will be erected at the corner of South Court and Walk streets, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$7,000. Oakland, Cal. Architect, Sidney E. Newsum, Nevada Bank Bldg., S. F. Owner, Sidney E. Newsum. The dwelling will be erected in Crocker Highlands, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat open fire places. Mantels will be of tile and brick. A hot water circulating system will be installed. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being revised and new figures will be called for shortly.

**RESIDENCES**—2, 2 story and base, frame, \$1,500 each. Oakland, Cal. Architect, none. Owner, C. M. MacGregor, 470 13th street, Oakland. These dwellings will be erected on the north side of Mandana Boulevard west of Paloma, and each has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and floors will be used in the bath rooms. Plans provide for automatic water heaters. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$1,000. San Lorenzo, Alameda Co., Cal. Architects, Mau & Sprague, MacDonough 1842, Oakland. Owner, J. L. Marlin. The dwelling will contain eight rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**STREET PAVING, GRADING AND CURBS**—Cost not stated, San Leandro, Alameda Co., Cal. Engineer, City Engineer, San Leandro. Owners, City of San Leandro. Bids for a large amount of street work are now being received

by the Board of Trustees. Bids on the work close August 16th between 8 and 9 p. m. The following streets will be improved: Hays street, San Miguel street, Santa Rosa street between Callan and Estudillo avenue; San Rafael street from Estudillo and Juana avenue; San Leandro street from Joaquin to Juana avenues; Juana avenue from Santa Clara street to Grand avenue. The improvement will consist of construction of sidewalks, grading, paving, curbing and macadamizing, construction of cast iron and concrete culverts, etc. Plans together with full information regarding the work may be had from the City Engineer.

**APARTMENT HOUSE**—3 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, C. M. Cook. Owner represented by Olin Offield, Phelan Bldg., S. F. The building will be erected at the corner of Durant Way and Telegraph avenue, and will cover an area of 80 by 120 feet. There will be a total of 84 apartments of two and three rooms. Interior will be finished in pine and hardwood veneer. Some hardwood floors will be used. There will be steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by Mr. Offield, Phelan Bldg.

**APARTMENT HOUSE**—3 story and base, frame, \$35,000. Oakland, Cal. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner's name not given. The building will be erected at the corner of Harrison and Grand avenue, and has been designed to contain a total of 25 suites of two, three and four rooms, all with private baths and wall beds. Interior will be finished in pine with some elm panels and hardwood floors. Plans provide for steam heat, oil burning system and hot water system. Bath rooms will have tile wainscot. Marble and tile will be used in the entrance lobby. Exterior of the building will be covered with veneer pressed brick and cement plaster. Plans are being prepared.

#### Contracts Awarded.

**SAN JOSE AND THE SANTA CLARA VALLEY.**

RESIDENCE—2 story and base, frame. Cost not stated. Burlingame, San Mateo Co., Cal. Architect, Carl Gieffuss, 16 Kearny street, S. F. Owner's name withheld. The dwelling will contain eight rooms, bath and sleeping porch. A separate garage will also be erected on the property. Interior of the house will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and marble. Bath room will have the floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will

be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**BRIDGES**—2, reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the County Supervisors plans and specifications prepared by the County Surveyor for two bridges in Santa Clara County were approved, and the Clerk of the Board was instructed to receive bids for the same until August 23rd at 11 a. m. Both structures will be of reinforced concrete. One will be a slab type bridge with reinforced concrete culverts and will be erected on the Shannon road. The other will be a two-span girder bridge and will be erected on the Bodfish road over Bodfish Creek. Plans may be obtained from the County Surveyor.

**ROAD CONSTRUCTION**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The County Supervisors have instructed the County Surveyor to prepare plans and specifications for the improvement of Stevens Creek road from San Jose to Meridian Corners, and Saratoga avenue from Meridian Corners to Saratoga. Plans were also ordered for improving the following roads: Saratoga avenue from Santa Clara to Meridian Corners and Stevens Creek road from Meridian Corners to Saratoga and Mountain View road; Saratoga and Mountain View road from San Francisco road to the town of Los Gatos; Alum Rock avenue from San Jose to Alum Rock Park; also Congress Springs and Summit road. On completion of plans bids will be called for.

#### Contracts Awarded

July 10, 1915—LOT 13 BLK 69 Naglee Park Tract, San Jose. W L Bierbach to C S Collins....June 18, 1915

#### MARIN, CONTRA COSTA AND SONOMA COUNTIES

**RESIDENCE**—2 story and base, frame, \$16,000. Yountville, Napa Co., Cal. Architect, Sidney B. Newson, Nevada Bank Bldg., S. F. Owner, Bertran E. Nixon. The dwelling has been designed to contain fifteen rooms, three baths and sleeping porches. A separate garage and summer house will also be erected on the grounds. Interior of the dwelling will be finished in pine and hardwood. Walls will be covered with painted canvas. Hardwood floors will be used in the principal rooms. There will be a vapor system of steam heat with wood burning furnace. Bath rooms will be finished in tile and equipped with showers. A hot water circulating system will be installed. Vacuum cleaning is specified. The grounds have been laid out in formal gardens and will contain a large lily pond. Exterior of the house will be covered with cement plaster on metal lath, brick and filed stone. Plans are complete and figures are being taken.

**BOULEVARD CONSTRUCTION—\$38,665.** Martinez, Contra Costa Co., Cal. Engineer, County Surveyor E. E. Arnold, Martinez. Owners, Contra Costa Co. The Board of Supervisors has decided to call for bids for the construction of the first unit of the boulevard system to run through Contra Costa County. The first strip will extend for a distance of about three miles, ending about 150 feet below the bridge over San Pablo Creek. The construction of this road will cost about \$12,000 a mile, according to County Surveyor E. E. Arnold, the amount of the first contract being approximately \$38,665. Plans call for concrete road with macadam shoulder on each side, making a road about 22 feet wide.

**SEPTIC TANK**—\$800. Pittsburg, Contra Costa Co., Cal. Engineer, W. H. Castner, Pittsburg. Owners, Town of Pittsburg. All bids received by the Town Board for the septic tank have been rejected as they were higher than the estimate of W. H. Castner, designer of the system, which was \$800, while the lowest bid received was that of S. B. Withers at \$1,250.

**STREET IMPROVEMENT**—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. City Engineer Chapman has recommended to the City Council the improvement of First, Third and Fourth streets between Chanslor avenue and the Santa Fe right-of-way.

**STREET IMPROVEMENTS**—Cost not stated. Napa, Napa Co., Cal. Engineer, Town Engineer, Napa. Owners, Town

of Napa. All bids received by the City Council for the improvement of First street have been rejected and new bids have been ordered called.

**STREET IMPROVEMENT** — \$3,000. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Ten bids were received by the Council for the improvement of Laurel avenue in the Stege District. Galbraith & Jones, 156 S. 14th street, Richmond, it is thought, submitted the lowest bid at approximately \$8,000.

**SUBSTATION** — 1 story, reinforced concrete. Cost not stated. Lime Point, Marin Co., Cal. Engineer, Engineering Dept. Pacific Gas and Electric Co., S. F. Owners, Pacific Gas and Electric Co. Plans are complete and a contract will be let at once for a new substation which will be erected by the Pacific Gas and Electric Co. at what is known as their Lime Station in Marin County. The building will be 40 by 50 feet, and will have steel frame, steel roof trusses and reinforced concrete walls and roof. The steel work is being done by the Western Iron Works.

**BANK**—2 story and base, reinforced concrete. Cost not stated. Rio Vista, Solano Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Bank of Rio Vista. The building will be designed in the classic style and will be a fireproof structure. The entire main floor and basement will be occupied by the bank. Upper floor will be used for offices. Interior will be finished in pine, hardwood and ornamental plaster. Fireproof vaults will be specified. There will be a central heating system with oil burning equipment. Exterior of the building will be faced with pressed brick. Plans are being prepared.

### Contracts Awarded

**BANK**—1 story and base, brick and concrete, \$20,000. Rio Vista, Solano Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, First National Bank of Rio Vista. Contractor, Harvey A. Klyce, Sheldon Bldg., S. F. Contract price, \$20,000.

**BRIDGE REPAIRS**—\$1,819. Napa, Napa Co., Cal. Engineer, Town Engineer, Napa. Owners, Town of Napa. Contractor, William M. Coffield, Napa. Contract price, \$1,819.

SACRAMENTO, STOCKTON AND  
NORTHERN CALIFORNIA

BRIDGE—Steel and reinforced concrete. Cost not stated. Redding, Shasta Co., Cal. Engineer, County Surveyor, Redding. Owners, Shasta County. Plans A and B for a wagon bridge across Clear Creek on the Igo road were adopted at the last meeting of the County Supervisors and bids were ordered received until August 21st. Plan A calls for a reinforced concrete bridge and plan B for a steel structure. Plans and specifications together with full information may be had from the County Surveyor at Redding.

BRIDGE—Reinforced concrete. Cost not stated. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans have been completed and approved for the construction of a highway bridge over Butte Creek on the State Highway between Nelson and Chico. Bids are now being taken and will be opened on August 17th. Plans and specifications can be secured from the County Clerk.

HIGHWAY CONSTRUCTION—Cost not stated. Sacramento, Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids were opened at the last meeting of the State Highway Commission for constructing highways in five counties. A complete list of these bids will be found under the heading of San Francisco in this issue.

STREET IMPROVEMENTS—Cost as follows. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids received for the improvement of Weber and Miner avenues, Market, Commerce, Sonora, Church, Washington, Sutter and San Joaquin streets, are as follows: Eaton & Smith, 407 11th street, S. F., \$84,556.70; Federal Construction Co., Sharon Bldg., S. F., \$98,007.55; Clark & Henery, Ochsner Bldg., Sacramento, \$99,003.05. All bids were taken under advisement. An award will probably be made at the next meeting.

SEWERS AND STREET IMPROVEMENTS—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The City Council has adopted plans and specifications and has ordered bids called for the construc-

tion of storm sewers in parts of Maple, Elm, North Commerce, North Center and North El Dorado streets. Plans for the work may be secured from the City Engineer at Stockton. The Council also adopted a resolution of intention of the improvement of East street between Park and Poplar streets, to consist of asphalt concrete paving and concrete curbs and gutters.

CHURCH—2 story, and base, reinforced concrete, \$30,000. Sacramento, Cal. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Roman Catholic Church of Sacramento. The building has been designed in the Mission style and will contain an auditorium seating 750 people. The plans also provide for Sunday School rooms and a large hall. Interior will be finished in pine and ornamental plaster. There will be a central heating system. Art glass windows and marble altars will be provided. Exterior of the building will be faced with cement plaster. Plans are being prepared.

FIRE HOUSES—2, 1 and 1½ story and base, brick and frame. Cost as follows. Stockton, San Joaquin Co., Cal. Architects, Ralph P. Morrell, Odd Fellows Bldg., and W. B. Thomas, Yosemite Bldg., Stockton. Owners, City of Stockton. A. J. McPhee & Son, Stockton, presented the lowest figures for both the Rose street and California street fire houses and will probably be awarded the contracts. Their bid for the Rose street house was \$5,696.50, oak floor, \$150 extra, and slate roof, \$160 extra. California street house, \$6,975.

BRIDGE—Reinforced concrete. Cost not stated. Dunsmuir, Siskiyou Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans are complete and figures are now being taken for the construction of a large reinforced concrete bridge over the Sacramento River. The structure will be 332 feet long with one arch of 180 feet clear span and two arches of about 114 feet clear span. Bids will be opened on August 23rd. Plans and specifications can be secured from the State Highway Commission at Sacramento or its branch offices in San Francisco or Los Angeles.

SCHOOL—1 story, hollow tile construction, \$15,610. Galt, Sacramento Co., Cal. Architect, Clarence C. Cuff, Ochsner Bldg., Sacramento. Owners, Galt School District. Contractors, E. E. Etherton & Co., Monadnock Bldg., S. F. The contractors are now taking sub-figures on all parts of the work except the concrete and carpentry.

ROAD MACHINERY—Cost not stated. Sonora, Tuolumne Co., Cal. Engineer, County Surveyor, Sonora. Owners, Tuolumne County. The County Board of Supervisors are taking under advisement the purchase of a ten-ton gasoline roller, a six thousand pound scarifier and an immense grader for the improving of the county roads.

BRIDGE—Reinforced concrete, \$6,000. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractor, V. M. Price. Contract price, \$6,000.

BRIDGE—Reinforced concrete, \$28,235. Shasta Co., Cal. Engineer, State

Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractors, Ross Construction Co., Sacramento. Contract price, \$28,235.

BRIDGES—2 reinforced concrete, \$5,450. Shasta Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractor, F. Rolandi, S. F. Contract price, \$5,450.

## Contracts Awarded

## LOS ANGELES AND SOUTHERN CALIFORNIA.

CHURCH—1 story and base, brick. Cost not stated. Riverside, Riverside Co., Cal. Architect, Thomas Franklin Power, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building

has been designed in the classic style and will cover a considerable ground area. The main auditorium will seat 550 people. Plans also provide for Sunday school rooms. Interior will be finished in pine with ornamental plaster. Art glass windows are specified. Exterior of the building will be faced with cement plaster. Plans have been revised and new figures are being taken. The foundation work is complete.

**FLATS**—2 story and base, frame, \$30,000. Los Angeles, Cal. Architect, H. H. Whiteley, Story Bldg., L. A. Owner, Henry M. Jones. The building will be erected on West Washington street near Rose Hill, and will contain a total of 15 flats. The design is in the Italian patio style. Interiors will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. A central heating system will be installed. Bath rooms will be finished in tile. Exterior will be covered with cement plaster on metal lath. Plans are being prepared.

**COUNTRY CLUB**—1 story and base, frame, \$20,000. Los Angeles, Cal. Architects, Edelman & Barnett, Black Bldg., L. A. Owners, Concordia Country Club. The building will be erected about seven miles out of the city and has been designed for living rooms as well as the usual club rooms. There will be a large banquet hall, ball rooms and office. Interior will be finished in pine with some hardwood. Hardwood floors will be used throughout. Plans provide for a central heating system and open fire places. Mantels will be of field stone. Exterior of the building will be covered with cement plaster and shingles. Plans are now being prepared.

**HOSPITAL GROUP**—San Bernardino, San Bernardino Co., Cal. The main building will be a four-story structure and will contain the administration offices, reception rooms, consultation rooms, dispensary, nurses' quarters, etc. There will be two two-story wings to contain the operating rooms, wards and private rooms for patients. The tuberculosis ward, indigent quarters and criminal ward buildings will be located at different points on the site. The entire group of buildings will accommodate about 246 patients. The style of architecture will be Spanish Renaissance. The main building will be of reinforced concrete construction with plastered exterior and clay tile roof. The other buildings will be of metal stud and metal lath and plaster construction with tile roofs. The equipment will be modern in every particular with hospital plumbing, elevators, steam heat, marble and tile work, etc. There will also be a number of residences and cottages for the superintendent, doctors and other members of the hospital staff. Plans are being prepared.

**JETTY**—Earth and concrete. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Engineer, County Surveyor, San Luis Obispo, Owners, San Luis Obispo County. The County Supervisors have directed the Surveyor to prepare plans and specifications for the construction of a jetty or such other improvements as may be necessary to confine the water of the

Santa Maria River in the channel of said river under the Santa Maria bridge at the Santa Maria River crossing.

**CHURCH AND RECTORY**—1 and 2 story, frame, \$20,000. Wilmington, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. The church will cover an area of 50 by 140 feet and, besides the main auditorium, which will seat 400 people, there will be Sunday school rooms and a parish hall. The rectory will contain eight rooms, baths and sleeping porch. Interior of both the church and rectory will be finished in pine. Some hardwood floors will be used. There will be open fire places and tile mantels. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SCHOOL**—1, 2 and 3 story, brick. Cost not stated. Los Angeles, Cal. Architects, Nedham & Cline, Brockman Bldg., L. A. Owners, City of Los Angeles. The building will be known as the Lincoln High School and will be erected on North Broadway. The auditorium will cover an area of 100 by 110 feet and will seat 500 people. The library building will be three stories, covering an area of 93 by 88 feet, and the music building, a two-story structure, covering an area of 54 by 110 feet. Interiors will be finished in pine with maple floors. There will be considerable marble and tile work and ornamental plaster. Plans provide for steam heat, modern school plumbing, vacuum cleaning and program clocks. Exterior will be faced with cement plaster. Roofs will be of clay tile. Plans are complete and figures are being taken.

**SCHOOL**—1 story and base, brick, \$30,000. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Redondo Beach Grammar School District. The building will cover an area of 213 by 187 feet and will contain eight class rooms, office, an auditorium seating 180 people and two play rooms. Interior will be finished in pine. Maple floors will be used in the class rooms. Plans provide for steam heat, oil burning furnace and modern school plumbing. Exterior of the building will be faced with ruffled brick. Plans are now being prepared.

**SCHOOL**—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, O. P. Dennis and H. H. Hewitt, Fay Bldg., L. A. Owners, City of Los Angeles. The building will be erected on the 24th street lot, and has been out for figures recently. All bids were rejected and plans are now being revised. New bids will be called for shortly.

**SCHOOL**—2 story and base, brick, \$30,000. Los Angeles, Cal. Architects, Jeffery & Schaeffer, Citizens' National Bank Bldg., L. A. Owners, City of Los Angeles. This building has recently been out for figures but all bids were rejected and plans are now being revised. New bids will be called for shortly. The building will be erected on the Annandale School site.

**SCHOOL**—1 story, brick and frame. Cost not stated. Saticoy School District, Ventura Co., Cal. Architect, G. S. Bliss, Thomas Bldg., Santa Barbara, Owners, Saticoy School District. The building will be partly of brick and

partly of frame construction. Interior will be finished in pine with some maple floors. Separate bids are being taken for the general construction, heating, plumbing, electric work and painting. Plans can be secured from the architect. Bids will be opened on August 2nd.

**ROAD IMPROVEMENT**—Cost not stated. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside, Owners, Riverside County. Plans are complete and figures will be opened on August 4th for the following: Improvement of a portion of divisions B and C, Route No. 2 (Murrieta to foot of Temecula grade) the improvement consisting in part of grading and paving with concrete 16 feet wide and 1 inches thick 8.6 miles of road, also a 60-foot concrete bridge which may be bid on separately. Plans are on file at the office of the County Clerk at Riverside.

**LIBRARY**—1 story and base, brick or hollow tile, \$35,000. Los Angeles, Cal. Architect, W. H. Dodd, Marsh-Strong Bldg., L. A. Owners, City of Los Angeles. The building will be erected at the corner of First and Chicago streets, covering an area of 100 by 80 feet. There will be two large reading rooms, stack room and office for the librarian. Interior will be finished in hardwood with hardwood floors. Hollow tile interior partitions and metal window sash and frames are specified. There will be steam heat, oil burning furnace and vacuum cleaning. Metal book stacks are specified. Exterior of the building will be faced with gray pressed brick trimmed with terra cotta. A clay tile roof will be used. Plans are complete and figures are being taken. Bids will be opened on August 20th.

## "American Builders' Week" at Panama-Pacific International Exposition

The most important coming event of the year to Builders is unquestionably "American Builders' Week" at the Panama-Pacific International Exposition in October next, from the 18th to the 23rd. Indeed it is doubtful whether any event in the history of the United States can possibly have any greater significance to Builders and the allied trades.

The importance of the Builder, as an individual as well as collectively, his intimate connection with all industrial and national progress, is at once manifest when we recall the fact that forty

per cent of the entire population of the United States is directly or indirectly dependent upon the Building industry and its success. No one line of business has more to do with progress than the builders of homes, of cities and towns and those public utilities upon which the comfort, among the building fraternity of this great nation, has ever occurred before, health, and happiness of our people depend.

No such opportunity as American Builders' Week, of promoting harmony nor could a more appropriate place or season for such a gathering have been selected.

The assembling of many thousands of Builders from every city and corner of the country to participate in such a Builders' celebration cannot fail to promote and foster an interchange of progressive thought upon technical and business matters or to more firmly establish good fellowship, educational and social intercourse.

Actively identified as Builders naturally are in the upbuilding and development of our cities and towns, these visitors to San Francisco this year will have not only the opportunity of viewing the greatest constellation of exquisitely beautiful Exposition buildings ever built, but in the City by the Golden Gate, renowned the world over for its progress and hospitality, they will find what is today, without doubt, the most up-to-the-minute, modern city, in the world.

From a mass of ashes, ruins, and complete desolation which covered over four square miles in April 1906, a new city has arisen! A new San Francisco, The "Queen of the West," and she stands today an eloquent monument to her local Builders, the men who are now cordially inviting their brethren and all who build, to come and view their finished work, to share their hospitality, and to contribute by their presence, to the joy and success of American Builders' Week.

It is eminently fitting therefore, that at this great international Exposition, which commemorates the bringing together, the uniting of two great oceans Builders, that our national Builders in every line of activity, should also be brought together and be permanently united in lasting bonds of friendship, sympathy, and mutual support, upon a scale never before attempted.

We learn that a strong general committee embracing representatives from all branches of the building business in San Francisco, with numerous sub-committees, are actively engaged in making the necessary arrangements to insure the success of this great celebration of Builders. Invitations to attend are being sent to every Builders' Exchange and similar organizations, in the country and to the Building press.

It may be mentioned that the San Francisco Builders are receiving the cordial co-operation of the Exposition authorities who join in extending a special invitation to Builders to attend the Exposition during American Builders' Week.

It may also be stated that the leaders in every trade connected with the San Francisco Building industry, the local building material firms and supply houses are all heartily co-operating with the Builders in this movement.

By no means the least attractive feature of the gathering in October will be the attendance of the large number of ladies who will accompany the visiting Builders from every state in the union. These ladies will be welcomed by committees of ladies prominent in San Francisco society.

It is suggested that those Builders who already contemplate visiting the Exposition either before or after the period between the 18th and 23rd of October next, now try to make it convenient to visit the Exposition during American Builders' Week, as a special daily program of particular interest to visiting Builders is being arranged.

We are asked to state that additional information may be obtained by addressing the "Publicity Committee, American Builders' Week, Care General Contractors' Association, 110 Jessie Street, San Francisco."

## Gold Metal Highest Award For Henderson's Metal Furring And Clamp System.

The jury of the Panma-Pacific International Exposition has awarded W. D. Henderson, Monadnock Bldg., San Francisco, the highest award, Gold Medal, on his improved metal partition construction exhibit in the Palace of Liberal Arts.

This exhibit shows the only hot roll channel partition system on the market and the only clamp for this particular purpose. These systems while only on the market a few months, are being used in the best of fireproof buildings in this part of the State. A thorough demonstration is given daily at the exhibit, showing the mechanical, economical and rapid installation of these systems. Many proposed builders have approved of same for residence work as well as other buildings on account of it being fireproof and a safety to life and property.

Send for descriptive catalogue to, W. D. HENDERSON, Patentee and Owner, Monadnock Bldg., San Francisco.

## TO CUT ALASKAN TIMBER FOR U. S. RAILROAD.

### Engineering Commission Gets Permit to Take 85 Million Feet From Chugach National Forest.

WASHINGTON, July 29.—The Alaskan Engineering Commission, which is to build the government railroad from Seward on the Pacific 471 miles to Fairbanks in the interior, has received a permit from the Forest Service to cut 85 million feet of timber in the Chugach National Forest for use in constructing the new line. The permit was issued by the District Forester at Portland, Oregon, who has direct supervision of the Alaskan forests, and is in conformity with the Act of March 4, last, which authorized the Secretary of Agriculture to permit the Alaskan Engineering Commission and the Navy Department to take from the national forests free of charge earth, stone, and timber for use in government works. The timber will be cut in designated areas along the right-of-

way of the proposed railroad, which runs through the Chugach National Forest for several miles.

Experiments and tests of Alaskan spruce and hemlock are being made at the Forest Service laboratory at Seattle, Washington, and so far have substantiated the opinion of foresters that Alaskan timber is sufficiently strong for practically all structural purposes. While these tests are going on Forest Service employees in Alaska are making the timber to be cut along the proposed railroad; the cutting to be done so that only mature trees are taken, the young trees being left uninjured and the condition of the forest improved.

This cut of 85 million feet will be the largest amount of timber ever felled on the Alaskan forests in one operation, and at the average rate per thousand board feet obtained for timber sold from the Chugach Forest during the fiscal year 1914, it is worth approximately \$145,000 on the stump. It will be nearly twice as much as the total quantity of national forest timber now cut and used annually for local purposes throughout Alaska, but only a little more than one-tenth of the estimated annual growth of the Alaskan forests. The two national forests of Alaska contain about 75 billion feet of merchantable timber and it is estimated by the Forest Service that more than 800 million feet could be cut every year forever without lessening the forests' productivity.

## PLANING MILL OWNERS ADOPT NEW TRADE RULES.

Commencing August 1st, 1915, The Planing Mills of San Francisco will refuse to give estimates for partial lists of mill work.

It appears that of recent years several mills very often secured parts of the mill work for a job, one mill furnishing the outside mill work, another the doors and sash, another the inside trim, etc. The mills found by experience that this practice is demoralizing and the cause of endless disputes.

The following resolution, adopted by their association is very clear and self explanatory:

"BE IT RESOLVED, that from and after August 1st, 1915, we will figure only the Full Mill Bid of the S. P. Planing Mill Owners' Association, either from plans and specifications or on a complete list furnished; our Full Mill Bid or full list includes Panels, Cabinets, Cases, Sash and Doors, as well as all other millwork."

Our members have arrived at this decision after long and careful consideration as a means of saving time and expense and thereby giving better material to the owner and a much improved service to the contractor. The mill owner, having secured the contract for all the millwork when the building is started, will be able to plan and arrange his work accordingly, will have proper time for the seasoning of the lumber and can make his deliveries promptly when needed.

As the competition between the different mills remains entirely unrestricted, the increased efficiency and reduction of cost to the mill is sure to prove of benefit to the building business in general.

Having set forth our reasons for making this change, we respectfully ask your co-operation in this reform which is intended to be helpful to all parties concerned.

Yours truly,

S. P. PLANING MILL OWNERS' ASS'N.,  
By A. C. Bredfield, Secretary.

## NIGHT SCHOOL FOR ADULTS.

The Washington Evening School at the southwest corner of Washington and Mason streets is enrolling pupils who are working and who have attended Grammar and Primary Schools. The hours are from 7:15 to 9:15 P. M. Special classes for adults. (German, French, Spanish, Italian, Greek). Preparation for Civil Service Examinations. Phone Mission 2132.

Socialism in the industrial arts has long been established in this country in the form of corporations and trusts in which labor and products have been standardized and efficiency methods developed in producing a maximum of products at a minimum price. Socialism both in industry and politics has been developed in Germany to a surprising degree. Bismarck took the workable parts of the Socialistic doctrine and grafted it on to the Imperialistic system. The methods in the industrial arts they have applied to the military system and have made it paramount to everything else.

England and France have had to organize their military supply systems since the beginning of the war. They are developing efficiency systems in the production of munitions and supplies and in time will have a highly efficient system. They have been at a disadvantage since the commencement of the war and have had to waste time and money.

This standardization of product lessens the cost. The standardization of men, no doubt, increases their efficiency as a whole. There is a question as to whether or not it does not tend to lessen their individuality. Individualism and socialism are sometimes diametrically opposed to each other and in the high organization of industry where great numbers of men do one thing and one thing only, the question is whether or not the individual is not lost in the machine. Lord Northcliffe has characterized the German war machine as "massed mediocrity." Whatever it is it has terrible momentum, a momentum against which the individual, however brilliant can not stand.

Another result of this standardization of humanity is that it is essentially brutal and cold blooded. Men are looked upon and carried on the books as so many machines. They are sacrificed in war as so much ammunition or supplies. The women are looked upon to furnish forth a new supply. And in a country like Germany the only people that really count is the ruling class.

How far cold efficiency is to dominate the world remains to be seen. The human element is always to be reckoned with. And just as the spirit of patriotism makes men lay down their lives for their country so the human element will persist in spite of artificial conditions under which it is restrained.

The Hearst exhibit at the Exposition catalogues the great number of publications that Hearst is connected with. And among others the list of daily papers that he publishes include the Deutsches Journal. Seeing Hearst's

picture on the cover of "Fatherland" and reading the Examiner of yesterday, one wonders whether or not the "Fatherland" is not printed by Hearst and the editorials are written by German subjects instead of American citizens.

The last note of the American government to Imperial Germany is not a threat, much less an ultimatum. It states the rights of American citizens on the high seas, the common rights of all neutrals, and asserts that this government must uphold them at any cost. As such protest against barbarous customs it commands and demands the support of not only every American citizen, but of every citizen of a neutral nation as well. And the only attitude for an American citizen to take if he does not agree with the administration is that of Herman Ritter, who quoted the words of Carl Schurz in saying, "My country right or wrong," and further adds that if it is not right it is the citizens' duty to help make it right.

The curse of Europe has been militarism. The states that have existed there have been compelled to keep armed in order to, in some degree, protect themselves. This has necessitated universal military service. Those states that have depended upon voluntary service are now at a disadvantage both as to men and munitions so that the standard of militarism has forced an unequal issue. These facts have forced us to the conclusion that if we are to be of any effect in enforcing a world peace or in compelling nations to abide by solemn treaties we must ourselves prepare to fight. And in such preparation there should be some way of eliminating from the ownership and control of public newspapers such people as William Randolph Hearst, who claim the protection and privileges of this republic while they at the same time do everything in their power to injure it. If we should be compelled to go to war with any nation to protect our rights or in the name of humanity, one of the first acts of this government should be to get rid of Hearst in the name of humanity.

#### PRODUCTION OF GYPSUM IN 1914.

According to G. F. Loughlin, of the U. S. Geological Survey, the production of gypsum in the United States in 1914 was marked by a decrease in tonnage but an increase in value, an increase due to a strong advance in the price of calcined gypsum, which more than offset a decline in price of crude gypsum.

The quantity of crude gypsum mined in the United States in 1914 was 2,476,463 short tons, compared with 2,599,508 tons reported mined in 1913, a decrease of 123,045 tons. The gypsum sold without calcining and used principally as land plaster and as an ingredient in Portland cement and paint amounted to 412,687 short tons, valued at \$616,799, a decrease of 19,419 tons in quantity and \$50,267 in value in comparison with 1913, when the sales for similar purposes amounted to 465,136 short tons, valued at \$697,966. The material marketed as calcined plaster was 1,664,966 short tons, valued at \$6,219,190, as compared with 1,773,849 tons, valued at \$6,677,156, sold calcined

in 1913. The total value of all gypsum marketed in 1914 was \$6,895,989, as compared with \$6,771,822 in 1913, an increase of \$124,167.

Considerable quantities of gypsum plaster, or "stiff," were used in the Panama-Pacific Exposition buildings at San Francisco and in the Panama-California Exposition buildings at San Diego, but they were not sufficient to offset the general decline in tonnage elsewhere. A marked increase in the sales of calcined plaster was noted in 1902 and 1903, which also was largely due to the consumption of "stiff" for buildings at the Louisiana Purchase Exposition buildings at St. Louis.

Gypsum was produced in 18 States and in Alaska in 1914, the same States reporting output in this year as in 1913. The relative rank of the three leading States has remained unchanged for the last four years, New York ranking first, Iowa second, and Michigan third in the output of crude gypsum.

The quantity of raw gypsum ground and sold for land plaster amounted in 1914 to 52,945 short tons, valued at \$97,716, as compared with 54,815 tons, valued at \$95,953, reported in 1913. The quantity of raw gypsum sold for the manufacture of paint and of Portland cement and for various other purposes amounted to 390,742 short tons, valued at \$549,083, as against 408,321 short tons, valued at \$601,113, sold for similar purposes in 1913.

The total quantity of calcined gypsum sold in 1914 was 117,783 tons less than that sold in 1913, but the total value was \$171,434 greater. Nearly 95 per cent of the domestic calcined gypsum marketed in the United States, or 1,565,937 tons, is used for use as wall plaster, Keene's cement, plaster of Paris, and other uses. About 1,250,000 tons of this quantity represents mixed wall plaster.

There were 78 gypsum mines, including quarries and pits, reported active in the United States in 1914, one of which is in Alaska. These mines supplied 68 domestic mills, of which 61 were calcining plants and 7 produced ground gypsum only. Four new mills were reported in operation last year, three in California and one in New York. One mill, located in Nevada, was reported under construction in 1914. About one-half of the active plants which reported on business conditions reported business practically the same in 1914 as in 1913, and the other half found trade poorer. A few producers considered conditions better. The average price of crude gypsum throughout the country decreased 5 cents in 1914 as compared with the price reported for 1913, and the average price of calcined gypsum advanced 34 cents.

#### SEES HUGE TRADE FROM COAST TO AUSTRALIA.

[Honolulu Star-Bulletin, July 1.]  
The development of an immense trade between Australia and the west coast of the United States, the prospects of adding larger steamers to the trans-Pacific service are at this time exceedingly bright, in the opinion of Capt. L. Thompson, master of the British freighter *Werrabee*, who will remain in this city a few days before steaming

to San Francisco or Portland, Ore., to complete his charter.

Australian importers are strongly inclined to favor American-made goods, reports brought to Honolulu to the contrary notwithstanding. I have moved among business and shipping interests at the principal ports on the southern continent for years, and believe I am sufficiently familiar with the situation to realize its great possibilities for expanded trade. Take it from me, American-made articles and American-grown produce will find a ready market throughout Australia. The difficulty of filling this demand at the present time is due solely to a shortage of ships.

#### A SAD REALITY.

Said the Architect to the Builder,

With a large and cheery sigh,

"I'd like to give this job to you

But, Holy Gee, you're high."

"Oh! never mind," the Builder said,

"I'll take it anyway,"

I'll just cut off ten thousand bucks

"And make the SUCKERS pay."

The SUBS came flocking 'round the job

Like flies around a pie,

But all the Builder said to them

Was, "Holy Gee, you're high."

He took their hide, he picked their bones

And scraped their carcass dry,

THEY found the money, brains and skill,

HE found the air and sky.

And when they got all through the job

They owed his ten percent

For hauling rubbish, watchman's fees

And SU PER IN TEN DENT.

#### PHILIPPINE VESSEL COMES VIA PANAMA.

[J. F. Boomer, correspondent, Manila, May 31.]

The schooner *A. J. West*, of 363 tons, equipped with auxiliary power, has sailed from Manila to New York via the Panama Canal. This vessel will be the first ship of Philippine registry to pass the canal. It carries a cargo of lumber shipped by a local firm, valued at \$99,050. The vessel is captained and officered by Americans. The engineers and carpenter are Japanese; the sailors are Filipinos. The *A. J. West* was purchased on the Pacific coast about two years ago, and has been engaged in the lumber-carrying business between Manila and the southern islands. The high freight rates prevailing have made it profitable for the vessel to undertake the voyage to New York.

#### NEW GOVERNMENT PUBLICATIONS.

The Superintendent of Documents, Washington, D. C., announces that he received in stock during the week ended July 17 the following new United States Government publications, which he will sell at the nominal prices affixed:

**Test of structural timbers.** Forest Service Bulletin 148, reprint.—Discussion of various timbers used for structural materials. Price, 20 cents.

**Bitumens, and their essential constituents for road construction and maintenance.** Public Roads Circular 93.—Discussion on the bituminous road materials. Price, 5 cents.

# Building and Engineering News

[Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.]

Issued Weekly, \$3.00 per year

San Francisco, August 11, 1915

Fifteenth Year, No. 27

As a general rule a Superintendent of Streets and Sewers in a small town is not very observant when it comes to the technical details of his work, especially not sewer pipe eight feet under ground and laid before he took office, but there are exceptions, and such an exception is Mr. T. E. Manning of the city of Imperial, Imperial County, California, who observed that the sewer pipe was deteriorating so fast that at times it was almost impossible to make house connections without injuring the main pipe.

The stability of sewer pipe is a matter of utmost importance to the profession as well as to the public at large, and upon hearing of these conditions in Imperial we at once got in touch with Mr. Manning, from whom we received the following communication which speaks for itself:

City of Imperial,

Imperial, Cal., Aug. 7, 1915.

Mr. George Nelson,

Editor Engineering Department,

Building and Engineering News,

360 Mission St., San Francisco, Cal.

Dear Sir:

In compliance with your request for a detailed statement for publication in regard to the condition of the vitrified clay sewer pipe of the Imperial sewer system, I am giving you the following data:

Before the paving was put down we connected all lots not already connected with the sewer, and had therefore occasion to observe the main sewer pipe and its general condition. In numerous instances we found it so soft and deteriorated that merely scraping it on top with a shovel would take off half the thickness of the pipe in a soft and almost muddy condition.

As particular instances, I shall cite a place on Main street near railroad depot, where the top of the pipe got so soft that it caved in and stopped up the sewer, and when we excavated it we found we had to replace six joints with new pipe. At a place on "N" street near Twelfth, where we connected a lot with the main 15-inch sewer, we found this in such a state of deterioration, that

instead of using a cold chisel for chopping a hole for the connection, we broke out some pieces with our hands and then concreted the connection to the main pipe.

In general, we found the pipe in poor condition wherever we had to make a connection, and in many instances the caps placed in the branches had been entirely cemented over and were harder than the main body of the pipe and branch, necessitating great caution in chiseling off the cap so as not to injure the pipe. As the soil here carries alkali, and the deterioration is in evidence both on the outside as well as on the inside, it is evident that both the alkali and the sewer gases are detrimental to the pipe.

Yours very truly,

T. E. MANNING,

Superintendent of Streets and Sewers.

The materials of engineering construction will receive special attention in the proceedings and discussions of the International Engineering Congress to be held in San Francisco September 20-25, next.

The field will be treated under 18 or more topics, covering: Timber resources; preservative methods; brick and clay products in general; life of concrete structures; aggregates for concrete; water proofing; volume changes in concrete; world's supply of iron; life of iron and steel structures; special steels; status of copper and world's supply; alloys; aluminum; testing of metals, of full sized members, and of structures.

Some twenty-five papers are expected for this volume, prepared by authors representing five different countries. The list of authors includes many of the most eminent names in this field of engineering work throughout the world.

These papers, together with discussions contributed by leading American and foreign engineers, will be published as volume 5 of the transactions, and will be illustrated with charts, diagrams and half tones. The volume will form a most valuable acquisition to the library of all engineers and others who may be interested in these phases of engineering work.

## Brick and Tile Production Valued At Nearly 130 Million Dollars.

The great brick and tile industries of the United States in 1914 produced material to the value of \$129,588,822. This was a considerable decrease, according to the United States Geological Survey, from the value for 1913, which was \$143,296,757, but as compared with the output for a number of years preceding it shows a general growth for the industry. Compared with 1911, the figures for 1914 show an increase of \$1,871,201; compared with 1908 they show a gain of \$1,526,615.

### Common Brick.

The principal clay product, considered as to value, is common brick, the value of which comprised over one-third of that of all brick and tile products in 1914. The quantity reported for 1914 was 7,146,571,000, valued at \$43,769,524, a decrease of 942,219,000 brick in quantity and of \$6,365,233 in value from 1913. The average price per thousand of common brick declined 8 cents, from \$6.20 in 1913 to \$6.12 in 1914. Illinois was the leading common brick producing State in 1914, reporting 941,343,000, valued at \$4,898,698. This was a decrease of 214,137,000 brick in quantity and \$1,547,123 in value. This decrease may be in some measure due to strikes in Chicago, the principal brick producing center of the States. New York was second, reporting 908,868,000 common brick, valued at \$4,666,037 in 1914, compared with 1,068,516,000 brick in 1913, valued at \$6,029,103, a decrease in quantity of 159,648,000 brick and \$1,363,066 in value. The average price per thousand in New York declined 51 cents in 1914 from 1913.

Common brick is made in every State of the Union and in the District of Columbia and in Porto Rico.

### Fire Brick.

The second clay product in importance is fire brick, the output of which was valued at \$16,427,547 in 1914, compared with \$20,627,122 in 1913, a decrease of \$4,199,575. The value of fire brick in 1914 comprised 12.68 per cent of the value of all brick and tile products. Fire brick is used principally in the iron and steel and coke-making industries and its production naturally rises and falls with the fluctuations in these industries.

The leading State in the production of fire brick is Pennsylvania. This State reported for 1914, a production, including silica fire brick, of 396,519,000 nine-inch equivalent fire brick, valued at \$7,836,503 or \$19.76 per thousand. This was a decrease in quantity of 97,071,000 brick and \$1,867,231 in value. Pennsylvania produced nearly half the output of the country. Ohio was second in rank in 1914, reporting an output of 102,735,000 fire brick, valued at \$1,833,740, or \$17.85 per thousand, compared with 109,884,000 brick in 1913, valued at \$1,961,020 or \$17.85 per thousand, a decrease in quantity of 7,149,000 brick and in value \$127,280. Missouri ranks third, producing in 1914, 76,177,000 fire brick, valued at \$1,554,431, or \$20.41 per thousand, compared with 104,728,000 brick valued at \$2,128,368 in 1913, a decrease in 28,551 brick in quantity and \$583,937 in value from 1913. Kentucky and New Jersey ranked fourth and fifth, respectively.

Production of fire brick was reported from 33 States in 1914.

### Sewer Pipe.

Sewer pipe, third product in value, with an output worth \$14,014,767, or 10.81 per cent of the total, was made in 28 States in 1914. The leading States in the production of sewer pipe in 1914, named in the order of their importance, were: Ohio, Missouri, California, Pennsylvania, Illinois, Georgia, Indiana, and Iowa. Ohio's output was valued at \$4,691,719 in 1914, a decrease of \$467,829 from 1913. Missouri, on the other hand showed a small increase, \$22,347, from \$1,212,889 in 1913 to \$1,236,236 in 1914. This output in California decreased from \$1,032,094 in 1913 to \$959,193 in 1914, a loss of \$72,901. The decrease in the total value of sewer pipe in 1914 compared with 1913 was \$857,336.

### Vitrified Paving Brick.

Production of vitrified paving brick or block, valued at \$12,500,866 of 9.65 per cent of the value of all brick and tile products in 1914, was reported from 28 States. This is the only important clay product whose output increased in value in 1914. The increase was \$362,645, or 2.99 per cent over 1913. The quantity of vitrified brick decreased 27,356,000 brick from 1913, and the average price per thousand increased from \$12.66 to \$13.42 in 1914. Ohio was the leading State in the production and value of vitrified paving brick in 1914, reporting an output of 293,381,000 brick, valued at \$3,682,230, or \$12.55 per thousand, a decrease in quantity of 1,010,000 brick, but an increase in value of \$373,255 over 1913. Ohio reported about 30 per cent of the quantity and value of the vitrified brick of the country. Illinois ranks second, reporting 157,176,000, valued at \$2,086,344, an increase of 23,238,000 brick in quantity and of \$203,145 in value over 1913, and Pennsylvania ranks third.

### Front Brick.

There were 810,495,000 front or face brick marketed in 1914, valued at \$9,289,623 or 7.17 per cent of the total, a decrease of 17,170,000 brick in quantity and of \$324,515 in value. Front brick was reported from 41 States in 1914. Pennsylvania leads in production and value, reporting 219,923,000, valued at \$2,402,361, an increase of 5,189,000 in quantity and of \$77,160 in value, over 1913. Ohio ranked second, reporting 188,074,000 for 1914, valued at \$1,944,486, an increase in quantity of 2,264,000 brick, but a decrease in value of \$5,947. Indiana ranked third in this product, reporting 80,349,000 brick, valued at \$799,520, an increase of 1913 of 12,147,000 brick and \$90,775. These three States combined produced considerably more than one-half of entire quantity and value of front brick in 1914.

### Drain Tile.

Drain tile ranked sixth among the brick and tile products in value in 1914. The output was valued at \$8,522,039, or 6.58 per cent of the total in that year, a decrease of \$26,281 from 1913. The Middle West is the great producing region for this product (though it was reported from 36 States in 1914). Ohio, Indiana, Michigan, Illinois and Iowa reporting over 88 per cent of the total in 1914. Iowa ranks first, reporting drain tile to the value of \$3,180,836 in 1914, and increase of \$382,020 over 1913. Ohio was second, with \$1,589,565 worth in 1914, an increase of \$81,001 over 1913. Indiana was third in 1914, with \$1,322,002, a decrease of \$263,288 from 1913.

### Fireproofing.

Fireproofing, including hollow building tile, or block, ranked seventh among brick and tile products in value in 1914. It was reported to the value of \$8,385,337, or 6.47 per cent of the total, a decrease from 1913 of \$234,879. Ohio is the leading State, reporting fireproofing to the value of \$2,200,544, an increase of \$84,683 over 1913. New Jersey was second and Iowa third in 1914, New Jersey reporting \$1,599,295, a decrease of \$493,075 from 1913, and the latter \$1,063,397, an increase of \$320,828.84 over 1913.

### Rank of States.

Ohio.—In 1914 Ohio was the leading State in the production of brick and tile, having passed Pennsylvania in the value of these products. As Ohio's products decreased in value this gain in rank was reached by a larger decrease in the value of Pennsylvania's products. The value of Ohio's brick and tile products in 1914 was \$21,815,392, or 16.83 per cent of the total, a decrease of \$53,015 from 1913. Ohio's principal brick and tile products in 1914 were sewer pipe, valued at \$4,691,719, vitrified brick, \$3,682,230, common brick, \$2,862,109, and tile not drain, \$2,331,079. Ohio was the leading State in the production of vitrified brick or block, sewer pipe, fireproofing and tile, not drain.

Pennsylvania.—Pennsylvania ranked second among the States in the value of brick and tile products, having been

displaced from first position in 1914 by Ohio. The value of Pennsylvania's brick and tile products in 1911 was \$20,100,195, or 15.51 per cent of the total for the country, a decrease of \$2,081,888 from 1913. Pennsylvania's principal brick and tile product in 1914 was fire brick, which, including silica brick, was valued at \$7,836,503, a decrease of \$1,867,231 from 1913. Its other large products in 1914 were common brick, valued at \$4,641,269, front brick, \$2,402,361, and vitrified brick, \$2,052,676. Pennsylvania was the leading State in the production of front brick, fancy or ornamental brick, and fire brick.

**Illinois.**—Illinois ranked third among the States in the value of brick and tile products in 1914, as in 1913, reporting wares valued at \$12,538,371, or 9.67 per cent of the total. This was a decrease of \$1,742,237 from 1913. Illinois' principal brick and tile products in 1914 were common brick, valued at \$4,898,698, vitrified paving brick, \$2,086,344, architectural terra cotta \$1,632,945, and drain tile \$1,041,927. Illinois was the leading State in 1914 in the production of common brick, and terra cotta, and second in the production of vitrified paving brick or block. Illinois reported for 1914 every variety of brick and tile products as classified in this report.

**New Jersey.**—New Jersey was the fourth State in the production of brick and tile products in 1914, as in 1913. Its wares in 1914 were valued at \$8,353,296, or 6.45 per cent of the total. This was a decrease of \$2,513,537 from 1913. New Jersey's principal brick and tile products in 1914 were: Common brick, valued at \$1,944,806, architectural terra cotta \$1,620,791, fireproofing, \$1,599,295, and tile, not drain, \$1,139,895. New Jersey is the leading State in the production of enameled brick, and is second in

terra cotta, fireproofing, and tile, not drain. New Jersey reported for 1914 every variety of brick and tile products as classified in this report.

**New York.**—New York was the fifth State in rank in the value of brick and tile products in 1914, as in 1913, reporting wares valued at \$6,923,141, or 5.34 per cent of the total, a decrease of \$1,704,677 from 1913. This decrease was principally in the value of common brick, which decreased in value from \$6,029,102 in 1913 to \$4,666,037 in 1914, or \$1,363,066. Common brick was New York's chief clay product, and terra cotta (valued at \$889,468 in 1914) was its second.

#### Value of Brick and Tile Products in 1914.

	Value.	Percent- age of total
Common brick .....	\$43,769,524	33.77
Vitrified paving brick .....	12,500,806	9.65
Front brick .....	9,289,623	7.17
Fancy or ornamental brick .....	124,459	.10
Enameled brick .....	1,075,026	.83
Drain tile .....	8,522,029	6.58
Sewer pipe .....	14,014,767	10.81
Architectural terra cotta .....	6,087,652	4.70
Fireproofing .....	8,385,337	6.47
Tile, not drain .....	5,705,583	4.40
Steve lining .....	520,585	.40
Fire brick .....	16,427,547	12.68
Miscellaneous .....	3,165,814	2.44
	129,588,822	100.00

Building operations for the month of July have moved on at about the same rate as the months immediately preceding, the total for the month amounting to \$1,347,248; this figure was composed of the following items: Brick and concrete construction, \$404,674; frame buildings, \$626,737; alterations and additions, \$102,606; city buildings, \$50,429; street and sewer work, \$70,241; Municipal Railway construction, \$78,280; State work, \$14,281.

Private construction for the month amounted to \$1,134,017, so that the amount of money expended for public work was negligible. Comparing with the former months of the year the record is as follows:

January, 1915 .....	\$1,284,598
February, 1915 .....	1,637,148
March, 1915 .....	2,049,534
April, 1915 .....	1,939,396
May, 1915 .....	1,212,413
June, 1915 .....	1,679,028
July, 1915 .....	1,347,248

Like the former months the majority of the construction for the past month consisted of frame building, the main deficit consisting of brick and concrete construction. Compared with former years the record for July for the last ten years is as follows:

July, 1906 .....	\$1,959,290
July, 1907 .....	4,687,516
July, 1908 .....	2,921,152
July, 1909 .....	3,144,482
July, 1910 .....	1,596,013
July, 1911 .....	2,126,720
July, 1912 .....	2,217,215
July, 1913 .....	3,626,998
July, 1914 .....	3,085,102
July, 1915 .....	1,347,248

The above figures taken from the files of the Daily Pacific Builder include all construction for the past three years. Prior to 1913, the record consisted only of private construction. The comparison for the past seven months shows about an average result. Considering the general condition of business the record is not discouraging.

One of the very best things about the Pan-American action proposed by Mr. Wilson for the Mexican troubles is that it may disarm the suspicion of the Mexican people and enlist their co-operation. And such Pan-American action may very well be the first quite definite step toward a solid Pan-American League, of which Mexico, restored to tranquility, will be a leading member.

The possible bigger significance in the whole business is indicated in this paragraph of an article by Arthur Bullard in the Century Magazine:

There can be little doubt that a league of American republics would mean peace for us—order and justice within and safety from outside aggression. No matter who wins in this devastating European war, no one will lightly pick a quarrel with all the Americas united. Great oceans protect us from such invasions as fell on Belgium and East Prussia. And within six months Great Britain was able to organize and equip a volunteer army which was bigger than any expeditionary force could be.

President Wilson could not give more convincing proof of the unselfish motives of the United States concerning Mexico. In such immediate action, or in such a continuing league, there is no assumption of authority or of superiority, on the part of the Northern republic. The Monroe Doctrine becomes a partnership affair among all the nations affected by it. Upon the Western Hemisphere there would be such an international confederacy as has been dreamed of for Europe. And the international "police duties" would be but a minor part of the mutual service. Perhaps then—"The league of American republics could most cordially urge other countries to similar action, could lend a powerful helping hand to every peace movement," as Mr. Bullard writes; "and as soon as any new group became organized, a union would be possible. So might we reach the federation of the world."—Kansas City Star.

The Chronicle finds fault with the bookkeeping methods of the government in that the government railroad, now being constructed in Alaska, is allowed to cut timber free of charge from the national forest and to use the same in construction of the road. What concerns the Chronicle is not that the government owns both the timber and the railroad, but that the proper charge will not be made against construction cost so that when comparisons are made with the cost of private construction there will not be shown the proper relation.

In all probability the Chronicle is exercised over the fact that the cost of government construction may show up anew the gigantic frauds that have been perpetrated in railroad construction, the enormous amount of water that should be squeezed out of the capitol stock of the present systems in order to arrive at a proper physical valuation, and will again demonstrate what an enormous amount of the national resources the railroads grabbed in the land grants they obtained for building a trans-continental system. It will be interesting to see just what the Alaskan railroad will cost, built under the difficult conditions under which it must be built.

The Sacramento Bee in speaking of the Exposition and the prospect of every person visiting its says: "The question for them to decide is not whether I can afford to see the Exposition, but can I afford not to see it," which statement seems to about express the idea. For few people can afford not to spend the time and money for the benefit a visit to the great Exposition would give them. It is the latest wonder of the world, the latest inventory of progress, the most beautiful show that has ever been given anywhere or at any time.

### APARTMENT HOUSES

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$15,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, William Linden, 1100 Dolores street, S. F. The building will be erected on the east side of 7th street south of Howard, and has been designed to contain a total of 41 small apartments with private baths and wall beds. Interior will be finished in pine. There will be steam heat, oil burning equipment and hot water system. Bath rooms will be finished in imitation tile. Marble wainscot will be used in the entrance. Exterior will be covered with rustic and brick veneer. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$5,000. Architects, O. R. Thayer and Charles C. Frye, 20 Montgomery street, S. F. Owner, George Gruenig. The building will be erected on the north side of Bryant street east of 25th, and has been designed to contain four small apartments. Interior will be finished in pine throughout. All suites will have wall beds and private baths. There will be a hot water supply. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and a contract will be let at once.

**OAKLAND, CAL.**—Apartment house, 4 story and base, brick, \$18,000. Architects, Richardson & Burrell, Albany Brigham. The building will be erected at the corner of 11th and Oak streets, and has been designed to contain a number of two, three and four room apartments. Interiors will be finished in pine, elm and white enamel. Hardwood floors will be used in the living room, dining rooms and reception halls. Plans provide for steam heat, an automatic elevator, hot water system and vacuum cleaning. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures will be called for at once.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Apartment house and stores, 2 story and base, brick and concrete, \$12,000. Architect, James T. Narbett, 704 Macdonald avenue, Richmond. Owner, Frank Prosser. The building has been designed to contain three stores on the first floor besides the entrance. Upper floor will be arranged for seven suites of three rooms and bath. Interior will be finished in pine. Wall beds are specified. Patent store fronts will be used. Bath rooms will have tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

### BONDS.

**SACRAMENTO, CAL.**—Two and one-half million dollars worth of state highway bonds were sold by the State Treasurer at a sale held recently. The counties which purchased bonds and the amounts they bought are as follows:

Butte, \$150,000; Mono, \$50,000; Stanislaus, \$35,000; Merced, \$100,000; Inyo, \$100,000; Placer, \$250,000; San Luis Obispo, \$135,000; Tulare, \$265,000; Kings, \$55,000; Imperial, \$60,000; Mendocino, \$75,000; Monterey, \$160,000; Colusa, \$120,000; Glenn, \$50,000; Tuolumne, \$35,000; San Diego, \$50,000; Kern, \$50,000; Santa Cruz, \$6,000; Humboldt, \$300,000; Santa Barbara, \$275,000; Santa Clara, \$125,000.

The proceeds of the entire sale will provide funds for highway work to be accomplished in the various counties.

**NEWPORT, ORANGE CO., CAL.**—The proposition to form an improvement district to include all Orange County and the issuance of bonds to provide for the development of a good harbor has received a hearty endorsement from the Associated Chamber of Commerce, at a meeting held recently at Huntington Beach. Circulation of petitions for a county vote on the question of forming a harbor district has already begun.

**VALLEJO, SOLANO CO., CAL.**—C. S. Jackson, of Aberdeen, Wash., is now in Vallejo with the intention of locating a business college. A site for the proposed institution is now being considered. Jackson has received the cooperation of the Vallejo Chamber of Commerce, who will render every possible assistance in having the school established in Vallejo.

**MERCED, MERCED CO., CAL.**—Preliminary discussion, looking forward to a bond issue agitation, has begun by the City Trustees of Merced relative to the eventual municipal ownership of the electric lighting distributing system. The idea is for the city to take over the distributing properties of the light and power corporation, and look to the city for power only.

**DINUBA, TULARE CO., CAL.**—Dinuba Grammar School District will hold an election, August 19, for the purpose of voting on a proposition to issue \$13,000 bonds for school purposes, the issue to be covered by thirteen \$1,000 bonds.

**LOS ANGELES, CAL.**—To provide for certain municipal improvements declared to be necessary this year the Los Angeles City Council is considering the calling of an election for the purpose of voting a bond issue of \$3,000,000.

**CANADA SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—The voters of the Canada School District have requested the School Trustees to call an election for the purpose of voting bonds of \$20,000 to erect a school building.

**FRESNO CO., CAL.**—The Chowchilla School District is among the several in Fresno County which recently held

elections to authorize the issuing of bonds for building purposes. It now transpires that the trustees were not correctly advised as to the manner of holding the elections, and they must be held again. The defect was in failure to conform to a law enacted by the recent legislature, which requires that the polls be kept open from 8 o'clock in the morning until 6 in the evening. In the elections held, the polls were open in the afternoon only.

**FLORIN, SACRAMENTO CO., CAL.**—Bonds of \$10,000 have been voted for the purchase of additional land and the erection of a school. The site for the proposed structure is now under consideration.

**OAKDALE, STANISLAUS CO., CAL.**—The Oakdale Irrigation District Board will order a special election to be held at an early date to vote on a special assessment for certain improvements, repairs, etc., for the district. It is thought that \$75,000 will be the sum voted upon.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—Bonds of \$25,000 will be voted here on August 16th for the erection of a school building.

**RED BLUFF, TEHAMA CO., CAL.**—The Board of Supervisors has set September 3rd as the date for voting bonds of \$140,000 to cover the cost of construction of three bridges to be erected in the county. Contracts for these structures have already been let.

**RIVERSIDE, RIVERSIDE CO., CAL.**—E. M. Bennett has purchased a site on Seventh street and will erect a modern bakery building. From advices received, no architect has been selected.

**BAKERSFIELD, KERN CO., CAL.**—Bids on the \$60,000 bond issue of the Conley High School District, the \$15,000 bond issue of the Maricopa High School District, and the \$2,500 issue of the Rosemond School District were opened by the Supervisors last week. All were sold and the construction of the proposed buildings for which the bonds were voted will soon be under way.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—The City Clerk has been instructed to advertise for bids for the sale of \$121,000 worth of bonds, which were voted for the erection of a pleasure pier. The contract for the construction of the proposed pier has already been let.

**GLOBE, ARIZONA.**—The Board of Supervisors of Pinal County has sold the \$150,000 highway bond issue to R. M. Grant & Co. of Chicago.

**LUNA COUNTY, ARIZONA.**—The Board of Supervisors of Luna County has called a special election for September 14, 1915, for the purpose of voting \$100,000 in bonds for the construction of bridges and county highways.

**WILLIAMS, ARIZONA.**—At a mass meeting held last week action was taken toward the calling of a bond election to vote \$350,000 for the construction of a county highway system.

**HUNTINGTON PARK, ORANGE CO., CAL.**—The proposed bond issue in the sum of \$18,000 for the erection of new school buildings failed to carry at the special election held last Monday.

**BAISTOW, SAN BERNARDINO CO., CAL.**—Bonds in the sum of \$15,000 for the erection of a new grammar school building were voted at the special election held last Saturday. The trustees

of the new Union High School District, who were elected last Saturday, will meet and organize at once.

**BRAWLEY, IMPERIAL CO., CAL.**—The Board of Supervisors of Imperial County will receive bids up to August 16 for the sale of the \$14,000 bond issue of the Brawley School District. The funds will be used in remodeling and repairing the present school buildings.

## BRIDGES AND DAMS

**PATERSON, STANISLAUS CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, A. L. Clary, Modesto. Owners, Stanislaus County. According to word received from this city, County Surveyor A. L. Clary has prepared plans and specifications for the construction of a cement bridge over the Salida Creek, where it crosses the county road immediately north of the town. Bids will be invited at an early date.

**VISALIA, TULARE CO., CAL.**—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, stated. Engineer, County Surveyor, and specifications prepared by County Surveyor Byron O. Lovelace have been approved by the Highway Commission for the construction of two bridge in Tulare County. The Supervisors have issued a call for bids on the work. The work will include the construction of one 100-foot span of the Kings River bridge on the line of the state highway, and one bridge of 40 feet across the Alta District or old "76" canal at Traver. Plans and specifications may be had from the County Surveyor at Visalia.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Bridge reinforced concrete, \$8,199. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, San Luis Obispo County. Engineers Leonard & Day, Rialto Bldg., have received word from the Board of Supervisors at San Luis Obispo to the effect that Allison & Cole, San Luis Obispo, were the low bidders for the reinforced concrete bridge to be erected over the San Luis Obispo Creek about two miles out of San Luis Obispo. Their bid was \$8,199 and an official award of contract will be made at once.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridges, 4, timber construction. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans have been completed and have received official approval for the construction of four timber bridges with approaches. Bids are now being taken. Bids will be opened on August 23rd. Plans can be secured from the office of the County Clerk at San Jose.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans are complete and bids will be opened on August 23rd for the construction of a reinforced concrete bridge over Guadalupe Creek. Plans can be secured from the County Clerk at San Jose.

**SALINAS, MONTEREY CO., CAL.**—Bridge repairs, steel and concrete. Cost not stated. Engineer, County Surveyor, Salinas. Owners, Monterey County. The plans and specifications for repairs to the Chualar bridge have

been approved by the County Supervisors and the Clerk has been instructed to advertise for bids on the work. Bids close August 20th, the next meeting of the Board. Plans and specifications, together with full information, may be had from the County Surveyor at Salinas.

**SANTA PAULA, VENTURA CO., CAL.**—Bridges, 12, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor Petit, Santa Paula. Owners, Ventura County. Plans and specifications for twelve bridges and culverts to be constructed throughout Ventura County are being prepared in the office of County Surveyor Petit. The plans include the construction of the Saticoy bridge, which will cost approximately \$45,000. On completion of the drawings bids on the work will be called for.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Bridges, 3, reinforced concrete. Cost not stated. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, Contra Costa County. At the last meeting of the Board of Supervisors of Contra Costa County plans submitted by Engineers Leonard & Day were accepted for three reinforced concrete bridges to be erected in that county. Bids were called for at the same meeting and the opening date was set for August 23rd. Plans can be secured from either the offices of the engineers or from the County Clerk at Martinez.

**FAIRFIELD, SOLANO CO., CAL.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, County Surveyor, Fairfield. Owners, Solano County. Bids are now being received by the County Supervisors for the construction of three bridges to be constructed on the state highway. The first will be over Pleasants Valley Creek at the Finch ranch in Vacaville Township. The second will be over Green Valley Creek near Nightingale ranch. The third will cross Green Valley Creek near Cordelia. Plans, together with full information, may be had from the County Surveyor at Fairfield.

## Contracts Awarded.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete, \$4,360. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, R. H. Jamison, San Jose. Contract price, \$4,360.

**SALINAS, MONTEREY CO., CAL.**—Bridge construction. Costs as follows. Engineer, County Surveyor, Salinas. Owners, Monterey County. Contractors, Bradley bridge to W. L. Gilman & Son, 112 West Santa Clara street, San Jose, at \$14,400; repairs to San Lucas bridge to McLaren & Peterson, Williams Bldg., S. F., at \$18,000; jetties at Hilltown awarded to Lou G. Hare, Salinas, at \$5,447.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Bridges, 3, timber, \$3,189.93. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractor, Henry Layaz, Redwood City. Contract price, \$3,189.93.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Bridge, reinforced concrete, \$2,978. Engineer, County Surveyor, Riverside. Owners, Riverside County. Contractors, Munoz & Munoz, Central Bldg., L. A. Contract price, \$2,978.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—Pleasure pier, timber and

concrete, \$108,500. Engineer's name not given. Owners, City of Redondo Beach. Contractors, Leyden-Orfseiten Co., Redondo Beach. Contract price, \$108,500.

**EUREKA, HUMBOLDT CO., CAL.**—Bridges, steel and concrete. Cost as follows. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Contractors, F. L. Smith, Eureka, suspension bridge over Trinity River, \$3,786; Farnell & Robinson, Eureka, repairs to North Fork bridge, \$1,692; F. L. Smith, Eureka, suspension bridge over Salt River, \$16,490.

**RED BLUFF, TEHAMA CO., CAL.**—Bridge, reinforced concrete arch girder type, \$109,000. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, Ross Construction Co., Forum Bldg., Sacramento. Contract price, \$109,000.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, 2, reinforced concrete, \$14,000 and \$17,000. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Contractors, McLaren & Peterson, Sharon Bldg., S. F. Contract price, \$14,000 and \$17,000.

**RED BLUFF, TEHAMA CO., CAL.**—Bridge repairs, \$14,890. Engineer, County Surveyor Lunning, Red Bluff. Owners, Tehama County. Contractors, Ross Construction Co., Forum Bldg., Sacramento. Contract price, \$14,890.

### CHURCHES

**FRESNO, FRESNO CO., CAL.**—Church, 2 story and base, brick and steel, \$75,000. Architect, R. F. Hotchkiss, Fresno. Owners, First Church of Christ, Scientist, Fresno. An announcement has just been made of the selection of an architect to design the structure, and no details of the building have been given out. It is understood that the architect and Building Committee will shortly make a tour of the principal cities of the state with the intention of securing ideas for the building. Further mention will be made of the work.

### FACTORIES AND WAREHOUSES.

**SAN FRANCISCO—Winery, 2 story and base, reinforced concrete, \$40,000.** Architect, P. Righetti, Phelan Bldg., S. F. Owners, Promotion Wine and Liquor Co. The building will be erected at the corner of Lombard and Columbus avenue, and will cover a large ground area. Construction will be fireproof. Interior of the front portion of the building will be finished in pine. There will be a number of large storage tanks. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

**SAN FRANCISCO—Shop addition, steel and concrete, \$15,000.** Engineer, Allen G. Ramsay, Union Iron Works, S. F. Owners, Union Iron Works. Plans have been prepared for a considerable addition to the company's mill and joiner shops. The work will require structural steel and concrete besides the addition of special machinery. Plans are complete and figures will be called for at once.

**SANTA CLARA, SANTA CLARA CO., CAL.**—Motion picture studio, 3, 1 and 2 story, frame, \$40,000. Architects, Ellis & Skilling, Garden City Bank Bldg., San Jose. Owners, San Jose Film Company. This group of buildings will consist of a large studio,

scenery lofts, living quarters and stables. Interior finish will be of pine and redwood. Special laboratory facilities are provided. Exterior will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**PATTERSON, STANISLAUS CO., CAL.**—Oil distributing plant, concrete and steel. Cost not stated. Engineer, Engineering Department Standard Oil Co., S. F. Owners, Standard Oil Co. C. O. Flint, assistant superintendent of construction of the Standard Oil Company, has secured a site on Fifth street, upon which the Standard will erect a distributing plant. Three steel storage tanks, 10½ feet in diameter and 39 feet long, each having a capacity of 288 barrels, will be installed—one for distillate, one for gasoline and one for coal oil. In addition to this there will be erected a warehouse and office building 32x40, a pump house 10x20, a stable 22x52 and a wagon shed 22x30.

### Contracts Awarded

**FRESNO, FRESNO CO., CAL.**—Warehouse, 1 story, frame and corrugated iron, \$12,000. Architect, none. Owners, Associated Warehouse Co. Contractors, Hansen Construction Co., Fresno. Contract price, \$12,000.

### FIRE HOUSES AND JAILS.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Jail, 1 story, reinforced concrete. Cost not stated. Architect, none. Owners, City of San Luis Obispo. Plans and specifications prepared by Street Superintendent Burch for the new jail building have received the approval of the City Council. The structure will contain five cells each 8x8 feet in size and one dark cell. Bids will soon be called for.

**PATTERSON, STANISLAUS CO., CAL.**—Jail, 1 story, reinforced concrete. Cost not stated. Engineer, County Surveyor A. L. Clary, Modesto. Owners, Town of Patterson. The building will be of fireproof construction. No details of construction have been given out. Plans are being prepared and figures will be called for shortly. Further mention of the work will be made.

### Contracts Awarded

**STOCKTON, SAN JOAQUIN CO., CAL.**—Fire houses, 2, 1 and 1½ story, frame and brick, \$8,396.50 and \$5,696.50. Architects, Ralph P. Morrell, Odd Fellows Bldg., and W. B. Thomas, Yosemite Bldg., Stockton. Owners, City of Stockton. Contractors, A. J. McPhee & Sons, 316 North California street, Stockton. Contract price, Rose street house, \$5,696.50 and South California street house, \$8,396.50.

### FLATS

**SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500.** Architect, none. Owner, L. C. Conner, 578 10th avenue, S. F. The building will be erected on the west side of 4th avenue south of Clement street, covering an area of 25 by 60 feet. The building will contain two modern flats of five and six rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will

be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

### GARAGES

**OAKLAND, CAL.**—Garage, 1 story brick, \$5,000. Architect, none. Owners, Harris & Hudson, 1957 East 38th street, Oakland. The building has been designed for a commercial garage and will be erected on the west side of Fruitvale avenue north of Hopkins street. There will be a concrete floor. Interior will be finished in pine. Special gasoline storage tanks are specified. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

### Contracts Awarded

**BERKELEY, ALAMEDA CO., CAL.**—Garage, 1 story, brick, \$5,000. Architect, J. Henry Boehrner, Delger Bldg., Oakland. Owner, J. H. Wright. Contractors, Boehrner & Legault, Delger Bldg., Oakland. Contract price, \$5,000.

### GOVERNMENT WORK & SUPPLIES

**SAN FRANCISCO—Officers' quarters and morgue, 1 and 2 story, brick and concrete, \$400,000.** Engineer, Construction Quartermaster's Office, Fort Mason. Owners, United States Government. The Army Appropriation Bill for 1916, which has passed Congress, provides funds for the construction of forty-one officers' quarters and a large morgue building to be erected in the Presidio of San Francisco. The new buildings will replace the old wooden frame quarters which will be torn down, the new buildings being arranged in streets. Construction will be of brick and concrete and is estimated to cost in the neighborhood of \$400,000, and will be carried out under the direction of the Constructing Quartermaster's office at Fort Mason. A part of the work will be out this summer although no additional information is as yet at hand.

### San Diego, Cal., Building.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing seven buildings at the U. S. naval radio station, San Diego, Cal.:

Item 1, price for the work complete, including the construction of a power house, operating building, pump house, quarters for commanding officer, double quarters for chief operators, and quarters for operators; 2, deduct from item 1 for omitting copper gutters and down-spouts; 3, deduct from item 1 for substituting asbestos shingles; 4, deduct from item 1 or item 9 if heating system be omitted from commanding officer's quarters; 5, price for power house; 6, price for operating building; 7, price for storehouse; 8, price for pump house; 9, price for quarters for commanding officer; 10, price for double quarters for chief operators; 11, price for quarters for operators; 12, add to prices under items 1 and 9 if attic of commanding officer's quarters be lathed and plastered and trimmed.

The William Simpson Construction Co., San Diego, Cal, item 1, \$50,082.65;

\$1,247; 3, \$1,000; 4, \$375; 5, \$11,166; 6, \$8,713.30; 7, \$2,650.05; 8, \$1,448; 9, \$3,103.40; 10, \$7,709.85; 11, \$11,205; 12, \$182.

Lewia A. Geisler & Son, 3688 Indianapolis street, San Diego, Cal., item 1, \$52,854; 2, \$942; 3, \$1,458; 50, 4, \$386; 5, 4,343.73; 6, \$9,777.79; 7, \$2,925.12; 8, 70.85; 9, \$7,719.60; 10, \$5,086; 16, 11, 1,595.53; 12, \$88; sewer work, \$917; bestos shingles, \$150.10.

A. F. Keyes, 3rd and E streets, San Diego, Cal., item 1, \$48,564; 2, \$1,419; 3, 749; 4, \$386; 5, \$12,140; 6, \$8,541; 7, 716; 8, \$957; 9, \$8,337; 10, \$7,529; 11, 1,020; 12, \$137.

Evans & O'Neill, 611 Watts Building, San Diego, Cal., item 1, \$46,604; 2, \$1,837; 3, \$2,500; 4, \$386; 5, \$11,130; 6, \$7,676; 7, \$2,869; 8, \$955; 9, \$8,732; 10, \$7,912; 12, \$250.

Jacobs Construction Co., 518 Hellman Building, Los Angeles, Cal., item 1, 1,010; 2, \$1,145; 3, \$1,400; 4, \$300; 5, 1,000; 6, \$7,415; 7, \$2,440; 8, \$1,140; 9, \$6,680; 10, \$5,980; 11, 1,046.5; 12, \$85. Rambo & Trepte, San Diego, Cal., item 1, \$53,528; 2, \$1,580; 3, \$2,570; 4, 548; 5, \$14,986; 6, \$8,229; 7, \$3,518; 8, 1,041; 9, \$9,037; 10, \$7,678; 11, \$12,553; 12, \$245.

T. M. Russell, San Diego, Cal., item 1, \$3,676; 2, \$1,419; 3, \$2,125; 4, \$560; 5, 3,514; 6, \$8,897; 7, \$3,725; 8, \$1,250; 9, 0.379; 10, \$8,336; 11, \$12,549; 12, \$328. Winter & Nicholson, San Diego, Cal., item 1, \$49,713; 2, \$1,300; 3, \$2,200; 4, 75; 5, \$13,500; 6, \$8,900; 7, \$2,800; 8, 225; 9, \$8,200; 10, \$8,300; 11, \$13,400; 12, \$250.

John Campbell, 1040 1st street, San Diego, Cal., item 1, \$56,722.25; 2, \$1,919; 3, \$2,287; 4, \$421; 5, \$15,668.75; 6, 1,715.38; 7, \$4,189.41; 8, \$8,889.79; 9, 0,846.87; 10, \$8,185.07; 11, \$12,315.92; 12, \$144.50.

W. N. Concanan, 525 Market street, San Francisco, Cal., item 1, \$56,970; 2, 443; 3, \$2,048; 4, \$400; 7, \$3,857; 12, 300.

Brown & De Cew, San Diego, Cal., item 1, \$51,315; 2, \$1,496; 3, \$2,467; 4, 886; 5, \$13,079; 6, \$7,557; 7, \$3,261.40; 8, \$1,018.50; 9, \$9,770; 10, \$7,846.85; 11, 12,045; 12, \$115.

Sparks & Hale, Union Building, San Diego, Cal., item 1, \$51,546.18; 2, \$797.3; 3, \$3,360; 4, \$386; 5, \$13,272.55; 6, 1,034.54; 7, \$3,338.70; 8, \$1,123; 9, \$8,89.75; 10, \$7,826.63; 11, \$11,379.71; 12, 233.

**Billings, Mont., Vault Shelving.**  
The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Billings, Mont.:  
American Bank Protection Co., Minneapolis, Minn., \$223.  
Van Dorn Iron Works, Cleveland, Ohio, \$273.50.  
Crown Metal Construction Co., Jamestown, N. Y., \$293.  
Berger Mfg. Co., Canton, Ohio, \$311.

Keyless Lock Co., Indianapolis, Ind., \$22.04.  
Watson Mfg. Co., Jamestown, N. Y., \$130.  
Canton Art Metal Co., Canton, Ohio, \$136.  
General Fireproofing Co., Washington, D. C., \$361.  
Steel Fixture Mfg. Co., Topeka, Kan., \$64.

Art Metal Construction Co., Jamestown, N. Y., \$385.

#### Siuslaw River, Wharves.

The contract for enlarging and repairing receiving wharves and tramways and extending jetties at mouth of Siuslaw River, Ore., bids opened July 12 by the engineer at Portland, Ore., has been awarded to the Miami Quarry Co., of Portland, Ore., at \$176,570.90.

#### San Francisco, Cal.—Repairs and Painting

The contract for repairs and painting in the U. S. post office and court house, San Francisco, Cal., has been awarded to the J. Llewellyn Co., Oakland, Cal., at \$1,850.

#### Panama Canal, I Beams.

The following bids were received by the general purchasing officer, Panama Canal, for furnishing 35 steel I beams: Belmont Iron Works, Philadelphia, Pa., \$1.55c per lb.

R. C. Hoffman & Co., Baltimore, Md., 1.59c.

Pennsylvania Steel Co., Baltimore, Md., 1.59c.

M. S. Steel Products Co., New York City, 1.53c; accepted.

#### Contracts Awarded.

FORT HUACHUCA, ARIZ.—Power house, etc. Cost as follows. Engineer, Constructing Quartermaster's Office, Fort Huachuca. Owners, United States Government. The following awards have been made by the War Department: To H. S. Tittle, S. F., power plant, except boiler, building, electric light and power distributing system, electric wiring, etc., \$21,200. To Charles C. Moore & Co., S. F., installing one Cyclops Iron Works traveling crane, \$2,931. To Vilter Mfg. Co., Milwaukee, Wis., furnishing ice machines, \$13,100. To New London Ship & Engine Works, Croton, Conn., 2 200-H. P. Deisel engines, \$24,585. To Gross Chandelieri Co., St. Louis, Mo., furnishing electric fixtures, \$3,344. To Russell Electric & Machinery Co., Tucson, Ariz., furnishing Westinghouse transformers and watt meters, \$1,553.

#### HALLS AND SOCIETY BUILDINGS

##### Contracts Awarded.

TILLAMOOK, ORE.—City Hall, 2 story and base, brick, \$19,388. Architect, Charles H. Burgraff, Albany. Owners, City of Tillamook. Contractor, F. Hyde, Tillamook. Contract price, \$19,388.

#### HOSPITALS

SAN JOSE, SANTA CLARA CO., CAL.—Cottage, 1 story, frame. Cost not stated. Architect, none. Owners, Santa Clara County. Plans have been completed and are now out for figures for the construction of a frame cottage to be erected on the County Hospital grounds. Bids will be opened on August 23rd. Plans and specifications can be secured from the County Clerk at San Jose.

#### LIBRARIES.

GRIDLEY, BUTTE CO., CAL.—Library, 1 story, brick and steel, \$6,500.

Architect Chester Cole, Chico. Owners, City of Gridley. The lowest bid submitted for the construction of the new Carnegie Library in this city was presented by Welsh Bros. & Haaman of Grass Valley at \$6,239 without the heating and \$6,689 with the heating. No official award has been made, but it is expected that such action will be taken at once.

#### HOTELS.

MT. DIABLO, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, frame, cost not stated. Architect, G. A. Applegarth, Spreckels Bldg., S. F. Owners, Mt. Diablo Hotel Co. The building has been designed for a hotel and observatory. Interior will be finished in pine and redwood. A central heating system will be installed. Exterior will be covered with rustic and shingles. Plans are complete and figures will be taken at once.

WALLA WALLA, WASH.—Hotel, 6 story and base, brick and steel, \$150,000. Architect, George B. Purvis, Northern Bank Bldg., Seattle. Owners, New Grand Hotel Co. The building will cover an area of 70 by 120 feet and will provide for stores and the hotel lobby on the first floor. Upper floors will be arranged for a large number of modern hotel rooms, a large percentage of which will have private baths. Interior will be finished in pine with some hardwood. There will be steam heat, elevator service, hot water system and vacuum cleaning. Bath rooms will have tile floors and wainscot. Marble and tile and ornamental plaster will be used. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are nearly complete and figures will be called for by September 1st.

#### RAILROAD CONSTRUCTION AND EQUIPMENT.

SAN DIEGO, CAL.—Railroad construction. Cost not stated. Engineer, Chief Engineer James R. Parish, Los Angeles. Owners, Santa Fe Railroad. The Temecula branch of the Santa Fe may be rebuilt, according to word received in San Diego. Commissioner Frank R. Devlin, before whom the hearing was held, has taken the matter under advisement. It is the intention to get a new railroad through San Luis Rey Valley. The proposed railroad would replace the section through the Temecula Canyon, washed out by heavy rains many years ago. Chief Engineer Richard E. Sachs of the Railroad Commission has estimated the cost of the proposed road to be \$823,000. The replacement of the washed-out gap through the canyon would cost \$650,000, according to James R. Parish of the Santa Fe Company. The proposed new road would be slightly longer and would avoid the Temecula Canyon, going instead via the San Luis Rey Valley, Bonsall and Fallbrook.

TURLOCK, STANISLAUS CO., CAL.—Passenger depot, 1 story, brick and concrete. Cost not stated. Engineer, Chief Engineer Barlow, Flood Bldg., S. F. Owners, Southern Pacific Co. According to word received from this city the plans and specifications for

the proposed depot building to be erected by the Southern Pacific Company at Turlock have been approved by the Railroad Commission after the company agreed to make certain changes in the plans. Work is expected to be started on the new structure within two months.

#### Contracts Awarded

**THE DALLES AND PILOT ROCK, ORE.**—Roundhouse and shops, reinforced concrete. Cost as follows. Engineer's name not given. Owners, Oregon-Washington Railroad and Navigation Co. Word received from this city states that the contract for constructing roundhouses, machine shops, etc., at The Dalles and Pilot Rock, Ore., for the Oregon-Washington Railway and Navigation Co., has been let to Nettleton, Bruce & Eachbach, American Bank Bldg., Seattle, for about \$95,000. The work at The Dalles calls for a 12-stall brick and concrete roundhouse, 50x60 feet; machine shop, turntable pit and foundations, 30x34 feet; concrete and brick power house and stack, 40x60 feet; brick storehouse and platform. Cost, \$50,000. The work at Pilot Rock calls for a 10-stall roundhouse, turntable pit and foundations, 30x60 feet; power house and stack and a one-story, 40x65 feet storehouse. All buildings to be of concrete and brick and cost about \$45,000.

#### RESIDENCES.

**SAN FRANCISCO** — Residence, 1 story and base, frame, \$3,000. Architect, none. Owner, Peter Rooney, 2853 Polson street, S. F. The dwelling will be erected on the north side of Bryant street east of 25th, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO** — Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, J. N. Gillogley, 745 San Jose avenue, S. F. The dwelling will be erected on the west side of 15th avenue south of Irving, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception hall. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot and floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO** — Residence, 2 story and base, frame, \$7,000. Architect, William Knowles, Hearst Bldg., S. F. Owner, H. F. Miller. The dwelling will be erected on the south side of Green street west of Scott, and has been designed to contain eight rooms,

two baths and sleeping porch. A basement garage is also provided. Interior will be finished in pine, hardwoods and white enamel. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with rustic, shingles and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO** — Residence, 2 story and base, frame, \$8,500. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owners, Allen Bros. The dwelling has been designed for an eight-room house with two baths, sleeping porch and a separate garage. Interior will be finished in mahogany and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Mantels will be of tile and brick. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—Residence alterations, frame construction, \$1,500. Architect, William Knowles, Hearst Bldg., S. F. Owner, Mrs. Has Brouck. The work will be done at the property on Maple avenue near Pacific, and will include interior finish, hardwood floors, painting, plastering, electric work and plumbing. New mantels will be installed. Exterior will be of rustic. Plans are complete and the work will be done by Day Labor.

**OAKLAND, CAL.**—Residences, 2, 1 story and base, frame, \$2,500 each. Architects, Universal Drafting Bureau, 1343 31st avenue, Oakland. Owner, M. H. Temple. These two houses will be erected in Elmhurst and each will contain six-rooms and bath. Interior will be finished in pine with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be an open fire place in each living room. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms. plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

## SCHOOLS.

**FRESNO, FRESNO CO., CAL.**—School, 1 story and base, brick and tile, \$12,000. Architect, Ernest J. Kump, Rowell Bldg., Fresno. Owners, West Park School District. The building will be erected about 2½ miles out of Fresno, and has been designed for a four-room school. Interior will be finished in pine. Maple floors will be used in the class rooms. There will be a central heating system, probably steam heat with an oil burning furnace. Modern school plumbing and electric work is specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

**BROWN SCHOOL DISTRICT, TEHAMA CO., CAL.**—School, 1 story, frame. Cost not stated. Architect, none. Owners, Brown School District. The building will contain two class rooms. Interior will be finished in pine. Stoves will be used for heating. Exterior will be covered with rustic and shingles. Plans are complete and out for figures. Bids will be opened on August 16th. Plans and specifications can be secured from the County Superintendent of Schools, Old Fellows Bldg., Red Bluff.

## Contracts Awarded.

**MARICOPA, KERN CO., CAL.**—School 1 story and base, frame, \$11,250. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, Maricopa School District. Contractor, Fred Gribble, Maricopa. Contract price, \$11,250.

## SEWERS, STREET WORK & WATER SYSTEMS.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street paving, etc. Cost not stated. Engineer, City Engineer Chapman, Richmond. Owners, City of Richmond. City Engineer Chapman has recommended to the Council that Bay avenue be improved with a concrete base and bituminous surface. Plans for this improvement will probably be ordered at the next meeting. Plans and specifications for the improvement of Twenty-first street and Anita street have been approved by the Council and bids will be ordered shortly.

**PETALUMA, SONOMA CO., CAL.**—Street improvement, grading, paving, and curbs. Cost not stated. Engineer, City Engineer, Petaluma. Owners, City of Petaluma. The City Council has passed resolutions of intention to improve Sheldon street from the south line of Bassett street to the north line of lot 177, between its property lines be graded to the subgrade for its entire width, and between its curb lines macadamized with crushed rock, curbed with basalt blocks and guttered with concrete, except 200 feet of curb and 500 square feet of gutter on east side of Sheldon street, 100 feet south of south line of Bassett street. Bids will soon be called for.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans have been completed and figures are now being taken for constructing a road with gravel base on

Division No. 2 of the Tunnel road, a distance of 7 miles and 300 feet. Bids will be opened on August 16th. Plans and specifications can be secured from the County Clerk.

**SAUSALITO, MARIN CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. The Town Engineer has been instructed to prepare plans and specifications for the paving of El Portal and Park avenues. The work will be under the 1911 act. On completion of the plans bids will be called for.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Road construction, \$19,246.23. Engineer, County Surveyor Arnold. Martinez. Owners, Contra Costa County. Plans and specifications for seven more miles of permanent highway running from the Bryant bridge to Walnut Creek, have been completed and presented to the Supervisors by County Surveyor Arnold. The new stretch is estimated to cost \$19,246.23, or an average of \$7,035 per mile. There are to be three concrete and steel bridges to be erected. The road is to be 18 feet wide and will have a concrete base with asphaltum crown. There will be a two-inch wing.

**SAN RAFAEL, MARIN CO., CAL.**—Road repair, \$5,000. Engineer, County Surveyor, San Rafael. Owners, Marin County. The bid of S. B. McNear of \$5,000 to repair the road leading from Chicken Point to a point near the McNear brick yard, was rejected at the last meeting of the Supervisors. Supervisor Hansen was empowered to do the work.

**SANTA ROSA, SONOMA CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. The City Engineer has been instructed by the Council to prepare a plan showing property owners not signed up for the paving of Santa Rosa avenue and submit same at the next meeting so that bids on the work may be called.

**SAN JOSE, SANTA CLARA CO., CAL.**—Furnishing rock and sand. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the last meeting of the Supervisors, upon motion, it was ordered that the clerk advertise for bids for the following rock for road purposes: 3,500 cubic yards or more Saratoga rock crusher run, Leona Heights rock crusher run, first class creek gravel, to be delivered on the Alviso and Santa Clara road between Agnew and the town of Alviso, and on the Mt. View and Alviso road to the westerly line of Supervisor's District No. 1. Bids to be opened Monday, August 23rd. On motion it was ordered that the Clerk advertise for bids for 1,820 cubic yards of Saratoga crusher run rock, to be delivered at the following named roads: Pennsylvania avenue, Palm avenue, Walnut avenue, Wissickier avenue, Live Oak avenue, Chestnut avenue, Hernandez avenue, Ellsworth avenue, Belmont avenue, Backman avenue, in Road District No. 5. Also 1,000 cubic yards or more of crusher run Saratoga crushed rock to be delivered on the Los Gatos and Almaden road between Union avenue and Hardwood road in Road District No. 5.

**MODESTO, STANISLAUS CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Modesto. Own-

ers, City of Modesto. Resolutions providing for the paving of L street between Seventh and Ninth streets have been adopted by the City Council, and bids on the work will be called for as soon as all necessary advertising requirements have been complied with.

**SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.**—Street paving. Cost not stated. Engineer, Town Engineer, South San Francisco. Owners, Town of South San Francisco. Resolutions providing for plans and specifications for the paving of Magnolia and Orange avenues, between Miller and Paden, were adopted at the last meeting of the City Board of Trustees. Bids for this work will probably be called at the next meeting.

**SAN JOSE, SANTA CLARA CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans have been completed and approved for the improvement of the Oakland road through the town of Milpitas. Bids for this work will be opened on August 23rd. Plans and specifications can be secured from the office of the County Clerk at San Jose.

**REDWOOD, CITY, SAN MATEO CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The County Supervisors have instructed the County Engineer to prepare an estimate of the cost of putting on 4 inches of macadam with two coats of screening and two coats of oil surfacing on the road from San Gregorio to Pescadero and from Tunitas to San Gregorio.

**MONTEREY, MONTEREY CO., CAL.**—Street paving, curbs, etc. Cost not stated. Engineer, City Engineer, Monterey. Owners, City of Monterey. Plans and specifications have been approved by the City Council for the improvement of Pacific street from the north line of Madison street to the south line of Jefferson street, by grading and paving with macadam from gutter line to gutter line, and the construction of gutters, sidewalks and curbs. Bids on this work will soon be called for.

**REDWOOD, CITY, SAN MATEO CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. At the last meeting of the County Supervisors the County Surveyor presented plans and specifications for the building of two roads in the Fourth Road District, one from Sunshine Valley to Montara, and the other from Montara to Martini. Bids will soon be called for.

**EUREKA, HUMBOLDT CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Eureka. Owners, Humboldt County. All bids received by the Supervisors for the construction of the three roads—Etnahsing, Honeydew and Bain's Hoopa roads were rejected and readvertise-ment was directed for alternate bids on 10-foot and 12-foot roads.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street paving, curbs and gutters. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council resolution of intention were adopted for the improvement of Scotts avenue from Lincoln to Monroe street, Van Toun from Taylor to Hazelton,

Monroe from Taylor to Scotts avenue, and the west half of Monroe street from Scotts to Hazelton avenue. The improvements are to consist of concrete curbs and gutters and asphaltic bound macadam street pavement.

**CHICO, BUTTE CO., CAL.**—Street paving. Cost not stated. Engineer, County Surveyor Martin C. Polk. Oroville. Owners, City of Chico. The street bordering the children's playground and connecting Broadway with the Esplanade bridge over Big Chico Creek, will be paved with what is known as the Richmond Specification, with a mixture of oil and crushed rock, according to a statement of Supervisor R. P. Holmes. County Engineer Martin C. Polk has been directed to prepare plans and specifications for the work. The work will cost several thousand dollars.

**CALEXICO, IMPERIAL CO., CAL.**—Street improvement. Cost not stated. Engineer, City Engineer, Calexico. Owners, City of Calexico. Plans and specifications have been completed by the City Engineer for the improvement of Second street, and bids on the work will be called for in about two weeks.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Road construction. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. Plans and specifications for route 16, 2½ miles, between Winchester and Coyote Pass of the county highway have been approved by the County Supervisors and bids have been ordered advertised to be received on August 18th at 10 a. m.

**TURLOCK, STANISLAUS CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer Luyster, Turlock. Owners, City of Turlock. Plans and specifications for sewer work to be done in Minaret avenue and Rose street have been completed by the City Engineer and approved by the City Council, and bids on the work are now being taken. Plans and further information may be had from City Engineer Luyster.

**LINDSAY, TULARE CO., CAL.**—Street paving, etc. Cost not stated. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. The Board of Trustees are making preparations for the improvement of Hermosa street from Mt. Vernon avenue to the westerly limits of the city, and Main street east to the city limits. A 16-foot pavement with a two-foot gravel and oil shoulder on each side will probably be laid on Hermosa street, while Honolulu street will be paved from curb to curb as far as the Santa Fe depot on Harvard avenue.

**HEMET, RIVERSIDE CO., CAL.**—Tank and tower, steel and concrete. Cost not stated. Engineer, Town Engineer, Hemet. Owners, Town of Hemet. The City Council is having plans prepared for a new steel water tower and tank to be erected at the municipal water plant. It is to have a capacity of 125,000 gallons.

## STORES AND OFFICES.

**SAN FRANCISCO**—Stores and offices, 3 story and base, Class A construction. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owner's name withheld. The building will be erected at the southwest corner of Davis and California streets, covering a large ground area. A pile foundation is necessary. There will be a complete steel frame, brick exterior walls, tar and gravel roof and hollow tile interior partitions. Interior will be finished in hardwoods, marble and tile. Metal

window sash and frames are specified. Plans provide for steam heat, oil burning furnace, three electric elevators and vacuum cleaning. Patent store fronts are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—Store, 1 story, brick, \$3,500. Architect, none. Owner, J. J. Cummings, 244 Kearny street. The building will be erected on Mission street south of Sycamore, covering an area of 25 by 50 feet. There will be one store. Interior will be finished in pine. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Store fixtures, \$9,000. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owner's name withheld. Plans are complete and figures are being taken for one of the largest jobs of store fixtures and interior trim which has been figured in some time. Mahogany and oak will be used almost throughout. Included in the work is a large amount of art glass, ornamental plaster and ornamental iron.

**SAN FRANCISCO, CAL.**—Office Bldg. Mr. Newlands, of the Sharon Estate Co., stated to a representative that the statement published by the morning papers in which it was stated that the Sharon Estate would construct a building on their property in the rear of the Palace Hotel for the use of the Southern Pacific Co. was untrue. He further stated that only two pieces of Sharon Estate property were so located as to be of use to the Southern Pacific and that both of these were two small for the required building.

**SAN FRANCISCO**—Store, 1 story and base, frame, \$2,500. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, J. P. McInerney. The building will be erected at the northeast corner of Capitol and Broad streets, covering an area of 35 by 65 feet. Interior will be finished in pine. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Stores and theatre alteration, 3 story and base, brick, \$60,000. Architect, Carl Werner, Phelan Bldg., S. F. Owner, Charles Heeseman. The building at the gore corner of 17th, San Pablo and Clay streets will undergo extensive alterations. There will be provision for a theatre besides the stores on the first floor and upper floors will be arranged for a lodge hall. Included in the work will be interior trim, heating, plumbing, electric work, and painting. Exterior will be faced with pressed brick. Plans are now being prepared.

**VALLEJO, SOLANO CO., CAL.**—Cafe, 1 story, brick, \$5,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owner, Frank Powers. The building will be erected at 412 Georgia street, covering an area of 25 by 130 feet. Interior will be finished in pine and hardwood with some ornamental plaster. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Office building, 1 story, brick, \$3,500. Architect, James T. Nabett, 704 Macdonald street, Richmond. Owners,

Pacific Gas and Electric Co. The building will contain the general office of the company. Interior will be finished in hardwood. A tile and marble floor will be used. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are now being prepared.

**SEATTLE, WASH.**—Publishing house and offices, 5 story and base, reinforced concrete, \$500,000. Architects, Charles H. Bebb and Carl Gould, Denny Bldg., Seattle. Owners, Times Publishing Co. The building will be erected at the corner of Westlake and 4th, and will cover a large ground area. Foundations have been designed to carry three additional stories. There will be a number of stores on the first floor besides the general office. Upper floors will be arranged for offices and the editorial and city rooms. Interior will be finished in pine and hardwood. There will be steam heat, elevator service and vacuum cleaning. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are being prepared and will be ready for figures about September 1st.

## THEATRES.

**OREGON CITY, ORE.**—Theatre, 1 story and base, brick, \$18,000. Architect, Aaron H. Gould, Henry Bldg., Portland. Owner, Charles Schram. The building will cover an area of 44 by 110 feet, and will be fireproof throughout. The theatre will seat 650 people. Interior will be finished in pine and ornamental plaster. Special electric work is specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## SEALED PROPOSALS

### PROPOSALS FOR BRIDGE.

**BRIDGE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Washington, D. C., until 2 o'clock p. m. September 8, 1915, for furnishing and erecting a steel bridge of three 100-foot spans and a structural steel movable crest with operating machinery for the Vandall dam of the Milk River project, Montana. For particulars address the United States Reclamation Service, Washington, D. C. A. P. DAVIS, chief engineer.

### PROPOSALS FOR VESSEL.

**VESSEL**—Sealed proposals will be received at the Coast and Geodetic Survey, Washington, D. C., until August 25, 1915, and then opened, and also on the same date at the office of the Inspector of Coast and Geodetic Survey, room 310, Custom House, San Francisco, Cal., for construction and equipment of the Coast and Geodetic Survey steamer Surveyor of about 1,000 tons displacement. Particulars may be had by addressing the superintendent, Coast and Geodetic Survey, Washington, D. C.

### PROPOSALS FOR ELEVATORS.

**ELEVATORS**—Sealed proposals indorsed "Proposals for Freight Elevators" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 28, 1915, and then and there publicly opened, for three hydro-pneumatic freight elevators, installed complete, at the naval station, Pearl Harbor, Hawaii. Plan and specification may be obtained on application to the bureau or to the commandant of the

naval station named. WM. M. SMITH, acting chief of bureau.

**PROPOSALS FOR CANAL SUPPLIES.**

**PANAMA CIRCULAR 958**—Proposals for Steel Reinforcing Bars, Bronze Wire Cloth, Screws, Cotter's, Screw-eyes, Cup Hooks, Staples, Cable Clips, Tacks, Hasps, Hinges, Night Latches, Chain Blocks, Snatch Blocks, Tackle Blocks, Steel Cams, Tucks, Grind-stones, Stable Brooms, Floor Brushes, Buckets, Oil Cans, Ladders, Lute Pressers, Blow Torches, Anchor Lights, Window Glass, Pipe Cutter, Wrenches, Awls, Pulleys, Steel Tapes, Rules, Lantern Globes, Oars, Tool Handles, Mop Handles, Mop Heads, Packing, Oakum, Crayons, Twine, Wrapping Paper, Index Cards and Lumber.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m., August 20, 1915**, at which time they will be opened publicly for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 958) may be obtained from the office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

**PROPOSALS FOR BUILDING**

**BUILDING**—Fort Rosecrans, Cal.—Sealed proposals will be received here until **2 p. m., August 20, 1915**, for constructing concrete storehouse. Further information on application to constructing quartermaster.

**PROPOSALS FOR LIGHTING FIXTURES.**

**TREASURY DEPARTMENT**, Superintending Architect's Office, Washington, D. C., July 28, 1915.—Sealed proposals will be opened in this office at **3 p. m., August 18, 1915**, for furnishing and installing lighting fixtures in the United States Post Office at Denver, Colorado, in accordance with drawings and specifications, copies of which may be had at this office. Proposals are desired only from those qualified to produce work of the highest grade, both artistically and mechanically, and the right is refused to send the drawings and specifications to or to receive proposals from anyone who, in the opinion of the Superintending Architect, is not so qualified. JAMES A. WETMORE, Acting Supervising Architect.

**PROPOSALS FOR RECLAMATION WORK.**

**RECLAMATION WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at St. Ignatius, Mont., until **3 o'clock p. m., August 18, 1915**, for the construction of materials, Colorado, and appurtenant structures on the Flathead project, involving about 33,900 cubic yards of excavation, 500 cubic yards of concrete, 3,500 square yards of paving, 100 tons of about 2,500 pounds of reinforcing steel and 74,000 feet, b. m., of lumber and the manufacturing and laying of about 1,000 linear feet of concrete pipe. The work is situated on the east side of the Flathead River, from 10 to 15 miles southwest of Polson and 9 to 16 miles northwest of Ronan, Mont. For particulars address the United States Reclamation Service, Washington, D. C., Denver, Colo., or St. Ignatius, Mont. A. P. DAVIS, chief engineer.

**PROPOSALS FOR CANAL SUPPLIES.**

**PANAMA CIRCULAR 958**—Office of the General Purchasing Office, Panama Canal, Washington, D. C.—Sealed proposals will be received here until **August 10, 1915**, under circular 958 for furnishing the following: 50 brackets, brake shaft, 2,000 feet trolley wire, 20 reams Manila paper, 10 cases iron posts, 1,200 feet vulcanized rubber strips, 500 spring plates, 12 machinists' vices, 50 lengths corrugated tender hose, 3 lengths steel rails, 100 hand saws, 2 water gauges, 500 handles, 72 hatchets,

24 vices, 258 wheels for Barnes pipe cutters, 12 air whistles, 21 adzes, 4 blacksmiths' anvils, 141 blacksmiths' chisels, 3,500 hacksaw blades, 24 breast drills, 72 saw frames, 12 buckets for ladder dredge and 24 manganese steel lips, 200,000 feet ceiling, 275,000 feet flooring, 200 feet siding, 2,200,000 feet service and rough lumber; also a quantity of files, bits, augers, cape and machine chisels, monkey and Stilson wrenches, machinists' hand taps, pipe cutters, drills, dies, claw, machinists' and siege hammers, stocks and dies and condulets. For further information address F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

**PROPOSALS FOR SUBMARINES.**

**SUBMARINES**—The date for the opening of proposals for building submarine boats Nos. 62-77, as fixed by the department's advertisement of May 20, 1915, is hereby changed from **August 2 to September 29, 1915**. JOSEPHUS DANIELS, Secretary of the Navy.

**PROPOSALS FOR WHARF.**

**WHARF**—Sealed proposals indorsed "Proposals for Extensions of Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., August 21, 1915**, and then there publicly opened for extension of wharf at the naval training station, San Francisco, Cal. Plan and specification may be obtained on application to the bureau or to the commandant of the naval training station named. H. R. STANFORD, chief of bureau.

**STATE OF CALIFORNIA.**

**DEPARTMENT OF ENGINEERING.**

**CALIFORNIA HIGHWAY COMMISSION**

**NOTICE TO CONTRACTORS.**

Sealed proposals will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until **1 o'clock p. m., on August 23, 1915**, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of state highway as follows:

Siskiyou County across the Sacramento River near Dunsuir (11-Sis-3-A), a reinforced concrete bridge about 532 feet long with one arch of 150 feet clear span and two arches of about 14 feet clear span.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's office are located at William Dunsuir, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is

made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.  
CHARLES D. BLANNEY,  
NEWELL, D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
AUSTIN E. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS, Secretary.

**PROPOSALS FOR CONCRETE PIERS.**

**CONCRETE PIERS**—Sealed proposals indorsed "Proposals for Torpedo Boat Piers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., September 18, 1915**, and then there publicly opened, for constructing reinforced concrete torpedo boat piers at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

**PROPOSALS FOR RAILROAD.**

**MARINE RAILWAY**—Sealed proposals indorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **1 o'clock a. m., September 18, 1915**, and then there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

**PROPOSALS FOR BUILDING.**

**BUILDING, ETC.**—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in this office at **3 p. m., August 24, 1915**, for the construction, complete (including mechanical equipment and approaches) of the United States post office at Grand Junction, Colo. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or at this office, at the discretion of the supervising architect, JAMES A. WETMORE, acting supervising architect.

**PROPOSALS FOR WHARF CONSTRUCTION.**

**WHARF**—Sealed proposals indorsed "Proposals for Reinforced Concrete Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., September 18, 1915**, and then there publicly opened, for constructing a reinforced concrete wharf at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

All suites will have wall beds and private baths. There will be a hot water supply. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and a contract will be let at once.

**WINEY**—2 story and base, reinforced concrete, \$10,000. San Francisco. Architect, P. Righetti, Phelan Bldg., S. F. Owners, Promotion Wine and Liquor Co. The building will be erected at the corner of Lombard and Columbus avenue, and will cover a large ground area. Construction will be fireproof. Interior of the front portion of the building will be finished in pine. There will be a number of large storage tanks. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

**SHOP ADDITION**—Steel and concrete, \$15,000. San Francisco. Engineer, Allen G. Ramsey, Union Iron Works, S. F. Owners, Union Iron Works. Plans have been prepared for a considerable addition to the company's mill and joiner shops. The work will require structural steel and concrete besides the addition of special machinery. Plans are complete and figures will be called for at once.

**FLATS**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, I. C. Conner, 578 10th avenue, S. F. The building will be erected on the west side of 4th avenue south of Clement street, covering an area of 25 by 60 feet. The building will contain two modern flats of five and six rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**OFFICERS' QUARTERS AND MORGUE**—1 and 2 story, brick and concrete, \$400,000. San Francisco, En-

gineer, Construction Quartermaster's Office, Fort Mason. Owners, United States Government. The Army Appropriation Bill for 1916, which has passed Congress, provides funds for the construction of forty-one officers' quarters and a large morgue building to be erected in the Presidio of San Francisco. The new buildings will replace the old wooden frame quarters which will be torn down, the new buildings being arranged in streets. Construction will be of brick and concrete and is estimated to cost in the neighborhood of \$400,000, and will be carried out under the direction of the Constructing Quartermaster's office at Fort Mason. A part of the work will be out this summer although no additional information is at yet at hand.

**STORES AND OFFICES**—3 story and base. Class A construction, \$150,000. San Francisco. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owner's name withheld. The building will be erected at the southwest corner of Davis and California streets, covering a large ground area. A pile foundation is necessary. There will be a complete steel frame, brick exterior walls, tar and gravel roof and hollow tile interior partitions. Interior will be finished in hardwoods, marble and tile. Metal window sash and frames are specified. Plans provide for steam heat, oil burning furnace, three electric elevators and vacuum cleaning. Patent store fronts are specified. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and segregated figures are being taken.

**STORE**—1 story, brick, \$3,500. San Francisco. Architect, none. Owner, J. J. Cummings, 244 Kearny street. The building will be erected on Mission street south of Sycamore, covering an area of 25 by 80 feet. There will be one store. Interior will be finished in pine. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

**STORE FIXTURES**—\$9,000. San Francisco. Architects, O'Brien Bros., 240 Montgomery street, S. F. Owner's name withheld. Plans are complete and figures are being taken for one of the largest jobs of store fixtures and interior trim which has been figured in some time. Mahogany and oak will be used almost throughout. Included in the work is a large amount of art glass, ornamental plaster and ornamental iron.

Mr. Newlands, of the Sharon Estate Co., stated to a representative that the statement published by the morning papers in which it was stated that the Sharon Estate would construct a building on their property in the rear of the Palace Hotel for the use of the Southern Pacific Co. was untrue. He further stated that only two pieces of Sharon Estate property were so located as to be of use to the Southern Pacific and that both of these were two small for the required building.

**STORE**—1 story and base, frame, \$2,500. San Francisco. Architect, Frank S. Holland, 100 Haight street, S. F. Owner, J. P. McInerney. The building will be erected at the northeast corner of Capitol and Broad streets, covering an area of 35 by 65 feet. Interior will be finished in pine. Exterior of the building will be covered with

rustic and shiplap. Plans are complete and figures are being taken.

### Contracts Awarded

### OAKLAND AND ALAMEDA COUNTY

RESIDENCES—2, 1 story and base, frame, \$2,500 each. Oakland, Cal. Architects, Universal Drafting Bureau, 1814 5th avenue, Oakland. Owner, M. H. Temple. These two houses will be erected in Elmhurst and each will contain six rooms and bath. Interior will be finished in pine with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be an open fire place in each living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—1 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owners, Welch & Rogers, 1751 Grove street, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch, and will be erected on East 33rd street east of Fourth avenue. Interior will be finished in pine with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile or brick mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$1,500. Oakland, Cal. Architect, none. Owner, C. M. MacGregor, 470 13th street, Oakland. The dwelling will be erected on Mandana Boulevard, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster

on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Joseph T. Hinch, 1718 Broadway, Oakland. The dwelling will be erected at the southeast corner of 56th and Adeline streets and has been designed for a six-room house with bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, L. G. Pfirang, 5441 Shafter avenue, Oakland. The dwelling will be erected on Glendale avenue west of Desmond, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living and dining room. There will be an open fire place and tile or brick mantel in the living room. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, J. Coward, 6081 Claremont avenue, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch, and will be erected on the south side of Cabot street east of Pedestrian Way. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms and reception hall. There will be a large open fire place in the living room. Mantel will be of brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, A. B. Chase, 1521 73rd avenue, Oakland. The dwelling will be erected on Montgomery street east of Peralta, and has been designed for a nine-room house with bath and sleeping porch. Interior will be finished in pine, elm and white enamel. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$1,500. Oakland, Cal. Architect, none. Owner, R. E. Stubbe, 1203 East 19th street, Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch, and will be erected on Miral Vista avenue near Alta Vista. Interior will be finished in pine with some white enamel and elm panels. Hardwood floors will be used in the living and dining rooms and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, C. J. Pfirang, 5481 Claremont avenue, Oakland. The dwelling will be erected on the east side of Dover street south of 63rd, and has been designed for a five-room dwelling with bath and sleeping porch. Interior trim will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place in the living room. Mantel will be of brick. Plans provide for an automatic water heater. The wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGE—1 story, brick, \$5,000. Oakland, Cal. Architect, none. Owners, Harris & Hudson, 1957 East 38th street, Oakland. The building has been designed for a commercial garage and will be erected on the west side of Fruitvale avenue north of Hopkins street. There will be a concrete floor. Interior will be finished in pine. Special gasoline storage tanks are specified. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500. Oakland, Cal. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Charles Isola. The dwelling will be erected on 12nd street east of Linden, and has been designed for a six-room house. Interior will be finished in pine throughout. There will be an open fire place in the living room with a tile mantel. Exterior will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Robert Sharon. The dwelling will be erected in Piedmont, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine, hardwood veneer and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, Louis O. Hanson, 8 The Alameda. The dwelling will be erected on the south side of Keith avenue west of Broadway, and has been designed for a seven-room house with porch and sleeping porch. Interior will be finished in pine with some white enamel and elm panels. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bathroom will have tile wainscot. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Edward L. Cannon, Central Bank Bldg., Oakland. Owner, David Caig. The dwelling will be erected on Santa Rosa avenue south of Rosal, and has been designed for a ten-room house with bath. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bathroom will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**APARTMENT HOUSE**—4 story and base, brick, \$48,000. Oakland, Cal. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner, Frank E. Brigham. The building will be erected at the corner of 11th and Oak streets, and has been designed to contain a number of two, three and four room apartments. Interior will be finished in pine, elm and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Plans provide for steam heat, an automatic elevator, hot water system and vacuum cleaning. All utilities will have wall beds and private bath rooms. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures will be called for at once.

**STORE AND THEATRE ALTERATION**—3 story and base, brick, \$60,000. Oakland, Cal. Architect, Carl Werner, Phelan Bldg., S. E. Owner, Charles Heeseman. The building at the corner of 17th, San Pablo and Clay streets will undergo extensive alterations. There will be provision for a theatre besides the stores on the first floor, and upper floors will be arranged for a lodge hall. Included in the work will be interior trim, heating, plumbing, electric work, and painting. Exterior will be faced with pressed brick. Plans are now being prepared.

### Contracts Awarded.

### SAN JOSE AND THE SANTA CLARA VALLEY

STREET PAVING—Cost not stated.  
South San Francisco, San Mateo Co.,  
Cal. Engineer, Town Engineer, South  
San Francisco. Owners, Town of South  
San Francisco. Resolutions providing  
for plans and specifications for the  
paving of Magnolia and Orange ave-  
nues, between Miller and Baden, were  
adopted at the last meeting of the City  
Board of Trustees. Bids for this work  
will probably be called at the next  
meeting.

FURNISHING ROCK AND SAND—  
Cost not stated. San Jose, Santa Clara  
Co., Cal. Engineer, County Surveyor,  
San Jose. Owners, Santa Clara County.  
At the last meeting of the Supervisors,  
upon motion it was ordered that the  
Clerk advertise for bids for the fol-  
lowing rock for road purposes: 3,500  
cubic yards or more Saratoga rock  
crusher run, Leona Heights rock  
crusher run, first class creek gravel, to  
be delivered on the Alviso and Santa  
Clara road between Agnew road and  
the town of Alviso, and on the Mt.  
View and Alviso road to the westerly  
line of Supervisor's District No. 4. Bids  
to be opened Monday, August 23rd. On  
motion it is ordered that the Clerk ad-  
vertise for bids for 1,830 cubic yards  
of Saratoga rock crusher run rock to  
be delivered at the following named  
roads: Pennsylvania avenue, Palm  
avenue, Walnut avenue, Wissackler  
avenue, Live Oak avenue, Chestnut  
avenue, Hernandez avenue, Ellsworth  
avenue, Belmont avenue, Backman  
avenue, in Road District No. 5. Also  
1,400 cubic yards or more of crusher  
run Saratoga crushed rock to be de-  
livered on the Los Gatos and Almaden  
road between Union avenue and Hard-  
wood road in Road District No. 5.

ROAD IMPROVEMENT — Cost not  
state. San Jose, Santa Clara Co., Cal.  
Engineer, County Surveyor, San Jose.  
Owners, Santa Clara County. Plans  
have been completed and approved for  
the improvement of the Oakland road  
through the town of Milpitas. Bids  
for this work will be opened on Aug-  
ust 23rd. Plans and specifications  
can be secured from the office of the  
County Clerk at San Jose.

ROAD IMPROVEMENT — Cost not  
stated. Redwood City, San Mateo Co.,  
Cal. Engineer, County Surveyor, Red-  
wood City. Owners, San Mateo Coun-  
ty. The County Supervisors have in-  
structed the County Engineer to pre-  
pare an estimate of the cost of putting  
on 4 inches of macadam with two  
coats of screening and two coats of  
oil surfacing on the road from San  
Gregorio to Pescadero and from Tun-  
nitas to San Gregorio.

STREET PAVING, CURBS, ETC.—  
Cost not stated. Monterey, Monterey  
Co., Cal. Engineer, City Engineer,

Monterey. Owners, City of Monterey. Plans and specifications have been approved by the City Council for the improvement of Pacific street from the north line of Madison street to the south line of Jefferson street, by grading and paving with macadam from gutter line to gutter line, and the construction of gutters, sidewalks and curbs. Bids on this work will soon be called for.

**ROAD CONSTRUCTION** — Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. At the last meeting of the County Supervisors the County Surveyor presented plans and specifications for the building of two roads in the Fourth Road District, one from Sunshine Valley to Montara, and the other from Montara to Martini. Bids will soon be called for.

**ROAD CONSTRUCTION** — \$29,233.56. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractor, L. G. Hare, Salinas. Contract price, \$29,233.56. The contract covers 14.825 miles of road to be constructed in District No. 5.

**BRIDGES**—4, timber construction. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans have been completed and have received official approval for the construction of four timber bridges with approaches. Bids are now being taken and are out for figures. Bids will be opened on August 23rd. Plans can be secured from the office of the County Clerk at San Jose.

**BRIDGE**—Reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans are complete and bids will be opened on August 23rd for the construction of a reinforced concrete bridge on the Malone road over Guadalupe Creek. Plans can be secured from the County Clerk at San Jose.

**BRIDGE REPAIRS**—Steel and concrete. Cost not stated. Salinas, Monterey Co., Cal. Engineer, County Surveyor, Salinas. Owners, Monterey County. The plans and specifications for repairs to the Chualar bridge have been approved by the County Supervisors, and the Clerk has been instructed to advertise for bids on the work. Bids close August 20th, the next meeting of the Board. Plans and specifications together with full information may be had from the County Surveyor at Salinas.

**MOTION PICTURE STUDIO**—5, 1 and 2 story, frame, \$40,000. Santa Clara, Santa Clara Co., Cal. Architects, Ellis & Skilling, Garden City Bank Bldg., San Jose. Owners, San Jose Film Company. This group of buildings will consist of a large studio, scenery lofts, living quarters and stables. Interior finish will be of pine and redwood. Special laboratory facilities are provided. Exterior will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

**COTTAGE**—1 story, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. Owners, Santa Clara County. Plans have been completed and are now out for figures for the construction of a frame cottage to be

erected on the County Hospital grounds. Bids will be opened on August 22nd. Plans and specifications can be secured from the County Clerk at San Jose.

 stalled. Bath room will have tile  
 floor and wainscot. Exterior of the  
 dwelling will be covered with cement  
 plaster on metal lath. Plans are com-  
 plete and figures are now being taken.

RESIDENCE—1 story and base,  
 frame, \$2,000. Richmond, Contra Costa  
 Co., Cal. Architect, James T. Narbett,  
 704 Macdonald avenue, Richmond.  
 Owner, Walter Giarrella. The dwelling  
 has been designed for a five-room  
 house with bath. Interior will be fin-  
 ished in pine and redwood. Some hard-  
 wood floors will be used. Bath room  
 will have tile wainscot. An automatic  
 water heater will be installed. There  
 will be a large open fire place in the  
 living room. Mantel will be of tile or  
 brick. Exterior of the house will be  
 covered with rustic. Plans are now  
 being prepared.

RESIDENCE—2 story and base,  
 frame, \$1,000. Richmond, Contra Costa  
 Co., Cal. Architect, James T. Narbett,  
 704 Macdonald avenue, Richmond.  
 Owner, J. Vander Zwiep. The dwell-  
 ing will contain eight rooms, bath and  
 sleeping porch. Interior will be fin-  
 ished in pine with some white enamel  
 and elm panels. Hardwood floors will  
 be used in the living room, dining  
 room and reception hall. Plans pro-  
 vide for furnace heat and open fire  
 places. Mantels will be of tile or  
 brick. Tile wainscot will be used in  
 the bath room. An automatic water  
 heater will be installed. Exterior of  
 the house will be covered with cement

plaster on metal lath. Plans are now  
 being prepared and figures will be  
 called for shortly.

STREET PAVING, ETC.—Cost not  
 stated. Richmond, Contra Costa Co.,  
 Cal. Engineer, City Engineer, Chap-  
 man, Richmond. Owners, City of Rich-  
 mond. City Engineer Chapman has  
 recommended to the Council that Bay  
 avenue be improved with a concrete  
 base and bitulithic surface. Plans for  
 this improvement will probably be  
 ordered at the next meeting. Plans and  
 specifications for the improvement of  
 Twenty-first street and Anita street  
 have been approved by the Council and  
 bids will be ordered shortly.

STREET IMPROVEMENT, GRADING  
 PAVING AND CURBS.—Cost not stat-  
 ed. Petaluma, Sonoma Co., Cal. Engi-  
 neer, City Engineer, Petaluma. Own-  
 ers, City of Petaluma. The City Coun-  
 cil has passed resolutions of intention  
 to improve Sheldon street from the  
 south line of Bassett street to the  
 north line of lot 177, between its prop-  
 erty lines be graded to the subgrade  
 for its entire width, and between its  
 curb lines macadamized with crushed  
 rock, curbed with basalt blocks and  
 guttered with concrete, except 200 feet  
 on east side of Sheldon street, 100 feet  
 south of south line of Bassett street.  
 Bids will soon be called for.

ROAD CONSTRUCTION—Cost not  
 stated. Martinez, Contra Costa Co.,  
 Cal. Engineer, County Surveyor, Mar-  
 tinez. Owners, Contra Costa County.  
 Plans have been completed and figures  
 are now being taken for constructing  
 a road with a gravel base on Division  
 No. 2 of the Tunnel road, a distance of  
 seven miles and 300 feet. Bids will  
 be opened on August 16th. Plans and  
 specifications can be secured from the  
 County Clerk.

STREET PAVING—Cost not stated.  
 Sausalito, Marin Co., Cal. Engineer,  
 City Engineer, Sausalito Owners, City  
 of Sausalito. The Town Engineer has  
 been instructed to prepare plans and  
 specifications for the paving of El  
 Portal and Park avenues. The work  
 will be under the 1911 act. On com-  
 pletion of the plans bids will be called  
 for.

ROAD CONSTRUCTION—\$49,246.23.  
 Martinez, Contra Costa Co., Cal. En-  
 gineer, County Surveyor Arnold, Mar-  
 tinez. Owners, Contra Costa County.  
 Plans and specifications for seven more  
 miles of permanent highway running  
 from the Bryant bridge to Walnut  
 Creek have been completed and pre-  
 sented to the Supervisors by County  
 Surveyor Arnold. The new stretch is  
 estimated to cost \$49,246.23, or at an  
 average of \$7,035 per mile. There are  
 to be three concrete and steel bridges  
 to be erected. The road is to be 18  
 feet wide and will have a concrete  
 base with asphaltum crown. There  
 will be a two-inch wing.

ROAD REPAIR—\$8,000. San Rafael,  
 Marin Co., Cal. Engineer, County Sur-  
 veyor, San Rafael. Owners, Marin  
 County. The bid of S. B. McNear of  
 \$8,000 to repair the road leading from  
 Chicken Point to a point near the Mc-  
 Near Brick Yard, was rejected at the  
 last meeting of the Supervisors. Su-  
 pervisor Hansen was empowered to do  
 the work.

**STREET PAVING**—Cost not stated. Santa Rosa, Sonoma Co., Cal. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. The City Engineer has been instructed by the council to prepare a plan showing the location of the street and the location of the property owners not signed up for the paving of Santa Rosa avenue, and submit the same at the next meeting so that the work may be called.

**HOTEL**—3 story and base, frame, not stated. Mt. Diablo, Contra Costa Co., Cal. Architect, G. A. Applebush, Spreckels Bldg., S. F. Owners, Diablo Hotel Co. The building has been designed for a hotel and observatory. Interior will be finished in oak and redwood. A central heating system will be installed. Exterior will be covered with rustic and shingles. Plans are complete and figures will be given at once.

**BRIDGES**—3 reinforced concrete. Cost not stated. Martinez, Contra Costa Co., Cal. Engineers, Leonard & Rialto Bldg., S. F. Owners, Contra Costa County. At the last meeting of the Board of Supervisors of Contra Costa County plans submitted by Engineers Leonard & Day were accepted for three reinforced concrete bridges to be erected in that county. Bids were opened for at the same meeting and the opening date was set for August 23rd. Plans can be secured from either the office of the engineers or from the City Clerk at Martinez.

**BRIDGES**—3, reinforced concrete. Cost not stated. Fairfield, Solano Co., Cal. Engineer, County Surveyor, Fairfield. Owners, Solano County. Bids are now being received by the County Engineer for the construction of three bridges to be constructed on the highway. The first will be over Grants Valley Creek at the Finch and Vacaville Township. The second will be over Green Valley Creek at the Nightingale ranch. The third will be over Green Valley Creek near Elia. Plans together with full information may be had from the County Engineer at Fairfield.

**APARTMENT HOUSE AND STORES**—2 story and base, brick and concrete. Cost, \$10,000. Martinez, Contra Costa Co., Cal. Architect, James T. Narbett, 704 Broadway avenue, Richmond. Owner, Frank Prosser. The building has been designed to contain three stores on the first floor besides the entrance. Upper floor will be arranged for seven suites of three rooms and bath. Interior will be finished in pine. Wall beds are provided. Patent store fronts will be used. Bath rooms will have tile wainscoting. Exterior of the building will be finished with pressed brick. Plans are being prepared.

#### Contracts Awarded

**STREET PAVING**—\$6,209.63. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractors, Galbreath & Jones, 156 14th street, Richmond. Contract price, \$6,209.63.

**SEWER CONSTRUCTION**—Cost as per estimate. Petaluma, Sonoma Co., Cal. Engineer, City Engineer, Petaluma. Owners, City of Petaluma. Contractor, J. Silva, Petaluma. Contract price, \$10,000. Plans for 6-inch iron sewer, including Y branches, 55c per foot.

### FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA

RESIDENCE—1 story, frame, \$1500. Fresno, Fresno Co., Cal. Architect, none. Owner, J. R. Church, Fresno.

The dwelling will be erected in the Riverdale Addition, and has been designed for a five-room house. Interior will be finished in pine and redwood. There will be an open fire place in the living room. Mantel will be of tile or brick. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCES—3, 1 story and base, frame, \$2,500 each. Fresno, Fresno Co., Cal. Architect, none. Owner, H. W. Ackerman, 1221 U street, Fresno. These dwellings will each contain six rooms and bath, and will be erected in the Alta Vista Tract. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and brick mantels. Tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**STREET PAVING**—Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, City Engineer, Modesto. Owners, City of Modesto. Resolutions providing for the paving of L street between Seventh and Ninth streets have been adopted by the City Council and bids on the work will be called for as soon as all necessary advertising requirements have been complied with.

**SEWER CONSTRUCTION**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, City Engineer, Turlock. Owners, City of Turlock. Plans and specifications for sewer work to be done in Minaret avenue and Rose street have been completed by the City Engineer and approved by the City Council and bids on the work are now being taken. Plans and further information may be had from City Engineer Layster.

**STREET PAVING, ETC.**—Cost not stated. Lindsay, Tulare Co., Cal. Engineer, City Engineer, Lindsay. Owners, City of Lindsay. The Board of Trustees are making preparations for the improvement of Hermosa street from Mt. Vernon avenue to the westerly limits of the city, and Main street east to the city limits. A 16-foot pavement with a two-foot gravel and oil shoulder on each side will probably be laid on Hermosa street, while Honolulu street will be paved from curb to curb as far as the Santa Fe depot on Harvard avenue.

**BRIDGES**—Reinforced concrete. Cost not stated. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. Plans and specifications prepared by County Surveyor Byron O. Lovelace, having been approved by the Highway Commission for the construction of two bridges in Tulare County, the Supervisors have issued a call for bids on the work. The work will include the construction of one 400-foot span of the Kings River bridge on the line of the state highway, and one bridge of 40 feet across the Alta District or old "76" canal at Traver. Plans and specifications may be had from the County Surveyor at Visalia.

**CHURCH**—2 story and base, brick and steel, \$75,000. Fresno, Fresno Co., Cal. Architect, R. F. Hotchkiss, Fresno. Owners, First Church of Christ, Scientist, Fresno. An announcement has just been made of the selection of an architect to design the structure, and no details of the building have been given out. It is understood that the architect and Building Committee will shortly make a tour of the principal cities of the state with the intention of securing ideas for the building. Further mention will be made of the work.

**HALE**—1 story, reinforced concrete. Cost not stated. Patterson, Stanislaus Co., Cal. Engineer, County Surveyor A. L. Clary, Modesto. Owners, Town of Patterson. The building will be of fire-proof construction. No details of construction have been given out. Plans are being prepared and figures will be called for shortly. Further mention of the work will be made.

**SCHOOL**—1 story and base, brick and tile, \$12,000. Fresno, Fresno Co., Cal. Architect, Ernest J. Kump, Howell Bldg., Fresno. Owners, West Park School District. The building will be erected about 2½ miles out of Fresno, and has been designed for a four-room school. Interior will be finished in pine.

will be installed. Bath room will have tile floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being revised and new figures will be called for shortly.

**RESIDENCE**—1 story and base, frame, \$2,750. Sacramento, Cal. Architect, none. Owner, W. D. McKay, 2029 E street, Sacramento. The dwelling will be erected in Casa Loma Terrace, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some elm panels and white enamel. Hardwood floors will be used in the principal rooms. There will be an open fire place and furnace heat. Mantel will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the

work by Day Labor. Materials are now being purchased.

**ROAD CONSTRUCTION**—Cost not stated. Eureka, Humboldt Co., Cal. Engineer, County Surveyor, Eureka. Owners, Humboldt County. All bids received by the Supervisors for the construction of the three roads—Ettersburg, Honeydew and Bair's Hoopa roads—were rejected and readvertisement was directed for alternate bids on 10-foot and 12-foot roads.

**STREET PAVING, CURBS AND GUTTERS**—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. At the last meeting of the City Council resolutions of intention were adopted for the improvement of Scotts avenue from Lincoln to Monroe street; Van Buren from Taylor to Hazelton; Monroe from Taylor to Scotts avenue, and the west half of Monroe street from Scotts to Hazelton avenue. The improvements are to consist of concrete curbs and gutters and asphaltic bound macadam street pavement.

**STREET PAVING**—Cost not stated. Chico, Butte Co., Cal. Engineer, County Surveyor Artin C. Polk, Oroville. Owners, City of Chico. The street bordering the children's playground and connecting Broadway with the Esplanade bridge over Big Chico Creek, will be paved with what is known as Richmond Specification, with a mixture of oil and crushed rock, according to a statement of Supervisor R. P. Holmes. County Engineer Martin C. Polk has been directed to prepare plans and specifications for the work. The work will cost several thousand dollars.

**BRIDGE**—Reinforced concrete. Cost not stated. Patterson, Stanislaus Co., Cal. Engineer, A. L. Clary, Modesto. Owners, Stanislaus County. According to word received from this city, County Surveyor A. L. Clary has prepared plans and specifications for the construction of a cement bridge over the Salida Creek where it crosses the county road immediately north of the town. Bids will be invited at an early date.

**BRIDGES**—Steel and concrete. Cost as follows. Eureka, Humboldt Co., Cal. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Contractors, F. L. Smith, Eureka, suspension bridge over Trinity River, \$3,750; Farnell & Robinson, Eureka, repairs to North Fork bridge, \$1,622; F. L. Smith, Eureka, suspension bridge over Salt River, \$16,190.

**STREET PAVING**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. The contract for the paving of M street from the east line of Second to the west line of Third street has been awarded to the McGilivray Construction Co., 1907 7th street, Sacramento, by the City Commission. The Clark & Henry Construction Co., Ochsner Bldg., Sacramento, were awarded the contract for the improvement of Third avenue in Oak Grove, from the east line of Lower Stockton road to the west line of East avenue.

**SCHOOL**—1 story, frame. Cost not stated. Brown School District, Tehama Co., Cal. Architect, none. Owners, Brown School District. The building will contain two classrooms. In

terior will be finished in pine. Stoves will be used for heating. Exterior will be covered with rustic and shingles. Plans are complete and out for figures. Bids will be opened on August 16th. Plans and specifications can be secured from the County Superintendent of schools, Odd Fellows Bldg., Red Bluff.

### Contracts Awarded

### LOS ANGELES AND SOUTHERN CALIFORNIA.

#### RAILROAD CONSTRUCTION

Cost not stated. San Diego, Cal. Engineer,  
Chief Engineer James R. Parish, Los  
Angeles. Owners, Santa Fe Railroad.  
The Temecula branch of the Santa Fe  
may be rebuilt, according to word re-  
ceived in San Diego. Commissioner  
Frank R. Devlin, before whom the  
hearing was held, has taken the matter  
under advisement. It is the intention  
to get a new railroad through San Luis  
Rey Valley. The proposed railroad  
would replace the section through the  
Temecula Canyon, washed out by  
heavy rains many years ago. Chief  
Engineer Richard E. Sachs of the Rail-  
road Commission has estimated the  
cost of the proposed road to be \$23,-  
000. The replacement of the washed  
out gap through the canyon would  
cost \$650,000, according to an estimate  
of Chief Engineer James R. Parish of  
the Santa Fe Company. The proposed  
new road would be slightly longer and  
would avoid the Temecula Canyon, go-  
ing instead via the San Luis Rey Val-  
ley, Bonsall and Fallbrook.

STREET IMPROVEMENT—Cost not  
stated. Calexico, Imperial Co., Cal.  
Engineer, City Engineer, Calexico.  
Owners, City of Calexico. Plans and  
specifications have been completed by

the City Engineer for the improvement  
of Second street and bids on the work  
will be called in about two weeks.

ROAD CONSTRUCTION — Cost not  
stated. Riverside, Riverside Co., Cal.  
Engineer, County Surveyor, Riverside.  
Owners, Riverside County. Plans and  
specifications for route 16, 2 1/2 miles,  
between Winchester and Coyote Pass  
of the country highway have been ap-  
proved by the County Supervisors and  
bids have been ordered advertised to  
be received on August 18th at 10 a. m.

BRIDGE—Reinforced concrete. \$43,-  
199. San Luis Obispo, San Luis Obispo  
Co., Cal. Engineers, Leonard & Day,  
Rialto Bldg., S. F. Owners, San Luis  
Obispo County. Engineers, Leonard &  
Day, Rialto Bldg., have received word  
from the Board of Supervisors at San  
Luis Obispo to the effect that Allison  
& Cole, San Luis Obispo, were the low  
bidders for the reinforced concrete  
bridge to be erected over the San Luis  
Obispo Creek about two miles out of  
San Luis Obispo. Their bid was \$8,199  
and an official award of contract will  
be made at once.

BRIDGES—12, reinforced concrete  
and steel. Cost not stated. Santa  
Paula, Ventura Co., Cal. Engineer,  
County Surveyor Pettit, Santa Paula.  
wners, Ventura County. Plans and  
specifications for twelve bridges and  
culverts to be constructed throughout  
Ventura County are being prepared in  
the office of County Surveyor Pettit.  
The plans include the construction of  
the Saticoy bridge, which will cost ap-  
proximately \$45,000. On completion of  
the drawings bids on the work will be  
called for.

JAIL—1 story, reinforced concrete.  
Cost not stated. San Luis Obispo, San  
Luis Obispo Co., Cal. Architect, none.  
Owners, City of San Luis Obispo.  
Plans and specifications prepared by  
Street Superintendent Burch for the  
new jail building have received the  
approval of the City Council. The  
structure will contain five cells, each  
8x8 feet in size, and one dark cell. Bids  
will soon be called for.

TANK AND TOWER—Steel and con-  
crete. Cost not stated. Hemet, River-  
side Co., Cal. Engineer, Town Engi-  
neer, Hemet. Owners, Town of Hemet.  
The City Council is having plans pre-  
pared for a new steel water tower and  
tank to be erected at the municipal  
water plant. It is to have a capacity  
of 125,000 gallons.

ROAD CONSTRUCTION — \$21,498.  
Santa Ana Orange Co., Cal. Engineer,  
County Surveyor, Santa Ana. Owners,  
Orange County. Contractor, Fred Hoff-  
man, Long Beach. Contract price, \$21,-  
498. At the same meeting the contract  
for furnishing and delivering 50,000  
barrels of cement at \$1.31 per barrel  
with 2 per cent discount for cash, was  
awarded to the Riverside Portland Ce-  
ment Co. An option was given on 30,-  
000 barrels additional at the same  
price.

#### Contracts Awarded.

BRIDGE—Reinforced concrete, \$2,-  
328. Riverside, Riverside Co., Cal.  
Engineer, County Surveyor, Riverside.  
Owners, Riverside County. Contrac-  
tors, Munoz & Munoz, Central Bldg., L.  
A. Contract price, \$2,928.

PLEASURE PIER—timber and con-  
crete, \$108,800. Redondo Beach, Los  
Angeles Co., Cal. Engineer's name not  
given. Owners, City of Redondo Beach.  
Contractors, Leyden-Orfseiten Co., Re-

dondo Beach. Contract price, \$108,800.  
**HIGHWAY CONSTRUCTION** — \$28,010.30. Riverside, Riverside Co., Cal. Engineer, County Surveyor, Riverside. Owners, Riverside County Contractors, Connors Construction Co., Higgins Bldg., L. A. Contract price, \$28,010.30.

## PORTLAND AND OREGON

**THEATRE**—1 story and base, brick, \$18,000. Oregon City, Ore. Architect, Aaron H. Gould, Henry Bldg., Portland. Owner, Charles Schram. The building will cover an area of 11 by 110 feet and will be fireproof throughout. The theatre will seat 650 people. Interior will be finished in pine and ornamental plaster. Special electric work is specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

### Contracts Awarded.

**ROUNDHOUSE AND SHOPS**—Reinforced concrete. Cost as follows. The Dalles and Pilot Rock, Ore. Engineer's name not given. Owners, Oregon-Washington Railroad and Navigation Co. Word received from this city states that the contract for constructing round houses, machine shops, etc., at The Dalles and Pilot Rock, Ore., for the Oregon-Washington Railroad and Navigation Co., has been let to Nettleton, Bruce & Eachbach, American Bank Bldg., Seattle, for about \$95,000. The work at The Dalles calls for a 12-stall brick and concrete roundhouse, 50x60 feet machine shop, turntable pit and foundations 30x54 feet, concrete and brick power house and stack, 40x60 feet, brick storehouse and platform. Cost, \$50,000. The work at Pilot Rock calls for a 10-stall roundhouse, turntable pit and foundations, 30x60 feet, power house and stack and a one-story 40x65 feet storehouse. All buildings to be of concrete and brick and cost about \$15,000.

**CITY HALL**—2 story and base, brick, \$19,388. Tillamook, Ore. Architect, Charles H. Burgraff, Albany, Ore. Owners, City of Tillamook. Contractor, F. Hyde, Tillamook. Contract price, \$19,388.

## SEATTLE AND WASHINGTON

**HOTEL**—6 story and base, brick and steel, \$150,000. Walla Walla, Wash. Architect, George B. Purvis, Northern Bank Bldg., Seattle. Owners, New Grand Hotel Co. The building will cover an area of 70 by 120 feet and will provide for stores and the hotel lobby on the first floor. Upper floors will be arranged for a large number of modern hotel rooms, a large percentage of which will have private baths. Interior will be finished in pine with some hardwood. There will be steam heat, elevator service, hot water system and vacuum cleaning. Bath rooms will have tile floors and wainscot. Marble and tile and ornamental plaster will be used. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are nearly complete and figures will be called for by September 1st.

**PUBLISHING HOUSE AND OFFICES**—5 story and base, reinforced concrete, \$500,000. Seattle, Wash. Architects, Charles H. Bobb and Carl Gould, Benny Bldg., Seattle. Owners, Times Pub-

lishing Co. The building will be erected at the corner of Westlake and 1th, and will cover a large ground area. Foundations have been designed to carry three additional stories. There will be a number of stores on the first floor besides the general office. Upper floors will be arranged for offices and the editorial and city rooms. Interior will be finished in pine and hardwood. There will be steam heat, elevator service and vacuum cleaning. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are being prepared and will be ready for figures about September 1st.

## CONSTRUCTION WORK ABROAD.

### AUSTRALIA.

[Sydney Herald, July 1.]

### New Railway Lines Will Open Up Crown Lands.

The Premier has received from the Director General of Public Works a memorandum respecting the areas of Crown land which the Government will be in a position to throw open upon the construction of the Mirrool-Hillston and Barmedman-Hillston lines of railway.

The Director General states: "The two railway proposals are closely related regarding the country to be served. For the expenditure of \$2,570,000 in the construction of 155 miles of railway (both proposals being 72½ miles in length) there would be available for closer settlement an area of 2,275,000 acres of Crown land. If, by the construction of these two lines, the Crown land is increased in value by \$1.20 per acre, the amount would aggregate \$2,750,000, a sum sufficient to pay for the cost of construction."

[Consul General J. I. Brittain, Sydney, June 9.]

### Warragamba Water Supply and Irrigation Scheme.

In response to an inquiry to this consulate general for particulars of the Warragamba irrigation scheme in the State of New South Wales, the following facts have been supplied by the Department of Public Works, Sydney:

The Warragamba scheme for the supply of water for the city of Sydney and for irrigation and manufacturing purposes in the county of Cumberland consists of the construction of an impounding dam upon the Warragamba River about 12 miles from Penrith, in the county of Cumberland, New South Wales, Penrith being distant from Sydney 34 miles, and the construction from the reservoir of channels for the distribution of the impounded water.

The reservoir will be formed by the construction of a concrete dam approximately 596 feet long on the crest and 275 or 280 feet (height not yet determined) from the foundations. The volume of water impounded will be approximately 25,000,000,000 cubic feet. The canals will be excavated and lined with concrete.

So far as the material employed in the construction of these works is concerned, and stone and sand required for concrete is obtainable in the vicinity of the works, the cement will be manufactured by the State. The quantity of iron required in outlet works, valves, siphons, etc., is very small.

and this also, together with any iron or steel reinforcement rods or bars used in the concrete of the channels, will probably be rolled and manufactured in New South Wales.

From the above brief description of the works it will be seen that they are of such a nature as to make the importation of any quantity of material required in their construction extremely unlikely. By much the most important item in respect of quantity and cost is the cement employed in the manufacture of the concrete dam, for which approximately 500,000 casks of 1 cubic feet each will be required, but there seems no reason to anticipate that it will be necessary to import this cement; requirements with regard to similar work, for instance, the Barron Jack Reservoir, having been satisfactorily met in the State.

[Sydney Daily Herald, June 12.]

### Canal Proposed to Connect Newcastle and Port Stephens.

The assistant treasurer of the Government is in the Newcastle district investigating an important scheme in connection with the port of Newcastle and Port Stephens. Under a new harbor trust a coastal canal could be dredged, through which vessels could enter or leave Newcastle in all kinds of weather. Port Stephens is the haven for coastal craft in rough weather, and is to be made a naval base. Motor boats at present ply to Tilligerry Creek, which forms part of the route of the proposed canal. [The Herald's map of the proposed canal route will be loaned on application to the Bureau of Foreign and Domestic Commerce, Washington, D. C.]

### CHINA.

[Consul General George E. Anderson, Hongkong, June 10.]

### American Prospects for Supplying Railway Equipment.

Considerable light upon the general railway situation in China, reviewed from a construction standpoint, is contained in a letter from an engineer employed in survey of the American section of the Hankow-Canton system written several weeks ago. This letter says:

It is now quite sure that our section (the American section) will surely stop work in the near future, perhaps in a month at most. The British section (Kwanung border to Hankow) and the German section (Hankow to Ichang) will both do some construction. The British will build from Hankow to Changsha (capital of Hunan Province), while the Germans will only build a feeder line (of about 75 miles) to the Peking-Hankow Railway. This is the final agreement between the Chinese Government and the bankers. The Hankow-Canton line must be built. Germans agree to give up their section if they could use the money now in the Hankow-German bank to build this feeder line to the Peking-Hankow Railway, while the American section will be abandoned of course due to lack of funds. Now all the loan will be concentrated on the British section and the Germans will get a part of it to build a small line. So you see we will have to quit here very soon. Just before the war we thought we were the backbone among the contractors.

if this line is ever built it would mean a chance of a lifetime.

Business in some lines of railway material will have to be done on a considerable scale in the near future to maintain lines now in operation. The indications are that American manufacturers will have an especially favorable opportunity to secure much if not most of this business. Little may be expected in the way of new work.

[London and China Telegraph, July 12.]

#### Progress of the Peking City Electric Line.

The scheme for the construction of the Peking tramways for which numerous contracts have been signed and over which there has been much discussion is still engaging the attention of the authorities. It is stated that the Minister of the Interior has now taken the matter up, and that it is intended to secure the capital by subscriptions from the wealthy Chinese merchants, and in the event of insufficient money being raised in this manner that the Government will provide part of the funds and make the company a semi-Government concern.

#### Proposed construction of Colliery.

A Chinese hardware merchant of Tientsin, Mr. Lo-yushen by name, has formed a company under the style of the Tungyu Enterprise Co., with a capital of 3,000,000 yen (\$1,500,000). The new company has for its object the exploiting of a colliery at Tayaokou near Chinchow. It is understood that when up-to-date machinery is installed this colliery will become capable of yielding 2,000 tons a day, and that the Peking-Mukden Line of the Chinese Government Railways has already contracted for the purchase of 500 tons a day.

#### SIAM.

[Vice Consul Carl C. Hansen, Bangkok, June 3.]

#### Shipbuilding in Bangkok.

The Bangkok Dock Co. has recently received an order for building a twin screw motor yacht 75 feet long and a 55-foot motor launch for the King of Siam. Both of these vessels will be fitted with Aster marine motor and will be very highly finished and furnished, and it appears that most of the construction material will have to be imported from abroad.

#### THE YEAR'S FOREIGN TRADE.

In exports of domestic products, in aggregate value of foreign trade, and in favorable balance of trade the United States made a new high record in the fiscal year ended June 30, 1915. Imports and exports combined totaled \$4,412,564,272, an increase of \$184,000,000 over 1914 and of \$164,000,000 over 1913, the prior high-record year in total trade.

Exports in 1915 totaled \$2,765,643,522, an increase of \$404,000,000 over 1914 and of \$205,000,000 over 1913. Imports aggregated \$1,647,220,750, a decrease of \$219,700,000 from last year's total and of \$123,500,000 from that for 1913.

The excess of exports over imports for the year 1915 was \$1,091,422,772, which sum exceeded by \$428,000,000, the former high record made in 1908 and by \$623,500,000 the export balance for 1914.

June, 1915, exports were \$265,601,599 and exceeded by \$111,530,000 the total for June last year. June imports were \$157,716,140, or less by \$216,690 than those for June, 1914, but \$26,500,000 more than those for June, 1913.

Of the June, 1915, imports 62.94 per cent entered free of duty, compared with 59.32 per cent for June, 1914, and 50.88 per cent for June, 1913. Of the year's imports 61.73 per cent were duty free; in 1914, 59.43 per cent.

The year's gold movements included imports, \$171,568,755; exports, \$146,224,148. In 1914 the figures were—imports, \$66,538,659; exports, \$112,025,529. The month of June, 1915, reversed the conditions shown in June last year, June gold imports having been \$52,341,740 this year and \$3,817,112 last year, while gold exports last month were only \$2,821,988, against \$48,107,064 in June, 1914.

#### NEW ZEALAND IMPROVING PATEA.

The Marine Department of New Zealand has approved plans for the improvement of the port of Patea, for which a loan of £86,000, secured by the Patea Harbor Board, has been issued. Tenders are now being invited for the extensions of the existing breakwater in concrete, on the "pierre perdue" system. The contract time to complete the works is four and a half years, and it is estimated that the extension will result in an increase of 50 per cent in the trade of the port.—Far Eastern Review.

#### REPORT ON FULLER'S EARTH.

The annual statement on the production of fuller's earth has just been published by the United States Geological Survey and is now available for distribution. This industry showed considerable progress in 1914, the marketed production amounting to 40,981 short tons, valued at \$403,646.

#### REPORT ON PHOSPHATE ROCK.

The annual statement on the production of phosphate rock has just been published by the United States Geological Survey and is now available for distribution. In 1914 the marketed production of phosphate rock in the United States was 2,734,643 tons, valued at \$9,608,041.

#### NEW STEAMSHIP LINE TO ALASKA.

[Commercial Agent W. B. Henderson, Seattle, Wash. July 10.]

A new semimonthly steamship line was established this week by the Independent Steamship Co. between Puget Sound and south eastern and southwestern ports of Alaska. It has Pier A in Seattle as headquarters, and handles both freight and passengers.

The total attendance at the Exposition up to this date has been over a millions. Inasmuch as only a little over half the Exposition is over and the best of the season is yet to come, it is natural to suppose that the attendance will be over double that number before the close of the fair. This is not a bad showing considering conditions. For the local territory where people can come from is small as compared to the cities in the East in the centers of population. This is a

country of magnificent distances and the distances impede frequent visits to an exposition. On account of the war and the consequent unsettled business of the country the vacation trips of everybody have been cut down. Under the circumstances the attendance of the Exposition has shown a splendid average.

The South American countries are not perhaps as well represented at the Exposition as they ought to be. At that there are exhibits enough to give an idea of the productions of the southern continent, and at least an indication of the comparative undeveloped resources. Brazil, an unknown land, with an area as large as the United States; Argentine with its wonderful agricultural resources; the Andes countries with their lordly mountains, their mines and varied climates all present opportunities for the emigrant to get from the land wealth and happiness.

If the people of Europe would emigrate to these undeveloped countries, become a part and parcel of the land in which they live, then there would be stable governments and virile republics in which political and industrial freedom would bloom and bear fruit. If instead of the seeking of one government to overthrow another and impose its language and government and customs on a people who do not want them, they allowed free emigration and cultivated trade relations with these people they would in the end reap a greater benefit.

South America is today a land of promise. If Europe is not depopulated by the present war there should be opportunity there for the victims of this horror to find a living in a new country. And it should be away from the ambitions of emperors and kings and under the protection of free republics.

#### CONSTRUCTION WORK ABROAD.

##### SIAM.

[Vice Consul Carl C. Hansen, Bangkok, May 13.]

#### Siamese Northern Railway.

On May 1, 1915, an 11-inch section on the Siamese Northern Railway extension was opened to traffic. It extends from Ban Fin to Ban Pakoh. There remains to be completed 107½ miles from Ban Pakoh to Chiangmai, the northern capital, which will be the northern terminus of the line. It is expected that the entire line will be ready for traffic in about two years.

The workmen's compensation act has been held valid by the Supreme Court. This is a long step in the way of remedial legislation and in the change of the attitude of the courts. It is doubtful if such a decision would have been rendered ten years ago in any court of justice. For precedent is the thing that binds the courts. And what was decided a hundred years ago in most cases binds the courts today.

In saying that the public interest demanded the protection of the worker the court aligns itself with the new order of things. The traditions of the law are with property. Injunctions are invoked to prevent injury to property. But it has taken a long time to enact laws for the protection of life, so that accidents in dangerous occupations do not leave the victims absolutely without means of support.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, August 18, 1915

Fifteenth Year, No. 33

The Los Angeles County Flood Control Report has been filed and the discussion of its contents is still going on and making the meetings of the Board of Supervisors rather lively at times, but out in the canyons important experiments are going on that will have important bearing on many of the problems presented in controlling the flood waters.

Floods made to order, big or little! They started to making them at an experimental station rigged up in the big Tejuanga by the Board of Engineers, Flood Control. It was the initiation of work that has a most important bearing on the whole project of flood control.

A rock dam with an adjustable sluiceway, supplies the apparatus, and five men do the work. The experiments are to determine the mean velocity of varying heads of water moving through channels of certain gradients and the impinging force at relative distances.

By determining all these, engineers will be able to figure out the precise strength of a dam necessary to catch and restrain one or more acre-feet of water moving at a certain velocity. As the plans of the board contemplate many of these impeding dams, costing a total of \$1,410,400 the experiments are important. The idea is to develop a type of dam that can be economically constructed in this country.

In the experiments a head of twelve and one-half feet of water was used. A shot was fired when the water was released, and men stationed a half-mile apart checked the arriving time of the water.

The dam itself is of concrete, seventy-five feet across and twenty-four feet high. It has an adjustable gate 5x7 feet.

Last month the county of Los Angeles, through the Board of Supervisors, made a contract with the city, whereby the city leased to the county the Portland cement works at Monolith. The lease was to run one year with the privilege of another term of four years at an annual rental of \$27,500, payable in monthly installments. Last week R. E. Patterson, as a taxpayer, brought an action in the Federal Court against the Board of Supervisors, Treasurer J. H. Hunt and Auditor W. A. Lewis to tie up the matter in an injunction.

The prayer of the petition is that the defendants be restrained from carrying out the lease or contract, and from operating the plant, from paying out any money or incurring any indebtedness or liabilities in connection therewith, or selling or attempting to sell any of the cement. The attorneys for Patterson are Fredericks & Hanna and O'Melveny, Stevens & Millikin.

It is set out in the complaint that the capacity of the cement works is about 1200 barrels a day, and that the annual requirements of the county in the cement line are not to exceed 15,000 barrels. Also, that the Board of Supervisors intends to run the plant to its full capacity of 1200 barrels a day, and sell the cement not

needed by the county in public work to the public, unless restrained by the court. It also asserted that the county has already entered upon a campaign of selling the surplus output, one offer being made to dispose of 20,000 barrels to the authorities of Kern county at \$1.35 a barrel.

It is further set out that it will be necessary for the county to incur a large indebtedness—estimated at \$50,000—that it may turn out an amount in excess of what is required by the county. Also, that the sale of cement to outside parties is not a governmental or public purpose and that power so to do cannot lawfully be conferred upon the county or any of its officers.

It will be interesting to watch the outcome of this fight, as it hits one of California's largest industries.

A formal request that provision be made for a survey of Los Angeles harbor with a view to further improvement by the Federal Government has been filed with the members of the Rivers and Harbors Committee of the House of Representatives by the local Harbor Commission.

The Government is urged by local authorities to widen the entrance channel of the harbor to a minimum of 1000 feet; to deepen the entrance channel and turning basin to 35 feet; to widen the East Basin channel and to dredge the triangular area south of Reservation Point.

In the formal report made to the Congressional Committee, the Harbor Commission calls attention to the fact that the United States has expended in 44 years since 1871 something less than \$6,000,000 in improving Los Angeles Harbor and that in the six years since the harbor came under the jurisdiction of the city this municipality has voted bonds aggregating \$5,500,000 for harbor improvements of which amount about \$800,000 remains. Attention is also called to the fact that the city also stands pledged to vote \$4,500,000 more or a total of ten million dollars by 1919.

"The City of Los Angeles," says the Harbor Commission, "therefore is co-operating with the United States in developing a water terminal for the use of commerce passing through the Panama Canal, and not for the benefit of this city alone, but for the benefit of all the people of the Southwestern part of the United States."

Figures are presented showing the growth of harbor business during the past fifteen years, namely that the number of vessels entering the port in the year just closed was more than five times as great as fifteen years ago, yet the net tonnage was more than twenty times as great as it was fifteen years ago.

The Congressional Committee is informed that additional steamship lines are seeking entrance to municipal wharves in the inner harbor and that the port tonnage is growing rapidly.

## Office Building Power Plants.

By Chester B. Loomis, M. E., Consulting Engineer

The power plant problem for office buildings is one that has seldom been given sufficient attention on the Pacific Coast. It is not only necessary to make a proper selection and arrangement of the apparatus, but also to foresee the conditions under which the plant is likely to operate. For this reason the plans should be examined and approved by an experienced designing engineer in case expert service is not employed, as it should be, at the outset.

It is not sufficient to have a mechanically perfect plant although this is, of course, of prime importance. The design of boilers, the selection of prime movers, size of the units, provision for future expansion and similar factors bear much weight upon the economy of operation. Each installation is a problem by itself and though similar plants should be studied and each case should be worked out in its own merits.

The most important factor in any power station design is the load curve, referring not only to the yearly average but also to the daily maximum and minimum. Steam requirements for heating and other purposes must be considered together with the power requirements, since these factors all effect the choice of the prime mover.

The variation of the load curve during the various months may be shown by the following figures giving the electric output of the power plant in a Chicago office building as given by Professor G. F. Gebhardt:

A. M.	January	July	P. M.	January	July
1	800 amps	600 amps	1	5800 amps	2800 amps
2	1000 "	800 "	2	6500 "	2700 "
3	1600 "	1200 "	3	6200 "	2600 "
4	1500 "	1000 "	4	5700 "	2650 "
5	1000 "	300 "	5	4000 "	2100 "
6	1200 "	700 "	6	3200 "	1500 "
7	1400 "	850 "	7	2000 "	1250 "
8	2000 "	850 "	8	1500 "	1150 "
9	4400 "	2000 "	9	1450 "	1200 "
10	5900 "	2000 "	10	1400 "	1300 "
11	6200 "	2400 "	11	1200 "	1000 "
12	6000 "	2600 "	12	1000 "	550 "

While the load variation between January and July will not be as marked on the Pacific Coast, due to the milder winters, the variation is still great and the most careful attention must be given to the selection of the prime movers on account of this variation.

In the design of the office building plant, the factor of limited space enters very prominently. As the plant must be installed either in the basement or sub-basement, compactness is an essential feature. By properly equating the cost of the plant per cubic foot against the cost per cubic foot of the basement it is possible to estimate how far the designer can go with regard to special machinery. In all cases the yearly value of a cubic foot of basement space can be determined. It sometimes is found that the saving in space more than compensates for the installation of a comparatively uneconomical prime mover. Then, again, the engine room is usually cut up with the building columns which complicates the design, particularly in regard to the piping and the accessibility of the various units.

### Boilers.

The almost universal practice is the installation of some modern type of water tube boilers. These boilers have many advantages. They are easily cleaned, are quick steamers and are the safest type to operate with oil fires. Owing to the fact that all building plants operate non-condensing, ease of cleaning is an important feature, as practically all the feed water used contains a certain amount of scale-forming matter which it is impossible to precipitate in the feed water heater and which forms a non-conducting scale in the boiler. While boiler compounds are used with good effect, still a certain amount of scale is formed which is not possible to remove by washing. In plans which purchase treated water or that are of sufficient size to permit the installation of the so-called water softeners, the scale question is not so serious, but it is seldom the case that water can be obtained which does not carry scale-forming material.

Super-heaters should be installed whenever possible as an increased economy can be obtained by their use. The steam should be super-heated as highly as possible without effecting the lubrication. With machinery such is commonly used, the total heat of the steam allowable is about 450 deg. F. With certain prime movers such as engines specially designed for the use of super-heated steam much higher temperatures may be safely carried.

There is one type of the fire tube boiler which is coming into favor in the east for building work, that being the Scotch Marine boiler. While it has some disadvantages, it has many advantages to compensate—such as no setting required, all surface water cooled except the combustion chamber, no leakage of cold air through cracks in the brick work and large steam capacity for the space occupied. Where the feed water is reasonably free from scale-forming materials it is a very satisfactory type if properly installed with circulators.

### Generating Sets.

The type of generating unit usually installed is the high speed automatic compound engine, either tandem or cross compound, direct connected to a direct current generator. The engine may be of the single or of the multiple valve type as desired. While the four-valve type shows a slighter economy than the single valve, it has the disadvantage of a higher first cost, increased complexity and increased repair bills. Tests show a steam consumption as follows on an automatic single valve high-speed engine, and a medium speed four-valve or non-releasing Corliss valve non-condensing engine. Both engines were of the highest class. Steam pressure for automatic engine 140 pounds, non-releasing Corliss 150 pounds at the throttle. Cut off in both cases 25 per cent per the stroke.

#### Pounds Steam per 1 H. P.

Engine	1 H. P.	Full Load	3-4 Load	1-2 Load	1-4 Load
Automatic	250	21.98	22.75	26.65	39.13
Four-valve	300	19.71	21.74	22.82	39.54

These figures are for test conditions only and are probably from 10 to 15 per cent better than will be obtained in actual practice. The four-valve engine is usually more economical under operating conditions owing to the wide fluctuations in load in the building plant, particularly when the elevators are electrically operated.

With the single valve engine any change of the position of the valve due to the operation of the governor, not only alters the inlet conditions but also those of the exhaust. This, of course, effects the economy as the point of opening of the exhaust valve should be fixed. With the single valve engine, the inlet and exhaust steam both come in contact with the valve, thus lowering the temperature of the inlet steam and heating unnecessarily the exhaust steam. These conditions do not hold for the four-valve engine.

The una-flow engine is gradually becoming recognized as a factor for building work, and while designed for condensing operation, gives an economy non-condensing comparably with the compound automatic engine. It requires large space, is exceedingly heavy, and it is a question whether it is satisfactory for a building plant as the compound type. It can be operated like all other poppet valve engines on steam with almost any degree of superheat, and with a high degree of super-heat its economy becomes more marked.

When floor space is at a premium, the vertical engine should always be considered. While the initial cost is higher, the saving in floor space is very great. In comparing two small engines of standard make, the following floor space for the engine alone is required: Horizontal tandem compound, 72 square feet; vertical cross compound, 20 square feet, both engines to be connected to 75 K. W. generators.

#### Pumping Engines.

When the elevators of a building are of the hydraulic type, pumps of some type must be considered. The pumps may be divided into three classes, i. e.: Corliss pumping engines, direct acting pumps and power pumps.

Where the load is fairly uniform and space is not at a premium the compound Corliss pumping engine is usually used. They have the advantage of good economy and comparative ease of operation. They are usually used in the cross compound type with outside center packed water ends. Great care should be used in proportioning the steam cylinders. Many such pumps as installed are simply the standard waterworks type operating non-condensing. In this case the low pressure cylinder is too large, and in some cases, tested by the writer, it has been found that the economy is not as great as the direct acting compound pump. This was due to the high back pressure in the heating system and light loads. In nearly all cases the elevator pumps operate too slowly for the maximum efficiency.

Where there is a large market for exhaust steam, the direct acting compound pump may be used with satisfaction and economy. They are simple to operate and when large powers are not required, are often used. They occupy small space per cubic foot of water pumped and very little head room.

Power pumps direct connected to electric motors and equipped with automatic control are satisfactory units. The efficiency of both motor and pump is high and repair bills low. The greatest trouble with this type of pump has been the vibration and noise of the gearing, but this can be taken care of with silent chain drives or herring bone cut gears. They are seldom used except for small installations.

The multistage turbine pump is sometimes used. Direct connected to a suitable motor they form exceedingly satisfactory units, requiring less space than any other type of pump and having no vibration. They are capable of handling large amounts of water against high pressure, and the maintenance and repair bill is negligible. The

efficiency of a set of this type is as high as the average power pump under operating conditions, and it has none of its disadvantages. They require less space than any other type of elevator pump.

The greatest care must be exercised in properly proportioning the pumps and motor to the load and in obtaining the proper sizes, and in obtaining a pump having the proper characteristic curve.

An installation of this type requires no more foundation than a motor, and the installation cost of the best types is exceedingly low.

#### Auxiliaries.

The auxiliaries in most power plants, excepting the largest ones, seldom receive sufficient attention. Feed pumps are usually picked at random. Any pump which will force water into the boiler being considered sufficient. When one remembers that the auxiliaries of a non-condensing plant consume from 7 to 16 per cent of the total steam generated, they are looked at in a different light.

A series of tests was run by the writer on several different small feed pumps and the actual duty per 1,000 pounds of dry saturated steam was found to be from 778,100-foot pounds to 11,234,000-foot pounds. Where the exhaust steam can be used for heating the feed water or for exhaust steam heating, the economy of the steam-driven auxiliaries is not essential, but usually there is an excess of exhaust steam, in which case economical auxiliaries quickly pay for themselves. On the Pacific Coast with the mild winters and long summers, a great deal of the exhaust must be wasted.

The feed water heater usually operates under several pounds back pressure as the exhaust is used for heating. A proper heater should have an ample water storage for the hot water, should be of a type easily cleaned and should have a filter to prevent the oil carried over by the exhaust from entering the boilers. The feed water should be heated to the highest degree possible in order to precipitate as much scale forming matter as may be, and to save fuel under the boilers. The fuel saving under the boilers is approximately 1 per cent from every 9 deg. F. rise of the temperature of the feed water.

Greatest care should be used in designing the piping of a steam plant. Usually the lines are short and contain many fittings, but with careful designing and the use of long sweep fittings saving can be made. The majority of building steam pipe lines are too large and are not well designed.

#### Measuring Instruments and Testing.

All plants should be equipped with recording instruments, such as oil meters, water meters, electric meters, etc. Without proper records it is impossible to tell where the plant leaks are. Many building plants have been abandoned and power purchased, through the inability of the plant engineers to definitely show the cost of power production. The power salesman for the public utility company has all his actual costs, while with the isolated plant, in many cases, the actual power cost is merely a guess.

The plant records should be kept under two headings:

1. Fixed charges—Investment costs.  
Administration costs.

2. Operating costs.

A complete yet simple system should be devised to cover each plant, as it is seldom the records of one plant will be similar to another. In general, the following items are required:

Fuel.	Station repairs.
Oil, waste and supplies.	Steam equipment repairs.
Water.	Electrical equipment repairs.
Wages.	Miscellaneous.

There will be several sub-headings required under these items. Against these should be credited the station output, so that the actual cost of operation may be obtained. If the items are properly classified, curves may be plotted which readily show any variations so that corrections in operation may be made where necessary.

All records should be studied both by the operator and by the executive head, and expert advice obtained from time to time. Tests also should be made at least once a year and preferably often. These tests should be made under the regular operating conditions, and any changes or alterations necessary then made. It is only by careful design by expert engineers and operation under suitable supervision, continued economy may be obtained.

## Concrete Electroliers.

By Gus. H. Atchley, City Engineer Hermosa Beach.

The city of Hermosa Beach in Los Angeles County was one of the first to install ornamental street lamp posts made of concrete by the centrifugal process. The first set of posts were installed with the building of the Ocean Front cement concrete walk, and a few excerpts from the specifications under which they were built and erected will give a very good idea of the work.

### Ornamental Lighting Posts.

1. The Standards (shaft, arms, cap and base complete) shall be composed of the following materials:
2. CONCRETE—1 part Portland Cement and 21-2

Rods to be wired with No. 14 wire hoops at intervals of not more than 18 inches. Arms to be reinforced with square twisted steel rods of the size and in the position as shown on the cross-section. Note reinforcing specified under erection.

4. CASTING—The concrete as above specified shall be mixed with sufficient water to make it possible to pour same into forms. When forms are filled they shall be securely placed in machine that will mechanically compact the concrete within a period of one hour and fifteen minutes. At end of such period the concrete shall be dense and capable of sustaining its own weight when

parts clean washed sand and gravel that will pass through 1-4 inch mesh screen, and be retained on 60 mesh screen when screened dry.

3. REINFORCING—The shaft of each Standard shall be reinforced with four 1-4 inch square twisted steel rods, spaced equally around center of shaft and within 3-4 inches of surface.

shaft is set on end and form removed.

When finished the shaft shall have hollow core not less than 2 inches in diameter and extending from end to end. No metal cores permitted.

All concrete shall be kept thoroughly wet for at least ten days after moulding or casting and thirty days shall elapse between time of moulding or casting and time of erection upon foundation.

**CUT OUT BOX**—Cast in base a 4x5x6 inches cast iron cut out box as shown and make and deliver cast concrete cover for each box. See detail of cover.

**CONDUIT**—Cast in the arms as shown 1-2 inch conduit cut, bent and threaded and fastened in junction box centered over shaft with lock nut and bushing. Junction box and conduit to be galvanized and conduit to be enameled inside. No L's will be permitted and bends must be so made that wire can be easily threaded.

**ARMS AND BASE**—The arms and base shall be moulded separate in accordance with specifications and plans.

**STEEL RODS**—The rods must have a clean, smooth finish and be free from seams, or cracks, also from oil, grease, paint, and rust scale, or any adhering substance, but a thin film of red rust will not be considered objectionable.

The tensile strength shall not be less than 55,000 pounds per square inch and the elastic limit shall be not less than 40,000 pounds per square inch.

All steel shall stand bending cold 180 degrees around a bar of its own diameter without showing signs of fracture.

All twisted bars shall have an even number of twists per lineal foot throughout the entire length of the bar.

Free access at all times must be permitted for the Engineer or his Inspectors at any mills or shops where rods proposed to be used are manufactured or stored.

**CEMENT**—All cement used shall be Portland Cement and must conform to the following requirements and be subject to the following tests, which will be open to the Contractor and will be made by the methods and under the conditions prescribed by the Committee on Cement Tests of the American Society of Civil Engineers.

Here follows the customary tests prescribed by the American Society of Civil Engineers.

Samples of the cement proposed to be used upon any piece of work shall upon request, be furnished to the City Engineer, for test and any cement, the samples of which do not come up to the required standard or which may have become damaged by exposure to moisture, shall be immediately and permanently removed from the work.

Cement shall be so piled as to permit of access for tally, inspection and identification of each shipment. It shall be delivered in the original package with the brand and name of the manufacturer plainly marked thereon.

#### Mixing and Placing Concrete.

**MIXING**—All proportions shall be obtained by actual measurement in boxes or wheelbarrows if approved by the Engineer, and no material shall be used which has not been thus measured.

All mixing shall be done in suitable boxes or upon tight platforms or in mixers. Not more than one cubic yard of concrete shall be mixed or wet at a time.

**ERECTION**—The standards shall be located as shown on plans and profiles. At these respective locations shall be cast a concrete foundation of dimensions shown and provided with hollow core.

Concrete for foundations to be composed of 1 part Portland Cement and 2 parts sand, 4 parts rock or gravel, free from organic matter or other foreign matter. Sand and gravel must meet with approval of the Engineer. Keep concrete wet for at least seven days after casting.

Conduit and wiring shall be brought into each side of foundation and enter cut out box in base of standard. Set base in cement mortar on foundation with conduit entering bottom of cut out box. Four 3-8 inch, square twisted steel rods 5 feet 6 inches long shall then be placed on end in hollow core of foundation as directed and this hollow core and base of standard shall be filled to within 1-2 inch of top of cut out box with concrete grout of the following mixture:

- 1 part Portland Cement.
- 3 parts sand and gravel.

Gravel not to be larger than will pass 1-1 inch mesh screen.

Great care must be exercised in pouring this grout in order that same does not run into bottom of cut out box.

When base has been set and the mortar and grout allowed at least 96 hours to harden, the shafts shall be placed. A derrick or tripod shall be used for this work to insure erection without damage to any portion of the work. Place in hollow core of shaft a 3-4 inch black conduit and fasten in top of cut out box with lock nut and bushing. This section of conduit to be of sufficient length to enter junction box in "Arms" when the latter are set. The core in the shaft shall then be filled with grout above specified and shall have three 1-1 inch square twisted steel rods extending from shaft as shown on cross-sections. Arms shall then be set and conduit extending from shaft be fastened into junction box with bushing.

Fill core in arms below junction box with concrete grout.

**SHADE HOLDERS**—Spun brass shade holders of the type and size shown in detail, shall be installed.

**GLOBES**—Center globe to be 16 inches in diameter, globes on arms 8 inches in diameter. All globes to be Alca Glass or equal. Wire Type Mazda or Tungsten Lamps are to be provided, one 60 Watt and three 40 Watt lamps for each standard.

**FINAL**—When completed the standards shall stand plumb and shall be free from all flaws or defects and show no lines or seams left by forms. Any standards showing pits caused by air bubbles or containing shrinkage cracks or other fractures will be rejected.

#### Wiring.

Standard receptacles for Lamps are to be provided and arranged as shown on plans.

Connections to the lamp socket are to be made by No. 14 B. & S. Gauge Double Braid Rubber covered wire, this wire to be extended down to the base and there solidly soldered to the feed wires.

The feed wires shall be two No. 3 and one No. 6 B. & S. Gauge New Code Double Braid Rubber covered wire and shall lead to the nearest electric service pole through conduit as shown on plans.

The system shall be three wire, the top single lights to be controlled separate from the arm lights.

All splices shall be made in junction boxes and soldered. A magneto, and Voltmeter test shall be made for shorts, grounds and loss.

**CONDUIT**—Conduit to be used shall be what is known as fibre conduit, shall be waterproof and shall have an internal diameter of 2 inches.

The bore shall be straight, and the cross-section shall not vary at any point more than one-eighth (1-8) of an inch from a true circle, and the interior surface shall be free from dents or other obstruction so that a mandrel twenty-four (24) inches in length and one-fourth (1-4) of an inch less diameter than a nominal sized tube can be passed through it. The insulating properties of the material shall enable the fibre tube to withstand a puncture test of 20,000 volts, A. C.

The conduit shall stand the following mechanical test: A section of the tube shall be heated to a temperature of 150 degrees Fahr., and remain at a temperature of 150 degrees Fahr. for one hour. It shall then be immediately placed on two (2) inch saddle blocks on fifty (50) inch centers, and shall withstand a load of three hundred fifty (350) pounds applied at the center without breaking or changing the cross-section of the bore more than one-eighth (1-8) of an inch from a true circle.

The elbows required shall be eighteen (18) inch radius. All dead ends of fibre tubes shall be plugged and made watertight with a wooden plug which has been dipped in asphalt and which shall fit snugly in the end of the tube.

The joints of all fibre tubes before being placed together shall be dipped in a hot compound suitable for sealing the joints and shall be used in sufficient quantities to prevent any leakage of water into the interior of the tube. All tubes shall be finished clean and free from all obstructions before the acceptance of the work.

The conduit is to be laid underground to nearest electric service pole and extend 18 inches above pavement at pole.

### APARTMENT HOUSES

LOS ANGELES, CAL. — Apartment house, 7 story and base, Class A construction, \$150,000. Architect, John Parkinson, Security Bldg., L. A. Owner, Dr. James H. Edmonds. The building will be erected on the west side of 6th street near Westlake Park, and will cover an area of 100 by 100 feet. There will be a reinforced concrete frame, floors and hollow tile interior partitions. The building is designed to contain a total of 150 rooms, which will be arranged in suites of two and three rooms. Interior will be finished in hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat, elevator service, a hot water system, vacuum cleaning and dumb waiters. All suites will have wall beds and private baths. Bath rooms will be finished in tile and equipped with high class fixtures. Marble and tile wainscot will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL. — Apartment house, 3 story and base, Class C construction, \$25,000. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, W. W. Padden. The building will be erected on Fremont avenue near 4th and will cover an area of 45 by 105 feet. There will be a total of 50 rooms arranged in two and three room suites with wall beds and private baths. Interior will be finished in pine and hardwood. Some hardwood floors will be used. There will be steam heat and a hot water system. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor under the direction of the architect.

SAN FRANCISCO—Apartment house and stores, 3 story and base, Class C construction. Cost not stated. Architect, Charles E. J. Rogers, Kohl Bldg., S. F. Owner, Frank M. Scoonover. The building will be erected on the west side of Mission street near 17th, and will have a frontage of 25 feet and a depth of 85 feet. There will be a store on the first floor besides the entrance. Upper floors will be arranged for a number of two and three room apartments with bath and wall bed. Interior will be finished in pine and elm. There will be steam heat and a hot water system. Bath rooms will have tile floors and imitation tile wainscot. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be taken at once.

SAN FRANCISCO—Apartment house, 4 story and base, Class C construction, \$35,000. Architects, Smith & Stewart, 244 Kearny street. Owners, Smith & Stewart. The building will

be erected on the south side of O'Farrell street east of Van Ness avenue and will cover a considerable ground area. There will be a number of two and three room apartments, all of which will have wall beds and private bath rooms. Interior will be finished in mahogany and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, an automatic elevator and hot water system. Bath rooms will be finished in tile and equipped with high class fixtures. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are in and under advisement.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete and frame, \$35,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mrs. I. Paisley. The building will be erected on the west side of Taylor street near Washington, having a frontage of 42 feet and a depth of 137½ feet. There will be a total of thirteen suites of four rooms each. All apartments will have wall beds and private baths. Plans provide for a large amusement room and lobby besides a roof garden. Interior will be finished in mahogany and white enamel. There will be steam heat, an automatic elevator and hot water system. Hardwood floors will be used in the principal rooms. Marble and tile wainscot will be used in the lobby. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Mr. Junck. The building will be erected at the corner of 17th and Church streets and will replace a structure recently destroyed by fire. The first floor will be arranged for a saloon and one store. Upper floors will contain four modern apartments of four rooms and bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. Patent store fronts and marble bases are specified. Bath rooms will be finished in imitation tile. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$10,000. Engineer, Pierre Zucco, 166 Geary street, S. F. Owner, J. Dempniak. The building will be erected on the east side of Hyde street between Sutter and Bush streets, and has been designed to contain a total of thirty suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be steam heat, an oil burning furnace, auto-

atic elevator and a hot water system. Bath rooms will be finished in tile. Marble and tile will be used in the entrance vestibule. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mrs. Schultz. The building will be erected on Mission street between 24th and 25th streets, and has been designed to contain two flats on the first floor and a number of small apartments on the upper two floors. Interior will be finished in pine and elm panels. There will be 60-gallon boilers. Each apartment will have a wall bed and private bath room. Tile wainscot will be used in the baths. Patent store fronts are specified. Exterior will be covered with rustic and shiplap. Plans are complete and figures will be called for at once.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame. Cost not stated. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner's name withheld. The building will be erected at the corner of Harrison and Grand avenue, and has been designed to contain a number of two and three room apartments. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms and in the entry halls. There will be steam heat, an oil burning furnace and hot water system. Bath rooms will be finished in tile. Wall beds will be used in each apartment. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and segregated figures will be called for in a week.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$5,000. Architect, J. Henry Boehrner, Delger Bldg., Oakland. Owner, Lillian B. Emery. The building will be erected on the south side of 41st street between Telegraph and Grove streets, and has been designed to contain four small apartments with wall beds and private baths. Interior finish will be of pine and elm. Some hardwood floors will be used. There will be a hot water system. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are now being taken.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Apartments and offices, 2 story and base, frame. Cost not stated. Architect, James T. Narbett, 701 Macdonald avenue, Richmond. Owner, J. J. McNamara. The building will contain offices on the first floor and a number of modern apartments on the upper floor. Interior will be finished in pine. There will be wall beds and private bath rooms. Kawnner store fronts are specified. Exterior of the building will be faced with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base. Class C construction, \$70,000. Architect, California Architectural and Construction Co., California Bldg., L. A. Owner's name withheld. The building will be erected at the southwest corner of Mary-

land and Bixel streets, covering an area of 100 by 88 feet, and has been designed to contain a total of 100 rooms, which will be arranged in suites of four and five rooms. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be steam heat, elevator service, a hot water system and vacuum cleaning. All suites will have wall beds. Bath rooms will be finished in tile. Marble wainscot will be used in the entrance vestibule. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## BONDS

**MODESTO, STANISLAUS CO., CAL.**—The last installment of the state highway bonds purchased by Stanislaus County to finance the construction of the Salida-Oakdale lateral of the state highway amounting to \$35,000 have been sold by the Supervisors. Work has already been started. The road will be 16 miles in length and will have a 12-foot cement base with 3-foot oil macadam.

**PITTSBURG, CONTRA COSTA CO., CAL.**—The election held to vote bonds of \$10,000 with which to complete the erection of the new Pittsburg Grammar school, carried and work will be started immediately. The structure complete will cost in the neighborhood of \$84,000.

**FILLMORE, Ventura Co., Cal.**—All doubt as to whether the county would build roads through the incorporated cities of the county to complete the system of good roads that is to be constructed if the bond election carries, was removed when the Board of Supervisors passed a resolution pledging the county to build these stretches of road through the cities. The proposed election will call for the voting of \$1,000,000 in bonds.

**SANTA MARGARITA SCHOOL DISTRICT, SAN LUIS OBISPO CO., CAL.**—An election will be held on August 30th to vote on the question of issuing and selling bonds of \$20,000 to provide for the erection of a new school building for the Santa Margarita School District.

**CHICO, BUTTE CO., CAL.**—The proposition of issuing bonds for the purchase of additional fire equipment for this city is now under consideration by the officials.

**AUBURN, PLACER CO., CAL.**—An ordinance calling for a bond election to vote \$22,000 for the purchase of fire apparatus, extension of the present sewer system and the erection of a septic tank has been passed to second reading by the City Trustees. The election will be held on September 14th. The bonds will be divided as follows: \$15,000 for the sewer extension, \$5,000 for the purchase of fire trucks and \$2,000 for the installation of a fire alarm system.

**SONORA, TULUMINE CO., CAL.**—The Supervisors have decided to purchase \$15,000 of state highway bonds for the continuation of the highway lateral in Tuolumne County.

**MILLAKEN SCHOOL DISTRICT, SANTA CLARA CO., CAL.**—Bond of \$3,000 will be sold by the County Supervisors on August 23rd. The pro-

ceeds of the sale will be used in the construction of a new school for the Milliken District.

**STOCKTON, SAN JOAQUIN CO., CAL.**—The Anglo-London & Paris National Bank of San Francisco was the successful bidder for the issue of \$230,000 worth of bonds recently voted by Stockton for sanitary and storm sewers.

**LOS ANGELES COUNTY, CAL.**—The Los Angeles County Supervisors will receive bids until August 23rd for the purchase of \$2,600 bonds of the Jefferson School District.

Bids will be opened on the same day for the purchase of the \$25,000 bonds of the Burbank School District, the proceeds of the sale to finance the construction of a school building.

The San Fernando School District, Los Angeles County, by a vote of 169 to 12, endorsed a proposal to issue \$25,000 bonds for a new grammar school.

The State Board of Control has purchased the bonds of the Lowell High School District of Los Angeles County.

The San Fernando Chamber of Commerce directorate has endorsed the proposition to bond Los Angeles County for \$3,000,000 for additional roads.

**SAN DIEGO, SAN DIEGO CO., CAL.**—The San Diego County Supervisors have called a mass meeting to discuss a proposed \$1,000,000 bond issue for road and bridge construction throughout the county.

**TUCSON, ARIZ.**—The Chamber of Commerce has petitioned the Board of Supervisors of the County of Pima to take such action as is necessary to submit to the voters of Pima County the question of issuing, for the purpose of securing funds with which to construct and maintain roads in said County of Pima, bonds in the amount of \$100,000, and recommends that \$100,000 of the amount so secured be set aside for the construction of the road in the Catalina Mountains leading to Mount Lemmon.

**PASO ROBLES SCHOOL DISTRICT, SAN LUIS OBISPO CO., CAL.**—The question of issuing bonds of \$40,000 to provide for the erection of a grammar school building will be voted here on August 27th.

**SANTA MONICA, LOS ANGELES CO., CAL.**—The City Council is taking up the question of calling a special election to vote bond of \$250,000 for the construction of a complete storm sewer system. The first step will be to employ an expert sanitary engineer to pass on the plans already prepared.

**MODESTO, STANISLAUS CO., CAL.**—A petition has been filed with the Board of Supervisors calling for the appointment of a highway commission and the calling of a bond election to vote bonds for the improvement of the county highway system.

## BRIDGES AND DAMS

**RED BLUFF, TERRAMA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and specifications for a steel bridge across Mill Creek on the Sherwood Boulevard in the Los Molinos Col-

only were adopted and bids were ordered to be advertised for. The bids will be opened on September 9th.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, steel and timber. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. The Tehama County Board of Supervisors has ordered the County Surveyor to prepare plans and specifications for wooden bridges and steel bridges across New Creek and Antelope Creek and a wooden bridge across the slough near Con's grove, all of said bridges being on the Sycamore road, in Road District No. 3, the motion was duly seconded by Supervisor Samson and carried.

**GRASS VALLEY, NEVADA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Grass Valley. Owners, Nevada and Placer Counties. Work on the new Dog Bar bridge over Bear River, to be built jointly by Nevada and Placer counties, will start immediately under the direction of Henry Nolte of Colfax. The bridge will be 180 feet long of the Howe truss plan, and the one span will be 160 feet.

**RAILROAD FLAT, CALAVERAS CO., CAL.**—Bridge, steel. Cost not stated. Engineers, Jones, Reddick & Holly. Humboldt Bank Bldg., S. F. Owners, Calaveras County. Plans prepared by Engineers Jones, Reddick & Holly have been approved by the Calaveras County Board of Supervisors for a steel truss bridge to be erected over the Mokelumne River near Railroad Flat. The bridge will be 670 feet long of the riveted pony truss type, carried on concrete abutments. Bids will be called for shortly.

**VENTURA, VENTURA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Bids will be opened on August 25th for the following work: Construction of the south abutment and approach to the Saticoy bridge, and for the construction of the Conejo Creek bridge on the state highway. The south abutment and approach to the Saticoy bridge is located about one-half mile southeast of the Southern Pacific station at Saticoy. Some approximate quantities in this work are: Embankment, 11,580 cubic yards; oil (70% asphaltum) 223 barrels; concrete in abutment, 500 cubic yards; reinforcing steel in abutment, 19,100 pounds; steel sheet piling, 152 square feet; concrete piles 35 feet long, 20; guard fence, 1,238 lineal feet; 24-inch corrugated iron pipe, 10 feet. The Conejo Creek bridge on the state highway is about two miles east of the Southern Pacific station at Camarillo, Ventura County, California. The bridge consists of 8 spans, each 30 feet long. Some approximate quantities in this bridge are: Concrete, 456 cubic yards; reinforcing steel, 47,100 pounds; pipe railing 480 lineal feet. Plans can be secured from the office of the County Clerk.

**VENTURA, VENTURA CO., CAL.**—Culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Plans have been completed and figures will be opened on August 25th for the following work: Construction of the Williams Barranca

culvert, the Harkey culvert, the Proctor culvert, and the Sudden culvert, all in the Saticoy Road District. The culverts are all of reinforced concrete with corrugated iron pipe gutter drains. Some approximate quantities of the four culverts are: Concrete, 205 cubic yards; reinforcing steel, 13,350 pounds; earth fill, 2,100 cubic yards; 18-inch corrugated iron pipe, 126 feet; 24-inch corrugated iron pipe, 58 feet; 36-inch corrugated iron pipe, 44 feet; 38-inch corrugated iron pipe, 44 feet; standard guard fence, 1,110 feet. Plans can be secured from the office of the County Clerk.

#### Contracts Awarded.

**SAN FRANCISCO**—Pier, steel and reinforced concrete, \$48,877. Engineer, Assistant State Engineer Newman. Ferry Bldg., S. F. Owners, State of California. Contractor, Tibbitts Pacific Co., S. F. Contract price, \$48,877. A complete list of the bids received will be found under the heading of San Francisco.

**BERKELEY, ALAMEDA CO., CAL.**—Bridge, reinforced concrete, \$5,675. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractor, D. McDonald, Berkeley. Contract price, \$5,675.

**OROVILLE, BUTTE CO., CAL.**—Bridge, reinforced concrete, \$11,723. Engineer, County Surveyor, Oroville. Owners, Butte County. Contractor, E. D. Sharp, Chico. Contract price, \$11,723.

**EUREKA, HUMBOLDT CO., CAL.**—Bridges, reinforced concrete and suspension. Cost as follows. Engineer, County Surveyor, Eureka. Owners, Humboldt County. Contractors, Moore & Lentell, Eureka. Contract price, \$3,475. Mercer-Fraser Co., Eureka. Contract price, \$965.

**CAMPO, SAN DIEGO CO., CAL.**—Railroad bridge, steel. Cost not stated. Engineer's name not given. Owners, San Diego & Arizona Railroad Co. Contractor, Charles W. Corbaley, L. A. Contract price not stated.

**SEATTLE, WASH.**—Bridges, steel and concrete. Cost as follows. Engineers, Seattle Bridge Commission. Owners, City of Seattle. The Board of Public Works has let the contract for the 15th avenue bridge to Hans Pederson, Madison Block, Seattle, at \$242,620.30, his alternative bid in which cofferdams will be used in the construction of the piers and pouring the concrete dry. The Pacific States Construction Co., Burke Bldg., at \$117,916, was awarded the contract for constructing the concrete piers for the Fremont avenue bridge, using cofferdams; and the Beers Building Co., Pittock Block, Portland, Ore., at \$154,601, secured the contract for the superstructure on the Fremont bridge.

**ROBERTS FERRY, STANISLAUS CO., CAL.**—Bridge, reinforced concrete, \$29,870. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Contractors, Ross Construction Co., Forum Bldg., Sacramento. Contract price, \$29,870.

**FRESNO, FRESNO CO., CAL.**—Bridge, reinforced concrete, \$11,974. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, J. E. Mitchell, Fresno. Contract price, \$11,974.

**SANTA ROSA, SONOMA CO., CAL.**—Bridge, reinforced concrete. Cost as

follows. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma County. Contractor, Charles Gildersleeve, Napa. Contract price, \$5,600. Comstock Construction Co., Santa Rosa, bridge repairs, \$1,521.

#### COURT HOUSES.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—City hall, auditorium, etc. Class A construction, \$210,000. Architects, Elmore R. Jeffery and Frank R. Schaefer, Westley Roberts Bldg., L. A. Owners, City of San Bernardino. The City Council of San Bernardino has approved plans and specifications for a group of municipal buildings, which will be erected on property at the corner of Fourth and F streets. A bond issue of \$210,000 will be voted on October 20th, the funds to be divided as follows: \$70,000 for the city hall, \$50,000 for the auditorium, \$5,000 for the jail and garage, and \$20,000 for furniture and equipment. The preliminary plans which were accepted provide for buildings of Spanish Renaissance style. The site will probably be at the corner of Fourth and F streets. The city hall will be a two-story structure, 150 by 62 feet. The first story will provide for the police court, jury room, judges' quarters, water commission, police chief, fire commission, lavatories, city clerk and auditor. The second floor will contain the office of the mayor, council chamber, committee rooms, city attorney, health department, board of public works, and the building and engineering departments. The jail building will be two stories, 32 by 60 feet. It will contain the receiving hospital and steel cells in the first story and officers' quarters in the second. The garage will be 32 by 30 feet and will provide room for five machines. The auditorium will be 114 by 90 feet. It will have a seating capacity of 2,500 on the main floor and 500 in the balcony. There will also be a fully equipped stage with dressing rooms, smoking rooms, reception parlors, foyer, etc. It will be provided with a level floor so that it may be used for exhibition and other public purposes. The buildings will be of brick or reinforced concrete construction, with plastered exteriors, clay tile roofing, concrete foundations, hardwood interior trim, maple floors in offices and auditorium, reinforced concrete stairways and corridor floors, marble and tile entrances and hallways, steam heat, metal frames and sash and all modern equipment.

**OROVILLE, BUTTE CO., CAL.**—Hall of Records, 2 story and base, reinforced concrete, \$55,000. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Butte County. Plans have been completed and approved for the construction of the new Hall of Records. The building will contain the office of the recorder, of the building will be faced with ceterney and auditor besides a large auditorium and several smaller private offices. Interior will be finished in oak. Terrazzo and tile floors are specified. The Rector system of heating will be installed. There will be metal window sash and frames, special fireproof vaults and metal doors. Vacuum cleaning is also specified. Exterior of the

building will be faced with terra cotta. Plans are complete and figures are being taken. Bids will be opened on September 7th.

**SUSANVILLE, LASSEN CO., CAL.**—County Court house, 2 story and base, reinforced concrete, \$71,000. Architect, George C. Sellon, Sacramento. Owners, Lassen County. Bids opened for this work show James L. McLaughlin, 244 Kearny street, low at \$74,222, and Sellman Co., Reno, Nev., second low at \$74,400. All bids have been taken under advisement until the next meeting of the Board of Supervisors. A complete list of the bids received will be found under the heading of Sacramento and Northern California in this issue.

**OAKLAND, CAL.**—Court house addition, 2 story and base, brick, \$2,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Alameda County. Plans for the small addition to the present building are now out for figures. Bids will be opened on September 7th. The new portion will contain one court room, Judges' chambers and an office for the court reporter. Interior will be finished in pine and oak. The heating system in the old building will be extended. Exterior will be faced with pressed brick. Plans can be secured from the architect or the County Clerk.

## FACTORIES AND WAREHOUSES.

**SAN FRANCISCO**—Winery, 2 story and base, reinforced concrete. Cost not stated. Architect, P. Righetti, Phelan Bldg., S. F. Owners, Promotion Wine and Liquor Co. The building will be erected at the corner of Lombard and Columbus, and will cover a large ground area. Construction will be fireproof with reinforced concrete floors and walls and metal window frames and sash. No interior finish will be used. There will be a number of large wooden tanks. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

**LOS ANGELES, CAL.**—Warehouse, 2 story and base, reinforced concrete. Cost not stated. Architect, Thomas Preston, Investment Bldg., L. A. Owners, National Transfer Co. The building will be erected on Ann street near Marguerite, covering an area of 50 by 110 feet. Construction will be fireproof with reinforced concrete floors, halls and roof slabs. Metal window frames and sash and fireproof doors will be installed. Modern electric work and plumbing are specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

### Contracts Awarded.

**LOS ANGELES, CAL.**—Warehouse, 2 and 3 story and base, reinforced concrete, \$33,541. Architect, E. L. Parcher, engineer, J. F. Blee, Union League Bldg., L. A. Owners, Hollywood Fireproof Storage Co. Contractor, F. O. Engstrom, 5th and Seaton streets, L. A. Contract price, \$33,541.

**PORTLAND, ORE.**—Warehouse, 2 story, mill construction, \$25,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owner, Fanny W. Brown. Contractor, J. C. Kilgreen, Lewis Bldg., Portland. Contract price, \$25,000.

**OAKLAND, CAL.**—Factory, 1 story and base, reinforced concrete. Cost not stated. Architect, Louis P. Hohart, Crocker Bldg., S. F. Owners, Shredded Wheat Biscuit Co. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. Contract price not stated.

## FIRE HOUSES AND JAILS.

### Contracts Awarded.

**FOLSOM, SACRAMENTO CO., CAL.**—Special cell work. Cost not stated. Engineer, State Engineer, Sacramento. Owners, State of California. Contractors, C. A. Palm Bridge and Iron Works, Sacramento. Contract price not stated.

## FLATS

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,800. Architect, none. Owner, Margaret A. Glunz, 527 Balboa street, S. F. The building will be erected on the west side of 6th avenue south of Balboa, and has been designed to contain two modern flats of five and six rooms. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Flats, 2 story and base, frame, \$1,000. Architect, F. Holberg Riemers, 2125 Shattuck avenue, Berkeley. Owner, Francis L. O'Meara, 302 Mendocino avenue, Santa Rosa. The building will be erected on Rose street near Greenwood Terrace and will contain twelve rooms. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms and reception halls. There will be an open fire place in each living room. Mantels will be of tile. Tile wainscot will be used in the bath rooms. Automatic water heaters are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

## GOVERNMENT WORK & SUPPLIES

### Miles City, Mont., Post Office.

As previously reported, the contract for the construction, complete, of the U. S. post office at Miles City, Mont., was awarded to the Hiram Lloyd Building & Construction Co., St. Louis, Mo., at \$86,817. In the construction of the building fixtures and material manufactured by the following firms will be used: Plumbing fixtures, A. B. Sands & Sons Co.; cast iron column radiators, Kewanee Boiler Co.; wall radiators, American Radiator Co.; non-conducting covering, Keasbey & Mattison Co.; radiator valves, Crane Co.; damper regulator, Standard Regulator Co.; air valves for radiators, American Radiator Corporation; air valves for end of steam mains, Jenkins Bros.; cabinet and tablet, Frank Adams; electric conduit, Safety Armored Conduit Co.; rubber-covered wire, Habirshaw; flush switches, Perkins Electric Switch

Co.; canopy switches, Cutler-Hammer Mfg. Co.; reflectors and glassware, Machett-Evans Co.; glassware, E. J. Holaphane.

### Denver, Colo., Bronze and Iron Works.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for flag poles and miscellaneous bronze and iron work in the United States post office, Denver, Colo.:

Item 1, flag poles, etc., 2, do, alternate design; 3, 8 single desks; 4, 2 double desks; 5, Champa street electrobushers; 6, 10 lamps.

Norman Ker Co., 1123 Broadway, New York City. Item 1, \$2,500; 2, \$4,500; 3, \$925; 4, \$1,570; 5, \$1,600; 6, \$1,600.

Tiffany Studios, New York City. Item 1, \$4,670; 2, \$5,470; 3, \$714; 4, \$990; 5, \$984; 6, \$792.

Bureau Brothers, Philadelphia, Pa. Item 1, \$3,135; 2, \$1,100; 4, \$1,525; 5, \$4,525; 6, \$1,500.

### Pearl Harbor, H. T., Dredging.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for dredging 72,000 cu yds, more or less, at the naval station, Pearl Harbor, H. T.:

Hawaiian Dredging Co., Ltd., 116 Merchant street, Honolulu, H. T., 44c per cu yd.

Lord-Young Engineering Co., Ltd., 12 Campbell Block, Honolulu, H. T., 45.5c.

### Hanford, Cal., Furniture.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing furniture in the U. S. post office at Hanford, Cal.:

Jacob Beitzel & Co., York, Pa., \$1,150, 30 days.

Furnas Office & Bank Furniture Co., Indianapolis, Ind., \$1,239.50.

Louck & Hill, Richmond, Ind., \$1,204.65.

Original Cabinet Co., Evanston, Ill., \$1,200.

Federal Equipment Co., Carlisle, Pa., \$1,075.

John E. Sjostrom, Philadelphia, Pa., \$1,182.

Richmond School Furniture Co., Muncie, Ind., \$1,104.65.

Mazuire Cabinet Co., Los Angeles, Cal., \$955.50.

### U. S. Marine Corps, Plumbing Fixtures.

The following bids were received at the office of the U. S. Marine Corps, Washington, D. C., for furnishing 50 water closets to be delivered f. o. b. St. Francisco, Cal.:

John Douglas Co., Cincinnati, Ohio, \$92.10.

A. B. Sands & Sons Co., 22 Vesey street, New York City, \$92.50, alternate proposition for delivery f. o. b. vessel, New York Harbor, \$86.

Crane Co., Washington, D. C., \$1,075.00.

Charles Hess Co., New York City, \$87.20.

### Portland, Ore., Pipe, Fixtures, Etc.

The following bids were opened by the lighthouse inspector, Portland, Ore., for furnishing pipe, fixtures, flanges, elbows, etc., for Cape Flattery light station:

Crane Co., Portland, Ore. \$658.88; accepted.

M. S. Kline, Portland, Ore. \$615.50.

#### Billings, Mont., Vault Shelving.

The contract for the installation of metal vault shelving in the U. S. post office at Billings, Mont., has been awarded to the American Bank Protection Co., Minneapolis, Minn., at \$223.

### HOSPITALS

#### Contracts Awarded.

LOS ANGELES, CAL.—Hospital, 2 story and base, reinforced concrete, \$32,875. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, French Hospital Association, Contractors, The Pozzo Construction Co., 121 Macy street, L. A. Contract price, \$32,875.

### HOTELS

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel alteration and addition, 3 story and base, brick. Cost not stated. Architect, Joseph Losekan, San Joaquin Bldg., Stockton. Owners, Yosemite Hotel Co. The present building at the corner of Main and Sutter streets will undergo extensive repairs. The two upper floors will be razed and new steel and brick work installed. The building will be in the nature of an addition to the present building at the corner of 6th and Olive streets, and will cover an area of 62 by 80 feet. The first floor will be arranged for offices and rooms for the directors, while upper floors will contain lofts with vaults and fireproof lockers. There will be a complete steel frame and concrete floors and roof slabs, hollow tile interior partitions, metal window sash and frames. Plans provide for elevator service, steam heat

and vacuum cleaning. Interior will be finished in hardwood and ornamental plaster. Marble and tile wainscot will be used. Exterior will be faced with glazed tile. Plans are now being prepared.

### STATE BUILDINGS.

Appropriations amounting to approximately \$2,000,000, made by the last Legislature for new buildings, additions and other improvements to be made at the various state institutions, became available last Monday and plans for the execution of the work were considered by the Advisory Board and State Architect at a meeting held last Tuesday.

Plans are practically completed for two cottages to be erected at the Southern California State Hospital at Patton at a cost of \$50,000, and also for an addition to the manual arts building of the Los Angeles State Normal School, to cost \$2,500.

Plans are also being prepared for additional cottages for the California School for Girls at Ventura, the cost to be about \$52,000. Plans will soon be completed for three additional buildings at the Norwalk State Hospital, the cost to be about \$195,000.

Plans for other work to be done under the appropriations are still in the preliminary stages. Among the appropriations made may be mentioned the following:

Installation of water system at Southern California State Hospital, \$10,000.

For permanent exposition building in Los Angeles agricultural park, \$50,000.

For improving grounds Los Angeles State Normal School, \$12,000.

Repairs and improvements, Whittier Industrial School, \$25,000.

Erection and furnishing of cottages at Whittier State schools, \$60,000.

Construction of additional buildings at hospital site in Norwalk, Southern California, \$195,000.

Construction and furnishing of cottages, Southern California State Hospital, \$50,000.

Repairs and improvements, San Diego State Normal School, \$14,000.

Boatways, etc., for San Diego naval militia, \$2,500.

Drain and storm water sewers in Ventura school for girls, \$7,500.

Construction of fire trails in San Bernardino Mountains, \$5,000.

Machinery building of Santa Barbara Normal Grounds, \$15,000.

For repairs and development, Santa Barbara State Normal School, \$11,500.

Establishment of water supply in the Polytechnic school in San Luis Obispo, \$20,000.

Constructing and equipping new normal buildings at Fresno, \$20,000.

For improving grounds Fresno State Normal, \$9,000.

Construction of temporary buildings for the Humboldt State Normal School at Arcata, \$17,500.

For the perfection of an artesian water system at the Deat and Dumb school in Berkeley, \$4,000.

New boilers and electrical wiring for the Stockton State Hospital, \$17,500.

Repairing the San Diego State Normal School, \$14,000.

Improving the grounds of the San Jacinto State Normal School, \$7,000.

Painting the State printing office, \$1,700.

Cottages for the Southern California Hospital at Patton, \$47,000.

Gymnasium and repairs in the Home for the Adult Blind at Oakland, \$2,750.

Cornelius is preparing plans for the installation of a new ventilating system and other extensive interior improvements to be made to the Richmond Theatre. Manager Hunter will be in charge of the work.

## SEALED PROPOSALS

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 959**—Proposals for Engine Tires and Springs, Malleable Iron Castings, Steel Castings, Car Repair Parts, Manganese Steel Tumbler, Cold Shuts, Steel Boiler Tubes, Bolts, Rivets, Stovepipe, Cable Clips, Cable Thimbles, Twist Drills, Drill Sockets and Sleeves, Taps, Electrical Fixtures, Electric Switches, Copper Wire Cloth, Hooks and Eyes, Cabin Door Hooks, Locks, Foot Bolts, Valves, Cocks, Cock-Hole Covers, Pipe Fittings, Anchors, Band Saws, Scythe Blades, Butchers' Blocks, Water Coolers, Copper Funnels, Window Glass, Tarpaulins, Sandpaper, Emery Cloth, Bond Paper, Beeswax and Lamp Chalk.

Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. August 27, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 959) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR DREDGING.

**DREDGING**—U. S. Engineer Office, 401 Custom House, San Francisco, Cal. Sealed proposals will be received here until **11 a. m. August 31, 1915**, and then opened. Information on application.

### PROPOSALS FOR BUILDING.

**BUILDING**—Sealed proposals indorsed "Proposals for Magazine Building" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. September 11, 1915**, and then and there publicly opened, for constructing one steel frame shell house with plastered walls and two brick magazines with steel roof trusses at the naval magazine, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. W. M. L. SMITH, acting chief of bureau.

### PROPOSALS FOR BUILDING.

**OFFICE** of the Clerk of the Board of Supervisors, Oakland, California. Bids will be received by the Board of Supervisors of Alameda County, California, at the office of the County Clerk and ex-officio Clerk of the Board of Supervisors in the Hall of Records, Oakland, California, until **ten (10) o'clock a. m. on Tuesday, the 7th day of September, A. D. 1915**, for the construction and completion of a two-story brick addition to the Alameda County Court House, located on Broad-

way between Fourth and Fifth streets, in the City of Oakland, County of Alameda, State of California.

Plans and specifications are on file in the office of the Clerk of the Board of Supervisors and copies may be obtained upon the deposit of Ten (10) Dollars, which said deposit will be returned upon the return of said plans and specifications. No contractor shall keep said plans and specifications for a period exceeding ten (10) days, then said deposit of Ten (10) Dollars shall be forfeited to the County of Alameda.

No bid will be considered unless accompanied by a certified check payable to the order of Geo. E. Gross, Clerk of the Board of Supervisors, certified to by some responsible bank for an amount not less than ten (10) per cent of the aggregate amount of the bid or proposal which it accompanies, said check to be forfeited to the County of Alameda, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract within ten (10) days after the award or fail to give a bond or bonds for the faithful performance of the contract.

Bidders shall make their bids on the blank forms furnished with the plans and specifications. All blanks in the bid forms shall be completely filled in, giving all proposals asked.

All bids must be enclosed in sealed envelopes, addressed to the Board of Supervisors, Alameda County, and be endorsed on the envelope, "Bid for the Construction and Completion of the Addition to the Alameda County Court House."

All bids that do not comply with the above provisions in this notice shall be thrown out as informal.

The Board of Supervisors reserves the right to reject any bid and all bids of proposals.

Dated August 9, 1915.  
J. J. MURPHY,  
Chairman of the Board of Supervisors of Alameda County.

GEO. E. GROSS,  
Clerk of the Board of Supervisors of Alameda County.

### PROPOSALS FOR BRIDGE.

**BRIDGE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Washington, D. C., until **2 o'clock p. m. September 8, 1915**, for furnishing and erecting a steel bridge of three 100-foot spans and a structural steel movable chest with operating machinery for the Vandala dam of the Milk River project, Montana. For particulars address the United States Reclamation Service, Washington, D. C. A. P. DAVIS, chief engineer.

### PROPOSALS FOR VESSEL.

**VESSEL**—Sealed proposals will be received at the Coast and Geodetic Survey, Washington, D. C., until **August 25, 1915**, and then opened, and also on the same date at the office of the superintendent, Coast and Geodetic Survey, room 310, Custom House, San Francisco, Cal., for construction and equipment of the Coast and Geodetic Survey steamer, Surveyor of about 1,000 tons displacement. Particulars may be had by addressing the superintendent, Coast and Geodetic Survey, Washington, D. C.

### PROPOSALS FOR ELEVATORS.

**ELEVATORS**—Sealed proposals indorsed "Proposals for Freight Elevators" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. August 28, 1915**, and then and there publicly opened, for three hydro-pneumatic freight elevators, installed complete, at the naval station, Pearl Harbor, Hawaii. Plan and specification may be obtained on application to the bureau or to the commandant of the naval station named, W. M. L. SMITH, acting chief of bureau.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 958**—Proposals for Steel Reinforcing Bars, Bronze Wire Cloth, Screws, Coppers, Screw-eyes, Cup Hooks, Staples, Cable Clips, Tacks, Haps, Hinges, Night Latches, Chain Blocks, Snatch Blocks, Tackle Blocks, Steel Cargo Trucks, Grindstones, Stable Brooms, Floor Brushes, Buckets, Oil Cans, Ladders, Life Preservers, Blow Torches, Anchor Lights, Window Glass, Pipe Cutter Wheels, Awning Pulleys, Steel Tapes, Rules, Lantern Glasses, Gears, Tool Handles, Mop Hardies, Mop Heads, Packing, Oakum, Crayons, Twine, Wrapping Paper, Index Cards and Lumber. Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. August 20, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 958) may be obtained from this office or the office of the assistant purchasing agent, Fort Mason, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR BUILDING.

**BUILDING**—Fort Rosecrans, Cal.—Sealed proposals will be received here until **2 p. m. August 26, 1915**, for constructing concrete storehouse. Further information on application to constructing quartermaster.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 956**—Office of the General Purchasing Office, Panama Canal, Washington, D. C.—Sealed proposals will be received here until **August 18, 1915**, under circular 956 for furnishing the following: 50 brackets, brake shaft; 2,000 feet trolley wire, 20 reins manila paper, 40 cast iron posts, 1,200 feet vulcanized rubber strips, 800 spring plates, 12 machinists' vices, 50 lengths corrugated tender hose, 3 lengths steel rails, 103 hand saws, 2 water gauges, 500 handles, 72 hatchets, 24 vices, 288 wheels for Barnes pipe cutters, 12 air whistles, 24 axes, 4 blacksmiths' anvils, 144 blacksmiths' chisels, 3,600 hacksaw blades, 24 breast drills, 72 saw frames, 12 buckets for added, 100 feet of 275,000 feet flooring, 200 feet siding, 2,200,000 feet service and rough lumber; also a quantity of files, bits, augers, cape and machine chisels, monkey and Stilson wrenches, machinists' hand taps, pipe cutters, drills, dies, claw, machinists' and sledge hammers, stocks and dies and condulets. For further information address P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR SUBMARINES.

**SUBMARINES**—The date for the opening of proposals for building submarine boats, Nos. 62-77, as fixed by the department, is hereby changed to **August 20, 1915**, is hereby changed from **August 2 to September 29, 1915**. JOSEPHUS DANIELS, Secretary of the Navy.

### STATE OF CALIFORNIA.

### DEPARTMENT OF ENGINEERING.

### CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

Sealed proposals will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until **2 o'clock p. m. on August 22, 1915**, at which time they will be publicly opened and read, for construction in accordance with the specifications, therefore, to which special reference is made, portions of state highway as follows:

Siskiyou County across the Sacramento River near Dunsuir (II-Sls-3-A), a reinforced concrete bridge about 532 feet long with one arch of

180 feet clear span and two arches of about 14 feet clear span.  
Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Wilts, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
ASTIN B. FLETCHER,  
Highway Engineer.  
WILSON R. ELLIS, Secretary.

#### PROPOSALS FOR WHARF.

**WHARF**—Sealed proposals indorsed "Proposals for Extensions of Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 21, 1915, and then there publicly opened, for extension of wharf at the naval training station, San Francisco, Cal. Plan and specification may be obtained on application to the bureau or to the commandant of the naval training station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR CONCRETE PIERS.

**CONCRETE PIERS**—Sealed proposals indorsed "Proposals for Torpedo Boat Piers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 15, 1915, and then there publicly opened, for constructing reinforced concrete torpedo boat piers at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR RAILROAD.

**MARINE RAILWAY**—Sealed proposals indorsed "Proposals for Marine Railway" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 15, 1915, and then there publicly opened, for constructing a marine railway at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR BUILDING.

**BUILDING, ETC.**—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. August 24, 1915, for the construction, complete (including mechanical equipment and approaches) of the United States post office at Grand Junction, Colo. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or in this office, at the discretion of the supervising architect. JAMES A. WETMORE, acting supervising architect.

#### PROPOSALS FOR WHARF CONSTRUCTION.

**WHARF**—Sealed proposals indorsed "Proposals for Reinforced Concrete Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 15, 1915, and then there publicly opened, for constructing a reinforced concrete wharf at the United States naval station, Pearl Har-

bor, Hawaii. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

#### BAKERY MACHINERY FOR PORTO RICO.

[Harwood Hill] correspondent, San Juan, July 28.]

Changes in the sanitary regulations for bakeries for the entire island provide that Porto Rican bakers must mix their dough by machinery and deliver their bread wrapped in paper. Ovens must be of an approved type and in some instances bakers will be compelled to install cutting machines. The regulations have been formulated to eliminate the handling of bread by workmen from the time the dough is mixed until the bread is delivered to the retail customer.

As these regulations practically revolutionize the baking conditions of the island there should be a market here for all sorts of bakers' mechanical supplies. When the new regulations were first issued it was found that it was impossible to obtain any adequate bakery machinery in the island and as there had never been any particular demand for such machinery local merchants in many instances were without even catalogues of manufacturers making such machinery.

Most of the island bakeries are small and the market demands small, inexpensive outfits.

Porto Rico imports annually over \$1,500,000 worth of flour—all from the United States.

#### FLOOD CONTROL ESTIMATES.

About \$15,000,000 is the amount eventually needed for flood control work in Los Angeles county, according to the final report of the board of flood-control engineers, filed with the Board of Supervisors recently. Of this, \$4,000,000 is figured as the cost of conservation work, and \$12,000,000 will be needed to construct channels through the county.

The sale of the ships of the Pacific Mail Steamship Company has brought public attention again to the La Follette Seaman's Bill. And the question of an American Merchant Marine will be before the public for some time to come.

The question of employment of American sailors will have to be settled along the broad lines of national policy. If the shipowners under

American registration can not compete with foreign shipping there must be either government subsidy or government ownership of ships. The question is one of political expediency.

#### NEW AUSTRALIAN STEEL PLANT.

[Commercial Attache William C. Downs, Melbourne, June 18; see also Commerce Reports for June 8 and July 1.]

The new iron and steel works of the Broken Hill Proprietary Co. (Ltd.), at Port Waratah, Newcastle, New South Wales, occupy a site of 264 acres in close proximity to the rich coal fields and limestone deposits, and have splendid harbor facilities. The entire plant, which has been installed at a cost of about \$7,000,000, consists of the most up-to-date and approved American machinery for steel making, and was erected under the management and supervision of Mr. David Baker, the well-known American steel expert, and the various processes of manufacture are in charge of American superintendents.

Although this new enterprise will seriously affect the sale of American steel rails in Australia, which in recent years has amounted to about \$5,000,000 per annum, it is gratifying that after a careful study of the largest steel plants in Europe and the United States American equipment was selected as the best and most efficient. It also insures American manufacturers of such equipment that further business will follow when the plant is enlarged.

[An elaborate souvenir booklet, issued by the steel company on the occasion of the formal opening of its plant, has been forwarded by Commercial Attache Downs. This booklet, which is illustrated with actual photographs, may be inspected at the Bureau of Foreign and Domestic Commerce or its branch offices.]

#### AMERICANS SHOULD FORM CHAMBER OF COMMERCE.

Consul General F. D. Cheshire reports from Canton, China, that at a meeting which was attended by representatives of British firms trading at Canton, it was unanimously resolved to form a British Chamber of Commerce in that city. It is stated that 20 firms joined as original members. The consul general recommends that American business men also become active in this field, as there is an opportunity for American goods.

Plans are complete and figures will be taken at once.

**APARTMENT HOUSE**—4 story and base. Class C construction, \$35,000. San Francisco. Architects, Smith & Stewart 244 Kearny street, S. F. Owners, Smith & Stewart. The building will be erected on the south side of Farrell street east of Van Ness avenue, and will cover a considerable ground area. There will be a number of two and three room apartments, all of which will have wall beds and private bath rooms. Interior will be finished in mahogany and white enamel. Hardwood floors will be used in the

principal rooms. Plans provide for steam heat, an automatic elevator and hot water system. Bath rooms will be finished in tile and equipped with high class fixtures. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are in and under advisement.

**APARTMENT HOUSE**—5 story and base, reinforced concrete, \$10,000. San Francisco. Engineer, Pierre Zucco, 166 Geary street, S. F. Owner, J. Dompniak. The building will be erected on the east side of Hyde street between Sutter and Bush streets, and has been designed to contain a total of thirty suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be steam heat, an oil burning furnace, automatic elevator and a hot water system. Bath rooms will be finished in tile. Marble and tile will be used in the entrance vestibule. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mrs. Schultz. The building will be erected on Mission street between 24th and 25th streets, and has been designed to contain stores on the first floor and a number of small apartments on the upper two floors. Interior will be finished in pine and elm panels. There will be 30-gallon boilers. Each apartment will have a wall bed and private bath room. Tile wainscot will be used in the baths. Patent store fronts are specified. Exterior will be covered with rustic and shiplap. Plans are complete and figures will be called for at once.

**WINEERY**—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, P. Righetti, Phelan Bldg., S. F. Owners, Promotion Wine and Liquor Co. The building will be erected at the corner of Lombard and Columbus, and will cover a large ground area. Construction will be fireproof with reinforced concrete floors and walls and metal window frames and sash. No interior finish will be used. There will be a number of large wooden tanks. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

**FLATS**—2 story and base, frame, \$11,500. San Francisco. Architect, none. Owner, Margaret A. Glunz, 525 Balboa street, S. F. The building will be erected on the west side of 6th avenue south of Balboa, and has been designed to contain two modern flats of five and six rooms. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**STORES AND OFFICES**—2 story and base. Class A construction, \$200,000

San Francisco. Architects, O'Brien Bros., 218 Montgomery street, S. F. Owner's name withheld. The building will be erected at the southwest corner of 10th and California streets and will cover a large ground area. The first floor will contain two large wholesale stores, which have already been leased. Upper floors will be arranged for modern offices. There will be a pile foundation, complete steel frame, concrete floors and roof slabs. Hollow tile interior partitions and metal window sash and frames will be specified. Interior will be finished in hardwood, metal and marble. Plans provide for steam heat, three elevators, vacuum cleaning and oil burning equipment. Exterior will be faced with pressed brick and terra cotta. Plans are being prepared.

### Contracts Awarded

**PIER**—Steel and reinforced concrete, \$18,877. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Contractor, Tibbitts Pacific Co., S. F. Contract price \$18,877. A complete list of the bids received will be found under the heading of San Francisco.

### OAKLAND AND ALAMEDA COUNTY

RESIDENCE — 1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, Joseph T. Hinch, 1718 Broadway, Oakland. The dwelling has been designed for a five room house with bath and sleeping porch, and will be erected on the east side of Adeline street south of 56th. Interior finish will be entirely of pine. Some hardwood floors will be used. There will be an open fire place in the living room with tile or brick mantel. Imitation tile will be used in the bath room. Exterior of the house will be covered with cement plaster and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, A. W. Smith, 1019 Broadway, Oakland. Owner, O. R. Wood. The dwelling will contain five rooms and bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms and reception hall. There will be a large open fire place with tile or brick mantel. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architects, Yerrick & Smith, Blake Bldg., Oakland. Owner, John Michels. The dwelling will be erected on West street between 31th and 33th streets. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Imitation tile will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustle and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owners, Fuller & Robbins, Athens Bldg., Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on the east side of Thomas street south of Prospect. Interior will be finished in pine with some elm panels and white enamel. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustle and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$6,000. Piedmont, Alameda Co., Cal. Architect, C. O. Clausen, Hearst Bldg., S. E. Owner, G. Erickson. The dwelling will contain eight rooms, two baths and sleeping porch. A separate garage will be erected on the property. Interior finish will be of southern gum and white enamel. Hardwood floors will be used throughout the first floor. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Hans P. Hansen, 161 Cook street, S. E. The dwelling has been designed for a six-room house, and will be erected on the west side of 40th avenue north of Carrington. Interior will be finished in pine throughout. There will be an open fire place and tile or brick mantel. Hardwood floors will be used in the living and dining rooms. An automatic water heater will be installed. Exterior of the house will be covered with rustle. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, P. L. de Sarno, 1852 37th avenue, Oakland. The dwelling has been designed for a six-room house and will be erected on the west side of 38th avenue south of Foothill Boulevard. Interior will be finished in pine with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room will be finished in imitation tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SEWER CONSTRUCTION — Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Plans are complete and bids will be opened on August 20th for furnishing the necessary materials, tools and labor for the construction of a combined sewer, manholes and appurtenances.

RESIDENCE — 1 story and base, frame, \$2,500. Alameda, Alameda Co., Cal. Architects, Universal Drafting

Bureau 1841 5th avenue, Oakland. Owner, C. C. Adams. The dwelling will be erected in Waterside Terrace, and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine with some white enamel. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place in the living room with tile or brick mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, H. C. Pfrrang, 320 Forest avenue, Oakland. The dwelling has been designed for a five-room house with bath and sleeping porch, and will be erected on the east side of 16over street south of 58th street. Interior finish will be of pine and hardwood veneer with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile or brick mantel. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architects, Universal Drafting Bureau, 1841 5th avenue, Oakland. Owner, R. C. Hillen. The dwelling will be erected in East Piedmont Heights, and has been designed for a five-room house with bath and sleeping porch. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living and dining rooms and reception hall. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot and floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame \$1,500. Oakland, Cal. Architect, Claude R. Barton, First Trust Bldg., Oakland. Owner, Mrs. Ella B. Edwards. The dwelling has been designed for an eight-room house with bath and sleeping porch, and will be erected on Arimo avenue. Interior will be finished in pine with some elm panels and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile floor and wainscot. Plans provide for an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and segregated figures are now being taken by the architect.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, Leo J. Nichols, 1761 Broadway, Oakland. The dwelling will be erected on the east side of Grand Ave. north of Welden Ave., and has been designed for a seven-room house

with bath and sleeping porch. Interior will be finished in pine with elm panels and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Oakland, Cal. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner's name withheld. The building will be erected at the corner of Harrison and Grand avenue, and has been designed to contain a number of two and three room apartments. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms and in the entry halls. There will be steam heat, an oil burning furnace and hot water system. Bath rooms will be finished in tile. Wall heds will be used in each apartment. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and segregated figures will be called for in a week.

APARTMENT HOUSE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, J. Henry Bochner, Delger Bldg., Oakland. Owner, Lillian E. Emery. The building will be erected on the south side of 11st street between Telegraph and Grove streets, and has been designed to contain four small apartments with wall beds and private baths. Interior finish will be of pine and elm. Some hardwood floors will be used. There will be a hot water system. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are now being taken.

COURT HOUSE ADDITION—2 story and base, brick, \$2,000. Oakland, Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Alameda County. Plans for the small addition to the present building are now out for figures. Bids will be opened on September 7th. The new portion will contain one court room, judges' chambers and an office for the court reporter. Interior will be finished in pine and oak. The heating system in the old building will be extended. Exterior will be faced with pressed brick. Plans can be secured from the architect or the County Clerk.

FLATS—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, P. Holberg Riemers, 2125 Shattuck avenue, Berkeley. Owner, Francis L. O'Meara, 302 Mendocino avenue, Santa Rosa. The building will be erected on Rose street near Greenwood Terrace, and will contain twelve rooms. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms and reception halls. There will be an open fire place in each living room. Mantels will be of tile. Tile wainscot will be used in the bath rooms. Automatic water heaters are specified. Exterior of the building will be covered with cement plaster on

metal lath. Plans are complete and segregated figures are being taken.

COLLEGE BUILDING—4 story am base. Class A construction, \$800,000. Berkeley, Alameda Co., Cal. Architects, John Galen Howard, 604 Mission street, S. F. owners, University of California. Over fifty contractors submitted figures on the various parts of the work in connection with the construction of this building. Awards have not as yet been made. A complete list of the bids submitted will be found under the heading of Oakland and Alameda County in this issue.

#### Contracts Awarded

BRIDGE—Reinforced concrete, \$5,675. Berkeley, Alameda Co., Cal. Engineer, City Engineer, Berkeley. Owners, City of Berkeley. Contractor D. McDonald, Berkeley. Contract price, \$5,675.

FACTORY—4 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, Lewis P. Hobart Crocker Bldg., S. F. Owners, Shredded Wheat Biscuit Co. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. Contract price not stated.

#### AMERICAN CUTLERY FOR CANADA.

Reiterating his earlier statements that Canada now presents a favorable opening for the sale of American cutlery, Consul Felix S. S. Johnson, of Kingston, writes:

I fear that American manufacturers, as a body, fail to appreciate the obvious truth that the present is a golden opportunity for entering the Canadian market; yet unless that truth is grasped and acted upon, Canadian buyers in the future may go elsewhere for their cutlery. The English cutlery industry is clearly inadequate to meet the demands made upon it; the number of operatives continues to decline, raw materials (particularly brass parts and brass wire) are hard to get, and the price of celluloid has been advanced another 10 per cent. I sincerely hope that American firms will awaken to the present opportunity and make efforts to establish a permanent trade in Canada.

## Bids Opened For Big U. of C. Job.

Many Contractors Submit Figures on Various Part of Work for Benjamin Ide Wheeler Hall.

Bids were opened at the Monday meeting of the Regents of the University of California for the majority of the work in connection with the construction of the Benjamin Ide Wheeler "A" building, designed by Architect Hall, a four-story and basement Class John Galen Howard.

The work was segregated into the following: Excavating and concrete, structural steel and steel erection, roofing and sheet metal work, lathing and plastering, marble and terrazzo work, carpentry and interior finish, plumbing, ornamental metal work, elevator, and acoustic felt. Following is a complete list of the bids received. All bids were referred to the Board of Regents and will receive further consideration Tuesday.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA

**RESIDENCE**—1 story and base

frame, \$2,000. Fresno, Fresno Co., Cal.

Architect, none. Owner, J. E. Saylor

2561 Emma street, Fresno. The dwelling has been designed for a five-room house with bath and sleeping porch and will be erected in Buena Vista Tract. Interior will be finished in pine throughout. Some oak floors will be used. There will be an open fire place and tile or brick mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SEWER CONSTRUCTION**—Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, City Engineer, Turlock. Owners, City of Turlock. Plans have been completed and approved for furnishing materials and labor, together with all appliances and accessories for the construction of an extension to the present sewer system. Bids are now being taken and will be opened on September 7th. Plans can be secured from the City Clerk.

**ROAD CONSTRUCTION**—\$28,858.58. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Bids were opened for the construction of a concrete road from Bakersfield to Edison, a distance of 6 1/4 miles and show Leigh G. Garnsey, 402 East 3rd street, L. A., the lowest bidder at \$28,858.58. Bids were taken under advisement.

**FURNISHING CRUSHED ROCK**—Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. The Board of Supervisors instructed the Clerk to readvertise for 300,000 tons of crushed rock, which will enter into the construction of the highway system, bids to be received on August 21st. Bids received last week were all rejected because they were deemed excessive.

**HIGHWAY CONSTRUCTION**—Cost not stated. Hanford, Kings Co., Cal. Engineer, County Surveyor, Hanford. Owners, Kings County. The Board of Supervisors adopted plans and specifications for the first unit of the Kings County highway system and instructed the Clerk to advertise for bids for the construction work. The bids will be opened on August 21st. The first unit of the 103-mile system of permanent highway will embrace the nine miles between Hanford and Lemoore.

**FREIGHT HOUSE ALTERATION**—Reinforced concrete, \$14,000. Fresno, Fresno Co., Cal. Engineer's name not given. Owners, Santa Fe Railroad Co. This work will include some exterior concrete walls, interior alteration, plastering, electric work and carpentry. Plans are complete and the work will be done by Day Labor under the direction of the superintendent.

#### Contracts Awarded.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA

**BRIDGE**—Reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans and

specifications for a steel bridge across Mill Creek on the Sherwood Boulevard in the Los Molinos Colony were adopted. Bids were ordered to be advertised for. The bids will be opened on September 9th.

**HIGHWAY CONSTRUCTION**—\$60,000. Yreka, Siskiyou Co., Cal. Engineer, County Surveyor, Yreka. Owners, Siskiyou County. The matter of constructing a hard-surfaced road over the Forest House Mountain to Fort Jones and Scott Valley, at a grade not to exceed 6 1/2 per cent, is now being considered by the County Supervisors. According to reports the work will be under way shortly as it has been a long talked project and favored by all concerned. It is estimated that it will ultimately cost \$60,000 to grade and hard surface this six or eight miles over the mountain.

**BRIDGES**—Steel and timber. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. The Tehama County Board of Supervisors has ordered the County Surveyor to prepare plans and specifications for wooden bridges and steel bridges across New Creek and Antelope Creek and a wooden bridge across the slough near Cone's grove, all of said bridges being on the Sycamore road, in Road District No. 3. The motion was duly seconded by Supervisor Samson and carried.

**BRIDGE**—Reinforced concrete. Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, County Surveyor, Grass Valley. Owners, Nevada and Placer Counties. Work on the new Dog Bar bridge over Bear River to be built jointly by Nevada and Placer Counties, will start immediately under the direction of Henry Nolte of Colfax. The bridge will be 180 feet long, of the Howe truss plan, and the one span will be 160 feet.

**BRIDGE**—Steel. Cost not stated. Railroad Flat, Calaveras Co., Cal. Engineers, Jones, Reddick & Holly, Humboldt Lunk Bldg., S. F. Owners, Calaveras County. Plans prepared by Engineers Jones, Reddick & Holly have been approved by the Calaveras County Board of Supervisors for a steel truss bridge to be erected over the Mokelumne River near Railroad Flat. The bridge will be 670 feet long, of the riveted pony truss type, carried on concrete abutments. Bids will be called for shortly.

**HALL OF RECORDS**—2 story and base, reinforced concrete, \$55,000. Oroville, Butte County, Cal. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Butte County. Plans have been completed and approved for the construction of the new Hall of Records. The building will contain the offices of the recorder, clerk, treasurer, registrar, district attorney and auditor, besides a large auditorium and several smaller private offices. Interior will be finished in oak. Terrazzo and tile floors are specified. The factor system of heating will be installed. There will be metal window sash and frames, special fireproof vaults and metal doors. Vacuum cleaning is also specified. Exterior of the building will be faced with terra cotta. Plans are complete and hearings are being taken. Bids will be opened on September 7th.

COUNTY COURT HOUSE—2 story and base, reinforced concrete, \$71,000. Susanville, Lassen Co., Cal. Architect, George C. Sellen, Sacramento. Owners, Lassen County. Bids opened for this work show James L. McLaughlin, 244 Kearny street, low at \$74,222, and Sellman Co., Reno, Nev., second low, at \$74,400. All bids have been taken under advisement until the next meeting of the Board of Supervisors. A complete list of the bids received will be found under the heading of Sacramento and Northern California in this issue.

HOTEL, ALTERATION AND ADDITION—3 story and base, brick. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Joseph Losekan, San Joaquin Bldg., Stockton. Owners, Yosemite Hotel Co. The present building at the corner of Main and Sutter streets will undergo extensive repairs. The two upper floors will be razed and new steel and brick work installed. Included in the work will be carpentry, plastering, electric work, plumbing, painting and heating. The work of razing the building has been let to Thomas Lewis and is now underway.

SCHOOL—1 story and base, reinforced concrete. Cost not stated. Yreka, Siskiyou Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Yreka School District. The building has been designed to contain a gymnasium and departments for manual training and domestic science. Interior will be finished in pine. Modern plumbing and a central heating system will be installed. Exterior will be faced with cement plaster. Plans are nearly complete and figures will shortly be called.

#### Contracts Awarded

## LOS ANGELES AND SOUTHERN CALIFORNIA.

RESIDENCE—1 story and base, hollow tile. Cost not stated. San Fernando, Los Angeles Co., Cal. Architect, Charles F. Heyer, 1901 West 11st street, L. A. Owner, General H. G. Otis. The dwelling will be erected on a large tract in the San Fernando Valley, and has been designed to contain 17 rooms, 5 baths and sleeping porches. Interior will be finished in hardwood and white enamel. Hardwood floors will be used throughout. Bath rooms will be finished in tile. Plans provide for a central heating system, hot water circulating system and vacuum cleaning. There will be open fire places and tile or brick mantels. Exterior of the house will be covered with cement plaster. Plans are complete and figures are now being taken.

APARTMENT HOUSE—7 story and base. Class A construction, \$150,000. Los Angeles, Cal. Architect, John Parkinson, Security Bldg., L. A. Owner, Dr. James H. Edmonds. The building will be erected on the west side of 6th street near Westlake Park, and will cover an area of 100 by 100 feet. There will be a reinforced concrete frame and floors and hollow tile interior partitions. The building is designed to contain a total of 150 rooms, which will be arranged in suites of two and three rooms. Interior will be finished in hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be steam heat, elevator service, a hot water system, vacuum cleaning and dumb waiters. All suites will wall beds and private baths. Bath rooms will be finished in tile and equipped with high class fixtures. Marble and tile wainscot will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared.

APARTMENT HOUSE—3 story and base. Class C construction, \$25,000. Los Angeles, Cal. Architect, L. L. Jones, L. W. Hellman Bldg., L. A. Owner, W. W. Padden. The building will be erected on Fremont avenue near 4th, and will cover an area of 45 by 105 feet. There will be a total of 50 rooms arranged in two and three room suites with wall beds and private baths. Interior will be finished in pine and hardwood. Some hardwood floors will be used. There will be steam heat and a hot water system. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor under the direction of the architect.

WAREHOUSE—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Thomas Preston, Investment Bldg., L. A. Owners, National Transfer Co. The building will be erected on Ann street near Marguerite, covering an area of 50 by 110 feet. Construction will be fireproof with reinforced concrete floors, walls and roof slabs. Metal window frames and sash and fireproof doors will be installed. Modern electric work and plumbing are specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities  
of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, August 25, 1915

Fifteenth Year, No. 34

With the city authorities taking a definite part in the preservation plans, the people of San Francisco are now practically unanimous in urging that the Marina be kept after the Exposition closes, as a beautiful bay boulevard.

The Marina should be converted into a boulevard extending from Van Ness Avenue through Fort Mason to the Presidio, thence through Fort Riley and Lincoln Park to connect with the Ocean Boulevard.

This would give San Francisco the finest ocean boulevards in the United States. With some of the buildings saved as museums and exhibit palaces, and with gardens, walks and parks flanking the boulevards, San Francisco would be transformed into a perpetual Exposition City.

The United States Department of Agriculture has assigned O. W. Schleussner, one of its commissioners, to Brawley, Imperial Valley, to direct a federal distribution of cantaloupes throughout the country. The government sees to it that while the cantaloupes reach all the markets, none of the latter is glutted with the melons. The producer thus is enabled to sell his crop at a fair price, and the consumer gets them at a fair price. More than 1500 carloads of the melons are shipped out during the season from Imperial.

The crops of the Imperial Valley, which from present indications would seem to be the largest in the history of that section, brought about the organization of a concern known as the Wichita Transportation Company. President E. M. Hackett, formerly of Texas, is now a resident of this city.

The company is operating five Wichita trucks, a value in rolling stock of \$12,000, less than the cost of building one mile of railroad. This line is running from San Diego to El Centro, through a territory not paralleled by any railroad, also stopping at intermediate points.

A railroad is now under construction between these two points, but will not be completed for some time. The transportation company is making deliveries to towns that even this railroad will not touch.

What is undoubtedly a test case, has been brought against the company by the combined railroad interest of the State seeking to have them pay heavy fines for not having conducted their business in the same manner and under the same laws which govern the steam and electric railways.

If in this test case the railways should be successful, every man who owns a motor truck, hauling freight out of the cities to small towns would be compelled to operate under the Railroad Commission governing railways and electric lines. This would necessarily force the truck man out of the business, and the railroads could not and would not give the service necessary of handling the limited freight business at small towns and out of the way places.

A novel safety exit for elevators has been incorporated for the first time in Los Angeles by the J. W. Robinson company in its new building on Seventh street, Hope and Grand avenue, has met with such immediate approval by the Los Angeles building inspector that an ordinance has been passed making it an obligatory feature in all buildings of this type erected in the future.

The eight big elevators, each with its eight by ten platform, are operated upon two separate electric currents. This power is furnished to alternating elevators so that in case any accident should occur to stop one current, the elevator adjoining it can take its passengers and continue the trip from basement to seventh floor. The particular part on which the city ordinance hinges, however, is a wide paneled door in one side of each elevator. This is so arranged that it can be opened in case of any stoppage of the lift between floors, the elevator next may be run to the same level and the passengers transported by means of a stout bridge from one car to the other with perfect convenience and safety.

A profit of \$219,212.99 has been made by the Panama-Pacific International Exposition during the three weeks ended July 31, or more than was earned by the exposition during the first twenty weeks of operation. This brings the total net profits to date up to \$396,244.07. During the period from the opening date, February 26th to Saturday, July 31, inclusive, the total attendance has been approximately 9,381,092. At this rate it is conservatively estimated by exposition officials that more than ten millions of persons will pass through the exposition gates from the date named until the closing day, December 1th.

July furnished crowds which broke all monthly attendance records at the San Diego Panama-California Exposition, according to official figures made public by the bureau of admissions. The July attendance was 961,977, a daily average of 9,744. Attendance since the opening to August 1, totals 1,267,775. A statement issued by Exposition President G. A. Davidson, which accompanied the report of the bureau of admissions, declared that bookings of large delegations with the natural influx of visitors for August will give this month a total to exceed that of July. With the increase in attendance the statement says, that there has been a corresponding increase in patronage of the concessions.

# LOS ANGELES AQUEDUCT.

CHECKED AND AUTHORIZED BY  
THE AQUEDUCT ENGINEERING DEPARTMENT\*

The Los Angeles aqueduct, the country through which it passes and the mountainous region from which its water comes have been reproduced. Under the personal direction of Chief Engineer Mulholland an accurate topographical model has been built and will be exhibited at both expositions that visitors from away may get a comprehensive idea of the big project.

The model is twenty-six feet long and thirty inches wide. It includes a wide strip of country all the way from the northern tip of the divide to the sea. It portrays the exact nature of the country, extraordinary care having been taken to make the reproduction exactly correct. The horizontal scale is one mile to the inch and the vertical scale 1600 feet to the inch.

The topographical sheets of the Geological Survey covering the strip of country represented by the model were all pantographed to the same scale and each contour transferred to plates of fiber one-sixteenth of an inch thick and then cut with a jigsaw run by an electric motor. The supply of fiber available in Los Angeles was soon exhausted and more had to be ordered from San Francisco to complete the work. On portions of the country not yet covered by surveys, these were ordered and work rushed to a speedy completion.

The coloring, also, is a close copy of nature, the artist who painted it having first made a trip through the Owens Valley.

The extreme northwest tip of the model ends at the divide, where the San Francisco as well as the Los Angeles water supply have their inception. On one side of the divide is the beginning of the Owens River tributaries. Just on the other side begins the stream which flows into and becomes a part of the Hetch-Hetchy supply.

The model shows, far above the aqueduct intake, a great mountain range, some of whose peaks are perpetually snow-capped. Mt. Whitney, the highest point, is 14,500 feet high and there are several other peaks almost as high. These mountains are much newer in formation than the volcanic Alabama hills on the other side of the valley. They are of granite and contain enormous fissures. One gorge, plainly revealed on the model, is more than 800 feet deep.

The aqueduct is shown on the model in a broad red line. The fifty-three miles of tunnels are indicated by black lines.

The model will be encased in glass and supplemented with explanatory diagrams. Another portion of the exhibit will be about fifty large transparent views of the aqueduct. These are from photographs recently taken and hand-colored to represent nature as faithfully as possible.

The pictures have been taken from the northern edge of the watershed, following down to include all the mountain ranges and showing the reservoirs, power plants and other important features of construction. One of the pictures is of an ice-bound stream with fields of snow on either side. It was taken the 5th of June, at which time the snow was four feet deep. Other pictures show, lower down, the water released from its snowy fastnesses leaping madly down the steep mountain side. The entire exhibit will constitute an instructive, accurate and interesting presentation of the aqueduct project from its physical side.

Exhibition of the aqueduct model will correct several popular misapprehension concerning the aqueduct. It has been stated many times that the water comes from Owens Lake. The model clearly shows that the water sources are far above the lake and that the aqueduct skirts that body of brackish water without at any point coming in contact with it.

One may see, as well as by taking a trip through the regions, how ruggedly wild and uninhabitable is the great watershed. Viewing the topography, the absurdity of the allegations of contamination by large numbers of people

at the headwaters or any other point above the intake is obvious.

Better than volumes of printed matter, the model reveals how stupendous the project was from an engineering point of view. It indicates how huge steel siphons were laid across the desert and up steep mountainsides; how for miles tunnels were driven through hard rock to emerge in places where there are magnificent power drops.

It is Mr. Mulholland's desire to have the model and views at the Fair in time for the Engineering Congress in September. After the Fairs are over it is proposed to have the exhibit permanently installed in Los Angeles, possibly at Exposition park.

The construction of the aqueduct that brings the waters of Owens River across 250 miles of desolate and rugged country to the city of Los Angeles has set a new standard of public service for American municipalities. No other public work at all comparable in magnitude to the aqueduct has been accomplished within the limits of cost and time fixed by the engineers in their first estimates. It is not an exaggeration to say that the builders of the aqueduct have established a world's record of efficiency and economy. They promised that the work should be done in five years and water delivered at the San Fernando reservoir at a cost of \$23,000,000. They began work in 1905, and they brought the water to San Fernando in 1913 at a cost within the original estimate.

For several years the men upon whom rested the responsibility of providing the city of Los Angeles with sufficient water for her people sought in vain for sources of permanent supply equal to prospective demands. The necessity for additional supply was made plain to the Water Commissioners in 1904, when for ten days in July the daily consumption of water exceeded the inflow into the reservoirs by nearly 4,000,000 gallons. Excessive consumption was checked by the use of meters, and some small additions to the supply were obtained from wells, but the rapid increase of the city's population made such relief only temporary, and the board was confronted by a problem of serious proportions. The board imposed upon Engineers William Mulholland and J. B. Lippincott and O. K. Parker the task of gathering data and finding a solution of the problem, and their report in 1905 showed the hopelessness of seeking relief in any watershed south of the Tehachepi.

There is water under the ground of all the coastal plain in which the city stands, but it is not an inexhaustible reservoir, and the drafts made upon the underflow by the pumps of thousands of farms and orchards were found to be steadily lowering the plane of saturation. To take more water for the city from the underground reservoir would stop the development of the surrounding country and set a limit to the growth of Los Angeles. The engineers were forced to the conclusion that nowhere in the basin south of the Tehachepi range and west of the San Bernardino could Los Angeles obtain any considerable flow of water without taking it from the lands which produce the wealth of Southern California.

In estimating the future needs of the city, the engineers assumed a rate of growth based upon the average for the ten preceding years, and predicted an increase from 200,000 in 1905 to 250,000 in 1912, and 390,000 in 1925. Assuming a reduction of average consumption of water, by the use of meters to 150 gallons a day for each inhabitant, the city would require in 1925 a supply of ninety second-feet, or more than 55,000,000 gallons a day, which is more than double the minimum flow of the Los Angeles River and ten second-feet in excess of the recorded maximum flow at The Narrows.

The city, however, failed to keep within the limits of the growth diagram drawn by the engineers, and by 1910 as shown by the Federal census, its population had reached the figure set by them for 1913, viz: 319,000. According to the diagram in the report of the engineers, the city would have a population of half a million in the year 1936. As a matter of fact, it reached that stage of growth in 1913. Fortunately a seven-year period of abundant rain brought

\*FOOTNOTE.—This article was compiled by Mr. Frederick Hayden of the Los Angeles Times and checked by the Aqueduct Engineering Department.

William Mulholland, Chief Engineer of the Los Angeles Aqueduct.

Owens River, 100 Feet above Aqueduct Diversion. Photo taken 1904.

the flow of the Los Angeles River up from the forty second-feet of 1905 to seventy second-feet in 1911, nearly doubling the city's supply from that source.

Heavy draughts were made by pumps upon the ground waters, lowering the water plane from six to nine feet, and the per capita consumption was decreased by the extended use of meters to 12½ gallons a day. Because of the series of wet seasons and the resort to the temporary expedient of robbing the agricultural lands of the coastal plain of their ground waters, the city escaped a water famine during the period of its wonderful growth, but

there was no margin of safety, and the lowering of the ground water plane confirmed the judgment of the Water Board and its engineers in seeking other sources of supply.

Early in 1905 a solution of the water problem was suggested to Water Superintendent Mulholland by Fred Eaton, who had been City Engineer and Mayor of Los Angeles. Mr. Eaton had interests in Inyo county, and for many years had been making extended trips through the valley of Owens River, which lies between the Sierra Nevada and ranges of desert mountains on the eastern state line. In the valley Mr. Eaton had seen vast floods of water pouring

foothills, with the Sierras and Mt. Whitney in the back ground.

Mt. Whitney (elevation 14,502 feet) and the main range of the Sierra Nevada.

wastefully from the Sierra snowfields into Owens Lake, a dead sea of the Inyo desert, where hundreds of thousands of years of evaporation and condensation had produced a saturated solution of soda salts, and he had wished that those floods could be made available to the great city which he saw growing in the Southland.

On his journeys to and from the valley, Mr. Eaton studied the country with the eye of an engineer, and he saw that in some past geological period the river flowing for 100 miles along the eastern foot of the Sierra had been a great torrent, swinging around the end of the range and pouring into the basin of the Mojave desert. Volcanic action had cut off the flow by throwing a barrier across the south end of Owens Valley and forming the enclosed basin in which the lake lies. But the barrier was low, and below it the old stream route was still open to within a few miles of the Southern California plain, the only obstacle being the range of mountains north of Los Angeles.

Confident that a constantly descending route for the

river could be found, Mr. Eaton made surveys from Owens Valley to the mountains north of the city, and proved the practicability of his dream.

Mr. Mulholland studied the problem in detail, going over the line alone and making a rough survey with an aneroid and a pocket level, keeping the purpose of his frequent trips into the desert a secret from all but the Water Board, until he had satisfied himself that he had found a feasible route for an aqueduct. He plotted an approximate line upon the detailed topographic maps of the United States Geological Survey and determined the lengths of open canal and tunnels and siphons that would be required, located reservoirs and calculated quantities of materials to be moved and placed, and made an estimate of cost that was confirmed later by thorough instrumental surveys and minute calculations. He then made a report to the Water Board and outlined an aqueduct and reservoir system, which he estimated would cost, including the purchase of land and water rights, about \$25,000,000.

Rugged country of Jawbone Division; 23 miles of Tunnel.

Owens River at point of diversion. Concrete Diversion Dam shown in place.

View of Mt. Williamson and the upper watershed of the Owens River.

Mr. Mulholland realized that the board would rely upon his judgment as an engineer, and that upon him would rest the responsibility of committing the city to a stupendous enterprise. If he should make a serious error in his judgment of the engineering practicability of the project or in his estimate of cost, professional ruin would befall him. It required sure knowledge of conditions, genius in design-

Gates letting Owens River water into the Aqueduct.

ing plans and great courage in accepting responsibility. Mulholland "made good" in all.

In August, 1905, on his return from the Owens River Valley, Mr. Mulholland took into his confidence Mr. J. O.

Steam shovel at work; huge boulders made progress slow.

Steam shovel on open conduit near Owens Lake.

Concreting open conduit of Aqueduct.

Putting cover on the Aqueduct in the heart of the Mojave Desert.

Koepfli, president of the Chamber of Commerce, and stated to him that he had found in the Owens River Valley a source of supply that would furnish Los Angeles with all the water it would ever need. President Koepfli immediately took the matter up with the board of directors of the Chamber, and in conjunction with other commercial bodies sent a special committee, consisting of H. C. Witmer, M. Lissner and Fred A. Hines to the Owens River Valley to make a personal investigation, especially with reference to the quality of the water. The committee obtained samples of the water and had them analyzed both at the State University and in Los Angeles.

As soon as this investigation was completed an election was called to vote \$1,500,000 in bonds for the purchase of land and water rights in the Owens River valley, the Chamber of Commerce strongly urging the people to vote the bonds.

The Owens River project was made known to the people

of Los Angeles in July, 1905, and was received with enthusiastic approval as the only practicable and adequate answer to the most vital question confronting the city. The Water Board asked the city to issue bonds for \$1,500,000 for the purchase of lands and water and the inauguration of work on the aqueduct, and on September 7, 1905, by a vote of 10,787 to 755 the citizens of Los Angeles approved the bonds and indorsed the Owens River project.

In November, 1906, the city employed three of the most eminent hydraulic engineers in the United States to examine and report on the project. The consulting engineers were Frederick P. Stearns, president of the American Society of Civil Engineers, and member of the Isthmian Canal Commission; John R. Freeman, the greatest specialist in hydraulics in the country, and James D. Schuyler, builder of the largest dams in the West, and an engineer of wide experience.

The Consulting Board made its report on December 25, 1906, showing that supply of 20,000 miners' inches of water could be obtained from Owens Valley, and that the cost of building an aqueduct to bring it to San Fernando, in-

View showing mountainous topography on Aqueduct line.

cluding purchases of land and water rights, would be \$21,485,600.

In 1907, the question of issuing bonds for \$23,000,000 for the construction of the Owens River Aqueduct was submitted to the people by the City Council and a campaign of education was carried on by the civic and commercial

Sections of steel pipe for siphon.

bodies and the press. The Chamber of Commerce, the Merchants' and Manufacturers' Association and other organizations investigated the project thoroughly, the Mayor and Council scrutinized it in detail, engineers studied it and reported their conclusions, and on June 12, 1907, the people of Los Angeles indorsed the project by voting in

Completed Aqueduct—Owens Lake in the background.

favor of the bond issue. The vote was in the ratio of ten to one.

The general plan of the aqueduct, as outlined by Mulholland and approved by the Advisory Board of Engineers, subject to such modifications and changes of location as might be found advisable during the progress of the work, was as follows: An intake on Owens River about thirty-five miles north of the point where the river empties into Owens Lake; an open canal of 900 second-foot capacity through Owens Valley, twenty-three miles unlined and thirty-seven miles lined with concrete, to Haiwee reservoir, at an elevation of 200 feet above the level of Owens Lake; Haiwee reservoir to accumulate and store the waters of the river and of intercepted streams flowing down the east

side of the Sierra Nevada, having a capacity of 62,800 acre-feet, or 29,000,000,000 gallons; from Haiwee to Little Lake, fifteen miles of lined and covered conduit of 410 second-foot capacity; Little Lake to Indian Wells, twenty-four miles of conduit, tunnels and siphon pipes; Indian Wells to Red Rock summit, twenty miles of conduit, flumes and siphon; Red Rock through the "bad lands" of Jawbone Can-

Jawbone Siphon.

yon to the Mojave desert nearly nineteen miles of tunnels, siphons and conduit, through the Mojave desert to the west end of Antelope Valley, sixty-eight miles mostly of concrete conduit; reservoir at Fairmont to regulate delivery of water through pressure tunnel; Elizabeth Lake

The \$60,000 Dollar Municipal Cement Plant at Monolith.

tunnel, 25,000 feet; power drops in San Francisquito Canyon; tunnels, siphons, flumes and conduit to San Fernando reservoir, fifteen miles; total, 225.87 miles, exclusive of reservoirs and power water ways.

A vast amount of preparatory work had to precede aqueduct construction and that was begun in the fall of 1907. It was believed by the engineers that the time of completion of the aqueduct would be controlled by the driving of the longest tunnel, and therefore, the portals of the Elizabeth tunnel were opened simultaneously with the beginning of preparatory work along the line; but

with that exception no permanent work was begun until October, 1908. Crews were organized and camps established in September, but construction dates from October 1, 1908.

In the first eleven months twenty-two miles of tunnel were driven, sixteen miles of cement conduit completed, four miles of open canal in Owens Valley dug, and a rate of progress established that would have brought the water into the San Fernando reservoirs in the fall of 1912 had there been no delay in providing funds.

Before work could be begun on the aqueduct, it was

Concreting pen conduit of Aqueduct, showing method of process.

necessary to build roads and trails, power plants, telegraph and telephone lines, and provide water supply for the camps established along 150 miles of waterless desert.

Included in this work were 215 miles of road, 230 miles of pipe line, 218 miles of power transmission line, and 277 miles of telegraph and telephone line. Fifty-seven camps were established along the line of work, most of them in the mountains, and good roads made to reach them. Some of the roads challenge comparison with the finest mountain roads in California, and all of them are better than the stage roads existing in the desert before the city began its work.

In the acquisition of water rights and for operation, maintenance and protection of the aqueduct, the Board of Public Works bought 124,929 acres of land in the drainage basin of the Owens River, 4,300 acres near Tehachepi, sixty-nine acres for yards at Mojave and 5,818 acres for reservoir sites; total, 135,116 acres, exclusive of canal rights of way. This is an area three times the size of the island

per day with three eight-hour shifts, and a bonus schedule was adopted by the Board of Public Works which provided that each man working in the tunnel would receive a bonus of 10 cents for each foot that this schedule was exceeded. This bonus was paid in addition to the regular wages, the men receiving these wages whether the bonus schedule was exceeded or not, and the bonus being distinctly a reward for extra exertion. The effect of the bonus was to increase the daily wage of the men about 30 per cent, and to decrease the cost of driving per foot from 10 to 15 per cent. There was a further saving to the city in expedition of the work and in early release of equipment for use elsewhere.

From the south portal, 13,500 feet of tunnel were driven, and from the north portal, 13,370 feet. The average rate of progress at the south portal was 11.11 feet per day; at the north portal, after the connection was made through to the shaft, the average progress was 13.65 feet per day. From the portal to the end of the section driven from

Completed Aqueduct, from Intake to Haiwee Reservoir, 68 miles—the Aqueduct is not covered.

of Catalina and double the total area of the city of Los Angeles.

World's records for speed, efficiency and economy were made by the tunnel drivers on the aqueduct. The American record for hard rock tunnel driving—604 feet in one month—is blazoned above the south portal of the Elizabeth Lake tunnel. This bore through the mountain, 25,870 feet in length, 10x12 feet in diameter, and having a capacity of 1000 cubic feet of water per second, or 27,000,000 gallons an hour, was driven and lined for two-thirds of the estimated cost and in two-thirds of the time allotted by the board of consulting engineers. The excavation work was in charge of John Gray at the north end of the tunnel and W. C. Austin at the south end. The average progress for the two headings was 22.1 feet, or a little better than eleven feet per day for each end.

When this tunnel work was started it was estimated that a reasonable progress for each end would be eight feet

the north end, including delays on account of shaft and cave-ins the average progress was eleven feet per day. The average progress for the two headings for the 1215 days' work was 22.1 feet, or a little better than eleven feet per day for each end. The connection was made of the two headings on February 28, 1911; after the expiration of forty months of work.

A noteworthy record was made in driving the Red Rock tunnel. This tunnel is in an indurated sand or soft sandstone, and is 16,596 feet in length. Excavation was started on May 27, 1909, and was completed January 24, 1910.

The Red Rock tunnel crew raced with the Swiss drivers of the Loetschberg tunnel for the world's record, and won it. In August, 1909, the Swiss broke their own previous record by driving 1013 feet, working with four air drills in one heading. Tom Flannigan's crew at Red Rock working with hand drills in one heading, drove 1061 feet. The hard-rock men in the Elizabeth tunnel raced with the

government crew on the Gunnison tunnel and beat them. There are 155 tunnels, aggregating 51.92 miles in length, in the aqueduct.

The aqueduct passes through the mountains of Jawbone division in a series of tunnels of varying length, connected by short stretches of conduit, and crossing the deeper and wider canyons in inverted steel siphon. The Jawbone division consists of 12.07 miles of tunnel, 7.47 miles of conduit, .94 of a mile of flume, and 2.2 miles of steel siphon. The Jawbone siphon is the most imposing piece of work on the aqueduct. Its total length is 8,136 feet, and it varies from 7 feet 6 inches to 10 feet in diameter. The steel plate of which this pipe is built is 1 1/4 inches thick in the heaviest section. The maximum head on the pipe is 850 feet, and its total weight is 3,243 tons. It is the most noteworthy pipe in the United States.

The longest siphon on the aqueduct is the pipe crossing Antelope Valley. It is 21,767 feet in length, and up to heads of eighty feet is built of concrete, the remaining 15,597 feet being steel pipe. The concrete and steel pipes are both ten feet in diameter. The maximum head on this siphon is 290 feet, and the weight of the steel is 3324 tons.

There are ninety-eight miles of covered conduit south of the Haiwee reservoir. The covering was not included in the original estimate of the board of engineers, but it was a part of Mulholland's plan. Mulholland never had any idea of leaving the conduit through the desert uncovered. He said he would save enough on the tunnels to pay for the cover, and he did. The covering cost more than a million dollars.

The first reservoir on the line is at Haiwee, seven miles south of Owens Lake. It is located in a pass and is formed by two dams seven and a half miles apart. The elevation of the high water in the Haiwee reservoir is 3,764 feet. The area of the water surface is 2,100 acres, and the capacity of the reservoir is 63,800 acre-feet, or enough water to run the full capacity of the aqueduct for eighty days.

The length of the North Haiwee dam is 1850 feet, the maximum height forty-six feet, and width on top twenty feet, and it contains more than 200,000 cubic yards of earth. The maximum depth of water against this north dam is thirty-six feet.

The South Haiwee dam is 1523 feet long and 91 feet high, and contains 559,750 yards of earth. The dam has slopes of 2 1/2 horizontal to 1 vertical on each side, with a top width of 20 feet, and a maximum width at its base of 450 feet. At this point, on account of the depth of the water, a core-wall was put down to bedrock, a maximum depth of 120 feet, at a cost of \$70,000.

The outlet from the reservoir is through a tunnel 1193 feet long and 10 feet in diameter in the clear, which has been driven through the west abutment. There is a submerged canal in the reservoir site 700 feet in length from the north portal of this tunnel to the lowest point in the reservoir. The gate-tower is a concrete structure 80 feet in height, and 21 feet outside diameter. It contains large gates placed at different elevations to regulate the outflow of water.

The Fairmont reservoir is intended not only as a safeguard in the shape of a storage supply 200 miles from the intake, but also as a means of regulating the hourly fluctuations of water through the power plants located below, to meet peak load conditions. The capacity of the conduit into this reservoir is 120 cubic feet per second, but the outlet tunnel from the reservoir to the power plant has a capacity of 1000 cubic feet per second. This will permit the discharge of this large volume of water in the few hours in the day during which the maximum demand exists for electric energy, and the decrease of the flow of water to a minimum amount during the night hours, when the demand for power is relatively small. The capacity of the Fairmont reservoir at the 3035-foot elevation is 7620 acre-feet. The dam has a maximum center height of 115 feet, and contains 607,114 cubic yards. It is built of earth with a concrete core wall.

The Dry Canyon dam on the Stogus division is 528 feet long, has a center height of 61 feet and containing 140,000 cubic yards of earth. The Dry Canyon reservoir has a storage capacity of 1325 acre-feet, and its province is to regulate back to uniformity the irregular flow that may be discharged through the power plants.

The San Fernando reservoir, into which the water is delivered from the aqueduct for distribution to the city and contiguous territory, has a storage capacity of 36,600 acre-feet, or enough to furnish a full supply for a

month and a half in case of breaks in the line above.

The city also owns a reservoir site in Long Valley, in the northerly portion of the drainage basin of Owens River, having a tributary watershed of 391 square miles. If this reservoir should be constructed, the flow line would be at an elevation of 6810 feet, the area of its water surface would be 5686 acres, and its storage capacity would be 310,984 acre-feet. This would call for a dam 520 feet long on top and 160 feet in height. A structure of this character would make this one of the most notable storage reservoirs in the United States. It may be found desirable to build this Long River reservoir when the complete flow of the aqueduct has been utilized. In this event its province would be to hold over a water supply from years of excessive flow for such years of drouth as may occur in a generation.

A second great reservoir site is controlled by the city at a point about six miles north of the intake of the canal. This is known as the Tinemaha reservoir site. Its flow-line would be at an elevation of 3887 feet. The area of its water surface would be 7074 acres, and its storage capacity would be 127,425 acre-feet, with an earthen dam 40 feet high. This reservoir site has the advantage of being situated near the intake of the canal, and the city owns continuously both sides of the river from the dam site to the intake, thus offering protection from trespass any waters which might be discharged from it.

The capacity of the Long Valley reservoir would be sufficient to furnish a continuous flow of the full aqueduct for a period of 127 days, and the Tinemaha reservoir, with the height of dam given, for a period of 159 days.

In addition to this, eleven wells have been put down in the bottom lands of Owens Valley along the line of the canal, and ten of these have struck artesian water. This body of underground and artesian water in Owens Valley is about fifty miles in length controlled by the city.

More than six million pounds of blasting powder was used by the builders of the aqueduct and yet only five men were killed in accidents in underground work.

Electric power to drive dredges, excavators, drills, machinery in shops and cement mills, and to light the camps and tunnels was developed in plants installed on Division Creek near the intake, and on Cottonwood Creek near the lower end of Owens Valley. High voltage lines transmitted the power along the line to the mill at Monolith. Power for work in San Francisquito Canyon was taken from the Kern River line, which passes through the canyon.

In San Francisquito Canyon two drops aggregating 1500 feet are to be used to develop about 112,000 horse power of electrical energy from the sale and use of which the city may derive a large revenue.

In April, 1910, the city voted three and a half million dollars for the construction of power plants in the San Francisquito Canyon and elsewhere and for the building of related electric works. The validity of the bonds was questioned, and the courts appealed to. This involved a delay in the building of hydraulic works in the San Francisquito until the State Supreme Court should pass on the matter. A decision of the Supreme Court was rendered in June, 1911, sustaining the contentions of the city and establishing the validity of the bonds and the work was begun under the direction of the Board of Public Works and not as a part of the aqueduct, although the conduit used for the generation of power will also be essential for the conveyance of the water to the city of Los Angeles as a portion of the aqueduct.

The maximum capacity of the power plants that have been and may be installed along the line is as follows:

	H. P.
Division Creek .....	500
Cottonwood Creek .....	8,600
Haiwee .....	6,150
San Francisquito .....	112,800
San Fernando .....	9,685

Total .....

Water was turned into the Los Angeles mains July 22, of last year, 1911, and ever since the Owens Valley supply has been used here to augment that of the Los Angeles River.

Last month the city purchased and took over the system of the Union Hollywood Water Company, by far the largest of the eighteen systems formerly operated independently. Prior to that time the Water Department furnished a large quantity of water to prevent a shortage in the Hollywood district.

### APARTMENT HOUSES

**SAN FRANCISCO.**—Apartment house 4 story and base. Class C. \$65,000. Architects, Rousseau & Rousseau, 110 Sutter street, S. F. Owners, Girard Investment Co. The building will be erected at the southwest corner of Bush and Jones streets having a frontage of 77½ feet on each street. There will be a total of thirty suites, arranged in two, three and four room apartments, with private baths and wall beds. Interior finish will be of pine, haidwood and white enamel. Hardwood floors will be used in the living and dining rooms. Plans provide for steam heat, an automatic elevator, oil burning plant and vacuum cleaning. Bath rooms will have tile floors and wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**SAN FRANCISCO.**—Apartment house 2 story and base, frame, \$25,000. Architect, Edward E. Young, 251 Kearny street, S. F. The building will be erected at the northeast corner of Geary and Palm avenue, covering an area of 89 by 86 feet and has been designed to contain ten large suites. Interiors will be finished in pine and hardwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Plans provide for steam heat a hot water system and vacuum cleaning. All bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Apartment house, 1 story and base, \$50,000. Architects, Richardson & Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Grand avenue covering an area of 88 by 78 feet and will contain a total of twenty-six suites of three, four and six rooms. Interiors are to be finished in pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, an automatic elevator, hot water system, vacuum cleaning and oil burning plant. All bath rooms will have tile floors and wainscot. Wall beds are specified. Marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$12,000. Architect, Merrill Newsom, 1748 Broadway, Oakland. Owner, William Kerrigan. The building will be erected at the corner of 40th and Webster street and has been designed to contain six

suites of three and four rooms with private baths and wall beds. Interior finish will be of pine and hardwood. Some oak floors will be used. Bath rooms will be finished in tile. A hot water system and steam heat are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Apartments and stores, 3 story and base, brick. Cost not stated. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Gus Weist. The building will be erected at the northeast corner of Ward and Union streets, covering an area of 70 by 100 feet. Plans provide for four modern stores on the first floor and a total of 14 suites of three and four rooms on the upper floors. Interior will be finished in pine. There will be steam heat, oil burning furnace, and a hot water system. All suites will have wall beds and private bath rooms. Tile floors and wainscot will be used in the bath rooms. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are now being prepared.

**SAN FRANCISCO.**—Apartment house, 3 story and base, frame \$23,000. Architect, Arthur J. Leib, Russ Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Sacramento street west of Taylor and has been designed to contain five apartments of four rooms and one large six room suite. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living rooms and dining rooms and private entrance halls. There will be steam heat, an oil burning furnace and hot water system. All suites will have wall beds and private baths. Bath rooms will be furnished in tile. Marble and tile wainscot is specified for the entrance vestibule. Exterior of the building will be covered with rustic and cement plaster. Plans are complete and a contract will be awarded this week.

### Contracts Awarded

**SEATTLE, WASH.**—Apartment house 3 story and base, reinforced concrete, \$32,215. Architects, W. R. B. Wilcox & Julian Everett, Boston Bldg. Seattle. Owner, L. Smith. Contractors, MacRea Bros., Empire Bldg., Seattle. Contract price, \$32,215.

**SAN FRANCISCO.**—Apartment house and store, 3 story and base, frame, \$3,500. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, H. D. Junck, Contractor, Ludwig Koenig, 3525 19th street, S. F. Contract price, \$3,500.

### BONDS.

**TERRA BELLA, TULARE CO., CAL.**—Without a dissenting vote, the electors of Terra Belle voted solid for the organization of the Terra Bella Irrig-

gation District. A bond election will be called in the future to develop the proposed district.

**SACRAMENTO, CAL.**—According to advice given out by the state engineering office at Sacramento, the organization of the boards of supervisors of fifty counties in this state will fight the proposed bond issue of \$12,500,000 which is planned to complete the various highways contemplated by the state highway commission. It is said that when the many highways and trunks and laterals planned are completed that it will take out of the hands of the supervisors the political patronage which has been an important item to the various supervisors.

**MARYSVILLE, YUBA CO., CAL.**—The Medical Society of Yuba and Sutter Counties has passed resolutions approving the calling of a bond issue to raise sufficient funds for the extension of the sewers from their present outlet to a point beyond Fourteenth street.

**ABERDEEN, WASH.**—A special election held to vote bonds of \$500,000 to build a gravity water system to the falls of Wishkah, 23 miles north, carried by a large majority.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—The first batch of school bonds of \$23,301 have been sold by the County Supervisors to E. H. Rollins of San Francisco. Plans for the improvements proposed will be ordered shortly.

**STOCKTON, SAN JOAQUIN CO., CAL.**—In response to the petition of residents in the vicinity of Tracy, the supervisors have called an election for October 12th to decide whether the West Side Irrigation project of 11,500 acres shall be formed.

**SAUSALITO, MARIN CO., CAL.**—An election will be held in the Sausalito School District on September 14th, to vote bonds of \$29,000 with which to build a new school building. Further information relative to the election may be had from P. J. Elliott, Caroline L. Fiedler or F. D. Linsley, Trustees of the Sausalito School District.

**RODEO, CONTRA COSTA CO., CAL.**—Owing to the extremely low rate of interest, the \$17,000 issue of Rodeo Sanitary District bonds failed to be sold when the time for opening bids arrived. The Board will issue another call for bids.

**MODESTO, STANISLAUS CO., CAL.**—The good roads petitions asking the Supervisors to appoint a commission and proceed with the work of calling a bond election in Stanislaus county are now being circulated.

**AUBURN, PLACER CO., CAL.**—An election for Tuesday, September 14th, to vote \$22,000 bonds has been called by the City Trustees. Of this amount \$15,000 will be for sewer purposes, in building a septic tank, and increasing the size of some of the main sewer pipes. \$5000 will be voted for the purchase of three fire auto trucks, and \$2,000 for the erection of a fire alarm system.

**TAFT, KERN CO., CAL.**—A \$60,000 bond issue of the city of Taft and an issue of \$2500 for the Rosamond grammar school have been sold by the Kern County Board of Supervisors. The Taft issue, which was pur-

chased by a San Francisco firm, brought a premium of \$1,311. The Rosamond issue was purchased by the Security Trust Company of Bakersfield.

**SAN BERNARDINO, SAN BERNARDINO, CAL.**—September 20 is the date fixed by San Bernardino City Council when the voters of that city will pass upon a proposed bond issue of \$219,400 for the building of a city hall and municipal auditorium.

**MOHAVE CO., ARIZ.**—The voters of the county have approved a bond issue of \$100,000 for improving the roads of the county.

**FLORIN, SACRAMENTO CO., CAL.**—Four bids were received by the Supervisors for the purchase of the \$10,000 bond issue of the Florin School District. The bids, which were referred to the Contract Committee, were as follows: Sacramento Valley Bank and Trust Company, \$196.72; Lumberman's Trust Company of San Francisco, \$155; Blythe-Witter Company, San Francisco, \$211, and the Capital National Bank, Sacramento, \$161.

**WESTMINSTER, ORANGE CO., CAL.**—The directors of the Westminster Drainage District, have called an election to be held on September 10th for the purpose of voting bonds of \$25,000 for the construction of a drainage system. This is a new organized district and includes a large area around Westminster.

**CIENEGA SCHOOL DISTRICT, CAL.**—A special election will be held in the Cienega school district on September 7, 1915, for the purpose of voting bonds in the sum of \$40,000 for the erection of a school building.

**GROSVILLE, BUTTE CO., CAL.**—Petitions asking for the formation of an irrigation district near Paradise, Butte County, will be presented to the Board of Supervisors at its October meeting. The project will include about 20,000 acres, and it is reported that about 60 per cent of the affected property holders have already signed the petition.

## BRIDGES AND DAMS

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, Co. Surveyor, San Luis Obispo. Owners, San Luis Obispo County. At the last meeting of the Supervisors plans and specifications for the construction of the San Miguel bridge across the Salinas river on the San Miguel and Vineyard Canyon road were presented, but failed to be adopted as the Board decided that the time was inopportune and action could be taken at some future date.

**MODESTO, STANISLAUS CO., CAL.**—Bridges reinforced concrete, steel and timber. Cost not stated. Engineer, E. H. Annear, Modesto. Owners, Stanislaus County. The plans and specifications prepared by County Surveyor E. H. Annear for a concrete bridge over the drainage canal, on the McHenry Road, for a bridge over the M. L. D. main canal on the Sonoma lateral at Sta. 363886 C. H. C. for a bridge over the Ceres main Canal on the Huchison road for a bridge over lateral No. 4 on the McHenry road at the northern limits of

the city of Modesto, for a bridge over lateral No. 3 on the McHenry road at the northern limits of the city of Modesto, for a bridge over lateral No. 6 on the McHenry road near Bang's house and for a bridge over lateral No. 5 on the Claus road, were adopted by the County Supervisors at their last meeting and the Clerk was instructed to advertise for bids to be received on September 14th, 10 a. m. Plans and full information may be had from the County Engineer at Modesto.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo Co. At the last meeting of the County Supervisors plans and specifications for the Paso Robles creek bridge on the state highway near Templeton were accepted and ordered that bids be called for to be opened on the 9th of September.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineers, Givan & Pearce, Sacramento. Owners, San Joaquin Co. Plans have been prepared by Engineers Givan & Pearce of Sacramento for reinforced concrete bridge over Mormon channel at San Joaquin street. The structure will be 260 feet long and will be built in six 53 1-3 foot spans. **SANTA ROSA, SONOMA CO., CAL.**—Retaining wall and bridges reinforced concrete. Cost not stated. Engineer, County Surveyor, Santa Rosa. Owners, Sonoma county. Plans have been completed and bids will be opened on September 16th by the Board of Supervisors for the construction of a reinforced concrete retaining wall located on the county road near Glen Ellen, and for two reinforced concrete bridges, located respectively on the county road near Grippi, and on the county road near Two Rock. Plans and specifications can be secured from the County Clerk.

**CRESCENT CITY, DEL NORTE CO., CAL.**—Bridge steel and concrete. Cost not stated. Engineer, County Surveyor H. Malpas, Crescent City. Owners, Del Norte county. Plans and figures will be opened on September 13th by the Board of Supervisors for the construction of a Pratt Combination type bridge of 120 foot span, 14 foot clear roadway, and a 90 foot approach and all grading necessary to reach approaches. Bents and piers to be of driven piling. Plans and specifications together with complete information may be had by addressing the County Surveyor at Crescent City.

**SACRAMENTO, CAL.**—Trestle, timber and steel, \$31,000. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. The Board of Supervisors of Sacramento county has entered into an agreement with the Natomas Consolidated, whereby a trestle will be constructed from the 12th street bridge to Reclamation District No. 1000. The county will pay one-half of the \$17,000 and the Natomas Consolidated will pay the other half.

**SAN JOSE, SANTA CLARA CO., CAL.**—By-pass, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. The county Supervisors have approved plans and specifications for the improvement of the Canoes by-pass and will receive bids on the work until September 7th, at 11 a. m. Plans

and specifications, together with full information may be had from the county surveyor at San Jose.

**OAKLAND, CAL.**—Timber trestle. Cost not stated. Engineer, County Surveyor, Oakland. Owner, Alameda County. Plans and specifications have been completed and approved and bids will be opened on August 30th by the Board of Supervisors for constructing a timber trestle and the necessary grading for the waterway and for footings, on the main county road from Alvarado to Centerville or County Road No. 544 all in Washington Road District, Washington Township. Plans and specifications can be secured from the Clerk of the Board of Supervisors.

**VENTURA, VENTURA CO., CAL.**—Bridge, steel and timber. Cost not stated. Engineer, County Surveyor Ventura. Owners, Ventura county. The Supervisors have instructed the county surveyor to prepare plans and specifications for the construction of a wood and steel bridge across the Ventura river at Foster Park, giving entrance to the Park and to the Casitas and Santa Ana sections. On completion of plans bids will be called.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. The County Supervisors have approved plans and specifications for the construction of a reinforced concrete culvert across the gulch on Bay Point to Richmond road, and the clerk has been instructed to advertise for bids which will be opened September 13th, 11 a. m. Further information can be had from the county surveyor.

**SALINAS, MONTEREY CO., CAL.**—Bridge and protection work. \$75,000 and \$15,000. Engineer, County Surveyor, Salinas. Owners, Monterey county. At the next meeting of the Supervisors the County Engineer will present plans and specifications for the new steel highway bridge and protection work near King City. The highway Commission has already approved the plans for the bridge which will be the longest and most expensive in the county of Monterey. If constructed in accordance with the present plans, the structure will cost \$75,000, and will be 2,800 feet in length. The protection work will cost in the neighborhood of \$15,000. Further particulars will be given when the plans have been approved by the County Supervisors.

**OROVILLE, BUTTE CO., CAL.**—Bridges, 16 steel, reinforced concrete and timber. \$22,000. Engineer, County Surveyor, Oroville. Owners, Butte County. The Board of Supervisors has ordered the construction of 16 bridges in Butte County, the total cost to be about \$22,000. Bids will be opened on September 1st. Ten of the bridges will be on the State highway between Nelson and Butte Creek. Eight of the ten bridges will range from 20 to 120 feet in length the total cost to be \$12,000, and one bid will cover the work on all of the eight. Of the remaining two, one will be 100 feet long across the North Channel of Butte creek, and the other, 40 feet in length, will be built across Burham Slough. The two structures will cost \$4,500.

Of the remaining six structures, five will be small bridges in different road districts, the total cost to be \$2,500. The other will be a large structure to cost \$3,000, across Pine Creek near the Cana road. Plans and specifications can be secured from the County Surveyor.

An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are now being prepared.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$5,000. Architects, Alvan J. Bros., Delcor Bldg. Oakland, and J. W. Marshall. The dwelling will be erected in Forest Hill and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine and hardwood veneer with white enamel in the bed rooms. Plans provide for furnace heat and open fire places. Man-

alls will be of tile and brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Bungalow, 1 story and base, frame, \$2,500. Architect, Joseph Losekann, San Joaquin Bldg., Stockton. Owner, Charles De Young, 236 East Anderson street. The dwelling has been designed for a six room house with bath and sleeping porch. Interior will be finished in pine and redwood with some elm panels and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place and tile mantel. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Bungalow 1½ story and base, frame, \$2,500. Architect, Franklin Warner, San Joaquin Bldg., Stockton. Owner, Harry McIsaacs, 231 South East street. The dwelling will be erected on Magnolia and has been designed to contain six rooms and bath, with a large sleeping porch. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are now being prepared.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Bungalow 1½ story and base, frame, \$2,500. Architect, Franklin Warner, San Joaquin Bldg., Stockton. Owner, J. Edward Madden. The dwelling will be erected in Yosemite Terrace, and has been designed for a six room house with bath and sleeping porch. Interior finish will be of pine and white enamel. Hardwood floors will be used in the living and dining rooms. An open fire place and tile or brick mantel will be used in the living room. Plans provide for an automatic water heater. The wainscot will be used in the bathroom. Exterior of the house will be covered with rustic. Plans are complete and a contract will be awarded shortly.

**SAN FRANCISCO**—Residence and store, 2 and 4 story frame, \$15,000. Architect, H. C. Baumann, Chronicle Bldg., S. F. Owner, S. F. Lehrke. The building will be erected at the corner of Connecticut and 18th streets and will contain a store on the first floor and a large residence above. The rear portion will be virtually a four story structure owing to the grade of the lot. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Patent store fronts are specified. Exterior will be covered with cement plaster on metal lath. Plans are complete and a contract will be awarded this week.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, James P. Fletcher, Russ Bldg., S. F. The dwelling has been designed for a six room house with bath and sleeping porch and will be erected on 35th avenue near Fulton. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place with brick mantel. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, H. A. Pleitner, 954 Fruitvale avenue, Oakland. The dwelling has been designed for a six room house and will be erected on the north side of Kansas street west of Laurel. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residence, 1 story and base, frame, \$2,000. Architect none. Owner, W. H. Ackerman, Fresno. The dwelling will be erected in the Alta Vista Tract and has been designed for a six room house with bath and sleeping porch. Interior will be finished in pine with elm panels. Some oak floors will be used. There will be an open fire place and tile or brick mantel. Bath room will have imitation tile wainscot. Exterior of the house will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**LOS ANGELES, CAL.**—Residence 2 story and base, frame, Cost not stated. Architect, J. C. Austin, Baker-Detweiler Bldg., L. A. Owner R. D. Collins. The dwelling will be erected on a fifteen acre tract on Washington street near the city limits. There will be ten rooms, three baths, sleeping porch and a separate garage. Interior will be finished in hardwood and white enamel. Hardwood floors will be used in the living rooms, dining rooms and reception hall. Plans provide for furnace heat, a hot water circulating system and vacuum cleaning. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are being taken.

**LOS ANGELES, CAL.**—Residence 2 story and base, hollow tile, \$20,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, J. M. Trumbel. The dwelling has been designed to contain 11 rooms, three baths and sleeping porch. A separate garage will also be erected on the property. Interior of the dwelling will be finished in

pine, hardwood and white enamel. Hardwood floors will be used throughout. There will be a central heating system, open fire places, a hot water circulating system and vacuum cleaning. Bath rooms will be finished in tile. Brick mantels are specified. Exterior of the house will be faced with cement plaster. Plans are complete and figures are now being taken.

Engineer offices in the following cities, Seattle, Washington, Los Angeles, Cal.—E. C. Burgess, Major, Corps of Engineers, U. S. A., general purchasing agent.

### PROPOSALS FOR EARTH WORK.

EARTH WORK.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Framway Building, Denver, Col., until 2 p. m., September 8, 1915, for earthwork on abutment piers of main canal, Ft. Laramie Unit, North Platte Project, Nebraska-Wyoming, involving the excavation of approximately 1,206,000 cubic yards of material. This work is situated near the Bridgeport-Quincy line of the Chicago, Burlington & Quincy Railway in the vicinity of Ft. Laramie, Wyoming. For particulars address the United States Reclamation Service, Washington, D. C., Denver, Colo., or Ft. Laramie, Wyoming. A. F. DAVIS, chief engineer.

### PROPOSAL FOR COURT HOUSE ADDITIONS.

The following resolution was introduced in the Alameda County Board of Supervisors:

Resolved, That the Clerk of this Board, it is for the best interest of the County that an addition be made to the County Court House; now, therefore, be it

Resolved, That an addition be made to the County Court House; that the plans and specifications filed August 9, 1915, be and the same are hereby approved and adopted. Be it further resolved, That the Clerk of this Board give notice in accordance with the provisions of law of said work by publishing the same in the Oakland Equiner and that said notice fix the day for the presentation of bids or proposals for said work as Tuesday, September 7, 1915 at 10 o'clock a. m., at the office of the Clerk of said Board of Supervisors, and that said notice also require that a certified check on some responsible bank accompany said bid for an amount equal to 10 per cent of the amount of the respective bids or proposals, said check to be payable to the Clerk of this Board and to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract for said work is awarded fail to enter into the contract for the performance of said work or fail to give bond required by this Board.

On motion by Supervisor Foss, seconded by Supervisor Heyer, the resolution was adopted by the following vote:

Ayes—Supervisors Foss, Heyer, Kelley, Mullins and Chairman Murphy—5.  
TO CONSTRUCT TRESTLES.

The following resolution was introduced:

Whereas, in the judgment of this Board it is for the best judgment of the County that a timber trestle be constructed and the necessary grading be done for the waterway and for footings on the main county road from Alvarado to Centerville, or County Road No. 541, all in Washington Road District, Washington Township, Alameda County, California. Now, therefore, be it

Resolved, That the plans and specifications filed August 2, 1915, be and the same are hereby approved and adopted. Be it further

Resolved, That the Clerk of this Board give notice in accordance with the provisions of law of said work by publishing the same in the Township Register and that said notice fix the day for the presentation of bids or proposals for said work as Monday, August 30, 1915, at 10 o'clock a. m., at the office of the Clerk of said Board of Supervisors, and that said notice require that a certified check on some responsible bank accompany said bid for an amount equal to 10 per cent of the amount of the respective bids or proposals, said check to be payable to the Clerk of this Board and to be forfeited to the County of Alameda as agreed and liquidated damages, should the party or parties to whom the contract for said work is awarded fail to enter into the contract for the performance of said work or fail to give the bond required by this Board.

Resolved by Supervisor Kelley, seconded by Supervisor Heyer, the resolution

tion was adopted by the following:

Ayes—Supervisors Poss, Hoyer, Kelley, Mullins and Chairman Murphy.

**PROPOSALS FOR CANAL SUPPLIES.**

PANAMA CIRCULAR 945.—Proposals for Steel Transverse Anchors for Pier No. 18, Lime, Rock Salt, Coal Tar, Sal Soda, Sal Ammoniac, Carbon Bisulfide, Muriatic Acid, Lard Oil, Neat's Foot Oil, Lined Oil, Paint and Varnish Remover, Shellac, Varnish, Enamel, Red Lead, Lumber, Coal, Locomotive Black, Paints, Waste Oil, Gas Oil, Bristol Board and Paper. Sealed proposals will be received at the office of the general purchasing officer, The Panama Canal, Washington, D. If any contractor retains said plans and specifications for a period exceeding ten (10) days, then said deposit of Ten (10) Dollars shall be forfeited to the County of Alameda.

No bid will be considered unless accompanied by a certified check payable to the order of Geo. E. Gross, Clerk of the Board of Supervisors, certified by some responsible bank for an amount not less than ten (10) per cent of the aggregate amount of the bid or proposal which it accompanies. Said check to be forfeited to the County of Alameda, as agreed and liquidated damages should the party or parties to whom the contract should be let fail to enter into the contract within ten (10) days after the award or fail to give a bond or bonds for the faithful performance of the contract.

Bidders shall make their bids on the blank forms furnished with the plans and specifications. All blanks in the bid forms shall be completely filled in, giving all proposals asked.

All proposals to be enclosed in sealed envelopes, addressed to the Board of Supervisors, Alameda County, and be endorsed on the envelope, "Bid for the Construction and Completion of the Addition to the Alameda County Court House."

All bids that do not comply with the above provisions in this notice shall be thrown out as informal. The Board of Supervisors reserves the right to reject any bid and all bids or proposals.

Dated August 9, 1915.  
D. MURPHY,  
Chairman of the Board of Supervisors of Alameda County.  
GEO. E. GROSS,  
Clerk of the Board of Supervisors of Alameda County.

Classified according to Location

## SAN FRANCISCO.

**RESIDENCE.**—2 story and base, frame, \$2,500, San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 712 Market street S. F. The dwelling will be erected on the east side of 18th avenue north of Balboa and has been designed for a six room house with bath. Interior will be furnished in pine and elm panels with white enamel in the bed rooms. Hardwood floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. Imitation tile wainscot and floors will be used on the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES.**—4 2 story and base, frame, \$5,000 each, San Francisco. Architect, none. Owner, P. D. Tyler, 1921 Oak street, S. F. These dwellings will be erected on the east side of 11th avenue south of Geary and each has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine elm panels and white enamel. Hardwood floors will be used in the living rooms, dining rooms, and reception halls. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners, who will do the work by Day Labor.

**APARTMENT HOUSE.**—4 story and base, Class C, \$65,000, San Francisco. Architects, Rosseau & Rosseau, 110 Sutter street, S. F. Owners, Girard Investment Co. The building will be erected at the southwest corner of Bush and Jones streets, having a frontage of 77½ feet on each street. There will be a total of thirty suites arranged in two, three and four room apartments with private baths and wall beds. Interior finish will be of pine, hardwood, and white enamel. Hardwood floors will be used in the living and dining room. Plans provide for steam heat, an automatic elevator, oil burning plant and vacuum cleaning. Bath rooms will have tile floors and wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

**APARTMENT HOUSE.**—2 story and base, frame, \$25,000, San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 343 14th avenue, S. F. The building will be erected at the northeast corner of Geary and Palm avenue, cover-

ing an area of 89 by 86 feet and has been designed to contain ten large suites. Interiors will be finished in pine and hardwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Plans provide for steam heat, a hot water system and vacuum cleaning. All bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE.**—3 story and base, frame, Cost not stated, San Francisco. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner's name is withheld. The dwelling has been designed for a nine room house with three baths, sleeping porch and basement garage and will be erected on Washington street near Maple. Interior finish will be of pine, hardwood and white enamel. Hardwood floors are specified in all the principal rooms. Plans provide for furnace heat and open fire places. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the house will be covered with cement plaster. Plans are complete, and figures are being taken.

**RESIDENCE.**—2 story and base, frame, \$2,000, San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. The dwelling will be erected on the west side of 11th avenue south of Balboa and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. The materials are now being purchased.

**RESIDENCE AND STORE.**—2 and 4 story, frame, \$15,000, San Francisco. Architect, H. C. Braumann, Chronicle Bldg., S. F. Owner, S. F. Lehrke. The building will be erected on the corner of Connecticut and 18th streets, and will contain a store on the first floor and a large residence above. The rear portion will be virtually a four story structure owing to the grade of the lot. Interior will be finished in pine and hardwood and with some white enamel. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Patent store fronts are

specified. Exterior will be covered with cement plaster on metal lath. Plans are complete and a contract will be awarded this week.

**RESIDENCE.**—2 story and base, frame, \$3,500, San Francisco. Architect, none. Owner, James P. Fletcher, Russ Bldg., S. F. The dwelling has been designed for six rooms with bath and sleeping porch and will be erected on 35th avenue near Fulton. Interior will be finished in pine and hardwood with white enamel in the bed rooms. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire place with brick mantel. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE.**—3 story and base, frame, \$23,000, San Francisco. Architect, Arthur J. Laib, Russ Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Sacramento street west of Taylor and has been designed to contain five apartments of four rooms and one large six room suite. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living and dining rooms and private entrance halls. There will be steam heat, an oil burning furnace and hot water system. All suites will have wall beds and private baths. Bath rooms will be finished in tile. Marble and tile wainscot is specified for the entrance vestibule. Exterior of the buildings will be covered with rustic and cement plaster. Plans are complete and a contract will be awarded this week.

**FLATS.**—2 story and base, frame, \$5,000, San Francisco. Architect, none. Owner, Emil Nelson, 244 Rivoli street, S. F. Location, Grove, east of Clayton. Will construct two flats finished in pine and elm panels. Hardwood floors, open fire places and tile mantels are specified. Automatic water heaters will be installed. Exterior covered with rustic and cement plaster. Owner will do the work by Day Labor.

**SCHOOL.**—Repairs and addition, frame \$10,000, San Francisco. Architect, State Architect George B. Montgomery, Sacramento. Owner, State of California. Plans have been completed and work will be started by Day Labor at once for extensive alterations to the State Normal School located at Waller street, near Laguna. Complete information can be had by addressing the State Architect.

**HOTEL AND STORE.** 3 story and base, frame, \$10,000, San Francisco. Architect, Charles E. J. Rogers, Kohl Bldg., S. F. Owner, Frank M. Sconover, 5 Montgomery street. Location

Mission, between 17th and 18th, covering an area 25 by 90 feet. Interior finish pine, bath room, imitation tile. Patent store fronts and steam heat to be installed. Exterior covered with rustic and shiplap. Plans complete and contract to be let at once.
